The Picture of the Year

A Preface to the 13th Annual Production Review

THE YEAR OF TELSTAR, the Seattle World's Fair and of expanding international film utilization and understanding provides a stirring prologue to the events of 1963. The New York World's Fair of 1964-65 lies just ahead, with plans already maturing for still more exciting applications of sight-sound techniques by exhibitors.

1962 was the year of the U.S. Department of Agriculture's 100th birthday observance and 20 factual films were honored at that Department's historic Centennial Film Festival on November 7th. Secretary Orville Freeman keyed that event with this phrase:

"More pictures and fewer words would bring more information about our nation's farm program . . ."

In that eventful November, the Committee on International Non-Theatrical Film Events (CINE) presented producers and sponsors of 42 motion pictures with honors received at 16 international film festivals during the year; inaugurated its own "Golden Eagle" awards.

But the "Show of the Year" was Seattle's "Century 21" Exposition to which this publication devoted a Special Report on the achievements of designers, producers and technicians who contributed the images and sound that made the U.S. Science Exhibit and other noteworthy displays and theaters the mecca of millions who toured those fairgrounds.

The film user demonstrated continued professional concern about improvement of a-v techniques at the annual meeting of the Industrial Audio-Visual Association and at the Third Annual Conference and "Cindy" Awards program of the Industry Film Producers Association.

IFPA cited Kodak's John Flory with the Jay Gordon Memorial Award as factual films' "man of the year" as Major General Arno H. Luehman was its honored guest. Autonetics' president John Moore and the late Dick Powell and Mrs. Powell (June Allyson) were at the head table as IFPA president-elect John Mahon took the gavel of office from Dr. Raymond Fielding.

Business films of the U.S. participated for the first time at the Third International Industrial Film Festival in Berlin on September 23-27. Thus, the National Association of Manu-

facturers joined such powerful European business organizations as the Federation of British Industries, the Confederation of German Employers Associations and similar European industry hosts in recognizing the urgent need for international exchange and review of business/industrial film technique.

The business of film-making and processing was expanding to meet growing demand for the sight/sound medium. Capital Film Laboratories completed its handsome, ultra-modern facilities in Washington, D.C. and MPO Videotronics divulged bold plans for its large and integrated new film production center, scheduled for 1963 occupancy in Manhattan. Acquiring Dramaturgy, Inc., to expand its show and exhibit facilities during the year, Wilding, Inc., broadened a cooperative arrangement with the E. F. MacDonald Company into the statutory merger announced elsewhere in this issue.

But it was the medium itself which made these events possible at Seattle, Berlin, Washington and elsewhere throughout the globe. *Vital and purposeful pictures* of the year included the life-saving *Breast Self-Examination* which Audio Productions re-created to continue the educational program of the American Cancer Society; the Bell System's highway accident prevention picture, *Anatomy of an Accident*, which brought merited honors to Jerry Fairbanks Productions; note the Parke, Davis & Company's *Better Medicines for a Better World*, for which The Jam Handy Organization received the Bronze Statue and Gold Medal awards at the Turin, Italy, Film Festival.

Pan American Airways continued its resultful film program with *Don't Hesitate to Ask* and *Strangers in Paradise* (honored at Berlin), and produced by Henry Strauss & Company; titles like *Wire for Sound*, *Answer for Linda*; *From Generation to Generation*; *Color Collage*; *The Question Tree* and hundreds of others brought screen results to their sponsors and deserved tribute to their creative producers.

The past is prologue. The key to film success lies within the detailed listings of over 425 specializing film companies within the U.S. and abroad which begin on page 109 of this issue, and in the services of sponsored film distributors and writers listed in these pages.

ARRIFLEX at work — ONE OF A SERIES *

Extreme close-ups of tiny soldering operations put startling dramatic punch into the instructional film, "On Solder," which demonstrates proper soldering techniques in a way never before depicted on the screen. Produced by Scope Film Associates, the film has won the American Film Festival "Blue Ribbon" Award, the Industry Film Producers Association "Cindy" Award and the Chris

Award. Shown above are (left to right): producer-director Ron Hagerthy; electronics technician Chuck Meier; and cameraman Joseph V. Mascelli, editor of the American Cinematographer Manual. Shooting exclusively with an Arriflex 16, Mascelli

ARRIFLEX® gets the prizewinning macro action!

achieved many original and exciting effects in the camera... without any lab-made opticals... including full-screen macro-zoom scenes of a single drop of molten solder and flux flowing like a giant river of lava! You can do that with an Arriflex. Place any combination of optics on the lens mount and see the effect as you film.

No guesswork or special calculation...because the Arriflex

mirror-reflex viewing system eliminates problems of parallax and depth-of-field. Focus and framing are precisely controlled even when the scene is only a half-inch wide. Arriflex... a time-saving, money-saving professional production camera!

From the microscope to the missile range... from spot locations to sound stages... Arriflex professional motion picture cameras are the dominant choice of filmmakers in science, industry, and entertainment. They're lightweight, rugged, tremendously versatile — uniquely suited to a range of applications virtually without limits. Here are some of the features that give Arriflex cameras their remarkable capabilities:

- MIRROR-SHUTTER REFLEX VIEWFINDER • REGISTRATION-PIN FILM MOVEMENT • 21°-DIVERGENCE 3-LENS TURRET • CONTOUR HAND GRIP • FRAMES-PER-SECOND TACHOMETER • COMPLETE ACCESSORY SYSTEM... lenses, standard and special-purpose electric drives, power supplies, time-lapse equipment, film magazines, sound blimps, tripods.

WRITE FOR NEW CATALOG.

*YOU ARE INVITED to send us a description of your special use of Arriflex equipment.

sound!

byron motion pictures

SCREEN

sound

You know the old cliché that "A picture is worth a thousand words." Well, think about this: how much more is a picture worth with words?

When sound was added to the silent screen, the most effective communications medium was born—because the modern sound motion picture stimulates impressions through both eye and ear, capturing almost the entire conscious mind. Today's film producer, to convey his message precisely, demands the most up-to-date and flexible sound recording equipment, manned by skilled craftsmen.

Commissioned by Byron, Westrex designed and built a sound system incorporating the newest features—sliding faders, graphic equalizers, effects filters, high fidelity monitoring—a sound system flexible in its use of $\frac{1}{4}$ inch, 16mm, 17½mm, and 35mm, magnetic and optical. Dubbers and recorders are interlocked for forward and reverse with the finest projectors—voice recording studios, a large mixing theatre—and five complete music and effects libraries on four mediums. Our sound services are under the guidance of one of the country's finest sound engineers, assisted by expert technicians. Of further importance is the fact that our sound studio is integrated with our own motion picture laboratory, assuring complete coordination and control. There is no more flexible facility in the country. There is no finer sound. Hear for yourself!

... CROWDING LEFT... THE SQUEEZE... THE SPIN OUT...

... CAMERA-HELICOPTER ZOOMS IN TO PICK UP DRAMA...

... AND THE DRIVER LIVES TO TELL THE TALE.

Thrills, Spills, Chills...

the most dramatic racing footage ever filmed...

coupled with an entertaining story line about a little old maid school teacher who loves gasoline engines, adds up to "The Adventures of Auntie Kay". For the first time ever, a helicopter was used to film the Grand Prix of the United States... catching the race strategies and maneuvers as they unfolded below with explanations by champion driver Stirling Moss. Conceived, written and produced by Holland-Wegman for the Kendall Refining Company, "The AOAK" covers equally exciting championship events for motorcycles, sports cars and hydro-planes. Result: Nearly 10 million TV viewers in the first few months... and, with a 12 minute tag, a stimulating sales training film.

AWARD COMPETITIONS FOR BUSINESS FILMS

THE AMERICAN FILM FESTIVAL

Sponsored by the Educational
Film Library Association
New York City • May 1-4, 1963

☆ The 1963 American Film Festival, sponsored by the Educational Film Library Association, representing school, university and public libraries, and film libraries throughout the U. S. will be held May 1-4, at the Biltmore Hotel, New York City.

CATEGORIES: 32 major areas of education and information, art and culture, religion and ethics, business and industry, and health and medicine will be offered for final judging by screening groups during the Festival. Elections will have been made by pre-screening juries for final entries.

AWARDS: Blue Ribbon (certificate) Awards to be presented at banquet, Friday, May 3rd. Entries closed on January 25, 1963.

THE 11TH ANNUAL COLUMBUS FILM FESTIVAL AND AWARDS

Sponsored by the
Film Council of Greater Columbus
in association with the
Columbus Area Chamber of Commerce

Awards Screening: Christopher Inn,
September 19, 20, 1963

Chris Award Banquet: Christopher Inn
September 27, 1963

ENTRIES: Film producers and sponsors are invited to enter motion pictures and filmstrips produced in 1960, 1961 and 1962, provided they have not been previously submitted to any Columbus Film Festival. 1963 films are, of course, accepted. Entries (in the categories enumerated below) must be accompanied by 3x5 cards (for preview committees) noting: running time; a brief summary of film content; type of audience intended.

Films are judged by professionals in the various fields. Entry fee per film is \$5 for films up to 1,500 feet; \$7 for films of 1,600 feet or more. Entrant also pays roundtrip postage on films. A flat charge of \$7 covers all feature films (16mm) regardless of length. A flat charge of \$10 for all feature length 35mm prints. (Both U. S. and foreign feature films will be judged in separate category.) An entry fee of \$1.00 is charged for each set of filmstrips entered; the same applies to sets of slides. *Entries accepted beginning January 1st; closing date July 1, 1963.*

CATEGORIES & CHAIRMEN: (Motion pictures and filmstrips should be shipped directly to the following:.) Business & Industry (job training; sales promotion; industrial relations; public relations; and industrial safety): *Galvy Gordon, Columbus Public Library, 96 S. Grant Ave., Columbus 15, Ohio;* Information & Education (classroom instructional films; specialized instructional; general information): *Daniel R. Porter, Ohio Historical Society, Ohio State Museum, Columbus 10, Ohio;* Health & Mental Health (health & hygiene; mental

11TH COLUMBUS FILM FESTIVAL:

health; general medicine; professional health; dental), *Peter A. Volpe, M. D., Director, Regional Hospital Planning, Columbus Hospital Federation, Box 2239, Columbus 16, Ohio;* Travel U. S. & Foreign & Special Fields (arts & crafts, music, experimental, religion): *Feature Films (16 or 35mm, U. S. and foreign), Daniel F. Prugh, Film Council of Greater Columbus, 280 East Broad Street, Columbus 15, Ohio;* General Filmstrip Category, (business, education, health, mental health, travel, U. S. & foreign, fine arts, religion) *Dr. Hazel L. Gibbons, Supervisor, Bureau of Educational Research, Ohio State University, 1988 N. College Rd., Columbus 10, Ohio.*

AWARDS GIVEN: This is the fifth year of the Chris Statuette Award, presented to the outstanding films in each category. Films receiving the Chris Statuette must be voted "best in photography, story value, and technical aspects of production." Chris Certificate Awards are given to motion pictures, filmstrips, and slides considered "finalists" but not receiving the statuette award.

FARM FILM FOUNDATION PROFESSIONAL IMPROVEMENT AWARDS

AWARDS: For the 9th consecutive year, an inscribed certificate and \$500.00 will be given to an active member of the American Association of Agricultural College Editors, who is selected by a committee of three Judges as having made, through work in motion picture production, the most outstanding contribution to the advancement of agriculture, home economics, rural-urban relations, and the public interest during the past two years. Honorable Mention Awards of \$50.00 each may also be given at the discretion of the Judges.

PRESENTATION: The Awards will be presented at a dinner co-sponsored by the Farm Foundation and the Foundation for American Agriculture at the annual meeting of the American Association of Agricultural College Editors scheduled for July 15, 1963 at Oklahoma State University, Stillwater, Oklahoma.

ELIGIBILITY: Any active members of AAACE engaged in some phase of motion picture production are eligible to apply for the Award.

FREEDOMS FOUNDATION AWARDS

Sponsored by the Freedoms Foundation
Valley Forge, Pennsylvania

Closing Date for Entries: November, 1963

CATEGORIES: Consideration is given to all films produced or released during 1963, which are aimed at building a better understanding of the American Way of Life.

AWARDS: A distinguished jury of State Supreme Court jurists and other eminent citizens selects one film for the top award and approximately 10 others for the George Washington Honor Medal recognition. Awards will be announced at Valley Forge on February 22, 1964.

TO NOMINATE: Nomination forms are available from Freedoms Foundation, Inc., at Valley Forge, Pennsylvania.

ANNUAL INDUSTRY FILM PRODUCERS ASSOCIATION AWARDS

IFPA Conference—June 13, 14, 15, 1963
Ambassador Hotel, Los Angeles

ANNUAL AWARDS COMPETITION in recognition of growing number of motion picture units set up for the production of factual films. The purpose of the IFPA awards is to stimulate a constant improvement in efficiency of production, quality of films, and their effective utilization by industry, education, and government. **CATEGORIES:** Public Information; Technical Information; Sales Promotion; Training; Orientation and Indoctrination; Out-Plant Production.

ENTRY INFORMATION: Films may be submitted by any Active IFPA Member. Out-of-plant films produced for an IFPA Active member may be submitted by that member in the Out-Plant Production category. Any film completed for release during the calendar year of 1962 is eligible. Films completed earlier under government security classification, but declassified during 1962 are also eligible. More than one film can be submitted. Entry deadline is March 15, 1963. Entry fee for each film is \$10.00. For additional information write to A. L. Gorsline, IFPA Awards Chairman, c/o Management Systems Corporation, 2043 Westcliff Drive, Newport Beach, California.

INTERNATIONAL FILM FESTIVAL OF NEW YORK CITY

(Held in Conjunction With the
Industrial Film & A-V Exhibition)

The Third International Film Festival of New York is scheduled for October 8, 10, 1963, at the Barbizon-Plaza Hotel, Central Park South, New York City. Industrial and other sponsored films as well as TV commercials are eligible for entry.

CATEGORIES: Business films may be entered in (1) Sales Presentation; (2) Training; (3) Public Relations; (4) Scientific; (5) Educational; (6) Public Service; and (7) Documentary categories. Television commercials are grouped into (1) Live Action; (2) Animation and Puppet; and (3) Live and Animation, and are divided into (a) up to 30 seconds; and (b) over 30 seconds.

AWARDS: Grand Prix is awarded in each of the two primary groups, Business Films and TV Commercials. Each category in these two groups is eligible for First Prize and Special Awards. Special achievement awards are given for contributions in Best Direction, Best Musical Sound Track, Best Special Effects, Best Photography, Best Art Work, etc.

ENTRIES: for entry forms and fees apply to Industrial Exhibitions, Inc., sponsors of the Festival, at 17 East 45th St., New York 17, N. Y. Phone: OXford 7-4978.

(AWARD LISTINGS ARE CONTINUED ON PAGE 14)

We Idolize Service

(THAT'S WHY WE'VE BUILT A NEW PLANT)

We outgrew our old quarters. The new plant offers the most modern facilities obtainable anywhere. No color job will be beyond us, no technical problem *too* technical. This is the world's newest, most modern film processing plant—and we're delighted to say "at your service."

FILM AWARD COMPETITIONS

THE 21ST ANNUAL NATIONAL SAFETY FILM CONTEST

Sponsored by the National Committee on Films for Safety

(Entries close February 15, 1964)

ELIGIBLE FILMS: All motion pictures and sound slidefilms produced or released during 1963 whose primary objectives are safety or which have important accident prevention sequences.

CATEGORIES: Motion pictures, theatrical and non-theatrical (16mm) in each of four fields: 1. Occupational. 2. Home. 3. Traffic and transportation. 4. General. Sound slidefilms are judged separately, as are television short subjects and TV spots.

AWARDS: Bronze Plaques will be awarded to top winners in each of the four fields and to top sound slidefilms. Award of Merit Certificates will be given to other films for special reasons of subject treatment, production excellence and or unusual contribution to safety. At the discretion of the judges, awards may be given separately for "instruction-teaching" and for "inspirational" purpose films.

PRESENTATION: Films winning the Bronze Plaque will be shown in October during the National Safety Congress and Exposition in Chicago, Ill. Plaques will be presented at that time to representatives of sponsors of these films by the Committee's chairman. Certificate of Merit winners will receive their awards after the final judging which is in April. All winners will be notified immediately after the judging.

INFORMATION ON AWARDS PROGRAM: Write to William Englander, Secretary, National Committee on Films for Safety, 425 North Michigan Avenue, Chicago 11, Illinois.

11TH ANNUAL AWARDS COMPETITION of the

NATIONAL VISUAL PRESENTATION ASSN.

Entries close April 29, 1963

The National Visual Presentation Association annually sponsors a National Visual Presentation Awards Competition, presenting awards to audio and visual presentations contending for its "Best Visuals" citations in various categories noted. All entries and blanks must reach the committee no later than Monday, April 29th, 1963.

The National Visual Presentation Awards Competition is a major feature of the 11th Day of Visuals, to be held June 4th, 5th and 6th, at the Hotel Commodore in New York. Also featured will be 3 days of seminars on visual presentation subjects and an audio-visual trade show. Winners of the National Awards Competition will receive their awards at NVPA's Day of Visuals banquet on June 5th.

TYPES OF VISUALS ELIGIBLE: For the purpose of this competition, visuals are defined as:

NAT'L VISUAL PRESENTATION AWARDS:

(1) motion pictures, (2) filmstrips and slide programs with recorded sound, (3) slides and overhead projector transparency programs, and (4) flannel board, flip chart and other non-projected visual presentations. This excludes point-of-purchase displays, pamphlets and conventional-type "reading matter."

COMPETITION CATEGORIES: (1) General Public Service, (2) Sponsored Educational, (3) Employee Relations, (4) Employee Training, (5) Sales Training, (6) Industrial Sales and Sales Promotion, and (7) Consumer Sales and Sales Promotion.

JUDGING: Judging will be based primarily on how successful the visual accomplished the communication job it was designed to do. A point system will be used.

FOR INFORMATION: Write M. E. Schack, National Visual Presentation Association, 19 West 44th Street, New York 36, New York.

SAN FRANCISCO INTERNATIONAL FILM FESTIVAL

(Film As Communication Section)

October 30-November 12, 1963

CATEGORIES: I. Art and Culture, (relating to subject matter); II. Industrial, Government and Institutional Films for Internal Use; III. Government Films for General Information to the Public; IV. Films Sponsored by Industry, Companies or Other Commercial Institutions for the General Public; V. Films Sponsored by Civic and Community Organizations or Other Non-Profit Institutions for Public Use; VI. Classroom Films (primary and elementary schools); VII. Classroom Films (secondary schools and colleges); VIII. Continuing Education (graduate, technical, training and other instructional).

ENTRY INFORMATION: Application blanks to be sent in April; receipt of forms deadline is August 1, 1963. Only 16mm release prints will be accepted but original gauge may be another. Film As Communication Final Screenings and Conference will be held Wednesday, November 6 through Friday, November 8. The general Festival dates are October 30-November 12, 1963. Requests for application blanks and additional information should be directed to: San Francisco International Film Festival, Film As Communication, 172 Golden Gate Avenue, San Francisco 2, California.

CREATIVE-EXPERIMENTAL FILMS, previously included in Film as Communication category, will be placed in separate competition this year. Titled "Film as Art," the new section will be devoted entirely to experimental films. Participation of independent film makers is encouraged; entries will be judged on the basis of original contributions to the film medium.

Awards for Television Commercials Are Detailed on Following Page Sixteen

"Selective Audiences" replace mere numbers with real people

Developing selective audiences for public-relations films is a challenge that a progressive distributor must accept.

Selective audiences are a product of our belief that the bland assortment of audiences in too many of today's distribution programs are not doing the job they should do for the film sponsor.

The obligation to do this job properly lies with the distributor. The goal he should strike at is not the vague assortment of adult and school audiences, so common today, but a *precise* selection of audiences that aims at the sponsor's range of *immediate* interests.

"Selective Audiences" are not just the heady stuff that shop talk is made of. Our sales consultants offer these precise distribution programs as part of our standard services, and they wind up being spelled out in our contracts every day.

We hold that these programs are the most advanced in the industry. They give the sponsor a high return on his distribution investment and equally important to sponsor and producer, they add a clear measure of extra value to the already proved function of public-relations films.

If you'd like more information about "selective" film distribution, we'll be glad to get in touch with you. Just call or write any of the Sterling Movies U.S.A. sales consultants below.

FILM AWARDS

THE FOURTH ANNUAL AMERICAN TV COMMERCIALS FESTIVAL

New York City,—May 24, 1963
Chicago, Toronto, Dallas, Los Angeles,
and Other Cities—May & June, 1963

ELIGIBILITY: Open to commercials shown nationally, regionally or locally on television in the U. S. and Canada during the period March 1, 1962 through March 1, 1963, except winners in last year's American Festival. Deadline for entries was February 15th, 1963.
CATEGORIES: Thirty product classifications, (i.e., automobiles, cigarettes, etc.).

COMMERCIALS' CLASSICS: Special category for all-time outstanding commercials. First air date must have been during or before 1958. Judged on longevity, productiveness in sales, memorability, influence on later techniques, awards received, etc. Winners to be added to past year's selection in Hall of Fame.

JUDGING: Judging will be handled by five Regional Commercials Councils of prominent advertising executives. *Criteria:* impact, believability, tastefulness, copy demonstration, identification, remembrance, audience involvement, entertainment values, plus TV technique.

AWARDS: Top 150 Commercials; Best of Product Category awards; special citations for Advertising Achievement; special citations for Craftsmanship.

INFORMATION: 16mm Reel of winners available from Wallace A. Ross, Director, American TV Commercials Festival, 40 East 49th Street, New York 17, N. Y. Phone: ELdorado 5-5877.

FOURTH ANNUAL INTERNATIONAL BROADCASTING AWARDS COMPETITION

Sponsored by the Hollywood Advertising Club

★ IBA awards to be presented during February, 1964 at the Hollywood Palladium, Hollywood, California for the world's best television and radio commercials broadcast during 1963.

ELIGIBILITY: Open to any company or individual engaged in creating or producing broadcast advertising. For television commercials broadcast internationally, nationally, regionally or locally between December 1, 1962 and December 1, 1963. Deadline for entries: December 15, 1963.

CATEGORIES: Fourteen television and eight radio categories, including: Live Action; Animation; Combination; Stop Motion; Video Tape; ID's; Local; Program Integrated; Humorous; Public Service; Series, etc.

JUDGING: Preliminary judging held in five production centers: London, Toronto, New York, Chicago and Hollywood. More may be added. Final judging by outstanding panel of industry professionals, held in Hollywood.

INFORMATION: General Chairman, International Broadcasting Awards, Hollywood Advertising Club, 6362 Hollywood Boulevard, Hollywood 28, California. Phone HO. 5-1183. (AWARD LISTINGS ARE CONTINUED ON PAGE 18)

**Shake his hand.
Open the box.
Plug it in.
Let 'er roll.**

Revolutionary projector sells your product anywhere. In sound and color. In broad daylight. Sets up in 10 seconds—and repeats automatically. Let us demonstrate:

Technically, the Fairchild 400 is an 8mm rear screen sound movie projector. It works more like a TV set, except you don't have to fuss with the focus.

The Fairchild weighs less than a portable typewriter and takes up less than 2 sq. ft.—wide open.

It shows up to 20 minutes' worth of color sound film. Requires no warm-up. Takes just 10 seconds to set up, plug in and turn on. *On is when it counts.*

You can demonstrate snow removal in July, a turbo-prop on a desktop or review a year's research in a minute. Take your customer on a field trip, a test run, or a tour of the plant. Right where he signs the orders.

When the commercial's over, the Fairchild's ready to repeat, automatically, up to 3000 times per print.

As we said, the Fairchild is an 8mm machine—the most reliable and modern ever made—but any 16mm or 35mm film can be quickly and easily reduced to 8, sound and all.

Thousands of Fairchild 400s have gone into use in the first 12 months. They're helping salesmen multiply sales of

automobiles, building materials, tractors, staplers, bowling alleys and brassieres. They're converting par salesmen into crackerjacks. Demonstrating product advantages everywhere. Concisely. Dramatically. If you have a product the Fairchild might help, clip the coupon. We'll rush one over and plug it in.

INTERNATIONAL AWARD COMPETITION

THE 10TH INTERNATIONAL ADVERTISING FILM FESTIVAL

Connes, France—June 17-27, 1963
Sponsored by the Screen Advertising
World Association Ltd.

MANAGEMENT COMMITTEE: The Joint Executive Committee, consisting of officers of the above mentioned Association, is fully responsible for all policy matters in relation to the Festival Organization. Categories and awards are planned by these representatives of the sponsoring Association. Festival Director: Mr. Peter E. Taylor, Head Office, International Advertising Film Festival, 17, Berkeley Street, London W. 1, England. Phone: GROsvenor 147112.

ENTRY DATE & CATEGORIES: Entry forms issued from London Office during March. Closing dates: for completed entry forms — April 30th, for delivery of films to Venice — May 12th. Contact in United States, Alexander International, 500 Fifth Avenue, New York 36, New York.

CATEGORY MODIFICATION: a new category in the Cinema Group will serve "Special Effects" subjects of the 13-110 metres length. In the Television Group, subdivisions in running time for three categories each for Live Action, Cartoon and Animated Objects (including Puppets, etc.) will be as follows: (a) up to 20 seconds; (b) 21-45 seconds; and (c) over 45 seconds.

AWARDS: Special awards will include besides the Grand Prix du Cinema and the Grand Prix de la Television, the *Coppa di Venezia* which will be awarded in each of the Cinema and Television groups for the highest average of marks attained for a minimum entry of six films in the one or the other group.

JURY: An International Jury headed by Dr. J. Klein, Amsterdam (as secretary) and Per Busted, Oslo, Norway (assistant secretary) has been selected to judge motion pictures entered. Members of the various international and national advertising associations and federations compose this judging group.

THE 15TH ANNUAL COMPETITION OF THE CANADIAN FILM AWARDS

Sponsored Jointly by
The Canadian Association for Adult Education,
The Canadian Film Institute,
The Canada Foundation

MANAGEMENT COMMITTEE: Consists of representatives from each of the sponsoring organizations plus technical advisers, who are associated with the film making industry in Canada. Roy Little, *Chairman*, Canadian Film Awards, 1762 Carling Avenue, Ottawa 13, Ontario.

CATEGORIES: Awards will be given for films produced for TV in two categories, fictional and documentary, and for filmed TV commercials. Other categories are: Theatrical, shorts and features; Non-theatrical, arts and experiment, children's, general information, public relations, sales and promotion, training and

15TH CANADIAN FILM AWARDS:

instruction, travel and recreation, amateur. New award for Cinematography to be presented by Canadian Society of Cinematographers. Films released during 1962 by Canadian film producers are eligible for award. Entries closed January 31, 1963.

AWARDS: Amateur Trophy of the Association of Motion Picture Producers and Laboratories of Canada, the Award for the Canadian Film of the Year, an Award of Merit for each category.

CINE

THE COMMITTEE ON INTERNATIONAL NON-THEATRICAL EVENTS

(Processing United States Entries
in International Film Festivals)

OFFICE (of the Coordinator): 1201 Sixteenth Street, N. W., Washington 6, D. C.

OFFICERS: John Flory (Eastman Kodak Co.), *National Chairman*; James A. Barker (Capital Film Laboratories, Inc.), *First Vice-Chairman*; Charles Dana Bennett (Farm Film Foundation); Brice Howard (National Educational Television & Radio Center); Ralph Hoy (Aluminum Company of America); Anna L. Hyer (National Education Association); Stanley McIntosh (Teaching Film Custodians, Inc.); *Vice-Chairmen*, Harold E. Wigren (National Education Association), *Coordinator*.

OTHER TRUSTEES: Eyre Branch (Standard Oil Co., New Jersey, retired); Otto H. Coelln (Business Screen Magazine); Ralph P. Creer (American Medical Association); Robert Disraeli (American Jewish Committee); Kirby Grant (Actor-Director); Carolyn Guss (Indiana University); Emily S. Jones (Educational Film Library Association); Alden Livingston (E. I. duPont de Nemours & Co., Inc.); The Rev. Michael Mullen, C. M. (St. Johns University); Edward Oglesby (State of Virginia); Willis H. Pratt, Jr. (American Telephone & Telegraph Co.); Reid H. Ray (Reid H. Ray Film Industries); Frank Rollins (E. R. Squibb & Sons); Randall Whaley (Wayne State University); Janet R. Wilkins (National Association of Manufacturers); Willard Webb (American Science Film Association); and Don G. Williams (University of Kansas City). Note: the above serve not as representatives of their organizations, but as individuals.

PURPOSE: CINE is a voluntary organization established to coordinate the selection of U. S. non-theatrical motion pictures, other than those produced by the United States Government, for submissions to foreign film festivals.

1963 ACTIVITIES: Selection of U. S. non-theatrical films for entry in the following festivals is being handled by CINE: Berlin International Film Festival; Berlin International Agricultural Film Competition; Padua International Exhibition of the Scientific-Didactic Film; Valencia Music and Dance Motion Picture Contest; Vancouver International Film Festival; Venice International Film Festival; (LISTING IS CONCLUDED ON PAGE TWENTY)

Technical pictures don't have to be too technical. Technicians are also *people*. Their worlds are complex ones, but the technical motion pictures they seem to prefer are the ones which are clear, interesting and well executed, as well as being accurate and informative. Put yourself in an audience with upper-case technicians and you couldn't tell a biochemist from your neighbor next-door. Technical groups want motion pictures on technical subjects to be, in the first, second and third place, good motion pictures.

If preferred, feature-length documentaries may be entered in above categories. (D) Children's Films: feature, entertainment or educational.

AWARDS: A festival certificate will be presented to all producers of films selected for showing at the Festival. Plaques will be presented to winning entries in categories B, C, and D. Special Diplomas will be presented winners in each section of categories C & D. Additional certificates of merit may be awarded at the discretion of the judges.

FOR INFORMATION: write, Vancouver International Film Festival, Queen Elizabeth Theatre, Vancouver 3, British Columbia, Canada.

VENICE INTERNATIONAL EXHIBITION OF CINEMATOGRAPHIC ART

Venice, Italy—1963

CATEGORIES: Scientific, cultural, educational and entertainment documentary; children's; scientific-didactic, at the University of Padua.

ENTRY INFORMATION: Selection of U. S. films for entry in the Venice Festivals is being handled by the Committee on International Non-Theatrical Events (CINE), formed for the purpose of coordinating U. S. entries in overseas Film Festivals. For complete entry data and instructions, contact Harold E. Wigren, Administrative Coordinator, CINE, c/o NEA, 1201 Sixteenth Street, N. W., Washington 6.

THE FOURTH INTERNATIONAL INDUSTRIAL FILM FESTIVAL & AWARDS

Sponsored by the Council of European Industrial Federations

Madrid, Spain—September, 1963

CATEGORIES: (a) General "public" motion pictures of industrial, economic or social interest; or on specific industrial products, materials or projects to enhance prestige. (b) "Specialist" audience subjects, i.e. films on administrative and technical methods for increasing productivity, efficiency or output. Films on marketing or sales techniques are also in this group. (c) "Specialist" audiences, including schools: films on scientific principles and research; their application within industry. (d) Industrial audience subjects, dealing with human factors in industry, i.e. training of management and work force; prevention of industrial accidents and disease; health and welfare of employees, etc.

ENTRY INFORMATION: At the 3rd International Festival, held September 23-27th in West Berlin, 14 countries of Western Europe and the United States competed. Films are selected by delegated committees within participating countries, usually sponsor representative associations. U. S. entries (approximately 15 films may be submitted) are forwarded by the National Association of Manufacturers.

E. F. MacDonald, Wilding, Inc. Agree on a Statutory Merger

☆ Agreement for a statutory merger of The E. F. MacDonald Company, Dayton, Ohio and Wilding, Inc., Chicago-based communications company has been reached, subject to approval of shareholders of both companies. The proposed merger was announced in February by Elton F. MacDonald, Chairman of the MacDonald board and H. Williams Hanmer, President of Wilding.

The MacDonald Company is the largest and oldest firm in the field

Freedoms Foundation Award to Weirton Steel, American Legion

☆ The Weirton Steel Company, Weirton, West Virginia and the American Legion's Department of West Virginia shared the principal Motion Picture Award of the Freedoms Foundation this year.

The two organizations received the honor at special Valley Forge, Pa. ceremonies on February 22nd for their film, *Men of Tomorrow*, which shows outstanding high school juniors proving they are men of tomorrow as they attend Boy's State.

Honor Medal Awards of the Foundation also went to the New Holland Machine Company for its film, *Food, Famine and Farmer Brown* and to Coronet Instructional Films for the motion picture, *The Boyhood of Abraham Lincoln*. The William Volker Fund of Burlingame, California, also received an Honor Medal for its film, *The Ultimate Weapon*, distributed by Modern Talking Picture Service, Inc.

Other "visual" awards were given numerous television programs on film, including shows sponsored by the Aluminum Company of America, American Motors, the American Savings and Loan Association and the Chevrolet Division of General Motors.

H. Williams Hanmer,
 President of Wilding, Inc.

of merchandise and travel incentives. Recognized as an innovator in the field of motivational programs for salesmen, the Dayton firm recently expanded services to include consumer incentives through its Plaid Stamp subsidiary.

It is a worldwide organization, operating offices in Canada, Mexico, Great Britain, West Germany, France, Italy, Belgium, The Netherlands, Switzerland and Australia as well as the U. S.

Wilding, Inc. began operations in 1914; was incorporated in 1927. A leading creator of media for management communications, the company specializes in marketing, training and the public relations fields. The joint program extends a previous arrangement in making available the joint services of both companies as a single source for merchandise and travel incentive programs, complete convention

SOLUTION TO COMMUNICATION CROSSWORD

If you've had a problem with this puzzle . . . or if you have any puzzling communication problems . . . Wilding, Inc. has the answers!

New Color Lab for Douglas Film Industries in Chicago

☆ Chicago now has its first 35mm 16mm negative positive color laboratory. A new 35mm and 16mm Eastman negative positive color printing and processing department, which includes ultra sonic cleaning, has been announced by Douglas Film Industries, 10 W. Kinzie Street, Chicago.

The company offers 24-hour service developing color negatives and furnishing answer prints in addition to its other complete 35mm 16mm laboratory services. ☐

CINE Plans to Enter More International Festivals in 1963

Trustees of the Committee on International Nontheatrical (Film) Events look forward to U. S. participation in more international events this year than in 1962.

Already official invitations of participation have come from four - Berlin, Cannes, Cortina, and Melbourne. The CINE executive committee has approved these four.

A fifth one just added is the Festival and Seminar on Films on Art in Ottawa, Canada. Others in which U. S. films will probably participate, via CINE, include Buenos Aires, Berlin Agriculture, Brussels, Edinburgh, LaPlata (Argentina), Lebanon, Valencia, Vancouver and those at Venice (documentary, children's, golden mercury, and Padua). ☐

Gerrie Acquires All Stock of the R. G. Wolff Studios

William S. Gerrie, electrical engineer of Toronto, Canada, has acquired all stock in the Raphael G. Wolff Studios, Inc., pioneer Hollywood producers of industrial and business films, it was announced today by the company's founder, Raphael G. Wolff. The transaction finalized an arrangement begun in December 1961, when Gerrie obtained operating control of the studios from Wolff.

The company has been producing business, industrial, public relations and training motion pictures since 1931 and under Wolff's aegis has listed among its clients virtually every major industry in the United States. It pioneered many technical and story-telling innovations in the 16mm film which today have become standard practices.

Wolff will remain in the industry as a business film consultant and on March 4 opens his own office at 2325 E. Glenoaks Blvd., Glen-

dale, California, with the Wolff Studios among his clients. ☐

Robert Abrams Named General Chairman of NAVA Convention

Robert P. Abrams, vice president of Williams, Brown & Earle, Inc., Philadelphia, has been named general chairman of the 23rd annual National Audio-Visual convention, July 20-23 at the Sherman Hotel, Chicago. Abrams is presently serving as NAVA first vice-president.

Harold A. Fischer, president of NAVA, sponsor of the annual event, estimates that the convention will attract a record 3,500 delegates from all areas of the instructional aids community.

During recent years, approximately one-third of the attendance has been made up of film producers, equipment manufacturers, trade publishers, and national distributors; about one-third of the delegates has been audio-visual dealers; and the remaining third of the registration has been A-V users, including educators, industrial training directors, religious instructors, government representatives and merchandising businessmen. Last year's registration was 3,319.

Featured during this largest single gathering of A-V people will be a 250-booth trade show, the National Aud'o-Visual Exhibit, which will occupy the entire mezzanine floor of the Sherman House. Billed as the "Biggest A-V Show on Earth", on display will be all of the latest products of the audio-visual industry.

Information on the NAVA Exhibit, including particulars on booth space, is available from National Audio-Visual Association, 1201 Spring Street, Fairfax, Va., phone area code 703, number 273-7200. ☐

A. M. Wertheimer Appointed PMDA Midwest Vice-President

Adolph M. Wertheimer has been elected first vice president for the midwest area of the Photographic Manufacturers and Distributors Association, it was announced by Donald M. Foyer, executive director of the Association.

Wertheimer, president of Radiant Manufacturing Corp., Morton Grove, Ill., world marketers of projection screens for home, school and industry, has been an active member within the association for many years, and recently celebrated his 25th anniversary in the photographic industry. ☐

where will your next prospect be

... out in the barn ... in the office ... the factory ... or on a convention floor? Wherever he is you can picture the solution in the best selling atmosphere, next to his problems, with the versatile single-case Moviematic repeater 16mm projector. With Moviematic you're not selling in the dark: you can watch your prospect's expression as your sales points are made on film ... see what piques his interest ... then close the sale on the spot. How? The Moviematic projects on its own built-in screen under daylight conditions. OR, for large-group showings, the Moviematic projects on a remote screen. How about operation? Just plug it in! Film is already in the projector ready to show. That's because the last time you showed it, the film was rewinding itself getting ready for this time. No rethreading or rewinding. Moviematic is versatile, too, because it can show any of your present 16mm optical sound films. No expensive new productions or alterations required. And, it will show anyone else's 16mm films as well. You can purchase, lease or lease-to-buy ... long term or short. Ask your Kalart, Victor dealer or write:

COMMUNICATIONS IN MOTION

OUR FILM SCOPE... **UNLIMITED**

ASSIGNMENT the WORLD

With an openness to knowledge, we have assumed responsibility to our clients who have multiplied and diversified throughout the years. Coupled with our accomplishments, the horizon of our company activities has expanded to global proportions.

We have established a flexibility that has taken our activities from Zamboanga to Atlantic City and has included scenes filmed in the Sulu Sea and in the bush of Africa. Our cameras have seen the Inland Empire at harvest time and have flown above the 6th Fleet in the Mediterranean.

Responsibility, integrity, plus dependability have been important factors in the more than half a century of continuous production leadership. A priceless heritage has been established.

Acmade Foot-Operated Splicer

with Tungsten
Tipped Blades

Combination
16mm-35mm
Model

\$1495

This splicer is constructed, as is usual with ACMADE products, of the finest materials and workmanship. All castings are of the best quality and the top body and cutter arms are seasoned to prevent distortion after machining. The machining is carried out to limits of $\pm .0005"$ in order that the cutter blades shall close in a dead parallel manner. The cutter blades are made from stainless steel with Tungsten Carbide inserts, and afterwards ground lapped and polished to a limit of $\pm .0002"$ thickness and the cutting edges relieved by $1"$. The Tungsten Carbide inserts will have indefinite life and will not require sharpening as with other types. A heater unit is installed in the top body of the machine. The top light in a well glass fitting is attached to the body of the machine and also an inspection light in the waste bin together with cement bottle and brush. A scraper block is supplied and also a scraper block setting jib and support shelf rubber-covered. The whole machine is finished in first quality grey hammer and all metal parts other than cutter blades are hard flash chromed.

ACMADE MARK II EDITING TABLE

AUTOMATIC BUTT SPLICER

Cuts, Splices, Applies
Magic Mylar Automatically!

Now, with no fuss, mess or waste, it is possible to splice, repair, butt-splice, or strengthen splices on all types of film—positive, negative, magnetic — even duPont Cronar or other bases.

The cutting arm, shown in operating position, is used by pressing the chrome button for cutting both sides of the film simultaneously.

The film, has been registered on pins in the horizontal channel. The cutting blade is easily replaced.

The splicing tape is registered on precision pins and held in place until automatically applied to the film by swinging the arm over and pressing the chrome button, cutting the adhesive and applying it — in perfect register to the film.

**THE ASSOCIATION
OF MOTION PICTURE PRODUCERS
AND LABORATORIES OF CANADA**

OFFICES (of the President): 38 Yorkville Ave., Toronto, Ontario. (Of the Executive Secretary): Suite 1301, 55 York Street, Toronto 1, Ontario, Canada.

OFFICERS: John T. Ross (Robert Lawrence Productions (Canada) Ltd., *President*; C. H. Everett (Crawley Films Limited, Ottawa), *First Vice-President*; S. Dean Peterson (Peterson Productions, Limited, Toronto), *Second Vice-President*; Henry Michaud (Omega Productions, Inc., Montreal), *Past President*; Frank A. Young, *Executive Secretary*.

DIRECTORS: Sydney Banks (S. Banks Ltd., Toronto); R. J. Beaudry (Pathe-DeLuxe of Canada Limited, Toronto); E. W. Hamilton (Trans-Canada Films Ltd., Vancouver); Hugh Moreland (Moreland-Latchford Productions, Toronto); Tolly Reviv (Tolea Film Productions, Inc., Ville LaSalle); A. T. E. White (Eastern Film Laboratories Ltd., Halifax).

MEMBERSHIP: Canadian firms, proprietorships, partnerships and corporations engaged in motion picture production or laboratory work are eligible for Active Membership. Persons, firms or organizations acceptable to the membership and interested in the furtherance of the motion picture industry in Canada are eligible for Associate Membership. Present membership: 48 Active Members; 11 Associate Members; Total 59.

**Producer and Laboratory
Trade Groups Abroad**

PRODUCERS & LABORATORIES OF CANADA:

PURPOSE: To promote the common interest of those engaged in the motion picture production and laboratory industries in Canada by maintaining the highest possible standards in the production of motion pictures for commercial, theatrical, or television release; to represent the industry in its relations with government, other associations and the public at large; to encourage government agencies to have required films let by tender to private producers.

1963 ACTIVITIES: 1. To continue to press our recommendation that government agencies let an increasing amount of work by tender to private producers and laboratories. 2. To develop public relations program in support of the foregoing. 3. To continue to acquaint industry, advertising agencies, television stations, networks, and other potential sponsors with the work of Canadian film producers. 4. To lend every assistance to the Canadian Film Awards presentations — the All-Canada Showcase — in Montreal on May 10, 1963.

Gulf Oil films explore THE SKY ABOVE AND THE EARTH BELOW

(and the world around us, too!)

This year more than 35 million persons will watch public relations films from Gulf Oil Corporation. Audiences will rocket into space with Astronauts Glenn and Carpenter, follow the trail of "the big inch," tour the Finger Lakes and the Great Smokies, visit with researchers who make the geological past the scientific tomorrow, and learn about a tiny country on a sea of oil.

It's a varied library — informative, interesting, attuned to Gulf's public relations objectives. And, most important to management,

every print, every booking notice, every piece of promotional literature identifies the films as coming from the *Gulf Film Library*. All print servicing, promotion and clerical procedures are handled by Association Films, *in Gulf's name*.

Many of the nation's foremost industries and associations use Association Films, America's first — and most creative — distributor. You can learn about us in "The Viewing Millions," available on request.

EDUCATIONAL AUDIO-VISUAL ORGANIZATIONS

AUDIO-VISUAL COUNCIL ON PUBLIC INFORMATION

OFFICE: 1201 Spring Street, Fairfax Virginia.

OFFICERS: Sam Barefield (TRAVCO), *Chairman*; Scott Mitchell (The Jam Handy Organization), *Vice-Chairman*; Betty Ellingboe (American Lutheran Church), *Secretary*; Alva I. Cox, Jr., (National Council of Churches of Christ in the U. S. A.), *Treasurer*.

PURPOSE: A joint industry-church committee concerned with the improvement of Religious Education through wider and better use of audio-visual materials and methods. It aims to inform constituencies of religious bodies on the significances and advantages of audio-visual materials, through publications, magazine articles and slidesets. A major publication of AVCOPI is *Has It Made Any Difference?*, available from Council office.

THE CANADIAN FILM INSTITUTE

NATIONAL OFFICE: 1762 Carling Avenue, Ottawa 13, Ontario, Canada.

OFFICERS: His Excellency Major-General Georges P. Vanier, DSO, MC, CD, Governor-General of Canada, *Honorary President*; Jean Clavel, *President*; A. L. Hepworth, *Vice-President*; G. Delisle, *Vice-President*; L. F. MacRae, *Honorary Treasurer*; Roy Little, *Executive Director*; Bernard Lalonde, *Associate Executive Director*.

DIVISIONS: Canadian Federation of Film Societies, Scientific Film Division, Business Film Service.

PURPOSE: To bring together Canada's educational, scientific, cultural and community interest in the field of documentary films and to encourage and promote the study, appreciation and use of motion pictures and television as educational and cultural factors.

ACTIVITIES: Distribution of the films in the National Film Library (7,000 titles in 24 special collections), National Science Film Library established June, 1962, Peter Morris, *Director*, Importation of films from other countries, Information Service, Preservation of films of historical interest, Distribution of sponsored films, Canadian Film Awards, Special services in the fields of business films, scientific films, films on art, films for UNESCO'S East-West project, medical films, etc.

PUBLICATIONS: Monthly Bulletin, Catalogues, Special Subject Listings of Films, Evaluations, Handbook for Film Societies, Information Sheets on selected entertainment films, C.F.F.S. Bulletin.

COMMITTEES: Canadian Film Awards, Canadian Film Archives, Canadian Labour Film Committee, Canadian Centre of Films for Children.

CATHOLIC AUDIO-VISUAL EDUCATORS ASSOCIATION

ADDRESS: Box 618, Church Street P.O., New York 7, N. Y.

OFFICERS: Rev. Michael Mullen, C. M. (St John's University), *President*; Rev. Joseph Coyne, O. S. A. (Cascia Hall, Oklahoma), *Vice-President*; Sister Agnes Virginia, C. S. J. (Brentwood College), *Secretary*; Rev. Bernard Butcher (St. Mary's Church, Meridan, Conn.), *Treasurer*.

PURPOSE: To further the use of Audio-Visual equipment and materials in Catholic education and to encourage production of suitable films for Catholic school use.

ANNUAL CONVENTION: CAVE is coordinating its Twelfth Annual Convention with the National Catholic Educational Association national convention, April 16-19 in St. Louis, Mo. Audio-visual equipment and materials may be exhibited at this joint convention. No registration fees are required.

DEPARTMENT OF AUDIOVISUAL INSTRUCTION OF THE NATIONAL EDUCATION ASSOCIATION

OFFICE: 1201 Sixteenth Street, N. W., Washington 6, D. C. Contact: Anna L. Hyer, *Executive Secretary*.

OFFICERS: William Allen (Dir. of Research, Dept. of Cinema, Univ. of Southern Calif.), *President*; Mendel Sherman (Asst. Dir., Audio-Visual Center, Indiana University), *President-Elect*; John Dome (Dir., Audio-Visual Center, Miami University, Oxford, Ohio), *Vice-President*; Clyde K. Miller (Dir., Div. of Audio-Visual Education, Ohio State Dept. of Education), *Past-President*.

COMMITTEES: More than 40 national DAVI committees and commissions are organized into the following five divisions: Division of School and College Groups; Division of Professional Specialization; Division of Operational Committees; Division of Professional Development; Division of Professional Liaison.

PURPOSE: The improvement of instruction through the better, wider use of audio-visual equipment, materials and techniques. Membership consists primarily of directors and specialists in colleges and universities, state depts. of education, and county and city school systems. School supervisors and administrators, classroom teachers, librarians and audio-visual specialists in the armed forces, in industry and among religious groups are included in membership.

1963 ACTIVITIES: National Convention, April 21-26, Denver Hilton, Denver, Colo.; 1964 conv., Rochester, New York, April 20-25; 1965 conv., Milwaukee, Wis., April 25-30. July 1 DAVI meeting to be held in connection with annual convention of National Education Assn., Detroit. Lake Okoboji Audio-Visual Leadership Conference, August 18-22, Lake

DEPARTMENT OF AUDIO-VISUAL INSTRUCTION.

Okoboji, Iowa (1963). Conference on Selection and Use of Programmed Instruction, June 26-28, 1963, Rackham Hall, Wayne State University, Detroit.

DAVI has given major attention during past year to changing role of media in institutions and the staffing facilities, organizational patterns for achieving these ends. A Task Force was assembled to develop a position paper which has been widely distributed for discussion. The Department also implemented a newly-adopted constitution; continues a Professional Placement Service for members.

PUBLICATIONS: two periodicals, *Audiovisual Instruction* (monthly except July and August); *A-V Communication Review* (bi-monthly). Other recent publications include: *National Tape Recording Catalog*, 1962-63; *Learning from Pictures*, by Catherine M. Williams; Task Force Position Paper, *The Function of Media in the Public Schools* (reprint free on receipt of stamped, self-addressed envelope); and publications of the Technological Development Project, including, *The Computer in Education*.

THE EDUCATIONAL FILM LIBRARY ASSOCIATION

OFFICE: 250 West 57th Street, New York 19, New York.

OFFICERS: F. A. White, *President*; Sally Clark, *Vice-President*; Kathryn L. Carlin, *Secretary*; Emily S. Jones, *Administrative Director* (at headquarters).

COMMITTEES: Festival — Frederic Krahn, *Chairman*; Nominations — Kathryn Carlin, *Chairman*; Membership — Sally Clark, *Chairman*; Evaluations — Susan Zeilman, *Chairman*.

MEMBERSHIP: (Constituent) — 475 non-profit educational institutions; (Service) — 61 commercial organizations and interested individuals; 4 international members (government agencies, film groups of other countries); 46 sub-memberships and 157 personal memberships.

PURPOSE: To encourage and improve the production, distribution and utilization of educational films. EFLA conducts a film evaluation service.

1963 AMERICAN FILM FESTIVAL: To be held May 1-4, at the Biltmore Hotel, New York City.

PUBLICATIONS: For members — Evaluations, EFLA Bulletins, Service Supplements and Film Review Digest. A catalog containing descriptions of EFLA "general" publications is provided on letterhead request.

PLAZA 1-1710

W E PREFACE this largest of all BUSINESS SCREEN issues with the fervent hope that the immense detail involved in collecting and organizing the countless thousands of lines that make up our awards, organization, distributor, producer, writer and government listings is, as usual, 99% accurate. That inevitable 1% will be quickly corrected, as before, in our first Production Review supplement later this Spring.

The sum total of producer listings alone reflect more incoming material and more complete data than in any previous year. It is tabulated on page 105. But, more important than all this, is this word of editorial dedication:

"To the United States Navy and specifically to the U. S. Naval Photographic Center, which this year marks its twentieth anniversary, we dedicate this 13th Production Review." The story of that anniversary observance, held in Washington, D. C. February 15, and attended by a distinguished group of guests and visitors, is our opening special editorial feature on page 103.

The Navy has always been a firm believer in the quality of its numerous training film projects. To achieve that aim it has turned, for decades, to the many specializing producers listed in these pages. A further elaboration of the Navy Training Film Program, a sequel to our own award-winning special issue devoted to that subject in the closing months of World

"David and Lisa," Academy Award Nominee, Well-Edited by Vision's Irving Oshman

National magazines have hailed the recent Academy Award — nominated motion picture, *David and Lisa*, whose director, Frank Perry and his wife, screenwriter Eleanor Perry, have each been cited for their work on this appealing film. But we'd like to add our special word of tribute to the skillful editing of Vision Associates' Irving Oshman, which helped turn this low-budget film into top-interest fare.

Cinema Laboratories Association Elects MovieLab's Saul Jeffee as Its President

Kudos to Saul Jeffee, president of MovieLab, Inc. of New York, who has accepted the post of president of the Association of Cinema Laboratories.

Active in the motion picture industry for more than 30 years, Mr. Jeffee succeeds Byron

Roudabush, head of Byron Motion Pictures, Washington, D. C. W. E. Gephart, Jr., president of General Film Laboratories, Hollywood, is the new ACL vice-president, succeeding G. Carleton Hunt of the same firm.

Two other officers of the organization were re-elected. They are Louis (Doc) Feldman, Du Art Film Laboratories, New York, as treasurer, and Dudley Spruill, Byron Motion Pictures, as secretary of the association.

Oveste Granducci Cited by Washington's Film Council for His Industry Contributions

The nation's first film council, in Washington, D. C., cited screen writer Oveste Granducci on February 13, granting him a life membership in that 20-year old organization. Council president Ashley P. Beatty delivered the salute with these words:

"To Oveste Granducci, in recognition of distinguished services and continued devotion to the interests of the audio-visual community . . . he has earned an international reputation by his contributions to the motion picture as an art form and as a means of communication. The long list of credits bearing the imprimatur of 'Scripts by Oveste Granducci' are established guide-lines for excellence and testify to a lifetime of dedication to the development of consistently high-standard motion pictures."

Have You Sized Up Your **AUDIENCES...**

for **QUALITY?**

Your sponsored film deserves the best distribution it can obtain, consistent with the purpose and intent of the public relations program it supports. More often than not this means a *qualitatively selected audience*—rather than simply raw statistical exposure before any group that happens to be sitting still.

The ability to reach *finer* audiences for sponsored films has been one of United World's many achievements during more than 3 decades in the film distribution business. We can deliver the *largest circulation* in the industry, and, at the same time, achieve for your film the degree of selective exposure that makes your p.r. campaign more effective and more valuable.

At United World we call our service "*custom distribution*" ... and it's just that! It means a constant effort to avoid "waste" exposure for the client; it means keeping your prints in the finest possible condition at all times; it means developing pre-selling promotion that creates a more receptive viewing atmosphere for your film when it is screened. It also means a roster of distinguished clients whose interests and goals do not conflict with each other.

Through our nationwide network of 43 distribution points, our broad film activities and our corporate affiliations with important theatrical, non-theatrical and television interests (we are the only major Hollywood film company in the sponsored distribution field) ... United World can offer its clients...

The big job of coordinating business film entries to overseas film festivals (for the Committee on International Non-Theatrical Events) merits a round of applause for Tom Hope, Assistant to John Flory, Advisor in this special field at Eastman Kodak. Dr. Harold Wigren is CINL's official coordinator at Washington, D. C. headquarters but the task of moving titles to the nationwide screening committees who must first clear festival entries, has long been Tom Hope's assignment.

The Editor of this publication, serving as a CINI member and a regional screening chairman, knows full well the complexity and size of the tasks involved. *Good work, Tom!*

Another theater TV network, based on the development of a unique color television projector, has been announced by National General Corporation and the General Electric Company. GE developed the Talariacolor TV projection system which permits for the first time display on full-size theater screens of high-quality color TV pictures with a brightness equal to current movie color films.

National General, headed by president Eugene V. Klein, has placed a multi-million dollar order for equipment and service providing for Talaria projectors in its own key city theaters. The projectors will also be franchised, leased and sold by National to other theaters.

William W. Cobbs II is the director of a newly-created audio-visual department of Science Research Associates, Inc. The international testing and management research organization is moving strongly into this field. Headquarters are at 259 East Erie in Chicago.

Thomas H. M. Elwell is the New York regional sales manager for the Westrex Recording System department of Litton Industries. He has located at 76 Ninth Avenue, in Manhattan.

**William J. German, Noted
Film Distributor, Dies at 74**

William J. German, widely known in the motion picture film industry, passed away in Hollywood, Cal., on February 17.

For many years, Mr. German was the president of W. J. German, Inc., distributor of Eastman Kodak unexposed motion picture film throughout the United States.

He was born in Port Hope, Ontario, Canada, on December 29, 1888. He is survived by his widow, the former Estella Elizabeth Wehnert, by his sons Frederick A. and Arthur W., and by six grandchildren.

Began Career in Kodak Office

Mr. German began his long association with the Eastman Kodak Company, starting as a clerk in the cost accounting department. From 1916 to 1921, he was in charge of planning and distribution of all Kodak products other than sensitized material.

He became associated, in 1922, with Jules E. Brulatour, who was then the sole distributor of Eastman Kodak unexposed motion picture film. In 1924, Mr. German organized and became vice-president and general manager of J. E. Brulatour, Inc., and on the death of Mr. Brulatour in 1946, Mr. German became president of the Brulatour corporations.

In 1952, Mr. German organized W. J. German, Inc., which purchased assets of the Brulatour corporations.

Active in Welfare Programs

Devoting much of his time to philanthropic work, Mr. German was particularly interested in all of the welfare activities of the motion picture industry.

At his death, he was a director, a vice president and chairman of the executive committee of Will Rogers Memorial Hospital, and a director of the Foundation of Motion Picture Pioneers, Inc., and the Joint Defense Appeal.

Member of These Organizations

Mr. German was an honorary life member of the American Society of Cinematographers; a life member of Local 52 of the I. A. T. S. E., and a member and past chief barker of Tent 35 of the Variety Club, New York, and a member of the Society of Motion Picture and Television Engineers; the Academy of Motion Picture Arts & Sciences, the Museum of Modern Art; the American Museum of Natural History and the Metropolitan Museum of Art.

Expect Color TV Set Sales to Double in This Year

Sales of color television sets are getting a big boost as color programming rises. Producers of TV color sets are forecasting a 1963 volume of 700,000 units, double that of 1962.

A newly designed color TV picture tube is sparking interest of manufacturers. The tube face is rectangular, instead of round. The new tube could well reduce the size of color TV sets. It would allow the depth of present color TV sets to be reduced by more than 20 per cent. J.P.

Communication Concepts Film Available for Group Showing

A film on new concepts in communications, adapted from the "Library 21" exhibit at the Seattle World's Fair, is now available to libraries, educational institutions and TV stations, technical societies and the graphic arts and related industries through Association Films.

The 12-minute color film, *Xerography*, produced by Visualscope, Inc., and sponsored by the Xerox Corporation, was originally a multi-screen "theatre-in-the-round" presentation in the American Library Association section of the Fair. It traces the history of communications and explores the potential of recent developments in reproduction and transmission of visual materials.

In the foreseeable future, according to the film, science will be able to transmit through telephone networks, micro-wave relay and communications satellites "the written works of man" from a library acting as a central core of knowledge. This knowledge, recorded on electronic tape or rolls of microfilm, will be relayed to "satellite" libraries any place in the world.

The science of zerography will re-translate the electronic impulses into visual images, the language of man. This process of graphic communication requires no liquid chemicals to reproduce instantaneously original documents, electronic impulses, the printed word and other visual images.

A basic problem in communications, the film states, is that of locating existing written knowledge. Millions of dollars is spent each year in doing this twice. The central-core-of-knowledge library of the future will be the store-hour of such information, coded, catalogued and correlated by computer. J.P.

9.7 Million View Mines' Films in Past Year

Six "Most Popular" Pictures Break Previous Audience Records

Six of the more than 50 industrial motion pictures distributed by the Bureau of Mines in 1962 broke their previous records for the number of showings in a single year, the U. S. Department of Interior reports.

These popular 16mm films in the Bureau's free-loan film library deal with various mineral commodities, including fuels, or with the natural resources of various states. All were produced in sound and color in cooperation with private industries. These sponsors paid production costs and provided the Bureau with prints for circulation.

Borrowing groups are chiefly schools, colleges, technical societies, business and civic clubs.

Popular Titles and Audiences

Titles of the record-breakers and the number of groups before which each was shown during 1962, are:

California and Its Natural Resources - 14,565.

Alaska and Its Natural Resources - 10,765.

The Magic of Sulphur - 10,404.

The Story of the Modern Storage Battery - 8,554.

The Story of Gasoline - 7,941.

Asbestos . . . a Matter of Time - 2,688.

The Bureau's newest film, *Copper - the Oldest Modern Metal*, was shown before 4,341 groups in the last four months of 1962. This striking remake of the former Bureau film on copper (sponsored by the Phelps Dodge Corp. and produced by Jamieson Film Co.) won prizes at film festivals in Venice, Italy, and Columbus, Ohio, in 1962, and will compete at other festival events to be held this year.

196,483 Showings of Films

Altogether, Bureau films were shown 196,483 times last year, with many more educational and public-service telecasts than in 1961. Combined audiences for all the films — excluding TV viewers — exceeded 9.7 million in 1962. Comparative figures for 1961 were 212,000 groups with an "in person" attendance of just over 11 million.

The decrease, the Bureau of Mines reports, was due chiefly to the withdrawal during 1962 of seven films for such reasons as

obsolescence of depicted processes or film wear. Nearly all of these will be replaced with remakes or by new film subjects within the next year or two.

All Production Under Contract

All films circulated by the Bureau under industry-Government cooperative agreements are produced by commercial film companies contracting individually with the respective industrial sponsors.

Groups interested in showing Bureau of Mines films can obtain complete information, including a catalog and a list of cooperating distribution centers, by writing Graphic Services, Bureau of Mines, 4800 Forbes Ave., Pittsburgh 13, Pa. No rentals are charged but return postage expenses must be paid by the borrower.

"TELEVISION IN EDUCATION"

A documentary survey, vivid but definitive, of how television is being used in America's pioneering ETV installations.

Before a school system can intelligently consider ETV, it must have learned what instructional television is — how telelessons are created and distributed.

To learn this, some school authorities have actually toured the pioneering installations. For others, this documentary motion picture will "take the tour" — filmed and synch-recorded on the spot in actual classrooms and ETV studios from South Carolina to California; with in-person observation and first-person reports by authorities.

Sponsor: Bell Telephone System, 27½ minutes. 16mm EK Color. Cleared for TV.
Distribution: local telephone operating companies.

656 Titles to Compete for Blue Ribbon Honors

Fifth American Film Festival in New York May 1-4

A RECORD TOTAL of 656 non-theatrical films and filmstrips have been entered for the Blue Ribbon Award competitions of the fifth annual American Film Festival, May 1-4, at the Hotel Biltmore, New York City.

The Educational Film Library Association, sponsor of the Festival, reports that the 523 sixteen-millimeter films and 133 thirty-five-millimeter filmstrips submitted this year represent 41 states and a score of foreign countries from India to South Africa.

Reflects Greater Film Use

According to EFLA Administrative Director Emily S. Jones, the number of Festival entries, larger than in previous years, reflects the increasing use of films in offices, clubs, public libraries, churches, government programs, museums, and homes, as well as in classrooms, film societies and television.

The 1963 Festival entries range from a film produced to spearhead the campaign of a gubernatorial candidate, through a wide variety of films exploring outer space, to one demonstrating how to make good coffee every time.

"Social-Documentary" Category

New this year is a competition category devoted to "Social Documentary" films. It will be one of 33 subject-area Blue Ribbon Award Festival Competitions which EFLA groups under the general headings of Art and Culture; Business, Industry, and Public Relations; Education and Information; Health, Medicine, and Safety; and Religion and Ethics.

In 29 cities across the country, the film and filmstrip entries are now being reviewed by EFLA's pre-screening committees of audio-visual experts who will nominate from among them, those which will be honored by screening in the Festival competitions in May.

Festival Juries Pick Winners

Specially-qualified Festival juries will then vote the much-prized Blue Ribbon Awards, which will be presented to the top-rated films and filmstrips on Friday, May 3, at a Gala Award Banquet presided over by EFLA President F. A. White, director of the bureau of audio-visual instruction at the University of Wisconsin. All entries screened at the Festival will be honored with special American Film Festival Certificates.

Formal and informal discussion

sessions again will be important features of the four-day Festival, with nationally known producers and users participating as speakers and panel members.

Channel 13 President to Speak

One speaker will be Dr. Samuel B. Gould, president of Educational Television for the Metropolitan Area, new owner of New York's channel 13, whose topic will be "Baptism by Fire: A New Station Getting Under Way."

Dr. Gould will speak at the luncheon sponsored by the New York Film Council on Thursday, May 2.

Advance information about the Festival screenings and program events, all open to the general public, may be obtained from EFLA, 250 West 57th St., New York 19, N. Y.

Direct Sales Tool

"COMMUNICATIONS SERVICES FOR ETV"

The Bell Telephone System has created a complete marketing package for *educational television*, from which their local representatives can draw, quickly and fully, whatever aids they need. Included in the package are two "presentation" films.

The first film ("Television in Education") is a non-commercial documentary survey of how television is being used today in America's pioneering ETV installations. But "Communications Services for ETV" is a frank sales pitch, to be shown by the Telephone sales representative to explain to school people why they should (1) transmit the TV lessons via a multi-channel closed-circuit system rather than broadcast, and (2) entrust the construction and maintenance of the system to their phone co.

SPONSOR: Bell Telephone System, 25 minutes, EK Color; Synch dialogue.

Hollywood 26, Cal.

"The Invisible Bridge" Shows Ford Assembly Workers Abroad

Assembly line workers in Southern Rhodesia, Germany, Brazil and Malaya are among the "stars" of a new motion picture produced by Ford Motor Company.

The Ford documentary, titled *The Invisible Bridge*, portrays the company's far-reaching international operations and their impact on nations and individuals throughout the world.

Sequences for the motion picture were shot "on location" in many of the 280 countries and territories where Ford International operates. The scenes dramatize differences in customs, cultures and languages and, at the same time, illustrate how employees, dealers and suppliers are bound together by the inter-related work they perform.

The 25-minute, 16-mm color film — now available free of charge for group showings — focuses on the relationship of the 2,000,000 men and women engaged in building and selling Ford products around the world.

Prints of *The Invisible Bridge* are loaned free to schools, churches, farm and youth groups, and fraternal and civic organizations. They may be obtained from Ford Motor Company film libraries in New York City, Oakland, Calif., and Dearborn, Mich.

Film Series Promotes Sale of Poultry in Arab Theaters

☆ Motion pictures promoting the sale and consumption of U. S. grown frozen poultry in the United Arab Republic will be exhibited in Egyptian theatres after mid-March, according to Harold Williams, president of the Institute of American Poultry Industries.

As part of the Institute's market development programs abroad, three five-minute color films were produced in Cairo by the Niles Communications Center of Chicago. Niles crews worked in co-operation with both U.A.R. and U. S. Department of Agriculture.

U. S. chicken and turkey have recently begun to be exported into the U.A.R. Sales have been made by the private trade to the Egyptian Government under the Food for Peace program. Two of the three films demonstrate to Arabian homemakers how to thaw and prepare U. S. grown broilers in a variety of local dishes. The third film covers the nutritional value of turkey, its thawing and serving suggestions.

EXCLUSIVE WITH CFI

GOOF PROOF

There's no mistake about it. Our system makes mis-labelled or illegible 16 mm release print leader a thing of the past.

First, we include all identification data in the negative leader. It's then automatically printed on the head leader of all release prints. Next, we convert this clear film to reinforced opaque white leader thru our special, patented process. Result: legibility, durability, infallibility. Makes old-fashioned, hand-labelled leaders obsolete. See for yourself!

Invite Entries for NVPA's "Day of Visuals"

April 29 is Final Date for Visual Presentation Competition

ENTRIES for the Tenth Annual Day of Visuals Awards Competition of the National Visual Presentation Association are now being accepted by the Awards Committee, headed by Janet Wilkins, of the National Association of Manufacturers, Chairman, and Roger Hall, of the Boy Scouts of America, Vice Chairman. Entry blanks are available from NVPA headquarters, 19 West 44th Street, New York 36. The last day for receipt of entries will be April 29.

Judge Media in Seven Groups

In this year's competition, four major types of visual presentations and seven classifications have been established. The four types are (1) motion pictures, (2) filmstrips or slide programs with recorded sound, (3) slide and overhead projector transparency programs, and (4) flipcharts, flannel and magnetic board programs and other non-projected visuals.

Subject categories for the competition will be: (1) general public service, (2) sponsored educational, (3) employee relations, (4) employee training, (5) sales training, (6) industrial sales and sales promotion, and (7) consumer sales and sales promotion.

Show to be "Twice as Large"

Frederick G. Beach, General Chairman of this year's Day of Visuals, said that while the 1962 Day of Visuals Exposition was the largest in NVPA's history, plans for the 1963 exposition indicate that it will be double last year's size.

Occupying the Windsor Ballroom of the Commodore Hotel in New York, on June 4, 5 and 6, the audio-visual exposition will bring the leading producers, dealers, and suppliers of the tools of visual presentation together in what may be one of the most important audio-visual shows in the nation.

Hold Seminars on Two Days

The NVPA seminars, always a major feature of the Day of Visuals, are being expanded this year and concurrent sessions are being held on two of the three days of the program. Both the experienced visual presentation specialists and those new in the field will find seminar sessions tailored to their interests.

The Tenth Day of Visuals

BUYERS READ BUSINESS SCREEN
THROUGHOUT THE ENTIRE YEAR

Awards Banquet will be held on the evening of Wednesday, June 5, and the winners in the National Awards Competition will be announced at the banquet.

Show Winner of NVPA Awards

On the following day, Thursday, June 6, the various motion pictures, stripfilms and slide programs, which were top winners in the Awards Competition, will be shown on a schedule throughout the day in the Windsor Suite. The various winning visuals will be introduced to the audience by judges from the awards panel.

Also on June 6, non-projected visuals that were top award winners will be placed on display in a special Hall of Honor in the corridor of the Commodore Hotel leading to the NVPA's Audio-Visual Exposition.

"HAPPY HOLIDAYS ...

ALONG THE POTOMAC"

"In every age there has been one city which has seemed the center of the world ... in our time, that city is Washington," and all its beauty and stateliness, particularly many seldom-seen interior views, are captured as seldom before by Guy Adenis' breath-taking photography. But with this beauty goes a sense of history, and of destiny, for, like its predecessor, "In the Land of Lincoln," this is a wholly new kind of travel film. Most Washington tourists are Family Trade, and out of their desires "to improve our children" and to "understand our country better" rises this new approach to an over-worked subject; viz., to bring out its *significance*. To show the things to see, but also what they *mean*.

SPONSOR: American Oil Company (Standard Oil of Indiana). 28½ minutes. 16mm, EK Color.

WASHINGTON FILM COMMENTARY

by Mary Finch Hoyt

Washington Correspondent for Business Screen

Nathan Golden Retires from Government After 35 Years

... One of official Washington's most widely-known film authorities and an internationally-honored specialist in motion picture and photographic industry affairs. Nathan D. Golden will retire from Government service on March 29th.

"Nate" Golden leaves his post as Director of the Scientific, Photographic and Business Equipment Division (Business and Defense Services Administration) in the U. S. Department of Commerce

after 38 years of continuous, effective service.

His resignation is taking effect on the conclusion of his planned visit to the International Photographic Trade Fair (Photokina) in Cologne, Germany. On his return, Mr. Golden will open a law office in Washington, D. C.

Among the awards and honors bestowed on this veteran are: Chevalier, French Legion of Honor, from the Government of France; the Order of Merit, First Class, from the Federal Republic of Germany; the Department of

Commerce Meritorious Service Award and the Certificate of Appreciation from the Department of the Army.

Producer of "The River" Is Honored by Secretary Freeman

... Government remembered ... and honored ... a pioneering documentary producer on January 28th when Secretary of Agriculture Orville L. Freeman presented an award and paid verbal tribute to Pare Lorentz for *The River*. This 25-year old classic about the Mississippi shared screen time with the Department's recent Centennial film, *Agriculture, USA*, during ceremonies at the State Department auditorium.

Secretary Freeman paid tribute to Lorentz for "awakening Americans to the broad problems of conservation, of the need for wise use of the land as our most basic resource, and of the way that technological, scientific and industrial change demands changes in social engineering to meet new conditions."

Department of Labor Film Encourages Apprentice Program

... A serious shortage of skilled workers is a paradox in the U. S. today. While unemployment of the unskilled holds a tenaciously high level, there are jobs waiting for printers, iron workers, sheet metal workers, crane operators.

The U. S. Department of Labor

Secretary of Labor Wirtz

looks to management and labor for the revitalization of apprenticeship programs to meet this two-edged problem. To bring the whole matter to the attention of both groups and the public, the Department is distributing *Skills for Progress*, a 29 1/2-minute motion picture.

The film was lensed in color in the Washington-Baltimore area by Milner-Fenwick, Inc. of Baltimore. It was directed by Irvin Milner, assisted by Stan Rowe; Vachel Blair was on camera, assisted by Ken Resnick. Thea Benler edited this timely information subject.

Skills for Progress' goals (and the problems involved) are introduced in the picture by the Honorable W. Willard Wirtz, Secretary of Labor. The Secretary's comments are presented below:

America's Goals in "Skills for Progress"

Secretary of Labor W. Willard Wirtz Cites the Need to Re-Vitalize Apprenticeship Training in Industry

THE FILM, *Skills for Progress*, demonstrates the most effective way for workers to acquire skills in modern industry. Apprenticeship is a highly-practical method because it combines on-the-job experience with class-room training. It is rewarding to the student, who is also an employee.

The Department of Labor's Bureau of Apprenticeship and Training has, for more than 25 years, assisted employers and labor in the development of apprenticeship. The Bureau is responsible for the on-the-job training phase of the Manpower Development and Training Act.

This is a critical program.

The demand for skilled manpower is growing while the unskilled go without work. Educational and training opportunities must be extended to all men and women without regard to race, col-

or, creed, national origin or physical handicap.

I cannot too strongly urge employers to provide training opportunities for their workers and to encourage them to take courses outside working hours.

I urge the unions to cooperate with employers in improving the skills and technical knowledge of their members.

I urge the individual worker to invest at least some part of his spare time to improving both his educational and occupational skills.

And, finally, what is of utmost importance: I urge our young people to stay in school, to acquire as much education as possible.

The future can be what we make it. We have only to will it.

ON BUSINESS FILM DISTRIBUTION

For the attention of

THE SPONSOR WHO CARES

BE SURE OF QUALITY, CARE AND INDIVIDUAL PERFORMANCE —
don't settle for an average kind of service.

Get the audience you really want —
not just those that the distributor can reach conveniently.

Have full company credit —
why be lost in a mass list of others' films?

Insure excellent print condition —
audiences have had it with poor screenings.

ROTHACKER

DISTRIBUTION AT HOME AND ABROAD

BUSINESS SCREEN

BUSINESS SCREEN INTERNATIONAL

ROUGHOUT EUROPE today, associations of film producers and sponsors are actively exchanging experiences and information not among their own members but, in many cases, with similar groups in neighboring tries.

Among such burgeoning organizations are the British Industrial Film Association, the CEDFI in France, and the Austrian Association of Industrial and Cultural Film Producers, members encouraged to cooperate frequently and with their "opposite numbers" throughout Europe.

* *

France, the CEDFI Club Provides an Informal Forum for Sponsors, Film Makers

In Paris, the CEDFI Club (in English, "The French and Distribution Center for Information and Club") is a flourishing association whose membership and membership are similar to America's National Visual Presentation Association. Founded in 1959 and with a current membership of 113 public relations officers, advertisers and women and film executives, the club is centered in Paris under the direction of Pierre Bruneau, one of France's most active promoters of audio-visual material in business industry.

Informal Forum of Opinion and Information

Because of the wide range of interests among its members, the Club (entitled, in French, the "Club Centre d'Etude et de Diffusion du Film d'Information") provides a valuable forum of opinion and information. Meeting regularly twice a month, the members keep a list of film events in their own and other tries. Below is a summation of their recent activities:

During twice-monthly film sessions, they saw industrial and over 100 advertising films in 1962. After each viewing, the films were discussed over a drink; for members who did not attend, composite reactions were shared in the club journal.

20 Members Visit British Studios

September, 1961, 20 CEDFI members visited London to study British film production sponsorship. They made many valuable contacts with their "opposite numbers" in Britain, saw England's large commercial TV station (Associated Rediffusion), and visited with the Film Producers' Guild, World Wide Pictures, and Halas and Bachelor Cartoon Films. Following month, the members called on Simca automobile plant and participated in a programme to launch a new car model.

March, 1962, they organized the first Common Market Seminar on Industrial Films; industrial and 65 advertising films were fitted for study by the six Common Market countries and Britain. During the Seminar, Film Producers' Guild (the British film production group) was at home to the 300 participants. High spot was a dinner-debate, attended by 100, who participated in a discussion of the distribution of industrial films.

Among the Club's plans for this year is

As Reported by Robinson P. Rigg European Editor of Business Screen

a new service to members: the use "on call" of a projector and operator for private showings and discussions of films from the CEDFI film library. As part of their subscription, members now receive France's only a-v business magazine, "Cinema and TV Production."

These Are Services to Members

Member meetings are only a portion of the group's manifold activities. Here are some other Club functions:

The CEDFI Film Library is a collection of French and foreign films lent free of charge by sponsors to any film users: schools, clubs, associations and technical groups. With no attempt to be a main distribution outlet, the library does provide a bonus to many sponsors. Among the films is *1301*, concerning a computer, sponsored by the British International Computers and Tabulators Company.

The CEDFI Projection Service is available at all times to show films either from the library or provided from outside, at special sessions organized by sponsors.

The International Newsreel Service conducts showings of film programmes on regular circuits in provincial France. Last year, more than 100 newsreel sessions were held by large public and private groups sponsoring films.

The CEDFI Public Relations Service holds "VIP" film shows and presentations to selected audiences of all kinds. Over 100 invited audience presentations were conducted last year.

CEDFI publications include books, pamphlets, and the magazine "Cinema and TV Promotion."

M. Bruneau Represents Group at Festivals

Furthermore, as though he had not enough to do, Pierre Bruneau attends any international festival which may include industrial films to make sure that members' films are adequately represented.

Membership is open to all nationalities. If your company is showing films in France, or thinking about it, you are encouraged to join. The address is 47 Rue Blanche, in Paris.

British Industrial Film Association Members View New Product at Two Recent Sessions

The British Industrial Film Association (membership restricted to industry film sponsors) has been holding regular meetings in London and in out-of-town centers like Manchester, Birmingham and Leeds.

The BIFA calls these sessions "Monthly Newcomers" and their programs feature the latest in industrial film production and the mutually helpful exchange of news and views on purposes, costs, audiences and other factors important to successful sponsorship.

January ('63) sessions in London and at Manchester included screenings of some highly-useful new productions. Among these were:

Towards Better Standards (Marks and Spencer's own unit) An eight-minute technical report for the directors of Marks and Spencer's chain stores, demonstrating how the installation of automatic machinery in a footwear factory saved the company \$150,000.

Network (Associated Electrical Industries' own unit) A 31-minute color film describing a breakdown in a ship at sea, and how a replacement engine part is provided for it by means of worldwide communications. Hugh Wickham, A. E. I.'s Films Officer, introduced the film.

The Calculated Risk (Produced by World Wide Pictures for British Petroleum). Color. 28 minutes. The story of a 10-year search for oil under the ocean bed off the shore of Arabia, and the \$75,000,000 investment it represents. The film also shows how the life of the nomad inhabitants of the coastline is affected when the oil men come. Introduced by Dudley Knott, B. P.'s Films Officer.

What's in a Flame? (Made for the Gas Council by Stewart Films) Color. 20 minutes. For youngsters of all ages, the film features David Nixon, TV personality, performing a number of unusual experiments in a laboratory, to show what flames will do. Introduced by Stanley Irving.

What's Cooking? (Produced for H. J. Heinz of Britain by Associated British Pathe) Color. 32 minutes. A slapstick comedy film featuring comedian Charlie Drake and highlighted by

Austria to Exhibit "Shorts" at Salzburg;

Association Sponsors an Exhibition in Paris

Although not a member of the Common Market, Austria cooperates enthusiastically with other countries in the exchange of films and film information.

Later this year, in Salzburg, it will be possible to study Austrian-sponsored films at the Festival of German Language Industrial Films, organized by the German and Austrian Federations of Industry. Between 1946 and 1961, Austrian producers made 740 short films; short subjects are often shown in Austria's 1150 cinemas.

Last November, the Austrian Association of Short and Cultural Film Producers cooperated with the French Film Center to demonstrate to the French public the recent strides in Austrian film-making. Herr Rudolph Kammel, president of the Austrian Association, states that the production of documentary films in his country is not economically possible unless they are subsidised either by industry or the Austrian Ministry of Education.

* * *

Cinema et Publicite Wins Moscow Awards

At The Third Festival of International Film Technique, held in Moscow, Cinema et Publicite of Paris received awards with a TV commercial for Dubonnet, the liquor firm. Dubonnet, Dubonnet gained the prize for animation and soundtrack. A premier award for trick photography was given to *Scottish Sombrero*, produced for Sandeman Port.

* * *

German TV Channel Gives Prime Time to Industry Films; Showing on TV Abroad

On the one German national television channel (government-owned) a number of international as well as German-produced industrial films were transmitted to viewers in 1962.

Among the 18 industrial films shown during a six-month period were IBM's *Information Machine*, and British Petroleum's Oscar-winning *Giuseppina*, both shown at peak periods.

German-sponsored films popular with viewers included A. E. G.'s *Maschinen lernen denken*, Krupp's *Campo Limpo*, and B. A. S. F.'s *The Magic Tape*.

During 1962, the international exchange of industrial films for TV continued to bring nations closer together. Klaus Brepohl of DIZ reports that Manila Television showed films sponsored by Siemens, Volkswagen, Farbwerke Hoechst and Bayer.

In Nigeria, the emphasis was on German autofilms: Volkswagen, German Ford, DEMAG and Phoenix all showed films during German Week.

The educational TV channel in Stockholm, Sweden, showed a series of sponsored films dealing with textiles — all German — from Glanzstoff, and Arbeitsgemeinschaft Kunststoff-industrie.

Vitfer's Emile Leze Is a Firm Believer in Fast Service, Quality for Films and Television

An honored guest at the British Kinematograph Society's recent annual dinner-dance at London's Savoy Hotel was Emile Leze, president of Vitfer Laboratories of Paris. M. Leze pioneered in the reversal and duplicating processing techniques which are now so popular for European television news and filmed program material.

Talking to your BUSINESS SCREEN correspondent at the dinner (held by the British equivalent of the SMPTE), Leze said that he had traveled from the Third International Television Film Festival at Monte Carlo, after keeping a fatherly eye on the entries which Vitfer had processed. The Paris lab processes over 80% of the film material shot by non-government units for French television.

This attention to detail and personal service pays off, for Vitfer also does work for such international organizations as NATO and such trans-Atlantic TV giants as the CBC, CBS and NBC. This service and the 12-hour processing delivery given European cameramen have attracted sufficient attention to require an expansion of facilities. M. Leze was to visit Newman and Guardia, makers of processing equipment, during his stay in England.

* * *

Factual Film Producers, Union Technicians Reach Accord; No Additions to the Crews

B/S No. 8/1962 reported that Britain's factual film producers and technicians' unions were locked in a wage dispute. It has now been settled for the time being, according to Brian Collis, Secretary of the Producers' Association, with a minimum wage scale rise of 2½% for a period of three months, with no alteration in crewing arrangements.

The latter phase was a key issue in the dispute, resolved to maintain the status quo.

* * *

Rylands Bros. Premiere "Drop Out" Film; Hank Strauss, MP's in London Audience

"Hank" Strauss, of Henry Strauss & Co. Inc., New York, was a guest at the London premiere of the film *Now the Wire*, presented by Rylands Brothers of Warrington as a means of recruiting school drop-outs for the company's further - education - while - you - work scheme.

The film follows three boys through their employment in the factory, one of Britain's biggest wire-making plants.

Other guests included the Member of Parliament for Warrington, and Christopher Chataway, who first ran the mile under four minutes and who is now Parliamentary Secretary to the Ministry of Education and a member of the British Government.

Mr. Strauss was en route to New York, following a holiday in Switzerland.

Britain to Host 5th Industrial Film Festival

In the fall of 1964, Britain will host the 5th International Industrial Film Festival. Date was confirmed by Ronnie Tritton.

DEPARTMENT OF DEFENSE

The Pentagon, Washington 25, D. C.

Office of Public Affairs: Audio-Visual Division Office of News Services

• This division is the central Armed Forces contact for the news media and producers in the important fields of radio, television, still pictures and motion pictures. Direct contacts on national and international release matters in these fields are:

Bertram Kalisch, *Chief, Audio-Visual Div.*

Phone: Oxford 7-6214

Donald E. Baruch, *Chief, Production Branch*

Phone: Oxford 7-4596

Robert W. Harvey, *Chief, Photo Branch*

Phone: Oxford 7-5331

Norman T. Hatch, *Chief, Radio-TV-News-film Branch*

Phone: Oxford 7-5111

ACTIVITIES: The Audio-Visual Division approves release of Armed Forces stock footage which cannot be procured commercially for newsfilm television programs, theatrical productions, etc. The Production Branch cooperates with producers of some 35 major theatrical productions and 10-12 TV series featuring or relating to the Armed Forces. There is an Armed Forces Film supplement which lists the various Service films available for public non-profit showing or cleared for public service TV programs. Information of such films can be obtained from the Production Branch. The Still Photo Branch releases to the press and television approximately 1500 photographs per year.

The Radio-TV-Newsfilm Branch releases approximately 260 (2-3 minute) subjects to the TV, newsfilm and theatrical newsfilm media annually. It maintains two small Pentagon studios for servicing the news media and radio programs, which feature interviews with top Defense officials. In addition, the Radio-TV-Newsfilm Branch releases taped and televised messages by Secretaries and Service Chiefs and radio trailers for Armed Forces Day. Civil Defense film activities are now being handled by the Department of Defense. **PRODUCTIONS:** The only film directly produced by the Office of Public Affairs for the Secretary of Defense is an annual film report on the progress and achievements of the Armed Forces. These reports have been produced by the Army Pictorial Center in New York. *The Pentagon Report*, presently in production, is expected to be available in 16mm color in March, 1963.

Armed Forces Institute of Pathology Medical Illustration Service

Herrnan Van Cntt, *Chief, Medical Illustration Service*

Phone: 576-2866

Morris M. Goldberg, *Asst. Chief, Medical Illustration Service*

Phone: 576-2867

William W. Nicholls, *Chief, Training Aids Division*

Phone: 576-2865

Miss Daisy B. Howze, *Chief, Visual Aids Branch (AFIP Film & Equipment Exchange)*

Phone: 576-2864

ACTIVITIES: This Institute makes or supervises films for the Armed Forces on medical subjects.

FACILITIES: In-house capability, and contracts for films through the Army Signal Corps.

DISTRIBUTION: AFIP operates a U. S. Army Signal Corps film exchange for medical films. The Institute procures and loans films for the Medical Services of the Armed Forces wherever and whenever they are needed. Unclassified films are available to members of the medical profession, with minor paying postage both ways. For information about available films, write the Government Printing Office, Washington 25, D. C., and refer *The Film Reference Guide - Medical and Allied Subjects.*

Directorate For Armed Forces

Information and Education

Paul J. Murdock, *Chief, Motion Picture Division*

Phone: Oxford 7-2967

Dallas Halverstadt, *Assistant Chief*

Phone: Oxford 7-2967

• This office produces and distributes information films for the use of the Armed Forces. Films are distributed through the film exchanges of each service, through on-base theaters, and to Armed Forces TV networks in 31 overseas locations.

DEPARTMENT OF THE AIR FORCE:

The Pentagon, Washington 25, D. C.

• The U. S. Air Force produces for itself or contracts with commercial producers for approximately 500-700 films of all types each year for internal and external purposes.

ACTIVITIES:

• **Training Films:** The Office of the Chief of the Training Film Section in Headquarters USAF validates, funds for, and directs the production of all Air Force Training films. Ninety percent of this total effort is contracted out to industry. All contracts are negotiated by Detachment #1, Air Photographic & Charting Service and are monitored by that command.

This same office in the Pentagon is responsible for a program, designated the Weapons Support System Training Film Program, which has been established so that training films on new weapons systems will reach the field at the same time as the weapons system itself. In most cases, the Air Photographic & Charting Service will negotiate with the motion picture industry for these films, and the prime contractors on the job will oversee the technical and engineering aspects of the films. (Also see data under "Facilities")

Further information may be obtained from:

Major John G. Rogers, *Chief, Training Film Section, AFPTR-D, Headquarters, USAF, The Pentagon, Washington 25, D. C.*
Phone: Oxford 5-5569

Lt. Col. Aiterio Gallerani, *Commander, Det. 1, Air Photographic & Charting Service, Wright-Patterson Air Force Base, Dayton, Ohio.*

• **Office of Information:** This office releases Air Force Sponsored Films, Newsfilms and Still Pictures.

Sponsored Films: Over \$850,000 worth of educational and informational films are in production or distribution in the Air Force's Sponsored Film Program. These films, which cover a wide variety of subjects of interest to the Air Force and to the public, are privately financed by industry and are distributed through the Air Force's Central Film Exchange in St. Louis, Mo. Present subjects under consideration by industry include "basic research"; "plastics in the missile and space program"; "telemetering"; "nuclear propulsion" and others. This program is administered by the Chief, Motion Picture Section.

Lt. Col. John R. Walker, *Chief, Motion Picture Section, Pictorial Branch, SAFOI, Headquarters USAF, The Pentagon, Washington 25, D. C.*
Phone: Oxford 5-5820

Lt. Col. William J. Lookadoo, *Chief, Pictorial Branch, SAFOI, Headquarters USAF, The Pentagon, Washington 25, D. C.*
Phone: Oxford 5-5853

Major Sherwood A. Mark, *Deputy Chief, Still and Reel Pictures, SAFOI, Headquarters USAF, The Pentagon, Washington 25, D. C.*
Phone: Oxford 7-5630

FEDERAL AUDIO-VISUAL PROGRAMS:

DEPARTMENT OF THE AIR FORCE:

● **Services & Support Division:** This division is responsible for the Air Force Special Film Projects and Production-Laboratory Services.

Special Film Projects: include general information and indoctrination films for the Air Force, and in some cases, the public.

Production-Laboratory Service Contracts: supplement the Air Force's in-service capability and provide for a combination of services from the motion picture industry.

The following officers are in charge of these programs:

Lt. Col. Donnell Bjoring, *Chief, Motion Picture Section, AFOOP, Headquarters USAF, The Pentagon, Washington 25, D. C.*

Edward A. Michalski, *Action Officer, Motion Picture Section, AFOOP-SU, Headquarters USAF, The Pentagon, Washington 25, D. C.*

FACILITIES: The Air Photographic & Charting Service, Orlando AFB, Florida, is the headquarters for the Air Force world-wide photographic program. Complete motion picture production facilities located at the 1365th Photographic Squadron, Orlando AFB, Florida, and at the 1352nd Photographic Group, Los Angeles, California, support Air Force-wide production requirements.

Det. #1, Hq. APCS, Wright-Patterson AFB, Ohio is responsible for contract procurement and commercial production of Air Force films, and the 1350th Motion Picture Squadron, Wright-Patterson AFB, Ohio, provides engineering and film report type productions to Technical Commands. The 1350th Motion Picture Squadron

also maintains the USAF Film Depository, a film archive with historical and current film footage holdings in excess of \$5,000,000 feet.

APCS also maintains photographic units at Vandenberg AFB, Santa Maria, Calif.; Ent. AFB, Colorado Springs, Colo.; and Andrews AFB, Camp Springs, Md. to provide documentary and instrumentation coverage of Air Force missile and other activities. APCS also maintains combat documentary teams capable of rapid deployment anywhere in the world. These teams are permanently located at March AFB, Riverside, Calif.; Barksdale AFB, Shreveport, La.; Offutt AFB, Omaha, Neb.; and Westover AFB, Chicopee Falls, Mass. Photographic Detachments are also located overseas, in the Far East, Europe and certain other areas of the world, to provide historical and combat documentation film coverage of important events of national and Air Force interest.

Additional information regarding the Air Force Film Program may be obtained by contacting:

Brigadier General Robert W. Hall,
Commander, Air Photographic & Charting Service, Orlando AFB, Florida
Phone: 241-2401, ext 501

Col. James P. Warndorf, *Deputy Chief of Staff, Photography, Air Photographic & Charting Service, Orlando AFB, Florida*
Phone: 241-2401, ext 2226

Specific information regarding the Commercial Production of Air Force films may be obtained by contacting:

Lt. Col. Alterio Gallerani, *Commander, Det. #1, Hq. APCS, Wright-Patterson AFB, Ohio.* Phone: CLinton 3-7111, ext 40219

DISTRIBUTION: Approved Air Force films, filmstrips and related visual aids are distributed by the Air Photographic and Charting Service through the centralized facilities of the Air Force Film Library Center, St. Louis, Mo. This facility routinely distributes 360,000 films per year to Air Force units and other agencies all over the world. The present active inventory consists of nearly one-half million prints of more than 4,000 separate film subjects. The Film Library Center also maintains overseas central Film Libraries located in France, Japan and Alaska, with a Branch Film Library in the United Kingdom. These libraries are strategically placed and stocked to service approximately 140 Base Film Libraries located throughout the world. Information regarding distribution of these films can be obtained by contacting:

Major James R. Watkins, *Commander, 1356th Film Library Squadron, 8900 South Broadway, St. Louis 25, Missouri*
Phone: MEIrose 1-4800, ext. 671

DEPARTMENT OF THE ARMY

Office of the Chief Signal Officer Pictorial Activities Directorate

The Pentagon, Washington 25, D. C.

● The Chief Signal Officer of the Army is responsible for policy matters on the procurement, production and distribution of *all* motion pictures for the Army. As a result, all film programs are authorized by the Pictorial Activities Directorate of the Office of the Chief Signal Officer. Information pertaining to the production or the distribution of prints may be obtained from the following:

DISTRIBUTION: All official motion pictures, film strips, transparencies and related audio-visual aids are distributed throughout the Army by the U. S. Army Film Distribution & Utilization System. This system includes the Film Distribution & Utilization Branch, Pictorial Activities Directorate, OCSigO, the Distribution Branch of Army Pictorial Center, and the 256 Film & Equipment Exchanges located at Army headquarters, major service schools and training installations throughout the ZI (Zone of Interior) Armies and Overseas Commands.

DEPARTMENT OF THE NAVY

Washington 25, D. C.

• The U. S. Department of the Navy produces motion pictures for such purposes as training, maintaining fleet readiness, explaining new weapons and devices, and for medical, historical, indoctrination, safety and recruiting uses, to name a few key subject areas.

• *Information and General Policy Procedures* on all aspects of the Navy film program, including application information for commercial producers interested in bidding on Navy contract films, are handled by the Chief of the Bureau of Naval Weapons, Navy Department, Washington 25, D. C.

Captain E. B. Johnson, USN — Code FF, *Director, Photographic Management Division*
Phone: 547-5700, ext. 2412

T. G. Cassidy, Code FFMP, *Head, Training Film & Motion Picture Branch, Photographic Management Division*
Phone: 547-5700, ext. 2470-2472

• *Procurement policies and procedures*, which involve information on technical questions regarding bids, are handled by the Officer in Charge, Navy Purchasing Office, Washington 25, D. C.

Captain C. A. Appleby, USN, *Officer in Charge*
Phone: OXford 6-5141

LCdr. M. S. Anderson, USNR, *Director, Purchase Division*
Phone: OXford 6-6479

FACILITIES: The U. S. Naval Photographic Center, a field activity of the Bureau of Naval Weapons, is the central photographic laboratory for the Navy Department and the Navy's largest photographic activity. The Center, composed of over 530 military and civilian personnel, provides photographic assistance and specialized services to the entire Naval Establishment, supervises the production of Navy training films and maintains the Navy's motion picture and still photographic film libraries.

The motion picture production facilities at the Center are modern and complete. There is a sound stage, film and tape recording and mixing equipment, an art and animation group and editorial branch. Here experienced script writers and artists collaborate with Navy photographers and technicians, maintaining a high standard of quality for Navy productions. The processing division has the capability to develop and print negative film and release prints in 35mm and 16mm black-and-white and negative-positive color. About 75 percent of all Navy films, however, are contracted with established commercial producers.

In addition, there is a growing requirement for films to report on the Navy's research and development activity, and to meet this need, rapidly, a TV closed circuit kinescope facility has been activated at NPC during the past year.

Extensive libraries of both still and motion picture photography are maintained at the Center. Library services are provided to the Naval Establishment and other government agencies and to commercial concerns on a cash sale basis. The Still Picture Department produces all types of still photography such as press, serials, murals, and official portraits. Up-to-date continuous roll paper printing and processing units meet the Navy's large volume print demands. There are (LISTING IS CONCLUDED ON PAGE EIGHTY)

FEDERAL AUDIO-VISUAL PROGRAMS:

Civilian Departments & Agencies

DEPARTMENT OF AGRICULTURE

Office of Information

Motion Picture Service

Washington 25, D. C.

• The Motion Picture Service of the USDA produces motion pictures in color and black-and-white on agricultural and related subjects for various agencies within the Department and, on occasion, for other Government agencies. Production and laboratory services are also available on a cooperative basis with land grant colleges and universities.

C. A. Carrello, *Chief, Motion Picture Service*
Phone: DUdley 8-6072

Sid L. Schwartz, *Assistant Chief for Planning, Distribution, Production*
Phone: DUdley 8-2073

Martin Lobdell, *Assistant Chief for Production, Laboratory Services*
Phone: DUdley 8-3628

Joseph Sanders, *Chief, Business Management*
Phone: DUdley 8-7263

Arthur Foster, *Chief of Laboratory*
Phone: DUdley 8-6747

James E. Alford, *Chief of Distribution*
Phone: DUdley 8-5246

Mrs. Anne Ware, *Stock Footage Librarian*
Phone: DUdley 8-3629

ACTIVITIES: The USDA currently has more than 300 films in distribution with an estimated audience of 195 million persons. These films cover such subjects as conservation, forestry, agricultural research, insect eradication, nutrition and marketing. In addition, the Department is prepared to cooperate with qualified non-government organizations in the production and distribution of agricultural educational motion pictures and TV films which are related to agricultural programs, if the non-government cooperator is a non-profit organization or association concerned with the dissemination of agricultural information or the production or handling of one or more agricultural products.

FACILITIES: The USDA Motion Picture Service has complete in-service production and laboratory facilities which have been in continuous operation since 1912.

DISTRIBUTION: Films for school and group showings are distributed through 69 cooperative film libraries located in each state. Films for TV bookings are distributed directly from Washington, and prints of all films may be purchased from Norwood Studios, Inc., 926 New Jersey Avenue, N. W., Washington 1, D. C. Catalogues are available of motion pictures, films suitable for TV showing, state produced films and of stock footage, which is for sale at a nominal cost.

OFFICE OF EMERGENCY PLANNING

National Headquarters: Washington 25, D. C.

Nat S. Linden, *Director, Audio-Visual Office*
Phone: EXecutive 3-3300, ext. 3092

ACTIVITIES: This office plans and produces motion pictures to support programs of OEP.

FACILITIES: At the present time, all production is contracted to commercial film producers, or performed by other agencies of the Federal Government under OEP supervision. For all information on motion pictures, contact the audio-visual office in Washington.

DEPARTMENT OF COMMERCE

Washington 25, D. C.

• The U. S. Department of Commerce produces and circulates motion pictures dealing with those domestic and foreign subjects relating to the offices which are under the jurisdiction of this Department.

Business & Defense Services Administration

Nathao D. Golden, *Director, Scientific, Photographic and Business Equipment Division*
Phone: WOrth 7-4378

Geo. R. Donnelly, *Chief, Motion Picture & Photographic Products Branch*
Phone: WOrth 7-2778

Earl Young, *Motion Picture Analyst, Motion Picture & Photographic Products Branch*
Phone: WOrth 7-2911

• The Motion Picture and Photographic Products Branch was established to serve the motion picture and the photographic and motion picture apparatus, equipment and supplies industries. It performs many functions, some of the more important being to foster, promote, and develop the foreign and domestic trade of these industries. It provides market development counsel to producers and exporters as to where and how to cultivate and expand their overseas sales, acquire distributors, facilitate the acquisition of frozen remittances, and render assistance in other problem areas. It also participates in tariff and trade negotiations, and maintains constant surveillance of foreign trade trends, and periodically issues concise basic information releases for industry guidance. Furthermore, the Branch acts as the focal point for industry with reference to advice and guidance to other agencies and use of other agency facilities.

Coast & Geodetic Survey

G. P. Meredith, *Chief, Administrative and Technical Services Division*
Phone: WOrth 7-3266

• The bureau has produced, in the past ten years, five documentaries on the following subjects: general activities of the Coast and Geodetic Survey; tides and currents; wire drag; surveyors at work; and oceanographic cruise of Ship Explorer. Certain aspects of these productions were contracted to industry.

In addition, the Coast and Geodetic Survey recently collaborated on the National Academy of Science's *Planet Earth* series. Film information available through Technical Service Division.

National Bureau of Standards

William R. Tilley, *Office of Technical Information, Connecticut Ave. & Van Ness St. N. W., Washington, D. C.*
Phone: EMerson 2-4040, ext. 7093

• This Bureau produces scientific and technical motion pictures about the research programs of the National Bureau of Standards. Films are available from the above address.

Bureau of Public Roads

William F. Hall, *Chief, Photographic Section*
Phone: DUdley 2-3008

ACTIVITIES: This Bureau produces films on subjects pertinent to highway development and improvement, safety, and other related subjects for government agencies, state and local highway departments, engineering colleges and universities, and other interested organizations. Films are often produced in cooperation with these organizations and schools.

FACILITIES: In-house capability.

DISTRIBUTION: These films are available on a loan basis, with borrower paying transportation charges both ways, from the Chief, Motion Picture Branch, Bureau of Public Roads, Washington 25, D. C. Safety films on winter driving are available from the National Safety Council, 425 N. Michigan Blvd., Chicago 11, Illinois.

U. S. Weather Bureau

James M. Beall, *Public Information Officer*
Phone: 965-2400, ext. 456

Philip Crofford, *Film Librarian*
Phone: 965-2400, ext. 217

• The Weather Bureau occasionally contracts for films and film shorts to be used in warning programs associated with hurricanes and tornadoes. In addition, it provides technical assistance for films on weather related subjects. The Bureau has an extensive library of other weather films produced elsewhere; loan information is available from the Public Information Office or the Film Library.

Office of Publications and Information Bureau of International Commerce

Americo A. W. Favale, *Director, Graphics Division*
Phone: WOrth 7-5481

ACTIVITIES: This office produces films describing Government-industry cooperation in staging official U. S. Exhibitions at international trade fairs overseas.

FACILITIES: Footage is shot by staff photographers of the Graphics Division and films are produced on contract by industrial film companies.

DISTRIBUTION: Color films average 15 minutes in length and are available on a free loan basis by application to the Director, Graphics Division. These films are also available through Department of Commerce Field Offices. Black and White prints are available for TV use.

FILM NOW AVAILABLE: *The Trade Fair Story.*

Maritime Administration

Richard Shea, *Public Information Officer*
Phone: DUdley 6-4461

• This administration engages in limited film production to promote American Merchant Shipping. At present, the Maritime Administration is engaged in a cooperative project with the Atomic Energy Commission and commercial industry on a special film report about the N. S. Savannah, the world's first nuclear merchant ship. Films are available through the Director, Public Information.

POST OFFICE DEPARTMENT

Washington 25, D. C.

J. F. Kelleher, *Special Assistant to the Postmaster General, Public Relations (Public Relations films)*
Phone: STerling 3-3100, ext. 500

John D. Horton, *Training Staff Assistant, Bureau of Personnel (Training Films)*
Phone: STerling 3-3100, ext. 8023

ACTIVITIES: The Post Office Department currently uses training and engineering photo reports.

FACILITIES: This Department has no provisions for making films. All work is contracted and for information on contracts write:

Bureau of Facilities, Procurement Division
Room 4206, Post Office Department
Washington 25, D. C.

DISTRIBUTION: Public relations film clips for public service are distributed through U. S. Postmasters in all regions. Training films are distributed by Regional Directors in 15 regions.

What do you have to lose?

Her Majesty Marie Antoinette. A lady who had everything to lose—and did. In the early days of kinescope, producers also had quite a bit to lose, due to poor quality process and transfer work of their productions. Today, the trick is not to lose everything, but to keep loss of original quality to a minimum. At Acme Film Laboratories, it is possible to obtain "live" film quality due to Acme's revolutionary techniques and technological advances which have been as dynamic as the industry itself. In keeping abreast and ahead of the state-of-art, Acme has made many modifications to equipment and services. This "in-house" capability has been obtained by years of experience and the acquisition of most modern equipment and skilled engineers and technicians. Today, Acme is the only motion picture laboratory offering all standard lab services plus the added accommodations of videotape duplicating and videotape transfer to film. Progress such as this never stops at Acme...a firm dedicated as the pace-setter of the industry. For complete information and prices, write: Acme Film Laboratories, 1161 North Highland Avenue, Hollywood 38, California.

U S PUBLIC HEALTH SERVICE

cal and Sensory Diseases." Other specialized reference works are in production. Productions: Motion pictures currently in production include *Epidemiology of Salmonellosis*; *Simian Malaria in Man*; *Radiation Fallout Protection in Hospitals*; *Immune Heart Murmurs in Children*; *Mental Status Examination*; *Biology and Control of Flies*; *Plastic Isolators*; *The Course and Management of Syphilis*; *The National Library of Medicine*; *Listeriosis*; *Fluorescent Antibody Technique*; and *Arthropod-Borne Encephalitis*.

Social Security Administration Baltimore 35, Maryland

Roy L. Swilt, *Information Officer*
Phone: 944-5000, ext. 2157
Wallace Kendall, *Chief, Production Branch, Office of Information*
Phone: 944-5000, ext. 2955

ACTIVITIES: The Social Security Administration produces and distributes films on Old Age, Survivors and Disability Insurance. These are public information films designed to explain the Social Security Law. All films are designed for TV audiences, and both spots and film shorts are produced.

FACILITIES: The Administration, located in Baltimore Headquarters, has a small studio and limited production facilities. Most film work is contracted to commercial producers.

DISTRIBUTION: Through 600 District Offices throughout the country, prints may be obtained on a free loan basis. Prints may also be bought.

Vocational Rehabilitation Administration

W. Oliver Kinnannon, *Chief, Publications and Reports Service*
Phone: WOrth 2-2040

• This office produces TV spots on vocational rehabilitation for state agencies which then distribute them through local TV. The office in May, 1962 released a major film, *To Live Again*.

FEDERAL A-V PROGRAMS

DEPARTMENT OF INTERIOR

Washington 25, D. C.

• The Department of Interior produces films which are concerned with the management, conservation and development of natural resources in every section of the Nation. Films are available from the bureau in which they have been produced.

Office of the Secretary

Harlan Wood, *Division of Information*
Phone: REpublic 7-1820, ext. 3171
Inquiries concerning the use of Department of Interior films for television should be addressed to this office.

The Bureau of Mines

A. Nicholas Vardac, *Motion Picture Representative*, Bureau of Mines, Washington 25, D. C.

Phone: REpublic 7-1820, ext. 3359

Meyer Reiness, *Chief, Bureau of Mines Distribution*, 4800 Forbes Ave., Pittsburgh 13, Pa.

ACTIVITIES: The Bureau of Mines has a broad film program dating from about 1920. Motion picture subjects deal with natural resources of states and areas and with mineral commodities including metals, non-metals, coal and petroleum.

FACILITIES: All films are made in cooperation with private industrial firms which pay production costs and select commercial film producers. The Bureau maintains no production facilities.

DISTRIBUTION: About 5,000 prints of films are distributed to the public on a free loan basis from the central film distribution center of the Bureau of Mines, 4800 Forbes Ave., Pittsburgh 13, Pa., and from depositories in 40 states. Annual number of showings is 225,000. Most films are cleared for free TV use. Single or block bookings arranged. Catalogues available.

PRODUCTIONS: Films in current production include: *The World of Phosphorous*; *National Synthetic Rubber*; *The Story of Potash*; *Helium*; *Washington and Its Natural Resources*; *Coal*; *Casting Iron*. Educational TV Program Series: The following television series are available: *Down to Earth*; *States of the Union*; *Out of the Earth*.

The Bureau of Reclamation

Ottis Peterson, *Assistant to the Commissioner, Information*
Phone: REpublic 7-1820, ext. 4662

ACTIVITIES: The Bureau of Reclamation produces one or two pictures a year on water resource development in the seventeen western states. These films are usually "low budget," sound-color films which run 28 minutes for TV use. Film catalogs are available from regional offices and from Washington D. C. office.

FACILITIES: Most of the film work for the Bureau of Reclamation is contracted by the appropriate regional office commercial producers. There are seven regional offices, supervised by the Washington office.

DISTRIBUTION: Each of the seven regions, and the Washington office, has its own distribution channels. On occasion, prints are loaned to educational institutions for short periods of time.

PRODUCTIONS: Recent productions include: *Key to the Future*, a film about the Colorado River storage project in Utah, Wyoming, Colorado and New Mexico; *Operation Glen Canyon*, which documents construction of Glen Canyon Dam on the Colorado River in northern Arizona; *Water for the Valley*, the story of Central Valley project, between the coastal and Sierra ranges in California. (Concluded on Page Seventy-Two)

• These listings of U. S. Government audiovisual activities and executive personnel are compiled with the cooperation of all U. S. departments.

CAL DUNN STUDIOS, INC.

141 WEST OHIO STREET, CHICAGO, ILL. - 644-7600

Now You Can Dial My Palm Tree

Voodoo drums have given way to progress on lovely St. Thomas. So — at 774-2770 — I'm as close as the hand on your phone.

Call me Collect when you're ready to start the script for your next motion picture, slide film, or meeting program, and I'll reserve for you the palm tree next to mine.

Clients have found it balmy here when the States are shivering, breezy and cool when they're sweating; and only four hours non-stop from the East Coast!

Business travel was never more economical! And such a wonderful way to shed your tensions *and* script problems.

But — if you really *can't* get away — I'm in the States on assignments about half the time, and *then* you can reach me through the Overseas Press Club in New York.

Clients have discovered that writing under a palm tree reflects the low overhead. And where else under the sun — the inspiring tropical sun — can you find creative writing backed by so much experience?

Oeveste Granducci

The Bureau of Land Management

Harmon Kallman, *Information Officer*
Phone: REpublic 7-1820, ext. 3609

• Three films are available from the Bureau's Washington, D. C., office and from 11 State offices in western states.

Available for loan and for TV showings are: *Our Public Lands*, a 28-minute color film on conservation and development of the national land reserve; *Alaska, Land to Grow On*, 28-minute color film on public lands and resources in Alaska; *Watershed Conservation*, demonstrating water conservation on the national land reserve; and *Rogue River Country*, 28-minute color film about the recreational opportunities and wealth of natural resources found in the Rogue River Valley of southwestern Oregon. State BLM offices having film libraries are: Portland, Sacramento, Phoenix, Reno, Salt Lake City, Santa Fe, Denver, Cheyenne, Boise, Billings, and Anchorage.

The Geological Survey

J. O. Kilmartin, *Chief, Map Information Office*
Phone: REpublic 7-1820, ext. 2446

This department has a small collection of training films of a technical nature on topographical survey subjects. The films were produced in cooperation with the Pan American Institute of Geography & History, and are circulated through the Washington, D. C., office.

U. S. Fish & Wildlife Service

Elliot A. Macklow, *Chief, Audio Visual Services*, Branch of Marketing, Bureau of Commercial Fisheries, Fish & Wildlife Service.
Phone: REpublic 7-1820, ext. 2151

ACTIVITIES: Using commercial contractual motion

FEDERAL A-V PROGRAMS

picture facilities, this organizational unit plans, produces and distributes fishery marketing and educational motion pictures sponsored by both Government and industry. Other audio-visual materials such as fishery television spot announcements, radio spot announcement discs, slides, specialized publications, etc. are also produced and distributed by the Unit.

FACILITIES: Commercial contractual motion picture facilities.

DISTRIBUTION: Utilizing about 200 Government and private film libraries, about twenty fishery motion pictures are distributed free of charge upon request. Provision has been made so that most of the films are cleared for television, although special permission is required before telecasting. Stock footage is not available. A catalog entitled *Fishery Motion Pictures* may be obtained free of charge upon request. A central Audio-Visual Services film library is maintained in College Park, Md. Films and information may be obtained by writing Audio Visual Services, Bureau of Commercial Fisheries, Post Office Box 128, College Park, Maryland.

PRODUCTIONS: Recent productions include: *Sponge-Treasure From the Sea*, an Edinburgh Film Festival honor film; *Salmon-Catch to Can*; *Fishing Five Great Lakes*. A documentary motion picture, *Watermen of Chesapeake*, sponsored by the States of Maryland and Virginia, will be released early in 1963.

An Exclusive Business Screen Feature

• These extensive listings of audio-visual activities in the Federal Government are an *exclusive* feature of each Annual Production Review edition.

FEDERAL AVIATION AGENCY

Office of Management Services Audio Visuals Section

16th & Constitution, Bldg. T-5, Room 1046
Washington 25, D. C.
Phone: WOrth 7-4628

Dennis Day starring in the 1962 Conoco Sales Managers Conference

IN LAWRENCE, KANSAS?

Seems an odd place to go for a business film.

And if you mean *odd* in the Webster sense of "not usual or ordinary" — it really is.

Centron Corporation produces films in Lawrence primarily because it happens to be a fine place in which to live and work.

It's not only that none of our creative staff lives more than five minutes from the studio, or that it's a university town, or that it's centrally located... the important thing here is that people have time to think.

That's one reason why films produced by Centron are eye-openers when they meet others in competition. In 1962 alone, they won a coveted Blue Ribbon Award at the American Film Festival (for the third consecutive year), a Chris Statuette at the Columbus Film Festival, and 12 other awards.

Centron films, slidefilms and sales meetings are produced for the

American Hospital Assn., American Medical Assn., American Motors, Buick Division of General Motors, Carrier Corp., Chrysler Corp., Continental Oil Co., McGraw-Hill, Monsanto Chemical Co., Phillips Petroleum Co., U.S. Public Health Service and Kansas State Board of Health, Southwestern Bell Telephone Co., and other names worthy of being dropped into a conversation.

We're 40 minutes from the Kansas City airport. We can go anywhere in a hurry and we're easy to reach.

Lawrence, Kansas, is a great place to have your films and sales meetings produced.

And thinking makes it so.

For sample films or further information contact...

FEDERAL AUDIO-VISUAL PROGRAMS:

DEPARTMENT OF THE TREASURY Washington 25, D. C.

Internal Revenue Service

Charles M. Lammond, *Public Information Officer*. Phone: WOrth 4-4037
John Burleson, *Audio Visual Training Officer*. Phone: WOrth 4-3465

ACTIVITIES: The Internal Revenue Service prepares, from time to time, motion pictures for either internal or external use. Those prepared for training purposes are produced under the jurisdiction of the IRS Training Division and are used at district and major local offices throughout the United States to instruct new personnel or those being assigned to different tasks in the work they are to undertake. The *Public Information Division* supervises the production of films and television spot announcements intended to acquaint taxpayers throughout the nation with matters of presumed interest to them involved in IRS operations.

FACILITIES: The public information films of IRS are produced professionally, usually utilizing the agency's own office facilities and personnel for background scenes but hiring professional talent for action bits, narration, etc. Laboratory production facilities are contracted to complete the film after the first rough cut. Training films are sometimes produced with IRS personnel and sometimes with professional talent.

DISTRIBUTION: The 62 district offices, and several of the larger local offices, distribute IRS film productions. All clearances and releases have been obtained for general showing of all IRS films.

PRODUCTIONS: The Internal Revenue Service has recently expanded its list of available films. It now includes the following titles: *Then and Now*, 27½ minutes in color, 100 years of Internal Revenue history. *It All Adds Up; No More — No Less; Your Farm — Your Tax*. The foregoing 27½ minute, black and white films deal with best methods of preparing Forms 1040, 1040-A and Farmers return. *Push Buttons and Taxes*, 10 minutes in color, is the story of automatic data processing in Internal Revenue operations. *The Inevitable Day*, 25 minutes, color and black & white; *Since the Beginning of Time*, 27½ minutes, color and black & white. These two films deal with operations of Revenue Service of probable interest to taxpayers, which show the relationship of the individual taxpayer to the various developments of Internal Revenue. *Insight*, 16 minutes, black & white. An interview with Commissioner Mortimer M. Caplin, in which he outlines plans and policies of Internal Revenue of probable interest to accountants, attorneys and others with specific interest in these phases of the Service's operation. The foregoing films are all available in 16mm. In addition, Internal Revenue has two 10-minute color films in 35mm only, suitable for theatre use. These are condensed versions of *Then and Now* and *Since the Beginning of Time*.

United States Coast Guard

Don Farran, *Chief, Motion Picture & TV Branch, Public Information Division*
Phone: WOrth 4-5305
Ch. Phot. H. E. Whitwer, USCG,
Assistant to Chief

ACTIVITIES: The U. S. Coast Guard produces information and training, as well as recruiting films. The majority are in 16mm color-sound with running time of 14 or 28 minutes. For the past three years, CG films have consistently been selected by the United States government for entry in foreign film festivals, and have won a number of awards, three films having been sent to the Edinburgh International Film Festival in 1961. In 1962 a Coast Guard film, *Firefighting Aboard Tankers*, won the Bronze Plaque First

Award in its category in the National Committee on Films for Safety contest.

FACILITIES: In-house capability. The CG uses its own facilities, including writing, directing, shooting, and editing to final cut of its productions.

DISTRIBUTION: Distribution of the films is made through the various Coast Guard District offices and from Headquarters to television stations, schools, colleges, various organizations providing information to their members. Usually, the films are cleared for non-theatrical and television use, and no charges are made for use. An annual Film Catalog is issued by Coast Guard Headquarters and separately by each District office.

PRODUCTIONS: Recent subject matter of the films has ranged widely across the world, including LORAN stations on Pacific isles, discovery operations in the Arctic and Antarctic, Search and Rescue, International Ice Patrol, Aids-to-Navigation, Merchant Marine Safety, small boat safety operations, including training films on navigation and rules-of-the-road, and the Law Enforcement responsibilities of the Coast Guard.

U. S. Savings Bonds Division

Jacob Mogelev, *Promotion Manager*. U. S. Savings Bonds.
Phone: WOrth 4-5702

• The U.S. Savings Bonds Film Program is completely dependent on the volunteer support from the non-theatrical and theatrical film industry and other industries. Over the past 20 years it has received over 1 billion dollars worth of promotional support.

AGENCY FOR INTERNATIONAL DEVELOPMENT

Communications Resources Division
State Department, Washington 25, D. C.

Gerald F. Winfield, *Chief*
Phone: DUDley 3-7143

V. M. Commerce, *Motion Pictures*
Phone: DUDley 3-7131

ACTIVITIES: This organization is composed of a group of specialists whose prime duties are to provide professional technical advice and assistance to a large number of functionaries working in conjunction with approximately 90 U.S. AID Missions in various cooperating countries of the free world. They are responsible for Resources program within AID, including all communications media instruction and training, the development of the media of mass communications, and the training of personnel in the professions and skills of technical information. The responsibility includes planning, development and use of communications media ranging from hand-made indigenous devices through more complex media such as motion pictures, radio and television. Such support extends itself into all technical fields with which AID programming is involved.

FACILITIES: With respect to film productions, some missions have complete professional staffs and facilities; others vary widely in degrees of completeness. All rely on the Washington staff to a greater or lesser extent for "backstop" guidance.

DISTRIBUTION: Except for a limited number of films produced under contract in the United States, motion pictures, film strips and slides are made in cooperating countries and are designed for overseas distribution. Approximately fifty films have been selected for showings to Educational and Civic groups in this country. They are available upon request from Educational Film Libraries in 10 geographic locations. Further information is available from AID, or the Educational Film Library Association, 250 West 57th Street, New York 19, N.Y.

thanks
to you...

... happy birthday for us! So we'll throw tradition to the winds and send our greetings on to you—our partners in production. You have served us well in the last ten years. Without you this happy milestone would not be possible.

Phone: WOrth 2-1728

ACTIVITIES: This branch produces and distributes educational and technical public release films on space and aeronautics.

FACILITIES: Motion picture requirements are fulfilled through in-house capability, contractors (NASA Centers and industry), and industry sponsored programs.

STOCK FILM: Requests for NASA stock footage reviewed and fulfilled through Code AFEE-3, NASA Hq.

DISTRIBUTION: NASA films are loaned through NASA Hq. Centers and offices.

PRODUCTIONS released in 1962 include: *The Mastery of Space; Friendship 7; Your Share in Space; Saturn a Giant Step to the Moon; Steps to Saturn; Before Saturn; Saturn Propulsion System; Aerial — the First International Satellite; Astronaut John*

FEDERAL A-V PROGRAMS

Glenn Speaks to American Youth; Voyage of Friendship 7; Exobiological Safety; Clouds of Venus; and many other technical films.

UNITED STATES INFORMATION AGENCY

Washington 25, D. C.

Alan Fisher, *Chief, Foreign Production Div.*
Phone: DUDley 3-5524

ACTIVITIES: USIA acquires and distributes motion pictures in the overseas information program which it conducts. These films show American life and support the United States foreign policy.

FACILITIES: USIA contracts with private commercial companies to produce films to specifications and under supervision of the motion picture service. In addition, the agency contracts to use selected films in overseas programs.

DISTRIBUTION: In addition to theatrical distribution for many of these films, the films reach a wide non-theatrical audience through the 213

film operation centers at the U. S. Information Service offices overseas. In addition to the 213 film libraries approximately 350 mobile motion picture units are used to show the films. The address of the local U.S.I.A. can be obtained from any American embassy or consulate. In the United States, USIA films are available from Norwood Studios, 926 New Jersey Avenue, N.W., Washington 1, D. C., recently awarded the contract for distribution of U. S. Government films

VETERANS ADMINISTRATION

Washington 25, D. C.

Mrs. Grace Moore, *Administrative Assistant Visual Aids Division*
Phone: DUDley 9-2715
Charles H. Glazer, *Chief, Motion Pictures, Visual Aids Division*
Phone: DUDley 9-2724

ACTIVITIES: Veterans Administration film programs are controlled through the Manager, Administrative Services, which produces and procures educational, training, informational, technical, and medical films for use within the agency, on a loan basis and for use by participating hospitals, schools, etc.

FACILITIES: VA films are produced in collaboration with the Department of Agriculture Motion Picture Service. VA has no in-service capability.

DISTRIBUTION: There is a central agency library in the Washington headquarters of the Veterans Administration, which controls and issues copies of all films used by this agency. There is no rental fee.

PRODUCTIONS: The most recent VA film is titled *A Design for Progress*, and depicts processing of veterans' claims through the Automatic Data Processing System.

CALLING ALL SALES MANAGERS!

NOW ANY SLIDE
PRESENTATION
COMES TO LIFE—

It's almost animated . . . with SELECTROSLIDE SPEED DISSOLVE SYSTEM

For professional big-screen presentations two 1200-watt SELECTROSLIDE projectors are teamed to the system to deliver an instantaneous change-effect on the screen without any dark period between changes. No break for magazine reloading either. Controlled by wire, or radio remote-control (as was done with the "Slide Commander" at the recent NAVA General Sessions) with such startling results.

Write for complete details on this — and other models, and applications — also the name of your nearest SELECTROSLIDE Distributor.

FEDERAL A-V PROGRAMS

UNITED STATES
ATOMIC ENERGY COMMISSION

Division of Public Information

Audio-Visual Branch

Washington 25, D. C.

• The Audio-Visual Branch of the Atomic Energy Commission has as its primary function responding to requests from the public media in all the audio-visual fields for assistance in the preparation of films, stills, and other audio-visual materials on atomic energy.

Edwin L. Wilber, *Branch Chief*
Phone: HAZelwood 7-7831, ext. 5365

Elton P. Lord, *Deputy Chief*
Phone: HAZelwood 7-7831, ext. 5476

ACTIVITIES: This branch plans and carries out audio-visual and still picture projects to advance specific Commission Programs, and acts as advisor to Commission and contractor personnel in Washington and nationwide on audio-visual problems and projects. This branch also places Commission- and contractor-produced motion pictures into loan and commercial sale channels, determines the content of the 10 domestic and 4 overseas film libraries, and issues popular-level and professional-level film lists.

FACILITIES: AEC has no motion picture production facility or motion picture laboratory, but uses Government and/or commercial services.

DISTRIBUTION: AEC operates an 8,500 still photo library, and distributes films through 10 domestic film libraries which cover particular geographical areas. All films are for free-loan. The Commission also has four overseas libraries at its offices at the U. S. Embassies at London, Brussels, Tokyo and Buenos Aires, stocked with semi-technical and technical films. The Brussels and Buenos Aires libraries have about 50 films each in French and Spanish respectively. Information on libraries available from Washington office.

STOCK FOOTAGE: The Commission has more than 120,000 feet of 35mm black-and-white unedited film footage on peacetime uses of atomic energy available for purchase. Information may be obtained from Washington office. Color stock footage is also available from any of the completed documentary films produced by or sponsored by the government. Films may be borrowed from libraries in geographical areas for footage counts prior to purchase of duplicating materials from the various laboratories holding the originals. Unedited stock film footage in black-and-white and color on nuclear or thermonuclear detonations sold at Lookout Mountain Air Force Station, USAF, 8935 Wonderland Avenue, Hollywood 46, California.

☆ Not an agency of the U. S. Government but an active user of films is:

ORGANIZATION FOR ECONOMIC COOPERATION & DEVELOPMENT

Phone: STerling 3-0400, ext. 839

• The Library of Congress has an unrivalled collection of American films dating from the infancy of the motion-picture industry, which it has acquired through the operation of the copyright law and through gifts, and it also has a large body of foreign films turned over to it as a result of wartime seizure. The Library's activities in the motion-picture field include the registration of claims to copyright, the acquisition of films, the cataloging of films and related bibliographic service on the collection.

The Library's Copyright Office has registered claims to copyright for motion pictures since 1894, when the first examples of this medium were deposited in the Library in the form of photographic paper prints; since 1912 the copyright law has provided for the registration and deposit of motion pictures as such. Generally, under the provisions of the motion-picture copyright agreement between the Library of Congress and the motion-picture proprietors, the films are returned to the copyright proprietor by the Library after registration, but the Library has the right to claim the deposits for its collections later.

The Copyright Cataloging Division of the Copyright Office prepares a semi-annual *Catalog of Copyright Entries: Motion Pictures and Filmstrips*, which lists all such materials registered for copyright in the United States and which is published by the Library and sold by the Government Printing Office. It has also prepared four cumulative catalogs entitled *Motion Pictures*, which together cover registrations of films for the years 1894-1959 and which are for sale by the Government Printing Office.

In addition, the Library's Descriptive and Subject Cataloging Divisions catalog educational films, using data submitted largely by producers and distributors, and the Library publishes this cataloging information in two useful forms for purchase by other libraries or individuals. One form is the printed catalog card, which any film-user may purchase to establish his own card-catalog for the control of his collection and for the dissemination of film information. The other is a book-catalog reproduced photographically from the printed cards and containing a detailed subject-index, adequately cross-indexed; entitled *Library of Congress Catalog - Motion Pictures and Filmstrips*, this publication is issued quarterly and in annual cumulation, and it also appears as a volume in the quinquennial cumulation of the Library's *National Union Catalog*. Both the printed catalog cards and the book-catalog may be purchased from the Card Division, Library of Congress, Washington 25, D. C.

The Library's collection of motion pictures comprises more than 68,000 reels and is in the custody of the Prints and Photographs Division in the Reference Department. It is primarily an archive in nature, and reference service is limited to scholarly research. The Library does not lend motion pictures, but some films may be copied under certain conditions: copying requires the signing of a standard loan-agreement concerning the selection of laboratory, the clearance of copyright, insurance coverage, and the copying of equivalent footage for the Library.

The National Archives

May E. Fawcett, *Motion Picture Branch, National Archives*

Phone: WOrth 2-2513

• This branch has an increasing amount of retired government motion pictures (about 50,000 reels at present). Films are available for viewing by anyone. No films are reproduced without the consent of the depositing agency.

The Washington Film Commentary:

The U. S. Chamber of Commerce Shows "The Great Tax Debate"

... While businessmen in all brackets argue the pros and cons of a tax cut, a timely documentary, titled *The Great Tax Debate*, has just been released to the public by the United States Chamber of Commerce. The 28 minute film, designed for television and business groups, seeks to present all sides

President Ladd Plumley discusses tax problems in film.

of the administration's proposal with emphasis, of course, on the Chamber's point of view.

The film has been cut around President Kennedy's Economic Club speech in New York where he first urged Americans to consider the effect of reduced taxes on the national economy. In news-reel style, interviews with Walter Reuther, president of the United Auto Workers, and Senator Harry Byrd, chairman of the powerful Senate Finance Committee, build up the case for a tax cut.

The Great Tax Debate lays heavy stress on the European point of view, too. Ladd Plumley, president of the Chamber of Commerce, figures prominently in the film, as he discusses with the European heads of state and financial experts: 1) the future of the American economy, 2) the need for tax reduction in the U. S., 3) European concern over our budget deficits, 4) the soundness of the American dollar, 5) and the impact on the U. S. of the European Common Market.

Those with significant points of view include Professor Walter Hallstein, president of the European Common Market, Prime Minister Amintore Fanfani of Italy, Reginald Maudling, Chancellor of the Exchequer of Great Britain, and others.

This film can be ordered from the News Department, United

States Chamber of Commerce, 1615 H St. N.W., Washington 6, D. C.

Schweitzer Visit Inspires Fine

Mark Evans Talk to Film Council

... There is still a lot of discussion around Washington about the recent Film Council meeting where Mark Evans, nationally-known Washington radio and TV personality, unexpectedly inspired a seasoned group of government filmmakers and capital city businessmen.

Evans, who is vice-president of Metromedia, the parent company of the Metropolitan Broadcasting Corporation, exhorted businessmen to "revitalize ethics" and maintain a "reverence for life"; at the same time, he spliced his lively speech with footage from his

"THE INFORMATION OPERATOR"

Today, with so many telephone calls being dialed, the most frequent personal contact the Customer has with the Company is often the Information Operator. Hence, the quality of the service she gives, and the tone in which she gives it, is increasingly influential in shaping the Company's "image." This picture develops a new training pattern; carrying its specific "Methods" instruction on a story vehicle of emotional motivation, attitude uplift. The colorful, occasionally poignant, even amusing, story action permits circulation of what is fundamentally a training film to public audiences, who may gain from it a new understanding of the skill and judgment that underlies a service they take for granted. Sponsor: Amer. Tel. & Tel. Co. 16mm; EK Color. Photoplay format. 30 minutes.

film, *Albert Schweitzer, the Man of Lamborene*...

"There's a little bit of Schweitzer in everybody. Businessmen should let it come out," he told the filmmakers whose guests included ranking chaplains from the military services, MBC, ABC, and CBS network executives, and others. "Remember the tragedy of life is what dies inside a man while he lives."

Evans' color film about Schweitzer, which was produced in two weeks under unbelievably difficult weather conditions in Gabon. Africa, documents the arduous life of the now famous, publicity-shy, Lutheran minister's son, who moved to the jungles to atone for the ills of the whites to the blacks.

Here the great doctor, organ builder, authority on Bach, and Nobel Peace Prize winner—who has earned doctorates in medicine, philosophy, theology, and music—administers a crude, 300-bed hospital in the wilds.

Without modern conveniences, confronted with incredible disease, poverty, and the lethargy of the natives, he and his dedicated work-

Albert Schweitzer's thoughts are recorded by Mark Evans...

ers live in harmony with man and beast. Albeit, Evans says "he has a sense of humor second to none."

Evans currently does special documentaries and has his own weekly one-hour show on Sunday nights over MBC. He has lectured and presented his own films, for five consecutive years, to vast National Geographic audiences at Constitution Hall.

Last December, for instance, 7,000 fans turned out in a driving rainstorm for his film-lecture on *Washington: Land of Contrast*. More recently, he has started production of a film for Metromedia which will show the depth and scope of his company.

Sponsored Tourism Films Aid U. S. Travel Service Abroad

... The U. S. Travel Service, Department of Commerce, was created by Congress to attract self-sponsored business and pleasure visitors to our shores. In achieving its mission, USTS employs nearly all of the modern advertising and public relations tools which would be used in any successful campaign to promote a new product or idea.

According to the directors of the USTS offices in London, Paris, Frankfurt, Rome, Sao Paulo, Bogota, Mexico City, Sidney and Tokyo, motion pictures are about the most effective tools for carrying the world-wide "VISIT USA" message to potential visitors. A recent USTS survey of airline passengers departing from the Honolulu International Airport, after visiting the USA, revealed that 18% had been attracted to our nation by travel movies and advertising.

USTS now has in circulation overseas approximately 15 privately produced films on tourist attractions throughout the U.S.A. These films have been given or loaned to USTS for overseas use.

The Travel Service welcomes an (CONTINUED ON PAGE 86)

opportunity to provide its nine overseas offices with good films on America's scenic beauty, recreation spots, and tourist attractions. Such movies must be of high photographic quality and capable of interesting their viewers in visiting the U.S.A. Foreign language sound tracks are most desirable. Films with English narration are suitable for foreign audiences if they tell their story visually rather than depending heavily upon spoken explanations.

Producers and sponsors with films which might be incorporated in the "VISIT USA" campaign should contact Mr. Will Arey, United States Travel Service, 1666 Connecticut Ave. N.W., Washington 25, D.C.

* * *

Carl Turvey, Aide to USDA Motion Picture Service, Dies

. . . Carl Francis Turvey, consultant and technical advisor to the chief of the Motion Picture Service, U. S. Department of Agriculture, succumbed in Washington recently after a long illness. He was the recipient of honors for design of photographic equipment. 📷

Federal Supply Service Plan Expands A-V Equipment Sales

. . . In a recent move which promises to develop increased sales for industry as well as substantial savings for the Government, the Federal Supply Service has greatly expanded the range of items contained in the Federal Supply Schedule, FSC Group 67, Part III, covering Photographic Equipment.

This expanded coverage is especially noteworthy in the classification for Photographic Projection Equipment. In this category, the multiple award method of procurement makes a wide selection of audio-visual equipment available to Government agencies. These agencies can select from many kinds of equipment which manufacturers are able to offer at the lowest possible price.

Heretofore, Government agencies either (1) accepted an item which had been chosen by competitive bid, or (2) wrote a letter to show cause why it was not suitable and then sought a similar item on the open market.

Under the multiple award method, each contractor furnishes the Government agencies with catalogs or price lists describing his

product, plus the necessary ordering data. The contract may be amended during the contract period to provide for new items.

This provides industry with an opportunity to market new or improved products and enables the Government to obtain at favorable prices the latest equipment. An additional benefit to industry is the publicizing of company name and products through official distribution of their catalogs, price lists and descriptive literature to the majority of Government procurement agencies throughout the 50 states and the District of Columbia.

Manufacturers with equipment suitable for Government use can contact General Service Administration officials, who will consider all offerings. Heading the GSA's photographic section is Robert A. Nolan, Chief, Office and Photographic Equipment Branch, Procurement Operations Division, Federal Supply Service, General Service Administration, 7th and D Streets, S. W., Washington 5, D. C. Working with Mr. Nolan on multiple award contracts are Robert E. Hughes, John A. Lusk and Samson Schechter.

Broadcasting Foundation to Screen Eurovision Entries

☆ The Broadcasting Foundation of America, international division of the National Educational Television and Radio Center, will screen entries for the Eurovision Grand Prix of Television Films 1963.

This is the fourth consecutive year that B. F. A. has been asked by the European Broadcasting Union to organize American participation in the competition, which takes place this year in May during the 16th International Film Festival in Cannes. The final selection of American entries will be made by a panel of distinguished judges appointed by B. F. A.

Each nation may enter one film either fiction or documentary. The film must have been produced during the 18th months prior to the May festival and must not have been entered previously in an international competition.

Purpose of the Eurovision Grand Prix is to promote close collaboration between the film and broadcasting industries by encouraging the production or co-production of works of distinction designed for television. For this reason, eligibility is limited to films produced by a film company or a "films-for-TV" company, or those co-produced by a film company and a broadcaster.

Mitchell Camera Corp. Gets \$300,000 Contract From CBS

☆ Mitchell Camera Corp., Glendale, Cal., has been awarded a contract "in excess of \$300,000" by the Columbia Broadcasting System for purchase of a quantity of professional 16mm single system reflex cameras of unusual advanced design.

The 16mm cameras purchased for CBS News are similar in concept to Mitchell's new Mark 35mm reflex camera currently used for a Technical Achievement Award at the Academy of Motion Picture Arts and Sciences.

The cameras purchased by CBS record both picture and sound simultaneously on the same film and will be used throughout the world by CBS for the production of "on the scene" news events and documentary interview type film programs.

Mitchell also announces it has been awarded an Army contract for design and development of special precision dual 70mm surveillance camera. Work will be done for Aberdeen Proving Ground, Maryland, an element of the Army Material Command.

F P A AWARDS

Details on the Competition

The IFPA film award competition will again be an important part of the Annual Convention, Awards Chairman and Chapters' Vice-President Anthony Gorsline announced.

As in previous years the Convention will be climaxed by the Annual Awards Banquet traditionally attended by the membership and special guests selected from among the leaders of the theatrical as well as non-theatrical film industry. The Banquet ceremonies include the formal presentation of awards.

Chapters to Aid Judging

This year's judging for the two finalists in each category will be carried out by the membership-at-large and coordinated by the five local IFPA Chapters. Voting on finalists will again be conducted at the Annual Convention, on the evenings of June 13 and 14, at the Ambassador Hotel, Los Angeles, site of the Convention.

It is important that entries be submitted as soon as possible so that pre-screening sessions may begin without delay, Gorsline explained. Films may be submitted by any Active IFPA member. Entry fee is \$10 for each film, and there is no limit on the number of films an Active member may submit.

Categories for this year's competition will include: Public Information; Technical Information; Sales Promotion; Training; Orientation and Indoctrination; and Out-Plant Production. Films produced out-of-plant are eligible for competition if they have been produced for an Active IFPA member, and if they are submitted by that member. They will be judged in the Out-Plant Production Category.

All 1962 Films Eligible

Any film completed for release in the calendar year 1962 is eligible. However, if a film was produced earlier, and was originally under a government security classification, it will be considered eligible if it has been declassified during the calendar year 1962. This change in eligibility has been made to accommodate the many classified films of award caliber which could not be publicly screened.

Deadline for entry was March 1, 1963. For further information write to Anthony Gorsline, IFPA Awards Chairman, Management Systems Corporation, 2043 Westcliff Drive, Newport Beach, Calif.

THE INDUSTRY FILM JOURNAL

National News-Letter of the Industry Film Producers Association

Fourth Annual Conference to Open June 13th

Program, Exhibits and "Cindy" Awards at the Ambassador

IFPA 4th Annual Conference Set for Ambassador Hotel

☆ The Los Angeles Ambassador Hotel, one of the most famous convention centers of the West, has been selected as the site of the Fourth Annual IFPA Conference. The conference will open on the evening of Thursday, June 13, and continue on Saturday, June 15.

A program of prominent speakers and a film industry trade exhibit will highlight the annual event. Speakers will include leading industry film makers and business and scientific leaders from many parts of the nation. The IFPA national board of directors is working closely with Jack R. Goetz, Conference Vice-President, to plan a program that will be both thought-provoking and entertaining.

Trade Show an Integral Part

The trade show, an integral part of the conference, will be held in the Ambassador's Boulevard Room, one of the largest of the hotel exhibit areas. Represented in the exhibit will be suppliers of nearly every important motion picture and audio-visual product.

Display Enterprises, Los Angeles, has been engaged by IFPA to plan and implement all trade show activities, with Mickey E. Slater acting as IFPA's official representative in all matters pertaining to the exhibit.

Awards Presented on June 15

Cinema industry "Cindy" awards for the best industry produced films of 1962 will be made at the annual awards banquet on the final night of the conference. On the same night, the Jay Gordon Memorial award will be made for outstanding individual contribution to the industrial film industry. Several special awards will be given in recognition of other important achievements in the industrial motion picture and television field.

According to Anthony L. Gorsline, Chapters Vice-President and chairman of the awards competition, the 1963 film contest will be broader in scope than in the past years, and will involve the voting participation of every IFPA chapter. Gorsline feels that national

participation will help make the "Cindy" awards more representative of the judgment of the entire IFPA organization.

* * *

Southern California Chapter Launches a Membership Drive

☆ An aggressive drive for new IFPA members has been launched by the Southern California Chapter, reports Chapter Membership Chairman Ernest A. Whitten.

In a recent mailing to prospective members, Chairman Whitten invited in-plant production people to join and become active in local IFPA Chapters, in order to help serve the following aims of IFPA: to elevate the state of the art in industry film production; to exchange ideas and information of benefit to all industry film makers and to build the stature of the professionals who produce motion pictures within industry.

* * *

Screen Cindy Award Winners at No. Calif. Chapter Meeting

☆ Noteworthy in a recent meeting of the Northern California Chapter was an increasing number of award-winning films produced by the membership.

The evening program, attended by over 50 members and wives, including the screening of a number of 1962 Cindy Award films.

Two of the award films were produced by Northern California

Pictured (l to r, standing) are: No. California Chapter officers Ed Carroll, Vin Agar, Chairman Mitchell Rose and Ray Jaeger.

Chapter members. Chapter Chairman Mitchell Rose announced. These included Aerojet-General's *Interior Ballistic Computer Program*, and United Airlines' *In Your Hands*.

Also screened was the Southern Pacific's *Revolution on the Right-of-Way* produced by Chapter member Ed Carroll. This film was winner of the Industrial Photography First Award.

Members of IFPA Commended for Program on Electronics

☆ Several members of IFPA received letters of commendation and appreciation from Irving M. Levin, director of the San Francisco International Film Festival for their participation in a program on electronic motion pictures.

Robert Steel, UNIVAC San Diego Engineering Center; Roger Tilton, president of Roger Tilton Films, Inc., San Diego; Bradley Kemp, president, TeleView Recording Services, Hollywood, and John Vrba, vice president, KTTV, Hollywood, participated in the recent Festival panel discussion on the potential of video-film as a new communications tool.

Highlight of the program was screenings of especially made video films produced by Tilton, Kemp and KTTV in both 16mm and 35mm black and white film samples.

More than 100 attended the program which was followed by a question and answer period. Tilton and William Palmer of San

Fire Destroys Film Section of the Aerojet General Plant

☆ Fire completely destroyed all equipment and the stock library of the Aerojet-General Sacramento Liquid Rocket Plant's Motion Picture Section on January 11th.

The blaze, which started in a warehouse facility next door to the space occupied by the movie section, fanned by a strong wind, soon swept through the entire building.

250,000 Feet of Film Destroyed

Before it could be brought under control, more than 250,000 feet of original, master, workprint, Answer and Release prints, optical and magnetic sound tracks had been reduced to charcoal. In addition, all editing equipment and sound equipment was charred beyond reclamation.

Two 16mm Arriflex cameras which happened to be in the unit's film truck were saved but numerous extra lenses were destroyed.

Getting Back to Business

F. B. Giermann, Section Supervisor, and member of the Northern California Chapter announced that the unit is definitely not out of business. All equipment will be replaced, he said, and a request has been sent to the Air Force and NASA to return, on loan, all original footage previously sent to them under film contractual requirements so that it may be mastered to form the basis for a new library.

Other members of the Northern California Chapter who work in the LRP film unit are Larry Filby, Bill Riley and Ralph Rose, writer-directors, and Paul Coble, film editor.

Sister Unit Provides Shelter

Temporary housing has been afforded the LRP unit through the courtesy of its sister unit, the Solid Rocket Plant Motion Picture Section.

By the time the next issue of BUSINESS SCREEN goes to press it is hoped that the LRP unit will be back in business, operating at full former efficiency.

Reviews IFPA Membership Growth and Requirements

☆ In answer to the growing number of requests concerning the nature of IFPA, Chapters Vice President Anthony Gorsline has submitted the following review of IFPA growth and requirements for membership.

The Association was first organized in the Southern California area by members of "in-plant" motion picture producing organizations, primarily in the aero-space industry. These writers, producer-directors, editors and cameramen were anxious to get together to exchange ideas and to see and hear about new state-of-the-art developments.

The organization quickly grew and today is international in scope. (CONTINUED ON PAGE 92)

- ✓ Employee Training, in

— Slidefilms —

"THE LENDING OFFICER" and "THAT VITAL FIRST IMPRESSION"

The first subject addresses bank Lending Officers, showing ways of evaluating applications for business loans. The second subject addresses Tellers and other personnel, showing them how to open varied new accounts, so that favorable first impressions will begin enduring friendships for the bank.

Since both subjects are being shown in training sessions to very small groups, they must be informal, natural, and carry strong personal identification. Hence, although retaining the economy of slidefilms, Parthenon uses its format of playing "character" voices over live-action color stills, in sharply-edited continuity, to project a surprising illusion of "movies."

IFPA MEMBERSHIP:

(CONTINUED FROM PAGE 90)
with over 400 members all over the United States and in half a dozen foreign countries. There are now five local chapters: Southern California, Northern California, New England, Delaware Valley and Florida.

Members close to these local chapters attend monthly meetings and find their interests served primarily in local chapter activities. All members receive **BUSINESS SCREEN**, which serves as the IFPA official publication by virtue of this special IFPA section.

Three Types of Membership

Membership in IFPA is divided into the following categories:

(a) Active: anyone actively engaged in "in-house" film production in a business, industry, government or educational organization is eligible to become an Active member.

(b) Associate: anyone in or out of the motion picture industry may join as an Associate member.

(c) Sustaining: sustaining memberships are solicited from the many commercial organizations, producers, laboratories, equipment suppliers, sound services, etc., which service the members of IFPA. Sustainers receive one individual membership, usually given to the President of the organization, which entitles the organization to receive **BUSINESS SCREEN**, all IFPA mailings, to attend local meetings and to participate in the Annual National Convention.

Where to Obtain Information

Further information concerning the organization may be received by writing the IFPA National Executive Board, P. O. Box 564, Hollywood 28, Calif.

Federal Aviation Agency Producing 14 Films

Announce Titles of Motion Pictures in Preparation for 1963

☆ For the new fiscal year of 1963, the Federal Aviation Agency has announced that fourteen black and white and color films will be produced for the various services and offices which comprise the agency. FAA uses both in-service capabilities and commercial producers for its extensive film program which is geared for training, public relations and general information purposes.

The films which have been announced are: *A Traveler Meets Air Traffic Control*, a 30-minute color film for the Air Traffic Service which is being written by Coz-Peacock, Inc. This is the story of a passenger on a commercial jet flight who meets an FAA Controller and finds out just what services FAA performs on a flight.

Show Dangers of Turbulence

Air Wake Turbulence, a 15-minute, black and white motion picture will be written by William Simon for Air Traffic Service, too. This film depicts the dangers of being caught in the "wake" of another aircraft and explains procedures to be followed to best avoid accidents in "turbulence" situations.

Air Traffic Service will also get films on distance measuring equipment, the use of VORTAC equipment in air traffic control, direction finding techniques, and aircraft identification.

Simon will also script a 30-minute color film, titled *The Flight Standard Story* for the Flight Standard Service. And for this same arm of FAA, William Betts will write *A Plane is Born*, which will emphasize the "safety and efficiency" standards which FAA demands in the development of a commercial aircraft. Flight Standards, in addition, will film *The Air Carrier Story*, written by High Whittington. This 20-minute color film will show FAA's supervision of all types of private and commercial aircraft with respect to maintenance and operation.

Film on Landing Procedures

A 30-minute black and white film for the Officer of Personnel and Training Service, titled *Instrument Landing Procedures*, will be segmented into *Part A-The Localizer*, and *Part B-The Glide Slope*. Another two part film for this Service will run 60 minutes long and discuss investigation techniques. Dr. Calvin Linton, Dean

of George Washington University, will star in this televised recording of his lectures on FAA training courses.

Earl Peirce will write a 30-minute color story about the Role of the Aviation Medical Examiner for the Aviation Medicine Service.

The benefits to a community of a properly designed, properly built, and efficient airport will be documented for Airports Service in *Community Airports*, a 30-minute color film. And the International Airports Service will film, in color, *The FAA Overseas*, depicting the operations of FAA in connection with aviation operations outside the United States.

* * *

Tom Cassidy Resigns Post in Navy's Training Film Branch

. . . Film people across the country will be surprised to learn that, after seventeen years in the Navy's film program, Tom Cassidy has resigned as Head of the Training Film and Motion Picture Branch.

Navy's Tom Cassidy

Photographic Management Division of the Bureau of Naval Weapons.

Cassidy, one of the most popular audio-visual specialists in the government, entered the Naval Photographic organization by reporting to the Navy Training Film Distribution Unit as a film inspector in 1946; in 1957 he assumed his Branch head duties.

He will remain in the Bureau of Naval Weapons, but has been assigned to the Policy and Procedure Branch of the Contract Plans and Programs Division.

Logos will produce a wide range of program material, with emphasis on their exclusive techniques for transferring color tape to color films.

* * *

Snowden-Nett Joins Family of Producers in the Capital

... Snowden-Nett Productions is the name of Washington's newest film firm, which has recently been formed with a group of experienced local animators. George W. Snowden and Charles T. Nett, previously with Creative Arts, Inc., head the business which will produce animated films, TV spots, slides, film strips, and all types of commercial art. The new offices are located at 5216 Wisconsin Ave., N. W., Washington 15, D. C.

In addition to recent contracts with USIA, WTOP, and the US Post Office, Snowden-Nett is deep in animation work for three important films which Washington Video Productions, Inc. is producing for the Goddard Space Flight Center of the National Aeronautics and Space Administration.

These 16mm color motion pictures were written by Spence Bostwick for the general public and the scientific community will detail the research and development of "Aerial I" and "OGO".

Aerial I is the satellite which was built in the United States, instrumented in the United Kingdom, and was the first international cooperative venture in space. Two films will be produced about this joint endeavor; one for the public, the other for a technical audience. OGO, or the Orbital Geophysical Observatory, is a standard spacecraft which can be easily adapted for many kinds of scientific experiments. It seems an OGO is versatile and cheap and there aren't enough of them to go around for the many space scientists who want to piggyback their instruments upstairs.

In addition to Snowden and Nett, other members of the firm are: Edward C. Santelmann, Rocco M. Eletto, and Frank S. Stewart.

Da-Lite President Chester Cooley

Da-Lite President Cooley Urges Imaginative Selling

☆ Chester C. Cooley, president of Da-Lite Screen Co., Inc., firmly believes that aggressive, imaginative selling is the cornerstone of the American free enterprise system. He emphasized this in a keynote address at the company's recent annual sales meeting.

Salesmanship at all levels must be better and more efficient in 1963, Cooley said in noting that his company is moving forward with new techniques and a major plant expansion program now under way.

Use "Boldness, Faith and Pride"

"While Da-Lite and others in the photographic industry are now able to produce better products and get them out faster than ever before, the products must be marketed and advertised with boldness, faith and pride," Cooley asserted.

"Now that so much headway has been made in production, the emphasis has shifted to marketing the greater volume of better products now available. Our industry and the whole economy of the free world are so dependent on the movement of goods from factory to consumer that the salesman carries the heaviest responsibility in history.

"If it weren't for competent salesmen, the U. S. and the world would be a lot closer to socialism and communism than it is today," Cooley said.

Planning, More Efficient Tools

Better planning and more efficient sales tools will enable the Da-Lite district managers to be of greater service to more distributors and dealers in 1963, Cooley predicted. Distributors and their salesmen, too, will be key factors in achieving the sales goals set for this year, according to Cooley.

By fulfilling their functions of competent selling and carrying adequate stocks for prompt delivery,

the distributors will not only strengthen their own positions but assist in the healthy expansion of the industry, he asserted.

Kodak to Spend 72 Million for Additions, Improvements

☆ Eastman Kodak Company will spend about \$72.5 million during 1963 for additions, replacements, and improvements in its U. S. facilities, Dr. Albert K. Chapman, chairman, and William S. Vaughn, president, have announced.

This year's capital expenditure budget is \$1 million more than the \$71.5 million figure announced a year ago and is the company's largest annual budget to date. In the past five years, Kodak has invested about \$328 million in capital improvements in the U. S.

"THE HARDESTY CASE"

Ford Motor Company has a problem in selling its light trucks (pickups, Rancheros, Econoline Vans) in that the Truck Specialists are busy with the heavy stuff and fleet sales, and car salesmen are reluctant to sell trucks.

So "The Hardesty Case" is a kidding - on - the - square comedy about a truck-shy hotshot car salesman who, despite all his blase principles, becomes a damn beaver. Or sort of, anyway. Along the way, the film painlessly refreshes on key sales fundamentals covered in the 3-day Truck Sales Workshop for which this is the closing event. And, although the picture is about the automobile business, it will be useful in other fields where one-line salesmen are dragging their feet on other lines the company wishes they'd push.

Sponsor: Ford Marketing Institute, 35 minutes, 16mm. Black-and-white. Not available for outside showing.

AMA Reports Increased Use Of Medical Motion Pictures

☆ A steadily growing interest in motion pictures as an education medium for physicians, medical students, and other scientific groups has been reported by the American Medical Association's Department of Medical Motion Pictures and Television.

Ralph Creer, director of the department, said that a total of 8,544 medical films were lent by the AMA Film Library during 1962, a 9.1 per cent increase over 1961. Total bookings of 2,273 were recorded in 1953. Greatest number of requests for films during 1962 came from civilian hospitals, with a total of 2,110.

AMA's film library now contains 1,200 copies of 258 subjects. There are 176 subjects for professional audiences and 82 health films which are used by physicians to address lay groups.

Red Cross Centennial Events Traced in Dual-Segment Film

☆ A "double feature" has been fashioned by the American Red Cross for its 1963 year-around film, which is built on the 100th anniversary of the World Red Cross.

The nine-minute production, which has been cleared for television, features two 4½-minute segments which can be shown independently or run as a single subject.

Titled *100 Years Young*, the black and white, 16mm sound film spotlights the birth of the Red Cross idea in the first segment. It shows how Swiss businessman Henri Dunant saw the need for such an organization after witnessing the Battle of Solferino and how his idea evolved into a worldwide humanitarian agency after formation of the Red Cross in 1863.

The second 4½ minutes deals with the Red Cross today and contains moving scenes of the organization in action in such far-flung places as Algeria, the Congo and Guam. There also is a brief scene of President Kennedy greeting at

Nursing Convention to Show A-V Techniques

National League for Nursing to Premiere New Film, Filmstrip

NEW METHODS of communication being used to teach and interpret nursing and new uses of some of the older techniques will have platforms of their own at the National League for Nursing 1963 convention in Atlantic City, May 13-17. Closed circuit television, teaching devices and films are among the media to be discussed and demonstrated.

"Eyes for Nursing: the Revolution in Learning and Teaching" is the theme of an afternoon meeting planned for May 15 at which Dr. David S. Ruhe, professor and chairman of the Department of Medical Communications, University of Kansas Medical Center, will be the principal speaker.

Demonstrations of A-V

Demonstrations of teaching nursing by programmed instruction, TV, and other audio-visuals, already in wide use in health agencies and schools of nursing, will be part of this session.

A film program, which will run throughout the convention week, will present films showing new developments in mental health, clinical research, nurse recruitment, community and world health. Two premieres are presently scheduled — a teaching film on parental medication and the new ANA-NLN filmstrip on the history of American nursing.

LaRue Picture on Screen

The film, *Techniques of Parenteral Medication*, to be premiered emphasizes basic principles in the application of subcutaneous, intradermal, intramuscular, and intravenous injections, contrasting old and new procedures.

A workprint version of this film shown at the ANA convention in 1962 elicited many audience suggestions, which have been incorporated in the film. It was produced by Mervin W. LaRue on a grant from Becton, Dickenson and Company, Inc.

"History of American Nursing"

The *History of American Nursing* filmstrip was also shown in an incomplete version at an earlier convention, that of the National Student Nurses' Association in 1961. Hundreds of opinionaires sent in to the ANA-NLN Film Service, producer of the filmstrip, led to the addition of a new sequence on modern nursing which takes the history toward the future. Although already in circulation by the ANA-NLN Film Li-

brary, the filmstrip will have its first convention showing in final form.

Another first nation screening will be given to the recruitment film, *Idea with a Future*, which deals with the associate degree program in nursing. This film is sponsored by the New York State Education Department Associated Degree Nursing Project. It was produced on a grant from the Kellogg Foundation.

Dear Jack:

This will acknowledge receipt of the third print order of our film "The Last Case of Polio." It is difficult to keep up with the demand for it.

The widespread use and effectiveness of our picture by medical societies, public health associations, and other groups sponsoring oral polio immunizing programs is evidence of a job well done by you and your associates. "The Last Case of Polio" is a valuable tool in our campaign to help eliminate polio as a menace to public health.

You are to be commended for producing this part of our project for us.

Very truly yours

William H. Buch

The Naval Photographic Center Holds a 20th Birthday Reunion

THE U. S. NAVY has long been one of the free world's most diligent users of training films. A report on the training film program of the Navy won national honors for this publication two decades ago and this Department has since continued to deliver factual films of the highest quality and utmost usefulness to the men of the fleet, the Navy's air arm and to shore bases throughout the world.

On February 15th, in all-day festivities which drew hundreds of visitors, a distinguished group of filmmakers, naval officers and industrialists were re-united for the 20th anniversary celebration of the U. S. Naval Photographic Center in Washington, D. C.

Among the Distinguished Guests

Prominent among the Navy's guests for the observance were RADM. L. H. Frost, Commander of the Potomac River Naval Basin, world-famed photographer Edward Steichen (Capt. USN, Ret.) and Jamison Handy, pioneer motion picture producer.

Official host for the day was Captain H. W. Crews, USN, Commanding Officer of the Center.

Proud memories were the order of the day as Walter Evans and his anniversary day committee directed visitors through the "three deck" center, which was officially opened in 1943 to meet the needs of a nation at war. By far the largest number of these visitors were trained at NPC during World War

II or worked directly on vital naval film projects through the ensuing years.

Film Industry Leaders Attend

Names familiar to the Service and in the film industry at the ceremonies included Audio Productions' Peter Mooney, Alex Gansell and Murray Margolin; Bray Studios' Paul Bray; Calvin Productions' Lee Davis; Joseph DeFrenes of that Philadelphia studio; Creative Arts' Milton Tinsley; Jerome Diebold of Wilding, Inc.; screen writer Oveste Granducci; General Films' Bill Gephart; Jack Squiers of Willard Pictures; and Film Graphics' Lee Blair, and Bernard Rubin, among others.

Out of the Washington film community also came Capital Film Laboratories' Jim Barker and producer Phil Martin. R. E. Hayes and Elmer Voltz joined their president in representing the Jam Handy Organization.

Past Commanders Welcomed Home

But it was the men of the Service who held the spotlight through a memorable day! Captain Thorne Donnelley, first to command the center from 1943 to 1945 when it was known as the Photo Science Laboratory was welcomed home.

Under Captain Thayer T. Tucker's command in 1947-48, one of the most significant programs for the employment of motion pictures was initiated. This program made the first use of films for Fleet Operational Readiness and saw art and animation used to clarify new and complex naval tactics and doctrine.

During Captain Thayer's tenure, some 300 Spanish and Portuguese translations of Navy training films helped to implement the Inter-American Defense Program.

Headed Center in Korean Crisis

Home again for the day, also, was Captain J. H. McElroy, USN, who served as assistant to the Head of the Photographic Division in the Bureau of Aeronautics during World War II. During a later tour, Captain McElroy became head of the Photography Division of the Bureau and was named Commanding Officer of the Center in 1952.

This was the period of crisis and expansion due to the Korean conflict and during one year (1952- (CONTINUED ON PAGE 104)

Two distinguished pioneers in Service training, Vice-Adm. Calvin T. Durgin, USN (Ret) and producer Jamison Handy (center) are pictured with Capt. H. W. Crews (right), Commanding Officer of NPC.

Shown above are (l to r): Walter Evans, Assistant Head, Motion Picture Dept., NPC; Dr. Don Williams, University of Kansas City; Cdr. Kube, Exec. Officer, NPC; and Jack McClelland, Head, Contract Productions Division at the Naval Photographic Center.

The distinguished photographer, Captain Edward Steichen, visits with Captain H. W. Crews, Commanding Officer of the Center.

From left to right above are: James Etheridge, National Aeronautics & Space Administration; Clifford Ettinger, N. Y. City Board of Education; R. E. Hayes and Elmer Voltz of The Jam Handy Organization.

The camera greets incoming guests at the NPC's 20th Anniversary celebration on February 15th.

Naval Photographic Center's 20th Birthday:

(CONTINUED FROM PAGE 103) 1953) the film production workload was increased by 60%. During his command, the Navy provided vast quantities of World War II stock footage to help make possible the now famous series of TV films, *Victory at Sea*, produced by the National Broadcasting Company.

Executive officer during Captain McElroy's tour and later Commanding Officer of the Center was Captain J. S. Harris, USN, who served in the period, 1954-1955. Films completed in this period included three award-winners in international festival competition.

Captain Noel Bacon Returns

Most recent alumnus of the Command group attending the ceremonies was Captain Noel R. Bacon, USN, (Ret), who served a long tour from 1958 through 1961. During his tenure, the Center's color motion picture processing facility became operational; a TV

kinescope facility was installed and a quality control study was initiated to improve the quality of Navy films and services.

The Navy Preview Screening Program was established by Captain Bacon to afford "headquarters" personnel the opportunity of viewing the latest training and public information films made by the Navy.

Admiral Durgin Foresaw Need

The list of Naval officers of high rank who visualized the important role which films could play in pilot training, flight safety, familiarization and other areas of application would find the name of visiting Vice-Admiral Calvin T. Durgin, USN (Ret), high among these pioneers.

It was during the then Captain Durgin's period of responsibility from 1940 through 1942 in the Bureau of Aeronautics that decisions were made which profoundly affected the future of training films

and the entire program of naval training.

Lt. Commander Harry J. Baudu, USN (Ret.) spent 30 years of distinguished service in the Navy, beginning before World War I. He was honored at the Center ceremonies for his leadership during his period of duty at the Photo Science Laboratory where he served

Creative Arts' Milton Tinsley (left) chats with former CO, Capt. Noel Bacon, now with Kalvar, during the eventful day.

ed as First Lieutenant until his retirement.

Navy's Director of Photography

One of the first U. S. officers sent to Great Britain during World War II to study British photo intelligence methods was Rear Admiral Robert R. S. Quackenbush, USN, (Ret). During the war he was in charge of the Naval School of Photography and was the Navy's Director of Photography; later he

At left: former Commanding Officers held an inspection during early morning Center tour.

became officer-in-charge of photography of the Atomic tests at Bikini and in addition served as Chief of Staff of a Naval Antarctic expedition, which also produced documentary motion pictures.

Before his retirement, Admiral Quackenbush served as personal representative in Europe for Admiral Jerauld Wright, Supreme Allied Commander Atlantic, for NATO. He is presently special representative in Washington for the Polaroid Corporation.

Opens With Tour of Inspection

Officially, the Anniversary festivities began with an early-morning personnel inspection tour by all of these former commanding officers of NPC; tours through the facilities continued throughout the day with historic and current Navy films screened continuously.

Captain Steichen (left) is pictured during re-union with another visual creator, Jamison Handy, during Anniversary Day.

The Anniversary luncheon was served in two shifts to accommodate the capacity throng; group reunions convened in the Motion Picture, Research and Development and Still Departments. The celebration closed with an informal social at the Naval Station Officer's Lounge and at the Chief Petty Officer's Club.

Few at the 20th Anniversary gathering, however, will forget the

Above: Captain Steichen is the camera subject for a change at the Naval Photographic Center.

Signing "aboard" for Anniversary Day observance at the Naval Photographic Center are (l to r, at right): Murray Margolin; Alex Gansell and vice-president and treasurer Peter J. Mooney, all of Audio Productions, New York. (All Official U.S. Navy Photos)

hours of re-union with that great photographer, Edward Steichen, who was accompanied by Mrs. Steichen on this return visit to the Navy he served with such distinction as Captain Steichen during World War II.

In World War I he commanded the Army Air Corps Photographic Division of the AEF and was decorated by France with the Chevalier Legion d'Honneur.

Head of Combat Photography

During World War II, Captain Steichen was Commander of U. S. Navy combat photography and received the Distinguished Service Medal. He supervised the photography of *The Fighting Lady*, directed *Power in the Pacific* and the creation of the photo exhibits, *Road to Victory* and *The Family of Man*, for the Museum of Modern Art in New York.

Standing beside another pioneer, Jamison Handy, the frail, bewhisk-

ered Steichen epitomized the Anniversary Day's meaning to all who were present when he said:

"I take fierce pride in having been with the Navy, and a deep love. As a symbol of my feelings, I have never worn anything but a black tie since!"

Captain Crews Sums It Up

As the present Commanding Officer, Captain H. W. Crews, USN, told BUSINESS SCREEN:

"The Navy's assigned mission is aided by the camera and its unique ability to capture a fleeting moment in time — to record an image of the past for study in the future.

"Naval personnel rely on motion picture and still photography for information, education and training. Naval commanders use intelligence photography in making decisions vital to the outcome of a mission.

'Photography is essential in the research and development of the

weapons, techniques and vehicles that are today extending seapower farther under the sea, into space, and into uncharted regions of our planet."

It was a proud day — for the

Naval Photographic Center story is one of drama and accomplishment which merits the full review it will be given as part of our own 25th Anniversary edition to be published later this year.

Key to Film Results

A Reader's Guide to the Listings of Producers

THE STATISTICAL SURVEY TASK involved in the compilation of the 61 pages of studio listings which begin on page 109 of this issue was again our most difficult assignment of the year. In these pages, the Editors provide facts-in-depth about the personnel, services, facilities and recent experience of 441 film production companies in the United States and abroad.

In addition to useful cross-references, a total of 91 branch offices are listed. Convenient alphabetical and geographical indices are provided on the next three pages for quick reference to these experienced, specializing companies.

The buyer's successful use of these potent sight/sound media is the primary goal of each Production Review. *Your key to film success lies in viewing the producer's work and in close study by personal inspection of facilities offered.* Only by complete reference data, voluntarily provided by every listed company, can the buyer know the capacity and calibre of prospective suppliers. There are no "incomplete" listings here.

The Editors have recognized a few listed individuals who limited their work during the year to fewer than the five required reference titles; new companies, organized in 1962, are also excepted from *minimum reference requirements of five motion pictures, slidefilms or related audio-visual media.* The specialist in television commercials is also clearly identified by appropriate references to his recent work.

This year's International Listings, beyond those of the United States and Canada, are exactly double those of previous years. Only space limitations made it impossible to carry *all* data offered. Rather than limit text, we decided to carry late data in the first Production Review Supplement. In this Supplement we will also correct the inevitable gremlins who invade the tens of thousands of lines involved.

Once again, this Production Review is *the only precise measurement of the specialized industry which it serves* through the thousands of subscribers who will use its pages in industry, trade groups, advertising agencies and government. This formidable task involves the names of over 2,000 key persons within U. S. companies. There are more than 1,825 motion pictures and 674 slidefilms given as references, in addition to related audio and visual media, live shows, meeting presentations, etc. Television commercial credits furnish an additional and very large number of studio references.

—OHC

Pictured below (left to right) are: Capt. J. A. Eady, former CO at NPC; Jerome C. Diebold, Wilding, Inc.; Capt. Howard E. Carr, USNR; and Joseph Aiken, Head, Sound Branch, at the Naval Center.

Your Key to Producer Listings

☆ The detail in depth of these listings of business and television film companies provides the sponsor, advertising agency and government film buyer with a complete picture of his prospective producer.

In addition to names of principal officers and data on services and physical studio facilities, the facts on "Recent Productions and Sponsors" show the nature of recent studio experience, of films produced in the past year. Preview current pictures as a prerequisite to purchases; bidders should also provide factual data on experience, staff, facilities and financial stability.

There was no charge or obligation whatsoever to these listed companies; every known source was contacted with three separate first-class mailings. Only those who furnished evidence of recent production were accepted for unqualified listing.

Sound Advice for the Film Buyer

A careful study of the prospective producer's listing text is a prerequisite to film buying. See the pictures listed by the company; note the nature of client references. And if the prospective producer isn't listed in these pages visit his facilities; meet permanent staff personnel and view current pictures identified as his own.

Sound Advice for Film Sponsors

☆ A careful study of the prospective producer's listing text is a prerequisite to film buying. See the pictures listed by the company; note the nature of client references. And if the prospective producer isn't listed in these pages visit his facilities; meet permanent staff personnel and view current pictures identified as his own.

Script to screen service. Represented in Birmingham, England, South Africa, Canada and Australia.

RECENT PRODUCTIONS AND SPONSORS

MOTION PICTURES: *Highland Estate* (Ford Motor Co. Ltd.); *Brilliant Fire* (De Beers Consolidated Mines Ltd.); *Over the Bottleneck* (John Lysaghts Bristol Works Ltd.); *Rouen Round* (Castrol Ltd.); *An Ounce of Prevention* (Pfizer Ltd.); *The Participants* (Anglo-American Corp. of So. Africa - in assn. with Copperbelt Film Unit).

this may be the first
movie projector sound system
you never need to fix
!

Its sound system can be trusted.

It has no electronic tubes to burn out; transistors replace the old tubes.

It has no photocell to go haywire; a space-age *solar cell* takes the place of the old photocell. Its exciter lamp is rated to last the life of the machine. You'll never have to carry spares.

This projector won't embarrass you or harass you.

It even takes good care of your film.

Kodak equips all PAGEANT Projectors with a spring-loaded film sprocket. These are like shock absorbers, so when you start the projector the film isn't jerked. Sprocket holes and film itself stay new longer that way.

These are the only projectors with a reversing sound drum. This means the film *rolls* with the sound drum when in "reverse," instead of being dragged over it, hazarding scratches.

Another thing you can safely do with this projector is reverse it from full speed forward to full speed the other way, in one whack!

Kids can't hurt it either, but a child can set it up and operate it.

Anyone who can follow a red line can thread film into it.

Move one lever forward. Push one button. And you have a sound movie. Brilliant picture. Beautiful, clear, noise-free sound.

Incidentally, this sound is instant sound. That means it comes with no warm-up. No empty silence. No awkward waiting. And

the speaker doesn't hiss, or crackle, or pop, either.

This projector doesn't do anything to distract an audience.

Its machinery consists of so few

moving parts that it never speaks above a whisper while the show is on.

And the show always goes on.

You're not left suddenly in a fix.

With this projector, there's so little that could possibly ever need fixing.

Its name is the KODAK PAGEANT 16mm Sound Projector, Model AV-126-TR.

If you'd like to see and hear one work, or read illustrated literature about it, write your name and address here:

Then send it back to us at the address below.

Check this box ☐ and we'll have a Kodak dealer call you to arrange for a convenient demonstration. No obligation, of course.

Ozalid sets the world's standard for overhead projection

Projecto-Printer® 40 makes perfect transparencies from maps, pictures or drawings in minutes.

Vary transparencies with 14 basic image and background colors on Projecto-Viewfoils and other Ozalid specialty films.

Ozalid accessories include Projecto-Mounts, tracing pads, and other tools plus "They See What You Mean," the most complete "how-to" text available.

Only Ozalid brings you this complete Overhead Projection System

Everyone grasps your ideas faster . . . understands more clearly when you project 7 x 7 inch color transparencies in *full room light* with the revolutionary new Porta-Lite 7 — the smallest, brightest, ready-to-use portable overhead projector ever designed! Or use the compact new Porta-Lite 10, companion to the Porta-Lite 7 for 10 x 10 transparencies. Both Porta-Lite projectors stay set up always — there's no assembly. A single handgrip and aluminum-light construction make them easy to carry. Prepare transparencies on color foils in minutes with the Ozalid® Projecto-Printer 40 or the Ozalid diazo copier in your repro department. Everything — foils, mounts, processors, projectors — to meet any overhead projection assignment — is yours from Ozalid.

Sound stages, lighting, etc. Videotape installation - 3 Ampex recorders with selective editing.

POLAROID

This is the closest anybody's come to an "ideal" industrial camera.

Here's why:

The Polaroid MP-3 Industrial View Camera is so versatile that it is virtually a self-contained studio. It can *finish* jobs ranging from photomicrographs to big maps and wall charts in times ranging from 10 seconds to two minutes. The end product can be a print, a print and negative, or a slide-mounted transparency, as you choose. All from one self-contained rig. All without using a darkroom.

Physically, the MP-3 is a rigid stand on a laminated wood base. A counterbalanced camera body rides easily up and down the stand and swings to a horizontal position for bigger work mounted on a wall. Pre-positioned floodlights illuminate regular size work on the base.

Optically, the MP-3 is even more sophisticated. You can work with four inter-

changeable lens and shutter combinations plus a lensless shutter for photomicrography. In all cases you work with an eye-level, ground-glass reflex viewer for fast, easy, hairline focusing.

But it's the film systems that give the MP-3 such speed and versatility. It uses five different kinds of Polaroid Land Film (some not widely known among amateurs) plus conventional 4x5 b&w and color films.

Many jobs call for just a black-and-white print. You can get it in 10 seconds with 3¼ x 4¼ roll film or two speeds of 4x5 film (one is A.S.A. 3,000!). If you need a negative to work with, another 4x5 Polaroid Land Film will supply a fully developed fine-grain negative and a matching positive print, in just 20 seconds.

Then there are two kinds of transparency

film (one for line work, one for continuous tone) which can be mounted and ready for projection in seconds. And, of course, if you aren't in a hurry you can use any conventional 4x5 black & white or color film.

The MP-3 is a precision instrument. It can meet the demands of skilled professional photographers. It is also an extremely simple camera to use. Inexperienced personnel can easily use it to record results of their regular work.

More details on this new camera are contained in our free, six-page brochure, which we'll be happy to send you. Even if you are satisfied with your present photographic set-up, it makes fascinating reading. Write: Technical Sales Dept., Polaroid Corp., Cambridge 39, Mass. Today.

FILM RESULTS DEPEND ON THE

AUDIENCE

FILMS ARE BORN in the studio or on location but life begins when the sponsor's message is presented to those audiences for whom the picture was created. The potential for **interesting, informative** films was never greater! Upwards of 600 television stations in the U. S. have accepted pictures **deserving** of public service time; theaters in the U. S. and abroad accept standard and wide-screen color films with **genuine audience appeal**; tens of thousands of influential groups in clubs, lodges, grange and union halls and the myriads of other meeting places have access to 16mm sound motion picture projectors for showing **useful** new films relevant to their interests.

The accented words in this brief introduction to these listings of national film distributors is on those words: **interesting, informative, deserving** and **useful**.

Much of the work of the producing companies listed in preceding pages of this issue is devoted to factual films with widespread public audience appeal. Together, these producers and distributors provide sponsors with the most effective means of achieving film results. **The sponsor is equally responsible for film success:** acceptance of expert advice and counsel on **audience standards** are "musts!"

Within these distribution companies, **proof of performance** is the sponsor's assurance of value received. Recent installation of computer equipment, broad national library operations and years of experience are of key importance.

BACKGROUND: Founded in 1911 (as "The YMCA Motion Picture Bureau," a division of the International Committee of the YMCA's), Association Films was the first sponsored film distributor in America. In 1949, the company was incorporated as an independent national distribution service.

SERVICE: Promotion, publicity; booking, shipping, storage and inspection of prints (electronically); film programming (Community and school groups); film programming (TV stations). Furnishes monthly reports on print activity and audiences (IRMI tabulated); advance booking notices to sponsors; correspondence and confirmations (to users); merchandising of teaching aids and other film-related materials; and print servicing (physical handling of professional, sales and TV prints).

OPERATION: Prints and bookings are serviced from four regional distribution centers, wholly owned by Association Films.

ASSOCIATION TELEFILMS — This television division is responsible for creation and distribution of special sponsored film series, including *Discovering America*, (travel and transportation), *Your Neighbor—the World*, (world affairs), *Theatre 30*, (half-hour sponsored films with story lines), *Camera 15*, (news and views), and *Rx Your Health and Safety*, (health and safety package). Association Telefilms also prepares TV promotion kits and other special services for sponsors and stations.

this symbol, appearing over a distributor's listing, indicates that display advertising containing additional and useful reference data appears in other pages of this 13th Annual Production Review issue.

BACKGROUND: Founded in 1920 in Chicago. In the past 43 years, has grown into a national organization of 28 offices handling rental films for schools, churches, clubs and industry. In 1948 Ideal began the distribution of industrial films, for the first time making available a proven paying customer list for the distribution of industrial films services.

SERVICES: Promotion, publicity; booking, shipping, storage and inspection of prints (electronically); film programming (community and school groups); film programming (TV stations). Furnishes monthly reports on print activity and audiences, all supported by actual signed audience reports; advance booking notices to sponsors; correspondence and confirmations (to users); merchandising of teaching aids and other film-related materials; print servicing (physical handling of professional, sales and TV prints).

OPERATION: Prints and bookings are serviced from 28 company controlled distribution centers.

BACKGROUND: The outgrowth of a pioneering organization in the field of talking motion pictures Electrical Research Products, Inc., a subsidiary of the Western Electric Co., formed in 1927 at the birth of the commercial sound motion picture medium, Modern Talking Picture Service emerged as the non-theatrical department of that company. An early pioneer in the licensing and operation of portable sound projection apparatus and also providing projection service in industry, etc., Modern's present trade name was adopted by its licensees in 1935 and Frank Arlinghaus, then of ERPI, was placed in charge of this growing activity. Modern became an independent corporation on July 1, 1937, under the ownership and management of its distribution employees.

SERVICES: In 1963, in its 26th year, Modern presents over 400 organizations from industry, commerce and the professions, distributing their public relations films to schools, colleges, industrial plants, offices, and to the public and private clubs and social groups throughout the United States and Canada. Other primary channels of distribution in which Modern is a leading specialist include: theatres showing sponsored short subjects; television stations. Modern operates a network of 32 regional libraries. For sponsors utilizing its service, the company promotes, ships, rents, repairs, maintains and stores their films. Additionally, it counts audience attendance, records their comments and furnishes the sponsor a monthly tabulation. Extensive IBM facilities and

MODERN TALKING PICTURE SERVICE:

equipment for promotional printing are maintained at New York headquarters. All regional libraries are equipped for electronic film inspection and handling. In 1960, Modern established its Modern Learning Aids division to distribute educational films for purchase, subscription (series rental) and lease-to-buy. MTA distributes the high school physics films developed by the Physical Science Study Committee.

REGIONAL EXCHANGES are located in Atlanta, Boston, Buffalo, Cedar Rapids, Charlotte, Chicago, Cincinnati, Cleveland, Dallas, Denver, Detroit, Harrisburg, Houston, Indianapolis, Kansas City, Los Angeles, Memphis, Milwaukee, Minneapolis, New Orleans, New York, Omaha, Philadelphia, Pittsburgh, St. Louis, San Francisco, Seattle, Summit (NJ), Washington D. C., as well as in Honolulu, Hawaii; Anchorage, Alaska and Toronto, Ontario.

SPECIAL ACTIVITIES & PUBLICATIONS: A physical handling service is maintained for technical professional and special films. Recent references for sponsor reading (available on letterhead request or by telephone from listed sales offices) include: "The Modern Fact Book of Sponsored Film Distribution" - "The Opportunity for Sponsored Films" - "Business Films at the Movies" - "How Television Stations Use Business Sponsored Films" - "The Teen Age Market" - and "Series Programming, PR Films Free From Modern TV."

Mayme R. Dawson, *Secretary*

BACKGROUND: Established in 1910 as the Rothacker Film Manufacturing Co., producer and distributor of educational films, the organization was subsequently reorganized as Rothacker, Inc., and is currently engaged in specialized business film distribution through all available media to audiences throughout the world.

SERVICES AND OPERATION: For all types of non-theatrical audiences, and for theatrical and television showings, individual promotional campaigns, audience selection, publicity, multiple confirmation, audit follow-up are done on a separate basis for each film. Prints are all hand-inspected, sound-read, cleaned, repaired, shipped, stored and a complete record maintained on condition of each print; annual print breakdown with classifications sent as well as monthly exhibition reports with full information of each showing; special questionnaires provide additional information on audience reaction, comments. Supervisory operation in New York supplemented by distributors functioning locally in New England, the South, Middle West and Far West.

FOREIGN DISTRIBUTION: In addition to full coverage nationally, Rothacker, Inc., offers its international distributing service covering Europe, the Orient and Latin America. The same standards of operations, available domestically, are handled, for Europe and the Far East, through representatives directed by staff in New York. For Latin America, arrangements are made through the facilities of Servicio de Informacion Panamericana.

this symbol, appearing over a distributor's listing, indicates that display advertising containing additional and useful reference data appears in other pages of this 13th Annual Production Review issue.

Copley Productions Filming Series on Newspaper Careers

"WHAT GREATER CHALLENGE!"

COLOR

SOUND

16 MM

Copley Productions Films Receive National Recognition

Copley Productions films have been entered in the American Film Festival, the Coronado International Festival of Films and the San Francisco International Film Festival, where they received international recognition and meritorious awards. Some films honored

have been: "From Type to Paper," "Borrego Springs: A New Way of Life" and "Expedition Borneo: Land of the Sleeping Giant." The motion picture unit has also been cited by Industrial Photography magazine for its outstanding industrial photography films.

PRINT AVAILABILITY:

All Copley Productions films may be borrowed for showing without charge, when available. Direct inquiries to your nearest Copley Productions distribution center:

7776 Ivanhoe
(P.O. Box 1530)
La Jolla, California

or
434 Downer Place
Aurora, Illinois

If you prefer, ask about our films at any of the Copley Newspapers.

IN CALIFORNIA: The San Diego Union and Evening Tribune, San Diego; Post-Advocate, Alhambra; Burbank

Daily Review, Burbank; Evening Star-News, Culver City; Glendale News-Press, Glendale; Daily News-Post, Monrovia; San Pedro News-Pilot, San Pedro; South Bay Daily Breeze, Redondo Beach; Evening Vanguard, Venice.

IN ILLINOIS: Aurora Beacon-News, Aurora; Elgin Daily Courier-News, Elgin; Joliet Herald-News, Joliet; Illinois State Journal and Illinois State Register, Springfield.

Or, call your local office of Nelson Roberts & Associates, Inc., national representative for the Copley Newspapers.

A Film Designed for Classroom Use As An Introduction to The Varied Career Opportunities Available on a Daily Newspaper

In ten short minutes "What Greater Challenge!" introduces your students to the many career opportunities available in working for a daily newspaper. Each member of the newspaper staff is shown doing his part to protect the Freedom of the Press.

A World of Its Own

Although more than 160 million Americans read the 1,700-plus daily newspapers, few realize just how many different specialists are involved in getting the news to readers. This motion picture shows these men and women as they accomplish their daily jobs: editors, reporters, feature writers, circulation managers, typists, business machine operators, classified ad operators, cold-type operators, editorial cartoonists, pressmen, and many others.

For the Student

Here is a capsule look at

the daily newspaper, its employees and their jobs. Although this film has particular appeal to students already interested in journalism or printing, it offers to every student a new world of career opportunities. For a general audience unfamiliar with daily publication the film also provides a comprehensive inside view.

This Is the First

The purpose of this initial film is to stimulate interest in the newspaper business and to encourage students to learn more about the specialized jobs within the newspaper framework. An entire series will be produced to show specialized jobs and their functions in publishing a daily newspaper.

All Copley Productions films are in color, sound-on-film, 16mm.

**we
make
slide
films
and
motion
pictures**

We believe you recognize the usefulness of films, provided they will pay their own way in your business.

We maintain they are as clear an economy as your telephone.

Treat them as a tool for which you expect to pay no more than returns will justify, and employ a producer who understands sound business principles.

Write for our booklet,

**"How Much Should
a Film Cost?"**

A message to film producers:

I am interested in helping you
make your pictures.

Whether you need me as a camera-
man, writer, director, associate
producer or producer . . .

Or maybe you've shot all the foot-
age and want me to finish the job
for you — record, cut, edit, mix,
conform and get the answer print.

I think I can help you make your
pictures more interesting and be-
lievable, and help you make them
better than your competition, for
less money.

from Bob Fisher . . .

Visualscope Moves to Larger Offices at 103 Park, New York
 ☆ Visualscope, Inc., has moved to new and larger offices at 103 Park Avenue, New York.

Facilities include, in addition to eight private offices for staff executives, a large art department and three fully-equipped conference rooms. Always in the forefront as developers of new audio-visual devices, the company has equipped conference rooms with every sort of sight and sound equipment, including master programmers for controlling a number of projectors and recorders automatically. Another new device starts and stops equipment by remote radio control.

Additional Services, Lower Cost from Capitol Library Services

☆ "1963 will mark the beginning of several new services to be offered film makers by the Capitol Hi-Q Library, plus a revision in usage rates designed to assist all producers in obtaining lower recorded music costs."

This broad statement of policy was offered BUSINESS SCREEN by Bill Loose, Library Services Supervisor for the Hi-Q Library.

The progressive program includes a complete new series of recorded music especially for slide films as well as a new group of musical aids specifically created for industrial films. A revised usage rate should also materially lower costs for consistent users of this company's tapes.

Most of the new Capitol recordings have already been completed and are now ready for client use. Since it is a *continuing* program, however, new material will be added throughout the year, according to Supervisor Loose.

Kelmenson Forms New Studio Organization in Manhattan

☆ David I. Kelmenson, a director and producer of television commercials, has formed a production company at 75 West 45th St., New York, under the name of Kelmenson Productions, Inc.

Mr. Kelmenson was formerly an associate and vice president with Robert Klaeger Associates. He was also associated with VPI and Filmways as a producer and director, and with Grey Advertising in television production.

Richard Heimann, a fashion photographer, will be a vice president of the new firm. He will work as a director with Mr. Kelmenson as well as direct his own commercials.

News Along the Film Production Lines

Alexander, Motion Picture Ad Service Combine Sales Activity

☆ Two companies well known in theater screen advertising exhibition have combined their sales organizations. The Motion Picture Advertising Service Company of New Orleans and the Alexander Film Company, Colorado Springs, Colo., will henceforth carry on their local sales responsibilities under a single corporate name: Motion Picture Alexander Corporation.

The consolidated operation will serve 15,000 retail merchants through 300,000 film shipments to approximately 10,000 theaters. Sales and administration of the new sales company will headquarter in New Orleans.

Broadcast Music Award Show by Muller, Jordan, Herrick

☆ The Eleventh Annual Award Dinner of Broadcast Music Inc. for its most successful songs of 1962 featured a special show that was produced, staged and executed by Muller, Jordan and Herrick, Inc., New York.

Held at the Hotel Pierre in New York on January 23, a special wide-screen slidefilm highlighted the evening. The slidefilm presented BMI's 78 outstanding songs of the year.

Visualizations of the songs were achieved by photographic portraits, record jackets and sheet music combined with hand-painted backgrounds. The songs were taped and synchronized with the slide-

film and introduced by Robert J. Burton, vice president of BMI.

New Sales Division Formed by Camera Service Center

☆ Camera Service Center, Inc., 333 West 52nd St., New York City, announces the establishment of a new sales division, Camera Sales Center Corp., specializing in the sale of motion picture equipment, including cameras, lights, sound, editing and projection equipment. This affiliate will also handle sales of small camera accessories such as film filters, and so forth.

Consultant Aids New England On Exhibits for '61 World Fair

☆ New England, with its space-age industrial complex, has named Dr. Jonathan Karas, president of Science House, Manchester, Mass., as scientific consultant. He will assist in creating dramatic exhibit and display concepts based on science and engineering for the New England States Exhibition for the 1964 World's Fair.

Dr. Karas will work closely with all industries which require the services of Science House to assure high mass appeal for ultra-sophisticated industrial and technological concepts using advanced audio-visual techniques.

WCD's New Studio Kitchen

☆ WCD, Inc., New York, has installed a special studio for food photography with permanent kitchen. This cooking center will be the special headquarters of Mike Stehney, producer-director of food and beverage commercials.

Gerald Productions Active in Medical, Sales Promotion Pix

☆ Gerald Productions' Industrial Division, New York, has completed a film on new techniques of coronary disease diagnosis for Warner-Chilcott Labs, and a 35-minute Christmas sales promotion film for National Distillers Corp. The latter, titled *The Big Payoff*, features Don Amcche. Another 27-minute film now in completion stages has been produced for the WPIX, New York, 1963 sales portfolio.

Cleveland Office for Behrend's

☆ Behrend's, Inc., Chicago, has opened a Cleveland, Ohio office at 4019 Prospect. The office will specialize in sale and rental of motion picture equipment, including cameras, lights and editing equipment. Mac Blair will head the Cleveland office.

Rapid Film Opens Midwest Offices in Chicago Area

☆ Rapid Film Technique, Inc., known as the "film doctors" has opened executive offices in Chicago to service its growing number of accounts. Jack Bernard, president and chairman of the board, announced that the Midwest office at 670 N. Michigan Ave., will be managed by Fred Davidson.

Bernard said "we can now anticipate 1½ day service or better with on location coverage. Local pick-up and delivery facilities will be of prime value to our Midwest accounts."

The "film doctors" have developed a process which completely restores all damaged motion picture film. Through its new treatments, all scratches (black lines) dirt, stains, abrasions are eliminated on both the base and the emulsion. Brittle film receives new life through rehumidification. Finally, a protective coating is applied to seal in the moisture and to resist future damage.

Rapid's main executive offices and plant are located at 37-02 27th Street, Long Island City 1, N. Y. ☐

X-Ray Copies Corp. a Bebell & Bebell Subsidiary

X-Ray Copies Corp. has been formed in New York to engage in the packaging, distribution and processing of a new high-speed, fine-grain 35mm b/w film specifically designed for x-ray copy work.

Principal users of the film are expected to be hospital radiology departments, physicians specializing in radiology, laboratories researching nuclear medicine, as well as film producers for slides and filmstrips.

The new 35mm film is said to follow the tonal gradations of the original x-ray image without getting contrasty, and thereby is able to hold fine shades of detail. Of added importance is the omission

Trends in the BUSINESS of Audio-Visuals

of an intermediate photographic negative stage which may serve to distort or cause degeneration of the original image.

The copy film is used for medical school lectures, visual demonstrations, and seminars in radiology techniques.

X-Ray Copies Corp. is a subsidiary organization of Bebell & Bebell Color Laboratories, Inc. ☐

Overnight Service on Slides Available from Producers Aid

☆ Producers Aid, Inc., a subsidiary of Manhattan Color Laboratory, is now offering a new service for producers of color and b/w 2 x 2 slides.

Automatic printing, processing and mounting equipment has been installed for overnight service.

Originals may be duplicated in either single copies or in quantity, and on either negative-positive or reversal film.

For further information write Producers Aid, 210 West 65th Street, New York 23. ☐

Canada's Consul General in N. Y. Hosts Crawley Reception

☆ The Canadian Consulate General in New York was host on February fifth to 50 American sponsors of business films at a reception given for F. P. Crawley, president of Crawley Films, Ltd., of Ottawa.

Mr. Crawley, and Graeme Fraser, vice-president of the firm, told the gathering of the remarkable record of "Crawley's", producer of over 1300 films in 24 years, winner of 131 national and international awards. Fifty of the company's clients now have from four to 40 Crawley films, each.

Over the past five years, Mr. Fraser said, a full 20 percent of Crawley's gross revenue has been in U. S. or foreign currency.

To top off the reception, guests were shown Crawley's latest award-winning film, *Abitibi*, made for the Abitibi Power and Paper Company, of Toronto. ☐

PACKAGE PROGRAMS

OXBERRY MASTER SERIES

FOR SLIDE-FILMSTRIP

OXBERRY AUTOFOCUS SLIDE-FILMSTRIP STAND Model FS-4300

This Master Series Stand has been designed for high speed, top quality film strip production. Autofocus combined with automatic rackover and lamp that projects aperture onto table top are invaluable in quickly positioning various sized pieces of art work. Receives up to 35" art work. Accessories may be ordered to include animation components, other lenses, double aperture shuttle, top lighting, etc.

BASIC STAND: Welded steel base, ground steel 4½" diameter dual columns. Ball bearing camera carriage, manual drive. Foursided zoom scale. Shadowboard. Fixed table top 36" x 48" has 9" x 12" hole in center with removable glass and wood inserts. Overall height 11¼", width 48", depth 58".

CAMERA: OXBERRY 35mm with rackover and viewfinder. Fixed pin registration. 47mm lens. Autofocus. 400-ft magazine, automatic take-up and single speed stop motion motor.

FOR ANIMATION

OXBERRY AUTOFOCUS ANIMATION STAND Model MP-4200

This is a standardized package unit incorporating all the basic requirements necessary for shooting full animation. A full line of accessories available for individual requirements. The difference between this unit and the OXBERRY Custom stand is primarily on rarely used special features.

BASIC STAND: Welded steel base, ground steel 4½" diameter dual columns. Ball bearing camera carriage, manual drive. Four-sided zoom scale. Shadowboard. Height 11¼", width 48", depth 58".

COMPOUND: 28" x 34" table top. Two 12-field peg tracks, hand-wheel controlled, with counters and locks. Two 18-field "push type" peg tracks calibrated in 20ths. 9" x 12" cut-out in table top for underlighting. Ball bearing compound movements. N.S., E.W. and 360° rotation. All movements have handwheel control with counters and locks. Gimbal-mounted platen with 12-field, 18-field glass.

CAMERA: OXBERRY 35mm with fixed pin registration. 47mm lens. Autofocus. Automatic take-up. Single speed stop motion motor. Straight through viewing device. 400-ft. 35mm magazine.

Scene from new Ramset film

"Build Better With Ramset"

on Powder-Actuated Fastening

☆ Craftsmen, job-trainees and students of every phase of the construction industry can now see powder-actuated fastening tools in action on film.

Ramset, which pioneered America's commercial use of powder-actuated fastening tools, has produced its first professionally-made film to demonstrate industry's most modern method of instantly fastening steel to steel, steel to concrete, wood to steel and wood to concrete.

Build Better With Ramset is 16mm, color, sound, and runs for 18 minutes. Produced by Academy-McLarty Productions, Inc., it is available to trade and industrial schools, contractor and engineering groups, building associations and to groups in the construction and building maintenance fields.

More than six months in the making, the film was lensed "on-the-job" at major construction sites in the northeast states, including two newly-famous New York City landmarks — Philharmonic Hall in Lincoln Center and the Americana hotel.

Movietonews, Inc. has selected portions of the Ramset film for inclusion in their *Science Report* series. This is a half-hour film produced by Movietonews for the United States Information Service, which distributes it as two 15-minute television shows a month to 46 nations in Europe, Asia and Latin America, as well as to Australia and New Zealand. It is estimated that the USIA program reaches 80 per cent of the world's television viewers outside U.S.

Modern Talking Picture Service, Inc., is distributing the picture to interested viewers in the U. S. on request. Sponsor of the film is Winchester-Western division of Olin-Mathieson Chemical Corp. Ramset is part of Winchester and is a major producer of powder-actuated and hammer-in fastening tools and accessories.

The film was produced for Ramset by Academy-McLarty Productions, Inc., Buffalo, N. Y. and was written and directed by its president, Franz E. Hartmann. ☐

National Film Distributor Installs Computer

An Historic "First" for Modern Talking Picture Service

A NEW IBM MODEL 1401 Computer has been installed at the New York headquarters of Modern Talking Picture Service. The installation is the first of its kind in the film distribution business and will provide Modern's clients with quicker and more complete information on past and future bookings than ever before possible.

The new computer replaces conventional IBM punch-card equipment which Modern first installed in 1947, then heralding a new era in the control of sponsored film distribution.

More Precise Audience Data

According to William Oard, Modern's operations chief, the value of the computer is not so much to give more information than was

possible under the old system, but to give more precise and sophisticated information on audiences almost immediately without the time-lag inherent in the punch-card systems.

In the area of advance booking notices, each of the 250,000 active film using groups in Modern's system now has a code number — even individual teachers in a school have their own sub-numbers — and all bookings are logged by the computer under number codes.

Exact Bookings at Any Time

By "pushing a button" the sponsor may now be given the exact number of bookings per print per exchange over any time segment. This information is also classified by audience types so that the spon-

sor has a good bird's eye view of his film's appeal, knows who uses what kind of films and where special promotion would be useful.

While most of this information has been available in the past, it is now possible to assemble the data constantly, quickly, on a routine basis. With increased postal rates all distributors are paying particular attention to the cost of securing the right kind of bookings for each film, and Modern expects the 1401 computer to be an invaluable tool in providing efficient controls for promotion mailings.

In addition, it is expected that the computer will benefit the user, as well, by insuring that information on the films he is interested in most will be quickly directed to his attention.

The computer was installed during the fall months and is now fully operational. Modern is now testing new applications that are expected to provide film sponsors with information about their programs which heretofore was not available. ☐

"Pole Top Rescue" Film Is Available to Utility Firms

☆ *Pole Top Rescue*, a new training film for use by electric utility companies, has been released by its distributor, American Film Producers, Inc., New York. The 17-minute color motion picture describes the methods of mouth-to-mouth resuscitation advocated by the Resuscitation Subcommittee of the Edison Electric Institute Accident Prevention Committee.

Pole Top Rescue teaches detailed steps for linemen to correctly position victims, maintain open air passages, blow air into the lungs through mouth or nose and watch for signs of recovery.

Sale price of the film is \$140 from America Film Producers, 1600 Broadway, New York 19.

Mid-East Refugees' Plight in "Journey to Understanding"

☆ Television performer Hugh Downs and his family star in a new film, *Journey to Understanding*, which gives an on-the-spot report of the Middle East's refugee problem.

With the exotic and mysterious Levant and its mosques and minarets as a setting, the Ralin Productions' film explores the problems of persons displaced by the 1948 Palestine conflict and what is being done to alleviate them. After glances at Beirut and Damascus,

There've
been

some
changes
made!

MATT FARRELL PRODUCTIONS, INC. is our new name. For over a decade under the name Farrell and Gage Films, Inc. we have enjoyed the reputation for producing solid, motivating films for business and industry on modest budgets. (This will not change.)

As MATT FARRELL PRODUCTIONS, INC. along with expanded facilities, we will continue to provide solid answers to difficult motivation problems.

Matt Farrell—President

Matt Farrell Productions, Inc.

213 East 38th Street • New York 16, N.Y. • MUrray Hill 3-8358

Journey to Understanding (27 minutes b&w) shows Downs visiting refugees, talking with them and observing how they live.

Hugh Downs visits UNWRA schools and vocational training centers where a portion of the 500,000 refugee children under 18 years of age are receiving an education and learning a trade. He participates in their activities and learns how UNWRA is giving youth an opportunity for a brighter future.

Journey to Understanding is being distributed exclusively to television stations, on a free loan basis, by Association Telefilms. ☐

Oxberry Optical Units Get Vacuum Packed for Shipping

☆ A new packaging method developed and adopted by Animation Equipment Corp., New Rochelle, N. Y., for all Oxberry optical equipment has been highly effective for cross-country and overseas shipments.

In keeping with high precision standards, it is essential to protect the Oxberry instruments in transit to make sure they arrive in tip-top condition.

The packaging operation begins on the drawing board where each unit has its own container "engineered" to fit perfectly. The assembly operation on the wooden enclosure starts with the base board on which a piece of metallized cloth is positioned. The machine sits on the cloth-covered base and is bolted solidly in place.

Corrugated cardboard is assembled on sides and over the top of the unit and this protective cover is held firmly together with pressure-sensitive tape. A bag of silica gel is tied to the machine. More metallized cloth is applied over the cardboard to provide a complete envelope, all joining edges are sealed, then air is pumped out so the machine has a vacuumed environment.

The Oxberry shipping box is so well integrated with the machine that people in foreign lands where wood is precious have great difficulty in salvaging the pieces. In spite of rough handling from truck to ship, ship to truck, in all parts of the world, every piece of equipment has arrived in first class condition.

An Oxberry optical printer makes a package that measures roughly 6'x3'x5' and weighs about 2,000 pounds. The same "deep freeze" method is also used for animation stands and other company products. ☐

Let the
CHARLES BESELER COMPANY
Bring You...

**THE EQUIPMENT...
THE "KNOW-HOW"**

**To Add IMPACT To Your
SALES MEETINGS***

***(Board Meetings, Training Sessions, Too)**

Use the "big picture" and the hum-drum sales meeting suddenly comes to life. Facts, figures, sales features are driven home with electrifying force. Meetings become more interesting... more productive... more profitable.

The equipment to project the "big picture" is the business of the Charles Beseler Company. Helping you to select the *right* type of projection equipment for your presentation is the business of Beseler Franchised Audio-Visual Dealers from coast to coast.

A note, on your letterhead, explaining your requirements will start this team *working for you* at once.

**The
VU-GRAPH®
Overhead
Projector**

This type of projector is unique in that you may operate it from the front of a fully lighted room. You face your audience at all times. In addition to projecting full color transparencies... you may use it as an "electric blackboard"—projecting what you write as you write it!

**The
VU-LYTE®
Opaque
Projector**

This projector is always ready for instant use. It will project any opaque material — photographs, charts, financial statements, catalog sheets, magazines, books... even samples (up to 10" x 10" in size, 2 1/2" in thickness). No advance preparation of materials is ever necessary!

**The
SLIDE KING®
Slide
Projector**

This is the projector you need for use in conference rooms, auditoriums or theatres. Extremely versatile, you may use 2" x 2", 2 3/4" x 2 3/4" and 3 1/4" x 4" slides. And project images as large as 21 feet... over distances as great as 150 feet.

**The
SALESMAN®
Sight & Sound
Projector**

This projector goes out on the road with your salesman. It's an attaché-case, desk-top automatic sound slidefilm viewer that works making dramatic presentations... the way you want them made. Excellent sales training, too!

Ford's Sporting Look at Stock Car Racing

Exciting Action on Fairgrounds Tracks Filmed by Dynamic

SPONSOR: Ford Motor Company

TITLE: *Meet Me at the Fair*, 15 min., color, produced by Dynamic Films, Inc.

☆ For a number of years, the major automobile manufacturers have followed a policy of non-support for sporting automotive events. Ostensibly, Detroit has no longer been interested in which stock cars picked up the winner's money at Darlington, Daytona, Milwaukee and other big tracks on the stock car circuit. But dealers have always been interested because cars that prove themselves on the speedways have found ready buyers on the sales floor.

Recently, Ford has given indication that it intends to lend a little more factory help to dealer-sponsored entries in stock car races, and to publicize the results of the growing number of Ford victories.

The new film, *Meet Me at the Fair*, is a good indication of this policy. It describes the good old American institution of the State Fair where people come from all over the state to compete for prizes in livestock, vegetables, preserves and dozens of other products of the home and farm. One of the major competitions at many Fairs is the big auto race pitting dozens of new stock cars against each other at speeds up to 150 miles per hour.

At the Wisconsin State Fair last year, as this film shows, the 200-mile race was a thriller right down to the checkered flag. Forty Fords, Mercurys, Pontiacs and Chevrolets took part and Don White in a Ford copped first place, averaging almost a hundred miles an hour.

The exciting new film is being

distributed entirely through Ford dealers throughout the country. ☐

This Picture Clarifies a New Reading System

English Method Introduced in Script by Gene Starbeker

☆ In print it would look like this:

NUE REEDING SISTEM

That's a sample of "New Reading System" in the augmented alphabet, the controversial new medium used for teaching reading at elementary school level.

The augmented alphabet is being documented by John Bransby Productions, Ltd., New York, by special arrangement with Sir James Pitman, in *The Forty Sounds of English*.

The augmented alphabet, known in educational circles as the Initial Teaching Medium (ITM), has stirred enormous interest since its introduction in England in 1961 by the Ministry of Education. The alphabet was devised by Sir James Pitman, chairman and managing

director of Sir Isaac Pitman and Sons, Ltd., of London.

His grandfather, Sir Isaac, was a pioneer in the field of communication of the English language and originator of the Pitman Method of Shorthand. Sir Isaac created the first phonic alphabet in 1844.

"Now, when our American educational methods are coming up for constructive criticism and analysis, we at Bransby feel ITM must be explained and considered as a means for overcoming our most serious problem — reading difficulty," notes David M. Jacobson, Bransby vice president and producer of the 27½-minute color documentary.

Statistical research has indicated that serious reading problems are faced by a startling number of English-speaking persons today:

- * \$10,000,000 in the U.S. goes annually for teachers' salaries to staff college-level remedial reading courses to bring reading comprehension to the level necessary for classroom work.

- * 15 per cent of the American labor force cannot properly read even simple written instructions.

- * 25 per cent of all Britons are labeled functional illiterates.

The Forty Sounds of English has been written and directed by Gene Starbeker, whose previous credits include numerous educational and technical films. One of the latest of these is the Bransby production of *Images of Life* for the United States Information Agency, soon to be released for foreign television distribution.

Starbeker will use simultaneous live action and animation to dramatize and clarify ITM's effectiveness as a learner's alphabet. ITM is designed to improve initial reading facility and success. A youngster makes the transition to the standard alphabet within a year or two.

Sequences filmed in England show children taught by ITM whose reading levels are an average of two years ahead of those taught by conventional methods. Other scenes record the reactions of parents and teachers.

"ITM utilizes all but two of the symbols in the Roman alphabet," Sir James Pitman explains ("q" and "x"), "and 19 augmentations. Each symbol represents one of the sounds of English." The augmented alphabet reduces the variety of letter combination sounds from nearly 2,000 to 88. ☐

La Belle's AV TUTOR

fully-automatic
film strips with
convenient
tape cartridge

Just place the cartridge into the Tutor and you're all set for continuous showing. This dual-track tape player and automatic projector combination is ideally suited for sales work and training.

The sound is perfectly synchronized to the picture by means of a silent signal. The AV Tutor is available with cartridge or conventional reel.

For top performance in desk top or large screen presentation, see and hear the AV Tutor.

LaBelle Industries, Inc. Dept. B • OCONOMOWOC, WIS.

Those Costly Industrial Fires

National Board of Fire Underwriters
Releases a Hard-Hitting New Picture

SPONSOR: National Board of Fire Underwriters

TITLE: *Are You Sure?*, 14 min. color, produced by Depicto Films.

☆ A fire in an industrial plant is a severe economic loss for the whole community, and most of these fires are caused by little unintentional acts of carelessness. This is the message of the new National Board of Fire Underwriters film, *Are You Sure*, released last month to television stations and to audiences of industrial plant, civic and service groups.

The film portrays the emotional impacts an industrial fire has on five employees who feel that they may have caused the disaster. Each

Industrial fires like this cause a severe economic loss to the plant community . . .

employee is aware of a careless act he committed just before the fire. All wish they could relive those moments to rectify their carelessness that could have produced the severe economic effects which they, their fellow workers and the community are experiencing.

The industrial plant, its employees and the situations are typical, and most realistically presented. *Are You Sure?* should prove particularly effective when used to motivate employee interest in plant fire prevention programs.

Prints are available on free loan from N.B.-F.U. film libraries in New York, Chicago, Atlanta and Berkeley, Calif.

German Cine, Tape Manufacturers Unveil Film Studio at the Photokina in Cologne

● Main feature at Photokina, the international photo marketing fair held in Cologne again this year (March 16-24) was the unveiling of a studio jointly operated by the German cine and tape recorder industries. Our European Editor Peter Rigg reports that sound engineers demonstrated new sound developments. The cinema industry of that country also screened industrial and documentary films to remind Photokina visitors of the value of film in communication.

Radiant president Adolph Wertheimer of our home town again headed the U. S. manufacturer delegations at Cologne. Radiant had another large display in the show.

Detail man shows physician new product with desk-top projector.

Cinevisuals Show New Drugs to Doctors

Warner-Chilecott Laboratories Makes Adept Use of 8mm Desk-Top Projectors and Films

IN ANY PATIENT-CROWDED DAY the busy physician has very little time to spare for the "detail men" of the pharmaceutical manufacturers. Yet the vast majority of doctors realize the importance of knowing about new drugs, one of which might help to solve an immediate need, and how they work.

Some doctors will see only certain representatives; others may try to give a hearing to all of them, but often without giving full attention to the story being told by the representative.

Physicians see pharmaceutical representatives *between patient calls*. Consequently, most doctors have the immediate problems of their patients on their mind.

To gain a better entree and, of even greater importance, to make sure the *full story* penetrated, Warner-Chilecott Laboratories last spring began to explore the use of 8mm silent color films using the Technicolor Instant Movie Projector.

The initial film featured Peritrate, a drug to encourage collateral circulation. Based on a medical journal report and a follow-up paper presented at a meeting of the American Heart Association, the pilot film was half live and half animation. Field-use quickly indicated that re-

search-minded doctors reacted most enthusiastically to live clinical demonstrations showing open heart surgery and similar material.

A Film-of-the-Month in Technicolor

A new Peritrate film was made live, setting the pattern for all future production. Actually, the Technicolor Instant Movie Projector made the experiment practical. Weighing only 6½ pounds, its users would carry it unobtrusively into a doctor's office, plug it into an outlet, slip in a no-threading magi-cartridge, and be into a daylight showing in seconds. It worked!

Now Warner-Chilecott has embarked on a film-a-month program which it calls Cinevisual, a registered trademark for this method of medical communication. All are processed in color by Technicolor, based on the company's decision that *accurate color* is essential to each film and on the availability of the same process for 8mm as is used in the multi-million dollar entertainment film productions.

Pre-Tested by Representatives in Field

One of the largest of the pharmaceutical companies, with about 250 trained representatives calling on doctors in all 50 states, Warner-Chilecott prepared these field men with a full statement of objectives and results of the first 100 or so tests made by salesmen on routine

Illustration from a Warner-Chilecott color piece introduces the new Cinevisual film program.

SHOWING CINEVISUALS:

(CONTINUED FROM THE PRECEDING PAGE 193)

calls, with virtually unanimous favorable response by viewing physicians.

The reaction of the physicians to the new type of presentation indicated immediately that most doctors would have an open door for future presentations in the projector. Furthermore, the unique presentation of a live film shown in the doctor's office almost always resulted in good discussion of the product between the doctor and the representative.

A commentary for the salesman was provided by the company and methods suggested for preparing the presentation. Several alternative ways of using the projector for the screening were shown in quick sketches. In all cases use of the film was stressed as a "second" presentation, following the initial discussion of new products and reminder on old ones. Reason for this specification again confirms the power of the effective visual: Invariably it precipitated discussion, making it difficult or impossible to follow with a second product.

"Visual brevity" has been stressed to the field men. Reminder memos note, for example, that "The Gettysburg Address contains 267 words. Hamlet's soliloquy runs 263. Spoken slowly, they take about three minutes. Our new film on Peritrate takes 4½ minutes, which proves that all great things take 3 to 4½ minutes. We do encounter doctors and nurses who think 'show time' is longer than it is. They then offer the usual excuses. Let's park our bag and approach the receptionist with our projector in hand. Hold up four fingers (a natural gesture) to emphasize that we need only about four minutes . . . Try it. It works like magic!"

As further door-openers, Warner-Chilcott uses letters signed by the Company's medical director, an M.D., each with a color illustration at the top showing the Technicolor projector atop a desk, each suggesting briefly a private film showing, and each personalized with the recipient physician's name done in large typewriter type.

Beyond that, again stressing the value of seeing the material and noting its brevity, the sponsor carries an extensive and continuing advertising program in the medical journals on its Cinevisual availability "when your Warner-Chilcott representative calls." Impartial readership studies were made to determine that in its field the Warner-Chilcott advertising was "among the best-read advertising in 1962." Other studies also indicated that the Company's direct mail was opened and read above average for the industry.

Company officials report a "very gratifying" increase in sales in 1962 and attribute part of it to the impact of the projector program.

The 1963 Warner-Chilcott Cinevisual program calls for converting to a special Technicolor model projector modified with a clutch or stop picture projection, a new method "to better coordinate and support the salesman through advertising."

Current producer of the Warner-Chilcott films is Sturgis-Grant Productions, of New York City, a specialist in medical films.

Monte Carlo Setting for New Ford Films

Dramatic Background of Monaco and Thrilling Action of the Monte Carlo Road Rallye Combine in Films of the Ford Division's New Car Unveiling

THE GLAMOUR OF MONTE CARLO and the grueling tests of the famed Monte Carlo Road Rallye combined in January to provide a story-book setting and tense action as the Ford Division of the Ford Motor Company held its annual mid-year (1963½) new product unveiling in Monaco.

The event was climaxed by finish of the Road Rallye in which two American teams, driving Ford Falcon Sprints, were in the dramatically thinned ranks of drivers who crossed the finish line after a 71-hour ordeal. The Falcons finished first and second in their division (eighth) and were 37 and 41 among the 200 cars completing the race, out of an original 300 entries.

That combined the *color, suspense and action* which made this precedent-breaking program one of the automotive industry's major promotional events of the year.

Both the new product introduction, attended by over 100 U. S. editors and automotive newsmen brought to Monaco for the event, and the road race were settings for Wilding, Inc. motion pictures subsequently shown in 37 U. S. cities. 8mm sound versions for Ford dealer showroom use on Fairchild repeater projectors were also made by Wilding.

Both U. S. and European press people heard Benson Ford, vice-president and head of the

company's Dealer Policy Board, as he opened the international news conference with these words:

"This display of our domestic products in Monaco, the participation — both actual and symbolic — of American mass-produced automobiles in a great European road rally — reflects a profound trend. It symbolizes the drawing together of sovereign nations in gigantic trade relationships such as the world has never before known."

With lenses open along the 2,000 mile route of the Monte Carlo rally, Wilding, Inc. crews filmed the Falcon Sprints in action from the chateau country through the foothills of the ice-crusted French Alps. Shooting conditions were no better than the drivers encountered, with long stretches of the route covered with sheet ice and compressed snow, the aftermath of Europe's worst winter in history.

16mm color versions were made for VIP showings across the U. S. and a special half-hour television film was edited for CBS-TV showing. But the Rallye picture was only part of the big story.

The announcement film, covering the new Falcon Futura Sprints, both hard-tops and convertibles, the new Fairlanes and Fords and a limited edition of the T-Bird Landau, brought

Falcon Futura Sprints head out through the chateau country in the Monte Carlo Rallye.

Torturous, ice-covered mountain roads provided a real test of sports car endurance.

When the streets of Windsor, Vt. had been cleared too efficiently, IVC's production team trucked the stuff down off mountains.

Monaco's color and glamor as background for the new models to 37 district cities; 8mm sound versions tied-in with current Ford national advertising using the same settings.

But Monaco's world-renowned background made a "set" seldom equalled for a new car introduction and the Rallye furnished the drama and suspense, as well as the performance tests, which will make both 8mm and 16mm versions of these films top sales material for dealers out across the country and abroad.

Tire Firm Shows the Way

Goodyear Film Provides Sound Advice for Safe Driving Along Winter Roads

SPONSOR: Goodyear Tire & Rubber Company.

TITLE: *Safe Winter Driving*, 11 min., b.w., produced by The Institute of Visual Communications.

Produced especially for drivers in heavy snow areas, this new film points out the two-fold responsibility of such driving. The responsibility falls on the community to remove the snow, and the driver to see that his car is ship-shape condition.

Recommended points to be checked include the battery, lights, brakes, muffler, windshield wipers, and tires.

Better Traction Through Winter Treads

According to National Safety Council tests, winter tires give 28 percent better traction than regular tires on ice, and 51 percent better traction on snow.

The picture is of particular value to young high school students for it instructs the novice. The lessons in driving are learned through the experiences of a teen-age girl being taught the "how to" of safe driving by her father.

Shows "Tricks" of Wintertime Driving

Through the use of stop motion, the camera shows the father advising and instructing. The "tricks" are explained so they can be grasped

Producer Bill Ganz (at extreme right above) checks Goodyear tire as cameraman and crew prepare scene for "Safe Winter Driving."

easily by those who are eager to learn to drive at the first moment that a learner's permit is available. They can see a car skid on ice . . . and learn how to straighten out; and they can watch a car stuck in snow . . . and discover how to free it.

2,000 bookings of *Safe Winter Driving* were made during the first month of winter this year. Distribution is being handled by the Institute of Visual Communications.

NOTE: additional case histories of resultful films are provided in other pages of this issue.

WHEN A LOCAL power company seeks to erect power lines over property in a pleasant neighborhood where residents are proud of their homes, a controversy is sure to develop.

To help harmonize such a problem, *Peter Tapley's Tenant*, a 28-minute 16mm color, sound film was produced for the Electric Council of New England by Bay State Film Productions.

Crestdale Faces a Problem

In the film, Peter Tapley and his neighbors of Crestdale have much to make them happy and satisfied home-owners. Their beautiful homes, including running brooks, bridle paths, and wildlife, are everything to make their mode of living what they want it to be.

Suddenly, they are faced with the problem of the local power company seeking to erect power lines over their property. This might well be a threat to the beauty of their surroundings, as well as seriously affecting property values. This forms the story of *Peter Tapley's Tenant*, the new Electric Council of New England film dealing with the controversy between overhead and underground power installations.

Viewpoint of the Companies

This film was produced to explain why power companies favor overhead power lines. Emphasized are such factors as lower installation costs which in turn provide lower power rates, ease of repairing breaks in such a wiring system, the problem of heat and moisture in underground lines and dangers involved therein.

The power companies, usually the highest taxpayer in a community, explain how they can pass on benefits to the landowners such as forming a buffer against other people building in the area involved, and preservation and upkeep of the land as a wild life sanctuary.

Good Use of Film Technique

Use of animation and a film within a film technique attempt to answer questions that arise every day as more and more power is brought to rural areas.

For information about this film (or a review print), write to Bay State Film Productions, Inc., Box 129, Springfield, Mass.

* * *

Extra Copies of This Annual

While the supply lasts, extra copies of the 13th Annual Production Review are available at \$2 each; postpaid if payment w order.

Utilities' Film Explains Facts to the Public

The Peter Tapley household becomes the focal center of a community problem in this scene from the current Bay State production.

WILL A "porta-dolly" SUPPORT YOUR CAMERA?

Not if it weighs more than a Volkswagen! But few cameras do. The camera plate goes low enough to go under a Volkswagen—13½", or high enough to tip it on its side—55", 65" with optional hi-plate, and it weighs only 320 pounds—the dolly, that is. Try its smooth hydraulic action at Behrend Cine in Chicago; check the quick change of camera angle with the 360° boom at Calvin Productions, Kansas City; lift it at Florman and Babb in New York; give it a gentle roll at Magna Film Productions, Boston; and everywhere load it into your compact station wagon and take it back to the studio. Sorry, it won't fit in a Volkswagen!

Petroleum Industry Hazard Pictured in "Detonations"

THE DEVASTATING DESTRUCTION caused by a special type of almost instantaneous explosion known as a "detonation" is the subject of a new safety motion picture produced for the American Oil Company.

Using a slow-motion sequence lensed at 4,000 exposures a second to show an experiment that emphasizes the difference between a detonation and an ordinary explosion, *Detonations* shows the almost instantaneous disintegration of a rubber balloon filled with propane and oxygen to make its point.

Shows Detail of Explosion

The balloon produces an atomic-bomb type fireball, filmed at 1/4000th of a second. Another balloon is shown in an ordinary explosion, with a single rip, collapsing into a few large fragments. It lasts about 1/25th of a second.

The film was produced by Fred A. Niles Communications Centers of the company's research division, R&D department. It was a key part of a November presentation by Jesse G. Ducommun, vice-president of manufacturing at American Oil, during the annual meeting of the American Petroleum Institute in Chicago.

Leader in Hazard Prevention

Mr. Ducommun has spearheaded a program in the company and the petroleum industry for recognition and prevention of operating hazards. The American presentation accompanied the premiere showing of a new Du Pont safety film made in cooperation with a number of companies and based on an American Oil handbook, "Safe Handling of Light Ends."

One sequence in the film shows a pipe line that blew up at intervals for nearly 30 miles in kangaroo-type explosions as the successive detonations moved the course of the pipe at about 300 feet per second. A detonation travels at very high speed through a vessel, unlike an ordinary explosion, and produced very high localized pressures. Ignition time to detonation may be no more than a fraction of a second.

Film Available to Industry

Detonations' prints are being made available to other companies at cost for use in their safety training programs. The need is stressed for continuing alertness and education to minimize and prevent future processing accidents.

Physical Fitness Keeps Time on Life's Clock

Limbo set featuring a huge "life clock" in the Douglas production of "The Time of Our Lives" shows importance of physical fitness.

PHYSICAL FITNESS is a matter which concerns all Americans, every member of the family. *The Time of Our Lives*, a new 28-minute sound and color motion picture sponsored by the American Dairy Association, presents timely facts and useful advice on achieving longer, happier lives through proper physical conditioning.

The film was produced by Douglas Film Industries, Chicago, in cooperation with President Kennedy's Council on Physical Fitness. A message from the President calls for action on improving the condition of all citizens. Bud Wilkinson, Oklahoma's football coach and special consultant to the Council, tells viewers how to assure ourselves that children are given daily vigorous activities on schedule.

Title from "Life Clock"

The film draws title significance from a clever "life clock" (see illustration) which shows the relationship of physical fitness to life span. The "time in your life" can be extended through adequate exercise anyone can follow at home, through adequate rest and a well-balanced diet.

This film is timely in more ways than its title suggests. Our "soft" younger generation (and most older viewers, too) will benefit from the extensive distribution of *The Time of Our Lives*.

Wide National Distribution

The picture is available on a free loan basis from two national distribution companies: Association Films and Modern Talking

Picture Service, Inc. Both organizations will handle bookings to 16-mm audiences in schools, churches, civic groups, etc. Television (public service) showings are handled by Association Films.

This is a "must" viewing for all Americans.

Good Grooming for Feminine Sales Personnel

Appearance and Manners Are Keys to Salesgirl's Future

A new sound slidefilm, *How Does Your Future Look*, produced by Rossmore Productions, is now being offered for sale by Association Instructional Materials, a division of Association Films.

The subject is 16 minutes long; visually emphasizes the importance of appropriate sales appearance and manners and teaches the way to achieve them. Areas of

had this to say about the film: "The presentation covers each important area quickly and thoroughly and is very practical in its approach.

"This Film Makes It Easy"

"Good grooming," Mr. Brennan said, "is a subject that is often difficult to handle. This film makes it easy to discuss impersonally some problems which create embarrass-

Scenes in Rossmore slidefilm show retail sales pointers.

what to wear, how to apply make-up, what hair styles are best suited for selling, care of clothes and complexion, posture and the do's and don'ts on the selling floor are all concisely and thoroughly explained by means of photography, art and narrative.

Some Things Are Hard to Say

How Does Your Future Look pays special attention to grooming problems that are otherwise awkward to handle directly and gives sales training directors a new way to teach the appearance and sales manners that department stores require.

The slidefilm was originally made for the non-exclusive use of Bloomingdale's in New York and is now being offered to other stores throughout the country.

Vincent P. Brennan, vice-president of Bloomingdale's, recently

ment. We plan to use it for our new employees to let them know what is expected of them, and also, to use it as refresher training for our present staff in all our stores."

How Does Your Future Look was produced by Anne Koller, with art by Robert Reddy, photography by Ralph Rocklin, and coordination by Mary Gail Baas. Prints cost \$75 each and may be ordered from Association Instructional Materials, 347 Madison Avenue, New York.

Premium Merchandising Role Outlined in Color Slides

PLUS — The Story of Premium Merchandising. 40 minutes, color-slide presentation, prepared by the National Premium Sales Executives, Inc.

★ The slides tell a basic story of the history, promotional functions and techniques of premium use. NPSE is offering the slide talk to non-profit and educational groups through its Speakers Bureau. The slides also are being used for sales training by members.

The slides trace the development of premium promotion from the first recorded usage by B. T. Babbitt in 1851 — color lithographs offered for soap wrappers.

Available from National Premium Sales Executives Inc., 41 Bedford St., New York 14, New York.

Rudy Vallee explains "How to Succeed" in selling

Stars Make a "Hit" With Metropolitan Life

Rudy Vallee, Abe Burrows Show "How to" in MPO Slidefilm

THE BROADWAY MUSICAL SHOW, "How to Succeed in Business Without Really Trying," is in its second sell-out year. And in recent months, this hit show gained a "new version" which is "road-showing" nationwide before a very special and select audience.

The newest *How to* . . . also featuring the Broadway show's Rudy Vallee and Abe Burrows . . . is *How to Succeed in the Life Insurance Business by Using Referred Leads and Making Good Neighbor Calls*. They won't have trouble with the men who hang marquee letters, however, for the select audience for this version of the popular musical are the 30,000

field representatives of the Metropolitan Life Insurance Company.

Producer of the new "hit" show is MPO Sales Meetings, Inc. "Family Security Month"

Metropolitan Life's sales promotion department came up with the idea of using Broadway's *How to Succeed* as a promotional program theme for this year's "Family Security Month." And this 20-minute, color sound slidefilm take-off on the Abe Burrows hit, produced by MPO, is a key element in that promotion.

Production of sound slidefilms is a regular part of MPO visual output; MPO Sales Meetings, Inc., (CONTINUED ON NEXT PAGE)

Below: director, producer and star talk over show ideas. Left to right: David Piel and Joe Kilmartin of MPO with star Rudy Vallee.

THESE SALES- MEN FOR "HIRE"

Any one of these "sales makers" will be valuable additions to your sales staff. Take a look at their qualifications:

- 1) After initial investment, they require no salaries, expense accounts, sick leaves or vacations.
- 2) They make every sales point you want made . . . the way you want it made (every time, too!).
- 3) They never tire . . . as persuasive on last call of day as first in A.M.

No, we haven't found a sales robot to replace the salesman. But, we have designed a line of sales "assistants" that will help your present sales force put their sales curve into orbit. Why not look into these Viewlex "sales makers" for your staff now. Contact your local Viewlex franchised A-V dealer or use coupon

Slidefilm's Hit Show

(CONTINUED FROM PAGE 199)

the industrial show and communications' arm of the company, frequently uses slides and strip film, often integrates these tools with live performances and motion pictures.

Metropolitan Life's film is narrated by the inimitable Mr. Burrows. Seated at the keyboard of a

Abe Burrows narrates tale . . .

piano, he tells the story of a young company representative who has to learn the rules of good salesman-

ship. It seems that the fellow thought he could write life insurance policies simply by smiling at his customers and buttering up the boss.

He learns otherwise under the tutelage of that boss: Rudy Vallee. Once Mr. Vallee has inculcated the rules of good selling to our young hero, he finds it easy to sell family security and even easier to get a "yes" to his proposal from the girl he loves . . .

Winner Across the Country

The program made a lively, effective contribution to the Company's nationwide program. David Piel directed, Earl Fultz wrote the script and Joe Kilmartin produced this *How to* show for MPO. William Klauber was executive producer for Metropolitan Life. The entire production was under the supervision of Met Life's Gerry Germain.

Slidefilm Series for Professional Salesmen

Training, Stimulation Provided in "Speaking-of-Selling"

Sales managers and marketing directors are offered a new sales training and stimulation tool in the recently released *Speaking-Of-Selling* program on professional salesmanship, prepared by Henning and Cheadle, Inc. of Detroit, Michigan. The program contains a number of unique features to recommend its consideration by every sales executive sincerely interested in improving the sales performance of his organization.

The program consists of six sound slidefilms in color art. Each film presents the basic principles of professional salesmanship, and then demonstrates the use of these principles in actual selling situations. More than 50% of the films are devoted to "how to" type of demonstrations.

Plan-of-Action in Guides

Each film is accompanied by a detailed meeting leader's guide. The guides offer specific suggestions. Appealing to the "Buying Motive" comes naturally to some people.

tions for applying the principles of the film to any product or service. Another feature of the guide is the "Plan-Of-Action" recommendation. This can be adapted to any product or service to assure immediate application of the professional selling techniques presented in any film.

Six Films Cover Key Areas

The program covers six important areas for stimulating and directing better salesmanship. These include *Attitude, Buying Motives, Handling Objections, Meeting Price Resistance, Closing the Sale, and Better Use of Salesman's Time*. Contents of the entire program represent sales guidance ideas suggested by more than 20 market-

brink scripts

Many types of buyers are shown throughout these slidefilms...ing managers who directed the preparation of the program.

One unique feature of the program is that it deals entirely with business and industrial selling, particularly of the repeat nature. It is ideal for jobber and distributor type organizations. Because it deals with practical, everyday selling situations, it is particularly well-suited for upgrading existing sales groups, and as an advanced or secondary training course for sales trainees.

Summarized in Written Notes

Another highlight is the written summary of the main points which concludes each film. These summaries are presented as the written notes of a salesman in the audience. The summary completes the established teaching technique of presenting each idea *three times*. Each basic professional selling technique is first presented as a technique, then demonstrated in an actual situation and then reviewed in the written summary. These written summaries also provide a helpful guide for the sales people in the audience to prepare their own notes.

The *Speaking-Of-Selling* program is available as a complete set for \$225. This includes six films and six double-sided records, one side with bell signal and the other side with 30/50 automatic signal. A set of meeting leader's guides is

also included. Individual films may be purchased at \$40 each. Quantity purchases lower the cost.

The program is also available for individual salesmen as an "At-Home" course. This "At-Home" course is particularly valuable for a widely scattered sales organization, or where a marketing manager wishes to improve the professional salesmanship of certain members of his sales staff.

Full details can be secured by writing to Henning and Cheadle, Inc., 10010 Greenfield Road, Detroit 27, Michigan.

3M Shows the Use of Tape in "Magnetic Memory"

Magnetic Memory, 16mm, color sound, 25 minutes, sponsored by Minnesota Mining and Manufacturing Company.

Recording tape — the "magnetic memory" of industry and business is the subject of this film. The 3M Company is the maker of "Scotch" brand magnetic tapes.

The theme is that magnetic tape has added a "new dimension" to the memory of man by providing a new method for recording and preserving the knowledge, skills and creative efforts which are vital ingredients of business.

A non-technical description of the theory of sound and recording opens the film. The many uses of tape — from capturing a baby's first words to preserving technical data — are outlined. The manufacturing process, including a description of the controls exercised to produce tape, also is described.

The film is available on a free-loan basis for showings to industrial and business audio-visual and communications groups, engineers, computer programmers and others using magnetic tape. Available from The 3M Company, Dept. Y2-542, 2501 Hudson Road, St. Paul, Minnesota.

Reevesound's William Szabo to Head Contract Operations

Expanding its design and engineering services in the area of communications motion pictures, the Reevesound Company, Inc. has named William Szabo as vice-president for contract operations and construction.

A registered professional engineer, Mr. Szabo played a key role in Reevesound's participation in the Seattle World's Fair including the creation, installation and operation of 50 major motion picture systems in the Federal Science Pavilion.

Reevesound's extensive operations at the New York World's Fair will be under Mr. Szabo's direction, according to president Boyce Nemec. He joined the company in 1960 as production manager. Prior to that date he spent six years with the Reeves Soundcraft Corporation.

Producer Jerry Fairbanks

Fairbanks & Associates Is Formed by Veteran Producer

☆ Pioneer television producer Jerry Fairbanks has formed a new organization to work with Jerry Fairbanks Productions of Calif.

Jerry Fairbanks & Associates, the new affiliate, was created to provide clients with personalized top-level attention, from story to screen. Fairbanks himself will serve as president of the Associates. Robert Scrivner is vice-president in charge of industrial films. Vice-president in charge of TV commercials is Ken G. Banes, former assistant director of radio and television advertising at the D. P. Brother Agency in Detroit.

Completing the executive staff is Frank J. Westbrook, president of Jerry Fairbanks Productions of Illinois. Until recently, Westbrook was a vice-president and creative director at North Advertising in Chicago.

John Henderson, III

Henderson Joins Audio as Director of Television Sales

☆ John Henderson, 3rd, for many years a sales and production executive at Sarra, Inc., has joined Audio Productions, Inc., New York City, as director of television sales. Widely known in the advertising field, Henderson was with Sarra for 16 years, and prior to that was associated with The Jam Handy Organization and directed film programs for American Cyanamid.

Coleman Appointed Vice-Pres. at Pathe Laboratories, Inc.

☆ Kenneth J. Coleman has been appointed Vice-President in charge of east coast sales for Pathe Laboratories, Inc., it has been announced by O. W. Murray, Pathe president.

Coleman previously had been associated with the laboratory for six years as sales manager. He had served in the same post for Guffanti Laboratories and Consolidated Film Industries. Fort Lee, New Jersey.

Reddick V P of W. J. German

☆ William J. Reddick has been elected vice-president of W. J. German, Inc. He has served on the sales staff of W. J. German, Inc., agent for the sale and distribution of Eastman professional motion picture films, since 1952.

Reddick had been previously associated with J. E. Brulatour, Inc. in a similar capacity for five years, having joined that organization after 11 years with Eastman Kodak Company in Rochester, N. Y.

Acme Film Laboratories Retains Cobler as Technical Consultant

☆ Acme Film Laboratories, Inc., Hollywood, has retained Robert Cobler as a technical consultant,

vice-president Mel Sawelson has announced.

Cobler's initial project will be development of a color display unit capable of reproducing high quality color television film recordings from an original source of video tape.

"Acme hopes to have this equipment ready for commercial use by the end of 1963," Sawelson said.

Cobler was formerly director of engineering for Skelton Studios.

Reid Ray Appoints Edw. Engel Regional Sales Representative

Edward E. Engel has been appointed regional sales representative for Reid H. Ray Film Industries of St. Paul and will service the Twin Cities, as well as the States of Minnesota, Iowa, North and South Dakota, and Western Wisconsin.

Mr. Engel is a graduate of the University of Southern California with a degree in Cinematography. In his fifteen years in the film industry he has held positions in Chicago with film producers as a Cinematographer and a Director, later going into the selling phase of the photographic industry in Chicago and the Twin Cities.

The Reid Ray organization has sales offices in Chicago and Washington, D. C., and Mr. Engel has just returned from indoctrination with general sales manager Clyde Krebs, who headquarters at the Chicago office of the St. Paul firm.

When one of Frank Willard's able representatives calls on you, by Ned, he'll make sure you get the whole story about the services and facilities of one of the South's biggest film studios. We're good, you see. How else do you think we get such clients as Coca-Cola, Delta Airlines, Lays Potato Chips, and Finkhauser's Delicatessen?

If you want it best, fast, and pretty reasonable, contact

Fork lift needed for flipping car did double duty as shooting platform on location for Walker picture.

Walker Wanted Realism. This Film's Got It!

Video Films Meets Upside-Down Problems for Sales Film

WHEN THE Walker Marketing Corporation of Racine, Wis. put its OK on a film script designed to help garagemen sell more replacement mufflers, they opened up a Pandora's box of unusual production headaches for the producer, Video Films of Detroit.

Chief grief: the mechanical star of the film was to be an automobile capable of being driven down a highway and into a service station *upside down*. In addition, a host of real magic and film magic effects were called for.

Making Attendants Aware

The script, entitled *Look at it This Way*, was based on the highly visual premise that if customers drove into gas stations upside down, the attendant would be immediately aware of muffler sales potentials.

The obvious temptation to rely solely on optical effects and flip the car with mattes, glass and inverted cameras was discarded summarily by Director Paul Lohman for two reasons. Walker's mechanically minded audience would reject detectable trickery; would be delighted by actual photography of a car that was really running on its roof. The second reason: the film was to be shot in 16mm and trick effects in 16mm can be sloppy from a technical standpoint.

The Car Wasn't Possible!

The first problem was the car itself. Most people in Detroit said it couldn't be done. Video Films got in touch with Ray Nichols, in Highland, Indiana. Ray is responsible for much of the success of Pontiacs at stock car races. He happened to have on hand a Tempest with roll bars and other structural reinforcements that would be necessary to invert a car without crumpling it. He was commissioned to rebuild the car to include three wheels in the roof section.

Casting proved another stumbling block. The driver of the upside down car was endowed, by the script, with magical powers. After considering several good actors who were far from facile with magician's props, Video set out to find a magician who could also

Actor Coe Norton spent several days doing upside-down scenes.

act. A New York talent agent suggested Coe Norton, a fine magician with a great many TV series credits. His assistant, a curvaceous beauty with an Audrey Hepburn-like charm was played by Beverly Winn, who had never appeared in a film before.

The part of the service station attendant went again to Gus Howard who had become very popular with Walker's field forces through his appearance in the same role the year previous.

Then Came the Problems!

On paper, things went well. On location, it was a different story! It was soon found that two Tem-

pests were necessary, one to run upside down, another to run right side up and present a good interior appearance for closeups. Hollow channels were welded on the bottom of the good car so it could be picked up by a fork lift, flipped and set down again for the static scenes.

So much on-the-spot engineering proved necessary that two sets of welding equipment were kept in action at the site. It was also discovered that a man can't climb into an upside down car and take his position behind the wheel.

Mr. Norton would have to get in the car when it was right side up, strap himself in and then the car and actor were picked up and

Offset periscope viewer on Arri camera aided scene composition.

flipped, lowered and the scene shot. The process had to be quick because Mr. Norton could not be kept upside down for more than two or three minutes without considerable discomfort.

For running shot closeups of the driver, the fork lift, the upside down car and upside down talent were run down the road on a low slung flat bed trailer. Long shots of the upside down car required motive power, which was furnished by a go-cart.

Step Printing to Speed Up

The speed of the go-cart was not impressive, so the resulting scenes had to be step printed. To avoid a third generation look, the step printing was accomplished directly on the color internegative and the production internegative was matched to it.

This required a great deal of

close cooperation between the Geo. W. Colburn Lab, which did the step printing and Allied Film Laboratories which made the release prints. Undercranking the camera would have been a better answer, but the results of the step printing were very satisfactory.

Turning Camera 180 Degrees

Two scenes near the end of the film called for a camera that could revolve 180° on the lens axis. A ring mount was considered, but a simpler answer was suggested by a local TV engineer which called for a hi hat & pan head mounted at right angles to the standard tripod head. Slotted bolt holes allowed for final adjustments.

Many of the production problems encountered were bad enough in themselves but they were compounded by a stretch of unseasonably bad weather that made arc lights a necessity. A ten day shooting schedule stretched itself to 22 days and for some shots the arcs were used before a scene to dry off the rain wet concrete apron.

A "Far Out" Sales Picture

In retrospect, all engaged in the project agree that the extra work and the extra money spent were well worth it. The resulting film is unquestionably one of the most far out sales training films ever made for the replacement parts industry and it is crammed with delightful surprises that keep interest heightened. With all the tricks, the sales story is still very much there.

As a gag award, cameraman 'Pete' Toukhanian and his crew presented writer Bill Witherell with a cutout section of the Tempest roof, neatly edged with welding bubbles and lettered with the film title. He treasures it.

It's too early to say whether blame or praise is in order, but right or wrong, in concept and execution *Look at it This Way* marks a decided departure from formula sales films and transparent fakery.

No, we didn't. They did. They say FILMSENSE is the certain way to profitable sales increases.

We are Filmack. We apply FILMSENSE to the creation of sales producing business tools. Then we put them on film. We've been doing it for 44 years.

They are our clients. They use FILMSENSE to spark sales meetings, present products, explain market opportunities, educate salesmen, distributors and

dealers, improve public image and turn prospects into customers.

Does FILMSENSE work? One client claims it sold an account they'd been after for 10 years. Another credits FILMSENSE for a rising sales volume for the third straight year.

FILMSENSE can do the same for you because it is different, effective, and pays for itself. Want proof? Write for your copy of "Case Histories: FILMSENSE IN ACTION."

Dawn Bible Film Volunteers Work Miracle

FOR THE PAST nine months, a unique new series of religious films called *The Bible Answers* has been offered free to television stations across the country by the Dawn Bible Students Association. The series, consisting of 26 half-hour discussion films about the Bible, is being distributed by Modern TV.

The format of *The Bible Answers* programs is basically an interview with three Bible scholars — Russell Pollock, Edward Fay and Norman Woodworth — which is enlivened and made attention-holding by the introduction of living characters from the Bible — Abraham, Moses, Job, David, Isaiah, Peter, Paul and others

\$25 a month. Ray Krupa, a well-known Bible scholar and lecturer, supervises the film activities of the Association.

The Word of the Bible, according to the Association, is that the Heavenly Father is a God of Love. The group hopes to reawaken the belief in a Loving God rather than a Punishing God. It believes in fundamentals, and in the Bible as a source of all Christian knowledge, but does not promulgate these beliefs in a sectarian way, beyond being basically Protestant.

39 Stations Play Series

The films, which are now playing on 39 stations as a series, have been telecast 616 times to an approximate audience of 870,000. Response has been almost universally good — enough so that some stations are now repeating the series.

One of the factors that the television stations appreciate is that none of the films ask for donations, and the Association is not seeking to build up a big mailing list. Small booklets about the Bible are offered and sent with no further follow-up. About 400,000 of these booklets have been sent out to date.

The Association hopes some day to have a full series of 52 films and work goes on constantly to this end. In addition to the 26 completed films, Charter Oak is finishing up 14 more, and scripts for seven are ready to go into production.

Scenes in Dawn Bible films . . .

speaking their lines from the Bible. All of the films were produced by Charter Oak Productions, New York.

Supported by Contributions

The Dawn Bible Students Association, founded in 1932, is a loosely-organized, nationwide group of sincere people interested in the good news which the Bible brings. About 25,000 of these people pitch in with small contributions to help spread the Word. There are no big contributors and the average donation is about \$5 per month. The working staff of about 25 full-time people serves voluntarily with an income consisting of only room, board and

19 FAIRMONT AVENUE
TORONTO OTTAWA, CANADA MONTREAL

In this scene from "The Challenge of Dentistry," Dr. Ford tells young Jim Reynolds of opportunities, rewards of the profession.

Gaining Recruits for the Dental Profession

"The Challenge of Dentistry" Aims to Interest Young Viewers

THE OPPORTUNITIES for young people in the dental profession are explored in a current 28-minute color motion picture, *The Challenge of Dentistry*, produced by Cal Dunn Studios, Chicago, for the American Association of Dental Schools and the American Dental Association.

A dramatic background brings out the many careers available in the profession; in private practice, public health work, government, hospitals and specialized aspects. The film is aimed at young people of high school and college age and is being distributed by the ADA's Bureau of Audio-Visual Services.

The film's opening sequences have all the suspense of a TV drama. Dr. Ford (played by Joe Slattery of TV fame) is being honored for helping save the life of a

woman patient, in whose mouth he detected the onset of cancer. This seldom-known but vital part of the dentist's work excites the attention of a lad, Jim Reynolds (played by Eddie Applegate of "Bye Bye Birdie").

The film answers, in down-to-earth language, the questions which trouble young men and women. Its climax motivates young Jim to enroll in dental school. Final scenes showing his graduation present a challenge to young viewers who are told that "they will write the headlines of dentistry of the future."

The film was produced with the aid of the Division of Dental Public Health and Resources of the U. S. Public Health Service and conveys the authority of its settings and collaborators.

*"The difference between the right
production and almost the right
production is the difference between

They Shot the Sports Film of the Year

Countless Millions of Americans and Service Men Throughout the World Are Viewing the "World Series of 1962" and This Year's Film Was the Greatest!

THE ANNUAL WORLD'S SERIES of major league baseball is America's major sports event of the year and motion pictures, replaying the games for thousands upon thousands of audiences in clubs, lodges, halls and hospitals throughout the nation keep hundreds of prints busy through winter, spring, summer and fall. Add to this multi-millionfold audience, the shipments of prints to service men and women at bases at home and abroad, and *The World Series of 1962* is unquestionably the major sports motion picture of the year!

The games between the New York Yankees and the San Francisco Giants were filmed last fall by a veteran of the news, sports and business film production field, Jack Lieb and his crews of Jack Lieb Productions, Chicago. The action and the arrangements, as usual were under the direct supervision of Lew Fonseca, head of the Motion Picture Department of the American and National Leagues of Professional Baseball Clubs.

Sponsorship of the 1962 film was by the Coca-Cola Company and sports equipment supplier, Hillerich-Bradsby, makers of the Louisville Slugger bat. Coca-Cola bottlers are keeping prints moving as are all member clubs in both leagues. The color printing, by Calvin Productions, Kansas City, was a spectacular contribution to the program.

Just before the Series, when it appeared that the Los Angeles Dodgers would be the Yankees' opponents, film work had to be started at the Chavez Ravine site of the play-offs between the Dodgers and the Giants. That added two days of shooting to the eventual seven game Series' schedule.

Total footage exposed was 28,000 feet of Eastman Ektachrome. Five cameras were used almost constantly; one of these was a 16mm Mitchell behind home plate, covering the action of the batter and the pitcher. The camera ran every time a ball was pitched.

Some of the most unusual footage was covered by a second camera behind home plate used for slow-motion sequences, covering any unusual action. This camera was set to follow

the ball to the infield or the outfield under all circumstances. If the play looked spectacular, the scene was filmed at 128 frames per second.

The fourth camera, at Candlestick Park, was placed out in center field so that close-ups could be obtained with a zoom lens (of outfielders catching long flies). A long focus lens on this camera provided closeups of the batter and catcher as they appeared to the pitcher. Even the catcher's signals could be "read" from a center field position in the grandstand which

The Leagues' Motion Picture chief, Lew Fonseca, is flanked by a Series' star and by cameraman Warren Lieb during a game break.

proved to be an extremely effective angle for "cut aways" and other action, such as audience reactions.

A fifth camera roamed the stands picking up crowd shots and general views of the field for "color" and background footage. It was estimated that approximately 3,500 feet of negative was needed for each game and the schedule worked out almost exactly.

Candlestick Park proved a godsend for the crews with brilliant sunlight and an almost total absence of shadows on the field. Not so for Yankee Stadium, a familiar "problem" for both television and film crews with its deep shadows. This setting called for high speed stock but the Lieb crew found that best results were obtained with the normal 7255 Ektachrome stock used in the slow motion camera.

On the day of the third game at Yankee Stadium the rains descended, putting the en-

At left: Warren Lieb focuses for color sequence during pre-game warmups at Series. Right: use of the "walkie-talkie" to make sure of top scenes was inaugurated by Jack Lieb during Yankee-Giant games last fall.

Producer Jack Lieb, high in the stands at Candlestick Park, checks World Series' action in first use of two-way "walkie-talkie."

tire schedule back a day. After the final day in New York, the Series stood at three victories for the Yankees and two for the Giants. The rains delayed the Series at San Francisco for three additional days.

One of the innovations used in this Series was the first use of two-way radio communication between each of the cameramen and Mr. Fonseca. This facilitated light meter readings between the crews as well as assuring focus on special action shots.

All negative was shipped to the Eastman plant in Chicago for processing. On return to Chicago, Mr. Lieb, Lew Fonseca and editors Art Ellis and George Halonen of the Lieb staff began the work of selection and matching. Only those scenes selected for use were printed to be used as a work print in assembling the big picture.

Although the Series wound up a week later than scheduled, the first print was delivered to the League's Motion Picture Department a week earlier than originally planned. The first showing, at Toots Shor's restaurant in Manhattan, launched the premieres. 225 members of the sports departments (press, radio and television) as well as members of the Commissioner's office and officials of both Leagues were at the first show.

Press comment has been enthusiastic but so has the reception given the hundreds of print now moving on night and day schedule to audience groups throughout the world.

Siemens "16" Sound Projector Has Wide Range of Capability

The Siemens 16 16, single system double system sound projector or is a high quality machine with extraordinary range of capabilities. The single system side of the machine has all of the most useful

Siemens 16 16 Projector

and desirable sound projector facilities. These include optical playback, magnetic recording, and playback, both full track and half track facilities.

The Arriflex Corporation of America has announced its appointment as sole U.S. agent for the Siemens series 2000 16mm sound projectors. The projector is manufactured by Siemens Halske in West Germany.

The projector is specially distinguished by its additional, double system. This is a complete additional sound channel, using 16mm perforated magnetic film, and is mechanically interlocked to the projector. On this "deck" are facilities for recording and playback of full 200 mil magnetic track. Sound may be recorded live and/or from records or tapes or transferred from one channel of the projector to another. Sound may also be recorded on sound and in fact a total of nine recording and re-recording possibilities are obtainable.

The basic projector has a double-cam driven, three-toothed precision pulldown. Pulldown time is a fast 1/192 second for maximum screen brightness. The projector may be set for either two blade or three blade operation optionally, and lamps may range in wattage from 250 to 1000 watts.

New Eclair Reflex Camera Acquired by Camera Service

The new and revolutionary Eclair Reflex has been acquired by

AudioVisual Equipment TradeFair

the latest tools
for film production
and presentation

Camera Service Center, Inc., New York City. This unique 16mm field and studio camera is self-blipped.

Perfect frame registration is assured through use of pilot pins entering the film perforations from the emulsion side. Precision synchronization between the rotary focal plane shutter and the intermittent movement permits 100 per cent of the light entering the lens to reach the film.

The camera unit, complete with 400 foot magazine and motor, weighs only 11 pounds. Magazines are of advanced coaxial double compartment design that

substantially reduces camera bulk.

Built in the camera is a signal generator and automatic electric start mark system for both picture and sound. Instant interchangeability of the motor and magazine and rapid self-threading are additional features.

Check NP #2 in the New Products Form for complete data.

Vertical Optical Printers Now Available in Five Models

Now available are five models of the Emby-Homrich Vertical Optical Printer.

There are two models of the

Emby-Homrich Optical Printer
for Slide, Filmstrip Duplication

46mm version — the standard and new model with photocell for automatic exposure control. These printers are primarily used for the making of internegatives by photo finishers throughout the world.

Internegative sizes can be full, square or 1/2-127 as the operator chooses. For example, from a 35mm slide an internegative can be made in the 1/2-127 size to make 2x or 3x prints. Or a full 127 negative can be made if a 5x7 or 8 x 10 print is desired.

An internegative can be made from a 16mm frame. Portions of a larger transparency can be cropped. In the other direction, an internegative can be made from a transparency as large as 4x5.

An accurate reflex viewer shows the operator the size, sharpness and brightness of the image being printed. The mirror returns immediately after each exposure. Negatives can also be made from opaque copy as large as 8x10. Thus a negative can be made from a print in cases where the original negative is lost or not available.

The new photocell on the Emby-Homrich optical printer makes internegative printing simpler, faster and much more accurate in the hands of inexperienced help.

The 46mm model is also a "super slide" (sq. 127) production printer. Provision is made for automatic operation in large quantity duplicating.

The 35mm version of the Emby-Homrich vertical printer has three models — the standard, plus one with a photocell and one with the photocell as well as a built-in light source with a dialable filtration system. This permits the operator to select any amount of cyan, magenta, yellow filtration merely by turning calibrated dials.

These printers are similar in all respects to the 46mm models ex-

SuperWide Short Focal Lens Added to Buhl Optical Line

The SuperWide One Four is being added by the Buhl Optical Company to its line of extremely short focal length SuperWide projection lenses.

The SuperWide One Four is a fully corrected and coated f:3.0 lens with a 1.4-inch focal length. It covers transparencies of every size from sub-miniature to super slides, drastically reducing required projection distances and producing much larger images than can be obtained with a conventional projector lens.

For example, the Buhl SuperWide One Four uses only 58 inches to project sharp 48-inch wide pictures from 35mm double frame film slides, while a conventional 5-inch lens would require 15 feet. Picture brightness, screen size for screen size, is equal.

New 5,000-Watt Spot Lamp Produced by Studio Lighting

Development of a new 5,000-watt spot lamp which has been studio-tested and pilot-modeled has been announced by the Studio Lighting Company of Chicago. Production of these lamps for producer rental use is now under way.

Outstanding features are size and weight, which has been reduced by approximately 45 per cent. Size has been decreased by five inches in both diameter and length from the 5KW spots available in the industry.

Adequate cooling is obtained by the same system used in the Studio Lighting Company's 10,000 watt Super Spot.

Other features in the lamp include new, high-impact aluminum castings throughout, removable lens, extended ears for scrims, doors and gels. The burner system is designed to rapidly dissipate heat, thus reducing burner damage and maintenance costs. Check NP #6 for more details from the manufacturer.

a newly designed Conrac photographic monitor, and an integral sound recording unit. It records picture and sound on a single piece of film.

The camera incorporates a shutter design which eliminates the

Palmer TV Film Recorder

shutter bar problem and permits recording on a variety of film emulsions. A unique film transport system features a fixed register pin and rapid film pull down. Absence of a conventional aperture plate in the camera prevents emulsion pile up and dirt accumulation.

Camera and monitor are permanently aligned and housed in a combination cabinet-carrying case measuring 40" x 27" x 22". For complete data, check NP #8 in the request form.

New Series of 16mm Projectors Unveiled by Associated Electric

☆ Series 700 — an entirely new group of 16mm sound projectors — has been introduced in England by Associated Electrical Industries Ltd.

Five models incorporate advanced features and are noteworthy for ease of operation.

quiet running, versatility and high quality sound and picture reproduction, as well as for pleasing appearance and portability.

Designed by Sound Equipment Group of AEI electronic apparatus division, the new series offers a choice of projector to meet all instructional or entertainment requirements. Two of the versions, 700 and 701, are for reproduction of optical sound tracks.

The 702 model can deal with both types separately or simultaneously, has facilities for magnetic recording and a four-way mixer control panel. This enables speech or music to be recorded, sound to be totally or partially erased and, with half-stripped film, the sound to be transferred from the optical track.

All models except 700 and 700R have external loudspeakers as well as the case-cover speakers. Check NP #9 for additional product data

Versatile Stereo Projector Shown by Compeco Corporation

☆ A versatile slide projector has been brought out by Compeco, described as a new version of its widely-used stereo equipment.

A feature of the multi-use Compeco 500 is its compact styling. The housing is free of knobs and gadgets. All controls except one are, handily located on a simplified, recessed, console panel.

Stereo slide projection is achieved in the Compeco 500 by having the polarizing lenses between the slides and the projection lenses. The polarization system is easily removable for the showing of 2 x 2 slides. Both types of image projection are easily adjusted, vertically and horizontally, by the single control on the lens housing.

The Compeco 500 has a new

GE's Portable Cinema Light Cuts Weight on Location

☆ Film cameramen are carrying less weight on location these days. The reason: A new, light-weight, portable light source which many of them are using.

The unit, General Electric Company's Cinema Light, weighs only 8½ pounds, including its sealed beam lamp and nickel-cadmium battery pack. Besides the light weight, TV news photographers like the added advantages of "spotless" beam and quick recharge. The unit can be recharged on a rush basis in 10 minutes, giving an additional three minutes of light. Full charge, giving 10 to 12 minutes of light, takes only 60 minutes.

Cinema Light is recharged by plugging it into household current. For photographers on the move, it can also be recharged from a car battery by means of an "inverter." There are several of these devices which convert low voltage to 110-volts available at about \$30. Among these are Heathkit's MP-10 and ATR's 12-T RME. With one

of these devices, photographers can recharge their Cinema Light units while driving from one assignment to another.

Cinema lights are equipped with a wide-angle, 3,400 K, 6,500 candlepower light source, the DWH lamp. This lamp can be used with wide-angle 6.5 mm movie lenses. The light has a three-hour rated life.

No-Scrape Safety Leader in Colors Offered by Starex

There's a unique safety film leader that requires no scraping and is available in a wide variety of colors. The non-flammable acetate film leader, announced by Starex, Inc. of Kearney, N. J., can be used on all standard splicers.

Made expressly for splicing, it has no emulsion for film editors to scrape off. And the opportunity to color-code film reels according to subject, film base, etc. is another advantage offered by Starex.

Full production in sizes ranging from 8mm to 90mm is expected early this year. Get details and prices from the company's main sales office at 251 W. 42nd St., New York 36, N. Y.

The Ceaseless Fight on Polio

Lederle Picture Persuades Viewers to Join Mass Oral Polio Vaccine Feeding

SPONSOR: Lederle Laboratories Division.

TITLE: *The Last Case of Polio*, 20 min, color, produced by Willard Pictures, Inc.

The Last Case of Polio urges a toast to the day when the chain of infection which causes polio may finally be broken. It has the primary aim of persuading the viewer to join in mass oral polio vaccine feedings.

The film has had a wide circulation since its release in October, 1962, notably in the Los Angeles area, where an intensive civic campaign has been on to encourage mass feedings. Surveys have indicated that neighborhoods where the film was shown had a significantly greater percentage of people who took part in the mass feedings campaign.

Shows How Polio Virus Is Transmitted

The Last Case of Polio contains a number of episodes, including an animated one, showing how polio viruses are transmitted and their primary effect in humans. It explains that treatment for polio is a complex process involving not only the physician but the concentrated attentions of nurses, medical technicians and physiotherapists.

Historical sequences trace the history of the disease from ancient times to the severe epidemic in New York in 1916, which claimed 2,000 dead and 9,000 paralyzed.

Some Poignant Chapters from History

The film shows Franklin Delano Roosevelt shortly after he was struck by the disease in 1921, the physical treatment work of Sister Kenny beginning in 1946, and Dr. Jonas Salk's discovery of a vaccine prepared from dead virus in 1953.

Dr. Albert Sabin, in 1960, first produced an oral vaccine which has now been fed to 200,000,000 people with entirely satisfactory results.

Much of the picture was photographed at mass feedings of oral polio vaccine. Production, quality control and packaging sequences were produced at Lederle Laboratories in Pearl River, N. Y., as Orimune, Lederle's oral polio vaccine, was actually being manufactured.

Primarily for Health, Medical Groups

The film is principally for the use of medical societies, public health organizations and other groups involved in the promotion of polio immunization campaigns. It is also being used by schools, civic groups, churches, service organizations and television stations. Distribution is the Lederle film libraries in Pearl River, N. Y.; Los Angeles; and Mt. Royal, Quebec.

Magnasyn Receives Air Force Order

Magnasyn Corporation, North Hollywood, Calif., has received an order in excess of \$232,000 from the Rome Air Material Area of the U. S. Air Force. The Magnasyn TR-1510 multi-channel tape recorder is used by the USAF in military airports to record pilot-to-tower radio transmissions. 

Staged collisions show effects of accidents . . .

. . . and another scene in "Safety Belt for Susie"

Good Safety Pictures Are No Accident

These Recent Useful New Safety Films Are Fortified by Extensive Studies of Accidents

THE HEADLINE PHRASE clues a special interest of industrial-TV commercial — and now educational — film producer Charles Cahill of Charles Cahill & Associates, Inc., Hollywood. Out of a long experience of highly successful production of commercials for two segments of industry came a wealth of background and understanding of the special needs and problems of photography related to petroleum and automobiles. Out of this, too, grew awareness of need for more and better films on traffic safety.

Out of pioneer studies on accidents made by Cornell University, current traffic safety analyses and extended studies are continuing at Harvard, the University of California at Los Angeles, and within the U. S. Public Health Service. In cooperation with these groups, and working closely with many state and local law enforcement bodies, the Cahill organization has built a library of a dozen subjects, with about as many more projected for 1963.

Pictures Are Aimed at Adult Audience

Basically the films are aimed at adult audiences and are primarily for men who make up the "bulk" market; targets are fleet operations, telephone companies, the Armed Forces, and others with sizable quantities of manpower piloting vehicles on the streets and highways.

In general, the films stay away from the shock effect of "blood and gore", for while such an approach makes a film controversial and thus has a sound effect in attracting attention, the inherent negative quality is that people tend to reject the unpleasant and forget it as quickly as possible. Nor are these "nuts and bolts" pictures, though generalities are avoided and each film makes its points specific. Rather, to make the points readily absorbable, and so that the audience goes away remembering the message, each has an element of story to capture and sustain interest.

Safety Belt Can Save a Child's Life

As example of one of the most recent of Cahill's films, *Safety Belt for Susie* is built around U.C.L.A.-staged collisions, using anthropometric dummies and dolls simulating children, which forcibly demonstrates that children of a year or older, riding with presumed

increased safety in a car's back seat, should wear safety belts, that with them children who otherwise will be killed in an accident at a seemingly moderate speed of 30 or 40 miles an hour, can live to prove that "safety is no accident."

Casting of a very winsome little girl and using her doll, Susie, as a device to warn parents, results in an emotional approach which combines the potential of tragedy with heart-warming tenderness.

The Effects of "Drinking and Driving"

Drinking and Driving is slated for early production as a followup of a picture done last year; the newer film will become, in effect, a "synonym" for the earlier one, giving companies concerned with driver education a presentation of the same basic point in a new setting.

Pursuit Driving, for use of law enforcement officers, also will be in the cameras shortly at the 2.2-mile California Highway Patrol track at Sacramento, where 90-degree, "S" and bank turns, use of a tremendously effective "skid pan", and other hazards for 100-mile-an-hour speeds will show how to drive fast and still keep the car under control.

Most Films Are Less Than 15 Minutes

Only one of the films in the Cahill library is longer than 15 minutes. Reasons for this limitation were suitable length for an educational picture; the fact that most often, though each can stand on its own, a screening is part of a longer program in which one or more spea-

Cahill's picture on "Trailer Safety" shows proper care of pleasure-boat hitch to car.

Ideas to Motion Picture Screen

Over 30 Years of Major Studio Experience"

Recent Assignments: Bronston Company's "55 Days at Peking," Cinerama's Seattle Spacearium "Journey to the Stars," Mitisch-United Artists "West Side Story," Children's Hour" and "Two for the See-Saw," Hitchcock-Universal "The Birds," Kramer-United Artists "A Child Is Waiting" and "It's a Mad, Mad, Mad, Mad World."

The experience of a staff of the finest of Hollywood's special effects technicians is now available to industrial, educational, television and theatrical motion picture production companies and film service organizations through a new and exclusive franchise plan. This association offers the latest in Hollywood's innovations and techniques through the tailored equipping and training of your own personnel, backed by the prestige and technical support of Film Effects of Hollywood.

This first announcement offers a limited number of exclusive franchises to responsible organizations.

Reel Safety's No Accident:

(CONTINUED FROM PRICEDING PAGE 217)

kers appear; and increased cost of prints for longer subjects.

All but four are in color, and three titles were not made by Cahill but by David Showalter for the California Highway Patrol. They include *Broken Glass* (13 min.), a study of intersection collisions; *The Camera in Accident Investigation* (Showalter, 15 min., b&w), showing how to use the camera for best documentary results; *A Day in the Life of a California Highway Patrolman* (Showalter, 15 min.) in which Art Baker goes on tour with the Patrol; *Fatal Meeting* (14 min.), a dramatized study of head-on collisions; *Hence Horsefeathers* (1 min., b&w), basically an announcement in which an anthropometric dummy in test collisions supports the value of safety belts; *Impact* (12 min., b&w), showing U.C.L.A. fixed-barrier-type test collisions demonstrating that "any speed can kill — even a limited speed

Scene above shows result when "Trailer Safety" rules aren't followed on the road.

of 'only 25'; *None for the Road* (12 min.), an emotional thought-provoking approach to the social-drinking-driver problem; *The Revolver* (Showalter, 18 min.), giving basic training for enforcement officers; *Routine Stops* (15 min.), a series of seven vignettes outlining points providing maximum safety for officers dealing with traffic violators; *Safety Belt for Susie* (11 min.); *Safety Through Seat Belts* (13 min., b&w), showing anthropometric dummies in other U.C.L.A. test collisions; *Stop, Look and Think* (10 min.), animation and live action combined in a pedestrian safety film for youngsters age 5-10 and their parents, with a separate 2-minute prologue for parents in which Art Linkletter stresses need for repetition and emphasis on pedestrian safety at home as well as in the school; *Trailer Safety* (12 min.), a summary of tips for the trailer enthusiast to insure maximum safety and comfort in road operation with mobile homes and boat trailers.

Three of these films produced last year were entered in the competition of the National Committee on Films for Safety. They took a first and two second-place awards.

A "Journey Into Friendship"

When we received an invitation last month to the preview of a new Girl Scout film about Ceylon, we asked an attractive young Ceylonese girl, Shirlene de Livera, to attend the event as *BUSINESS SCREEN'S* guest reviewer.

Miss de Livera is in this country learning the ins and outs of the film production business as an assistant at Rossmore Productions, New York.

By Shirlene de Livera

Journey Into Friendship, directed by Wheaton Galantine, takes you on a delightful 28-minute spin into friendship in the scouting way.

It tells a fascinating story of a group of young people — the Girl Guides and Girl Scouts of different nations — who with a courtesy and eagerness to serve, with a sense of responsibility, with a love to improve their skills and share their knowledge, try to serve both God and country so well. Thus, striving for the same goal, they live in a spirit of to-

Girl Scouts from Mexico, the U.S. and Denmark getherness, which is brought out quite interestingly in the film.

It starts out rather lazily with scenes from Ceylon — the brown hills, blue waters, and the brown-bodied people of Lanka.

You see exciting Peruvian guides in three different moods . . . dressed in uniforms as nurses aides in the hospital, mastering the art of pottery in the manner of ancient Incas, and in a much lighter mood, dressed in their traditional and colorful costumes in a captivating dance at a Guide festival.

Between scenes we are taken to the beautiful
(CONCLUDED ON THE FOLLOWING PAGE 221)

shooting around Washington?

It happens to all good producers now and then: the next time you have shooting requirements in Washington, you can do away with all the problems of personnel, equipment, shipping, accommodation — by calling Milner-Fenwick, Inc. All personnel and equipment are available at rates low enough to make sure you can handle them with overhead and profit to spare.

EQUIPMENT: 16/35 Blimped Arris—Moviola Dolly—Gear Head—Mobile (2½ ton) van, equipped with 20 x 8 shooting platform—Master B/L—Color-trans—5K2K750 lights—heavy stage cable—16mm mag. records—35/16mm Acme optical camera—360° Oxberry—photo aircraft—powdered wigs.

PERSONNEL: directors—writers—editors—cartoon artists—technical artists—illustrators—cameramen—grips—electricians—production assistants—actors—announcers—pilot—script girls—minutemen.

We have equipment to handle anything this side of a re-enactment of the British arrival in 1812. Experience? The only shooting in Washington we ever missed was the one of Lincoln. (Some outfit by the name of Booth wanted to do it alone—they ran into all sorts of trouble.)

For rates and information call:

Baltimore MO. 4-4221 Hoby Wolf

Cleveland LO. 1-6835 Bob or Frank Gold

LOOK Ma, No STANDS!

That's right. Lowel-Lights attach virtually everywhere, without stands. Shooting in cramped quarters? Flying to location with minimum equipment? Lowel-Lights will save the day. They tape up on walls with non-marring Gaffer-Tape, clamp onto pipes, furniture, moldings, nail onto objects, balance on level surfaces. Work great on stands, but Units fit in your pocket, so do the folding Barn-doors which attach instantly — without tools — to all R40 reflector bulbs. Lowel-Light system saves so much set-up time, it pays for itself the first day of location shooting. Fastest, most versatile, most compact incandescent lighting equipment ever designed!

Fibre case 9" x 12" x 4" with 5 Lowel-Lights, Gaffer-Tape, space for 5 Barndoors \$34.50

Vulcanized fibre case 14" x 22" x 6" with 6 Lowel-Lights, 6 Barndoors, 2 P.I.C. stands, 3-25 extensions, Gaffer-Tape, holders for 6 R40 bulbs \$124.50

Single Lowel-Light with porcelain socket, neoprene cord, Gaffer-Tape \$6.95

Lowel-Light R40 Barndoor \$5.75

Gaffer-Tape 12 yds. \$1.95 / 30 yds. \$3.95

LOWEL-LIGHT PHOTO ENGR., 429 W. 54th ST., N. Y.

An Eastman Kodak Film on "Photography At Work"

Photography at Work, 16mm, 45 minute, sound color, sponsored by Eastman Kodak Company.

☆ This film pays tribute to photography's ever-increasing contributions to industry and research — and to the ingenuity and resourcefulness of industrial photographers. A wide range of action is covered — from going inside a baking cake to a half-mile vacuum chamber filled with whirling protons.

Narrated by NBC news commentator Chet Huntley, the film takes viewers into research laboratories and plants of 19 companies where photography is used as a research or operational tool.

Among the "stars" of the picture are fiberoptics that bend light around corners, printed circuits that control spacecraft, seismographs that interpret geophysical structure and aerial photographs that guide highway construction and traffic studies.

At one point, the camera's eye is even found inside a baking cake in a research laboratory of the Monsanto Chemical Company. Monsanto, manufacturer of some of the ingredients used in prepared cake mixes, ingeniously combined a pan, quartz rod for a light source, lens tube and pulse camera set-up to study the reaction of the leavening agents.

The film opens with a brief summary of the evolution of photography in industry and closes with scenes at Edwards Air Force Base in California, and the Bausch and Lomb Company in Rochester showing one of photography's most exciting new techniques: fiber optics.

Other scenes show how photography plays a part in:

Exploring for oil in Texas with personnel of Geophysical Survey, Incorporated.

Streamlining progress reports at the H. J. Heinz Company in Pittsburgh.

Unraveling the mystery of fiber flow at the Mead Paper Corporation's Central Research Laboratories.

Recording historical highlights at the National Cash Register Company, Dayton, Ohio.

The film is another in Eastman's informational film series. Prints can be borrowed by writing: Audio-Visual Services, Eastman Kodak Company, Rochester 4, New York.

A "Journey Into Friendship"

(CONTINUED FROM THE PRECEDING PAGE 219)

Cabana in Mexico. A residential center, it is located in Cuernavaca and operated by the Guides. Here they interest themselves in different activities such as painting and pottery, playing games and even sightseeing.

Wonderful! — and your wonder is given a big lift as you see the Guides of Denmark in the beauty of their countryside, bicycling after their leader in a troop or walking in the woods.

Finally, we are given a glimpse of the eye-catching loveliness of the landscape and the graceful native costumes of the people of Ceylon. Here the Guides work and share their knowledge with the poor villagers. They teach the girls to sew, or cut and wash the unkempt hair of a little child.

The social life of the Guide is not neglected. For after an interesting day's work, attired beautifully, she's ready for anything, an exciting date, or a quiet evening with her books.

Exciting scenery of four different countries, pleasant music, a fair story with the warm and intimate voice of the narrator, Alexander Scourby, make this film a tremendous success.

SPONSOR: United States Steel Corporation.

TITLE: *Modern Trends in Swine Production*,
20 min. color, produced by The Jam Handy
Organization.

☆ Audiences at the Centennial Festival for Agriculture considered this basic motion picture on an important segment of farm economy as the kind of directly useful picture for rural use.

Its purpose is to present the most up-to-date methods for better swine production, in both confinement and pasture systems. These are explained to farm viewers by a recognized authority, Bernard Ebbing, swine specialist for the Rath Packing House, Waterloo, Iowa. Mr. Ebbing is a nationally-known lecturer and judge of prime hogs. He introduces the picture and serves as its most competent narrator.

The camera swings through swine-raising facilities in Iowa, Indiana and Ohio as the track serves to point out the fundamental principles of successful hog farming. As the first comprehensive picture to be made on this subject for many years, it will prove most useful to growers as well as ag school and college audiences. The picture is being distributed by U. S. Steel, directly from its Pittsburgh, Pa. film library facility.

THE CASE FOR SPONSORED FILMS:

"ARE SPONSORED FILMS IMPORTANT TO KNOX?"

MR. JOHN KNOX, *President, Knox Gelatine, Inc.*

"Of course they are. A great deal of thought, time and money went into our decision to use films in our merchandising program, and we're getting the results we wanted.

Even though Knox Gelatine has been a household standby for almost 75 years, women in growing numbers still are asking us for information on basic nutrition. Our film program was organized to expand this opportunity and to provide both teen-age girls and adult homemakers with factual help in the areas of food preparation, nutrition, nail care and weight control.

Our school film, "A More Attractive You", featuring beauty expert Candy Jones, has proved to be the ideal vehicle for telling teen-age girls about gelatine's contribution to their health and appearance... and allows us to fill an important educational need at the same time. With the trend toward earlier marriages, this audience is an important one for us to reach effectively.

Our television films are equally important to us. Broad-

casters tell us they're popular because they contribute essential information for their homemaker audience and we get excellent exposure for our recipe and grooming suggestions.

Films have found their place in our marketing plan. We're convinced that they've earned their way. Positive identification for our company and our product, wide circulation... and all at a realistic cost."

Modern's skilled distribution achieved these results for Knox Gelatine, Inc.:

ARRIFLEX at work — ONE OF A SERIES *

..... Nine ARRIFLEX 16's in a compact cluster film 360° movies-in-the-round!

The "Circarama" system, developed by Walt Disney Studios, films extraordinary movies-in-the-round views of breathtaking action and beauty, for projection on the huge screen that completely encircles spellbound audiences at Disneyland. Circarama! Nine Arriflex 16 cameras with standard 400-foot magazines. Installed around a pedestal, shooting into individual angled mirrors, to achieve a combined 360° field

of view. Operated and monitored from a single control panel. A highly versatile, transportable camera cluster. Fitted to racing cars... suspended from high-altitude aircraft... dollied through subterranean caverns... shoehorned into small boats... hoisted aloft on towering masts. Subjected to extreme heat and sub-freezing cold... with top performance reliability under all conditions! Whether you use one or nine... no other camera does the job as well as Arriflex!

From the microscope to the missile range... from spot locations to sound stages... Arriflex professional motion picture cameras are the dominant choice of filmmakers in science, industry, and entertainment. They're lightweight, rugged, tremendously versatile — uniquely suited to a range of applications virtually without limits. Here are some of the features that give Arriflex cameras their remarkable capabilities:

- MIRROR-SHUTTER REFLEX VIEWFINDER • REGISTRATION-PIN FILM MOVEMENT • 21°-DIVERGENCE 3-LENS TURRET • CONTOUR HAND GRIP • FRAMES-PER-SECOND TACHOMETER • COMPLETE ACCESSORY SYSTEM... lenses, standard and special-purpose electric drives, power supplies, time-lapse equipment, film magazines, sound blimps, tripods.

THE DIET that Frank Willard went on one sunny day last August really worked. Now, instead of walking heavily about set and location, he sleekly masterminds a skeleton crew working on some of the world's finest productions from a comfortable couch of culm. Feet firmly on the ground, he writes, directs and produces some of the finest films that ever came out of camera and pen. "Win with Slim!" our clients say. They've never lost yet.

But Frank does look bad, doesn't he?

If you want it best, fast, and pretty reasonable, contact

Invite America's Best for Madrid

N. A. M. Seeks Films for 4th International Festival

THE NATIONAL ASSOCIATION OF MANUFACTURERS is again seeking outstanding industrial motion pictures to represent American industry at the Fourth International Industrial Film Festival, to be held in Madrid, Spain this year, beginning on October 14th.

Under the patronage of the Council of European Industrial Federations, which annually sponsors this showcase of outstanding films, the Federation of Spanish Industries is organizing this year's program. The Festival showings demonstrate the progress made by each nation's industries in the fields of production, research and management. Films are only accepted into this event through national associations of manufacturers in each participating country.

American entries (15 films may be submitted) will again be selected a committee of industrial audio-visual experts. Any industrial motion picture completed since September, 1961, is eligible, providing it fits into one of the following categories:

A. Films about economic and social questions of general interest and intended for showing primarily to the general public.

B. Films about specific industrial products, materials or projects, intended for showing primarily to the general public.

C. Films aiming less at information than do those in categories A and B, but which have the purpose of contributing to the prestige of the industry concerned or of a firm and intended primarily for the general public.

D. Films on industrial techniques (management methods, productivity, efficiency and output, rationalisation, automation, application of modern techniques, etc.) intended primarily for specialist audiences.

E. Films on marketing and sales techniques, commercial practice, etc. intended for specialist audiences.

F. Films on industrial application of scientific principles and research intended primarily for specialist audience, including schools.

G. Films on management and manpower training (for example, vocational guidance and training, training within the firm) and on manpower promotion and human relations within the firm, intended for an *industrial* audience rather than the general public.

H. Films on accident prevention, occupational diseases, health, re-education and measures of social security for *industrial* audiences.

To enter a motion picture a sponsor or producer should immediately send a letter describing his film and agreeing to pay the festival registration fee, in the event that his film is selected to represent the United States. All films must be received in New York before June 15th. All letters and films should be addressed to Miss Janet R. Wilkins, Producer, Audio-Visual Programs, National Association of Manufacturers, 2 East 48th Street, New York 17, New York.

Camera Eye THE EDITORIAL VIEWPOINT

AWARDS FOR FIVE outstanding industrial relations films produced in 1962 were presented on March 26th at the 35th Institute on Industrial Relations, sponsored by the National Association of Manufacturers and held at the Arizona-Biltmore, Phoenix, Arizona. Winners were selected in four categories and judged by a committee of leading industrial executives. The award-winners and their categories were:

Company Economics: *Our Newest Challenge*, 20 minutes, color. Distributed by the Motion Picture Section, Martin Company, Orlando, Florida.

Industrial Safety: *Cause Undetermined*, 18½ minutes, color. Produced and distributed by Bay State Film Productions, Inc., Boston and Springfield, Mass.

Management Development: *A Coin With Two Heads*, 35 minutes, color. Distributed by the Proctor and Gamble Company, Cincinnati, Ohio. An award in this category also went to *Overcoming Resistance to Change*, 30 minutes, b&w. Produced and distributed for syndication sale by Roundtable Productions, Beverly Hills, Calif.

Welfare Benefits: *Cash on the Barrelhead*, 17 minutes, color. Produced by Reid H. Ray Film Industries for distribution (syndicated) by the Bureau of National Affairs, Washington, D. C.

The judging committee included Stuart F. Arnold, Manager, Benefit Plan Administration, Union Carbide Corporation; Fred D. Hunter, Director, Employee Relations, American Brake Shoe Company; Hudson Nix, Director of Labor Relations, Celanese Corporation of America; Douglas Soutar, Director of Industrial Relations, American Smelting and Refining Company; and William G. Johnson, Director of Special Projects, NAM Industrial Relations Division.

Handsome certificates of award were bestowed on the winners. Both the jury and the sponsoring host set a high standard of film accreditation which this industry accepts with gratification.

Estey Electronics to Make, Distribute "Cinebox" Which Shows 40 Sound Films

If you wonder what happened to that useful "Cinebox", the Italian-made automatic sound film projection unit which shows 40 four-minute color sound films and can be operated by push-button or by coins, you'll be interested in the news that U. S. distribution (and later, manufacture) has been taken over by Estey Electronics, Inc., oldest organ manufacturer in the U. S.

An Estey subsidiary, Cinevision Corporation of America, has been organized and the unit licensed by Societa Italiana di Fonovisione, of Milan, Italy. Stanley Green, president of

Estey, avers that the "revolutionary advertising medium" has been used successfully in many countries of Europe.

Eventually, the American licensee will manufacture the machines at its Torrance, California plant but will initially import 2,000 units for sale and distribution this year. Estey also plans to produce, distribute and rent films for coin-operated entertainment versions of the machine but is strong on its advertising potential for the myriad of public places in which it can be installed by simple plug-in. They also look to its useful role in trade shows and at conventions.

Washington Groups Hosts Premieres for American Oil's "Potomac Holiday" Film

And, while we're on the subject of important events, the series of previews held in Washington, D. C. for *Happy Holidays Along the Potomac* were noteworthy! This Parthenon-produced travel promotion subject was premiered at an April 22nd luncheon sponsored by the Washington Convention and Visitors Bureau (part of the Greater National Capital Committee) and the Metropolitan Washington Board of Trade. Mr. L. W. (Bill) Moore, president of the American Oil Company, proud sponsors of this tourism film, gave the introduction.

Some extremely well-put comments were made by Mr. Moore, who suggested that companies in his industry could spend less time fighting gas wars and more time expanding the market for their product. He explained how, two years ago, AMOCO decided to enlarge its film library with "positive-approach" films for touring families. *Happy Holidays in the Land of Lincoln* (also produced by Parthenon) was the first in the series (1961) and on May 1st, through the nationwide distribution facilities of Modern Talking Picture Service, Inc., the *Potomac* film will be available on free loan to groups throughout the U. S.

A picture story of this preview event and the subsequent showings to major Democratic and Republican club organizations in Washington will be a feature of our next issue. An example well worth emulating!

Caterpillar Tractor's "Water Bill U. S. A." Backstops Major National Ad Campaign

Those double-truck ads you've seen in national magazines within recent weeks for the Caterpillar Tractor Company's well-timed water conservation campaign have a great film story behind them. The company's film, *Water Bill U. S. A.* (nationally distributed by Modern Talking Picture Service) is supplementing this print campaign in fine style.

As C. B. Leber, Caterpillar's advertising manager, puts it:

"Not every subscriber to this magazine is reading our message. Readership studies indicate that we are reaching a sufficient percentage of the audience to make it a good investment. We feel, however, that the thousands of people who saw the film through your (Modern) 16-mm distribution system and the more than 9 million television viewers have received a fuller (CONTINUED ON THE FOLLOWING PAGE 12)

"Impact at point-of-sale...amazing!"*

*A typical quotation from Videotronic 8 users. Write us for copies of our fan mail.

automatic 8 mm sound motion picture repeater projector... **MPO** Videotronic 8

Now, salesmen, training directors and exhibitors can show motion pictures as easily as turning on a TV set! Show them in daylight on a prospect's desk or to a large conference room group. Show them in a display or a trade show exhibit. Show up to 15 minutes of 8 mm sound film over-and-over with no operator, no rethreading or rewinding. Show your films on a big, self-contained screen. Show them with unmatched brilliance and clarity in picture — the brightest picture available — and clear undistorted sound.

EASY TO CARRY

Light as a portable typewriter, the Videotronic 8 weighs only 19¾ lbs. Smart, luggage-type case makes it easy to carry, and easy to take along.

NEW FILM LONGEVITY

Short film path, unique, powerdriven film platter and specially designed rollers and gate. Tension, abrasion and scratching are virtually eliminated.

NEW PATENTED PRE-LOADED MAGAZINE

Film comes to you in a preloaded plastic magazine. Rewinds film automatically during projection. Stop and start anywhere in the film.

PREPARATION OF 8 MM FILMS: To start your program with the Videotronic 8, MPO, world's largest producer of sponsored films for industry, can make a new, inexpensive 8 mm sound film for you . . . or convert your existing 16 mm films to 8 mm. And 8 mm prints cost less!

VIEWING

Self-contained, fold-out rear projector screen for daylight, desk-top viewing. Finger-tip mirror adjustment for conventional screen projection.

CYCLING UNIT AVAILABLE

For display and exhibit use, for use in "closing" and show rooms. Visitor activates machine. Film runs to end and cuts off, ready to be started again.

PATENTED GUIDE ARMS

gently shape the film coil so that a friction-free space is created in the center of the magazine. The film loop is fed to the projector without tension.

LOWEST PRICED 8 MM REPEATER! With all of its quality features and advancements in continuous projector design, the Videotronic 8 is the lowest priced repeater on the market! It can be purchased or leased on an attractive low-budget monthly lease/purchase plan.

Acmade Foot-Operated Splicer with Tungsten Tipped Blades

Combination
16mm-35mm
Model

\$1495

This splicer is constructed, as is usual with ACMADE products, of the finest materials and workmanship. All castings are of the best quality and the top body and cutter arms are seasoned to prevent distortion after machining. The machining is carried out to limits of $\pm .0005$ " in order that the cutter blades shall close in a dead parallel manner. The cutter blades are made from stainless steel with Tungsten Carbide inserts, and afterwards ground lapped and polished to a limit of $\pm .0002$ " thickness and the cutting edges relieved by 1". The Tungsten Carbide inserts will have indefinite life and will not require sharpening as with other types. A heater unit is installed in the top body of the machine. The top light in a well glass fitting is attached to the body of the machine and also an inspection light in the waste bin together with cement bottle and brush. A scraper block setting jib and support shelf rubber-covered. The whole machine is finished in first quality grey hammer and all metal parts other than cutter blades are hard flash chromed.

ACMADE MARK II EDITING TABLE

\$3295

f.o.b. New York

Makes Editing Easy!

Operation of this simple, efficient editing machine can be mastered in minutes. Continuous movement provides absolute safety for your film. Instant controls and de-clutching allows up to 50% increase speed and efficiency in editing. Any combination of 2 or 3, 16mm or 35mm channels, plus magnetic and optical sound available.

AUTOMATIC BUTT SPLICER

Cuts, Splices, Applies
Magic Mylar Automatically!

Now, with no fuss, mess or waste, it is possible to splice, repair, butt-splice, or strengthen splices on all types of film—positive, negative, magnetic — even duPont Cronar or other bases.

The cutting arm, shown in operating position, is used by pressing the chrome button for cutting both sides of the film simultaneously.

The film, has been registered on pins in the horizontal channel. The cutting blade is easily replaced.

The splicing tape is registered on precision pins and held in place until automatically applied to the film by swinging the arm over and pressing the chrome button, cutting the adhesive and applying it — in perfect register to the film.

Model 35 for 35mm, Model 16 for 16mm—\$295

color-correct[®]

byron motion pictures

"color-correct"

In Webster's dictionary, the adjective correct is defined as "conforming to an approved standard, free from errors."

This describes exactly the Byron "Color-Correct" process that is recognized throughout the motion picture film industry as representing the very highest standard for color duplication. And how did this perfected color process come about?

In 1943, seeking a process for better color reproduction in motion picture prints, Byron instituted an extensive research program. Comprehensive tests were made on the basis of information secured from the National Bureau of Standards. As a result, Byron's printers were modified. Byron then became the first laboratory to print color while accurately maintaining color temperature of the printing lamp, year-in and year-out. With the new Byron process so well received, we adopted the term "Color-Correct." The first of many advertisements on "Color-Correct" printing was placed in November, 1945. Trade-mark application was granted by the U.S. Patent Office on May 26, 1953, under Registration No. 575058.

We know — because we've been told by our customers — that Byron "Color-Correct" prints symbolize the finest quality available in color duplicating. See for yourself!

For free brochure on all Byron services, write, phone, or wire:

Have You Sized Up Your AUDIENCES...

for QUALITY?

Your sponsored film deserves the best distribution it can obtain, consistent with the purpose and intent of the public relations program it supports. More often than not this means a *qualitatively selected audience*—rather than simply raw statistical exposure before any group that happens to be sitting still.

The ability to reach *finer* audiences for sponsored films has been one of United World's many achievements during more than decades in the film distribution business. We can deliver the *largest circulation* in the industry, and, at the same time, achieve for your film the degree of selective exposure that makes your p.r. campaign more effective and more valuable.

At United World we call our service "*custom distribution*" ... and it's just that! It means a constant effort to avoid "waste" exposure for the client; it means keeping your prints in the finest possible condition at all times; it means developing pre-selling promotion that creates a more receptive viewing atmosphere for your film when it is screened. It also means a roster of distinguished clients whose interests and goals do not conflict with each other.

Through our nationwide network of 43 distribution points, our broad film activities and our corporate affiliations with important theatrical, non-theatrical and television interests (we are the only major Hollywood film company in the sponsored distribution field) ... United World can offer its clients...

small WORLD

FROM ROBINSON P. RIGG'S VIEWPOINT

B RITISH A-V MEN welcomed the news that His Royal Highness The Prince Philip, Duke of Edinburgh, husband of Queen Elizabeth II, is to be patron of the 5th International Industrial Film Festival which moves to London in November, 1964.

The Festival will be organized by the British Industrial Film Association and an international exhibit of audio-visual media and material is to be a main feature at the Commonwealth Institute, London's newest convention hall. BUSINESS SCREEN is active on the Press and Publicity Committee for the Festival.

But this year's Festival holds the spotlight as selections get under way for Britain's entries to the 4th International, opening at Madrid, Spain on October 14th. Your correspondent is serving on two of the eight selection panels choosing the 15 British industrial films for Madrid. Altogether over 70 companies are represented on these panels and jurors expect to view over 100 films between April and August. Final selection will be carried out by the Council of the British Industrial Film Association and will be this country's official entries.

British Aircraft Manufacturers Boost Sales With Worldwide Showings of Films

Within a few weeks of its release, the 14th in a series of motion pictures produced under the joint sponsorship of the British Information Services and the Society of British Aircraft Manufacturers was helping boost sales of British aircraft through theatrical showings in 32 countries and, via 11 different language versions, to influential group audiences in 82 lands.

Wings to the Future is the annual report of the industry, featuring the 1962 Air Show at Farnborough, England, which was attended by 11,000 guests from abroad, nearly every one

At the Rank Bell & Howell reception held in Cologne during the Photokina exhibition: (l to r) Keith Russell, president of 16mm Australia (Pty) Limited, of Sydney, chats with Jim Collis, managing director of the Rank Audio-Visual & Photographic Division and Mrs. Collis. Keith markets B & H and Rank products throughout the vast continent of Australia.

a potential buyer of aircraft for civil and military purposes. The film was produced by British Movietone and contains some magnificent aerial photography as well as a feast of information for the aeronautic buff.

The new release has already exceeded the distribution of *Design in the Sky*, 13th in the series, which was seen in 80 countries in 20 language versions.

33% Increase in Sponsored Film Audience During 1962 Is Reported by Sound Services

Eric Morden, joint president of Sound Services Limited, Britain's large sponsored film library, tells me that the scope of the British audience for these factual films can be assessed from his latest figures.

In 1962, 207,810 16mm prints were loaned to 83,124 audience groups — representing a 33% increase on the 1961 figures. The total audience increased by over one million in the twelve months: from 3,118,626 to 4,160,356. In addition to loans by "self-equipped" audiences with their own 16mm sound projectors, Sound Services did increased "Road Show" business. Unilever Limited (grocery products) was among the sponsors. 1,000 hour-long shows of Unilever films were taken to women's groups by mobile projection units, reaching over 80,000 customers.

The average "per head" costs of distribution in Britain are: theatrical showings, under one-fifth of a cent; "off-the-shelf" library loans, three cents; road show viewers, 30 cents.

British Film Archive Welcomes Subjects from Abroad for Its "20th Century" Library

Founded in 1935, the British Film Archive is unique in that it concentrates on collecting, storing, preserving and indexing all types of films which recreate the sights and sounds of the 20th Century.

The Archive vaults are filled with newsreels, newsreel items, short films, industrial films, educational and biographical subjects chronicling the salient personalities of the century. Historical events cover the battles as well as the development of the automobile and the conquest, first of the air, then space. They also contain the major advances in science, medicine, productivity, the growth and achievements of industry and the emergence of developing countries.

To keep that record complete, Curator Ernest Lindgren welcomes informational films from all over the world. Sponsors and producers are invited to write BUSINESS SCREEN's London office at 139a Bedford Court Mansions, London W. C. 1 for full particulars on the Archive.

Sales of John Halas' "Design in Motion" Over 3,000 Copies in the U. S. to Date

Well pleased with the U. S. sales of his book "Design in Motion" is studio head John Halas. Sales of this excellent treatise on the animation art in which he excels have topped 3,000 copies in the States.

Currently, Halas is creating films for clients in five countries, including the Italian candy

KALART VICTOR

SERIES SEVENTY 16mm SOUND PROJECTORS

Projector Primer No. 2

See the lion roar!
His mouth opens wide.
The Kalart/Victor projector opens wide.
But it is quiet.
Why does the Kalart/Victor open wide?
To make film threading easy.
To make projector cleaning easy.
ALL projectors need cleaning.
Why do all projectors need cleaning?
To keep from scratching film.
The Kalart/Victor does not scratch film.
It opens wide for easy cleaning.
And it is oh so quiet!

The Kalart/Victor lens mount, film shoes and tension rollers all open wide for easy threading and cleaning. Quiet, gentle film handling are just two reasons you should specify a Kalart/Victor 16mm projector. For more reasons, see your Kalart/Victor dealer or write:

Being a loving foster parent is a richly-rewarding experience.

Well-Produced Films Help Welfare Agencies Reach a Larger Audience: Aid Volunteers

by Freelon M. (Nat) Fowler*

Voluntary welfare and church agencies rely upon certain specific publics for the partial support and further dissemination of information. Such a circumstance is very true of the Lutheran Child Welfare Association in New York.

Constant, around-the-calendar, mailings in the form of letters, brochures and newsletters supply limited avenues for publicity and other public relations materials. As with many other agencies, in this way we are able to reach specific delegates and other volunteers who, it is to be hoped, spread the word to their friends and fellow churchmen.

A Doorway to a Wider Audience

However, this represents something less than educational saturation because we cannot control usage by the number who ultimately receive our information.

The motion picture medium, it seemed to us, offered an opportunity to reach a considerably larger select audience and reach it more effectively. We believed that if we could produce a sufficiently good film, we might educate our delegates and volunteers in a highly-charged, graphic manner.

And, if produced with guarded emotional tact, these volunteers could become further identified with the Agency and want to represent it to others.

Following this line of thinking it was our intention that these informed volunteers accompany the film to answer questions raised by our audiences. This was our goal and it is being achieved.

From our experience we would

say that though highly-informed, the Association's staff members should not generally be called upon to represent the Agency if volunteer services can be obtained.

Of Lasting Value to Volunteers

It follows that the volunteers in this process learn themselves, become more interested in the Agency and become part and parcel of its public relations program. Analysis indicates this to be very desirable. However, finding volunteers equipped and able presents problems.

The Lutheran Child Welfare Association sent employed staff personnel on several test speaking engagements. These people were asked to submit thorough evaluations of the meetings, together with full reports of questions asked by their audiences. From these remarks an exhaustive set of questions and answers was put in mimeograph form. These were di-

Film scene: because of a shortage of Negro applicants, many children may never find happy homes . . .

*Mr. Fowler is Director of Public Relations for the Lutheran Child Welfare Association.

vided under subject headings for easy reference.

Next, a Speakers' Bureau was formed. All board members, delegates and other volunteer people were invited to attend workshops designed to instruct them how to introduce the film and direct a question and answer period following each presentation.

We recognized that our volunteers were not usually accustomed to public speaking, therefore, considerable time was spent on rudimentary public speaking rules and platform poise. A public speaking primer was compiled and given each potential speaker for study and reference. He also received the compilation of most frequently asked questions and their correct answers.

Brought a Vast New Audience

The film and this procedure has secured for the Lutheran Child Welfare Association an audience we could never have dreamed possible through any other method. Our speakers have proved apt and for desirable psychological speaker and audience responses, we take care to request our volunteers to speak within areas close to their homes in their own churches and organizations.

Advertising the film beyond word of mouth and audience to audience is principally done by mail. The Association printed a simple flier in the form of a "teaser" which includes a provocative still from the movie. The reverse side of the flier serves as a booking order form. With discretion, most mail leaving the Agency includes a copy of this flier.

How We "Package" the Program

Our program consists of an introduction to the film, showing the 15 minute film itself and conduct-

Unwed expectant mother who calls the Association finds love, understanding and help await her.

ing a question and answer period following the meeting. This means we can provide clubs, churches and associations with a packaged program of 30 or 40 minutes duration, the subject being child adoption, foster homes, institutional child care and services to unwed moth-

Preface to the Film

Suffer Little Children is a recent motion picture sponsored by the Lutheran Child Welfare Association in New York to tell its audiences about the four services performed by the Association: adoption, foster homes, Bethlehem Children's home, and service to unwed mothers.

The film was produced by Vision Associates using still photographs and the animation stand techniques of travels and zooms within the pictures. The 400 photographs used in the film, shot by Director Seymour Weissman and by Jeri Sopenen, were specifically made for this technique — with carefully-planned motion blurs and other effects to create a real sense of movement.

An original score of modern music by Irwin Bazelon completes the psychological mood of sympathy for the children involved in the story, and understanding of the Association's people who are helping them.

ers. As the Lutheran Child Welfare Association's child care program and methods are relatively typical and professional in nature, we are fairly representative of current operations in this field throughout America.

Whether other organizations should consider the motion picture medium as described here is pretty much an economic factor. Certainly the experience of this Agency has proven the documentary film to be a more than satisfactory public relations tool. We feel that by educating our publics we can benefit in every way — including financially.

There Are Also Film Failures

A caution would be that an over-produced or under-produced movie might have drastically bad public relations effects.

For ourselves, we felt that a highly skilled or "name" professional acting cast would not be necessary. Also, we did not feel (CONTINUED ON NEXT PAGE)

AN ULTRA-
**SONIC
BOON***

BOON 1. A welcome benefit; blessing.

— Webster

The Lipsner-Smith ultra-sonic film cleaning machine was first introduced to the Hollywood motion picture industry by Consolidated Film Industries.

Thru close user-manufacturer collaboration and under actual working conditions, CFI technicians helped develop the original machine to today's practical** and efficient machine. Now, ultra-sonic cleaning has become standard procedure for negative cleaning in film processing laboratories throughout the world.

A famous first from CFI. One of many in its 40--- years of serving the film industry.

**STILL ANOTHER FIRST FROM CFI is the recent development of a solvent recovery system that further extends the use of ultra-sonic cleaning.

Films for Welfare:

(CONTINUED FROM PAGE 17)
that dialogue, as opposed to narration, could achieve what we wanted of our film.

Assigned to Vision Associates

We contracted with Vision Associates, Inc., of New York City who had considerable practical experience in informational movies, supplying it the script, interior and exterior locations plus our own adults and children for actors. This reduced our overhead. It also facilitated quick production. Our movie *Suffer Little Children* which was produced in the still-photographs-to-motion process was entirely shot in less than one week. Aside from the customary time required for opticals, mechanicals and transferring taped sound to film, no more time was involved and the movie was ready for presentation on schedule.

All things being equal, to the agency considering the adventure of public relations through film, one would be wise to consider such an undertaking as ours. Certainly the Lutheran Child Welfare Association's experience in the film media has been highly satisfactory and profitable public relations. ☐

Dr. Milan Herzog Named VP of Britannica Films, Inc.

Dr. Milan Herzog, director of production for Encyclopaedia Britannica Films Inc., has been named vice-president of production, it was announced by Dr. Warren P. Everette, EBF president.

Dr. Herzog joined EBF in 1946. He was named executive producer in 1958 and director of production in 1962. In 17 years, he has produced over 300 films for the EBF film catalog. ☐

* * *

Kodak's East Coast Division Moves to Pan American Bldg.

The East Coast Division of Eastman Kodak Company's professional motion picture film department will move to new facilities in New York City's Pan American Building on about July 1.

Donald E. Hyndman, Kodak assistant vice president and manager of the professional motion picture film department, said the new offices will provide more adequate sales and service facilities. E. M. Stifle is East Coast Division manager.

Professional motion picture film products accounted for about eight per cent of Kodak's U. S. sales of \$1,056 million in 1962. ☐

**Shake his hand.
Open the box.
Plug it in.
Let 'er roll.**

Revolutionary projector sells your product anywhere. In sound and color. In broad daylight. Sets up in 10 seconds—and repeats automatically. Let us demonstrate:

Technically, the Fairchild 400 is an 8mm rear screen sound movie projector. It works more like a TV set, except you don't have to fuss with the focus.

The Fairchild weighs less than a portable typewriter and takes up less than 2 sq. ft. wide open.

It shows up to 20 minutes' worth of color sound film. Requires no warm-up. Takes just 10 seconds to set up, plug in and turn on. *On is when it counts.*

You can demonstrate snow removal in July, a turbo-prop on a desktop or review a year's research in a minute. Take your customer on a field trip, a test run, or a tour of the plant. Right where he signs the orders.

When the commercial's over, the Fairchild's ready to repeat, automatically, up to 3000 times per print.

As we said, the Fairchild is an 8mm machine—the most reliable and modern ever made—but any 16mm or 35mm film can be quickly and easily reduced to 8, sound and all.

Thousands of Fairchild 400s have gone into use in the first 12 months. They're helping salesmen multiply sales of

automobiles, building materials, tractors, staplers, howling alleys and brassieres. They're converting par salesmen into crackerjacks. Demonstrating product advantages everywhere. Concisely. Dramatically. If you have a product the Fairchild might help, clip the coupon. We'll rush one over and plug it in.

CAN REPRIMANDS IMPROVE DISCIPLINE?

Slidefilm Gives Answer

One of the heaviest burdens of management is wise maintenance of discipline . . . while avoiding costly turnover due to employee resentment of supervisory methods. This slidefilm:

"MAINTAINING DISCIPLINE"

clearly defines the essential importance of discipline. It trains supervisors in the ability to handle the two distinct types: *Self-Imposed and Enforced*, with the proper techniques for use when reprimands are unavoidable. The goal: to build more efficient performance through all levels of organization. One of a tested series of eight sound slidefilms:

"SUPERVISOR TRAINING ON HUMAN RELATIONS"

widely used by management in many industries and service groups.

Write today for other titles in the series and details concerning a preview.

HOT ACTION ON A POLAR FIELD

Sports Classic: "Pro Football's Longest Day"

Filming National Football League's Championship Game
Proved Epic Battle Against Elements for Blair's Crew

THE WORLD CHAMPIONSHIP of the National Football League was decided in Yankee Stadium on December 30th. But the memory of that tremendous game between the New York Giants and the Green Bay Packers is being re-lived nightly when audiences throughout the nation and in the armed forces see the 28-minute color motion picture, *Pro Football's Longest Day*, produced for the NFL by Edwin M. Sabol and his company, Blair Motion Pictures, Inc. of Philadelphia.

The story of the film's production, under the most trying circumstances ever faced by veteran cameramen, is a kind of "epic" of itself. Fierce gusts swept thru Yankee Stadium at kick-off time, scooping the ball off the kicking tee. The temperature dropped steadily that bright, brutal afternoon until cameras as well as players froze and both had to be thawed over open bonfires in the dugouts. Warmed-up spare cameras, kept under blankets and sweaters, were rushed by messengers to crewmen whose equipment kept icing up.

Picture of Action and Suspense

Out of these awesome conditions came a picture with tremendous action and suspense. Even if most viewers know the score (the Packers won it again 16-7), attention will be riveted on the relentless drive of both elevens for the victories which each club so plainly fights to achieve. Play, at least, was "hot" throughout that polar afternoon.

Everything came "hard" that *Longest Day*: the touchdowns at one apiece, the yards gained in rushing and passing and the crackling tackles. Well, nearly everything, except the margin provided the Packers in those game-winning field goals by Jerry Kramer. Hardest of all, in so many ways, was the lot of Blair's camera crews.

"One man suffered a frozen index finger and is still under medical treatment," reports producer Sabol. "Another has lost the circulation in his right hand. We had six ace cameramen and four assistants. Some had worked on Arctic assignments and elsewhere under blizzard conditions and all agreed this was the worst they had faced!"

But like the "pros" on the field,

the crew got the job done with a victorious flourish. They took 12,000 feet of Ektachrome Commercial and highspeed Ektachrome to cover the action (twice what Sabol thought would be needed). Three 16mm Arriflex cameras and five 16mm Bell & Howell Filmos were used on the job. Two main cameras were posted high above the 50-yard line; one of these was the "master" camera used to record every play; the other caught close-ups in slow motion with its long focal lenses. But "slow-motion" became impossible when the camera motors had to be run at 48 frames per second and above to try and get a 24-frame per-second speed.

Cameras at Strategic Points

Other cameras were placed on each sideline, behind the goal posts. One camera "covered" each bench for reactions of the players and coaches; another cameraman roamed the stands to catch glimpses of fan reaction. Three walkie-talkie units proved "life-savers" in helping coordinate the production job.

Weather experts attest that temperatures on the field, created by violent wind gusts up to 50 miles an hour, were equivalent to 20 degrees below zero. Film consumption was greater than expected because unused footage was brittle and kept breaking during threading operations.

Few among the millions who view *Pro Football's Longest Day* will know the tremendous accomplishment this film represents under those weather conditions. For the action and suspense of the game soon take over; the heroics of both Giant and Packer stars rivet attention on the screen. And that's as it should be — but the unsung heroes of that awesome day were the crews who helped create an historic spectacle of sports action.

Press and League Enthusiastic

Sports writers and football executives have been unanimous in their praise of the picture. Art Daley's column called it "terrific . . . football photography at its best." After the New York premiere, Ira Seebacher (Morning Telegraph writer) cited the "splendid telephoto shots of the play," and the Philadelphia Evening Bulletin's Hugh Brown called it a "visual de-

PARTHENON PICTURES

NEW

TRIA/SELL

A new way

to project a

STAND-UP SALES PITCH

VIA FILM

A constant business need is the film where "a man just stands there and belts." The man, whether Sales Manager, Glorious Leader, tech expert, a "satisfied user" or whoever, has to stand on a dais or sit at a desk and just talk. Utterly non-cinematic, inherently dull — but it must go on film for mechanical reasons of portability, duplication, and so on.

The dullness is sometimes relieved by cutting away from the talker to movie clips which illustrate what he's talking about and which his voice "narrates." But two trouble spots remain. Both are crucial.

First, there are still those slugs of talk which are simply not illustratable. Yet these are usually the key items you need to register and to be remembered — the statements of Sales Advantages, the Policy Points, and the Elements of the Selling Proposition.

Second problem, those damned diagrams, and the dammed graphs and tabulations. Visually utterly dull — yet utterly vital to the purpose of the pitch.

These two negatives are what Parthenon's

"TRIA SELL" TECHNIQUE transmutes into positives. Your erstwhile dulllest, heaviest chunks can now become the things your target audience members talk about as the lights go up — and what they remember — vividly.

Cost? Surprisingly feasible.

Delivery? Surprisingly fast.

If your company has a continuing film program (regrettably, we just don't have the time and personnel to work with one-shot sponsors) Parthenon will be happy to air-ship you a TRIA/SELL demonstration subject. Phone Cap Palmer or Ron Haggerty and ask for the TRIA SELL picture.

Ford Motor Company Reports 16 Million Viewers in 1962

The Ford Motor Company — one of the earliest producers of informational films — reported last month that more than 31,000,000 Americans viewed Ford films during 1962.

In addition to these viewers of direct showings, an estimated additional 15,000,000 persons saw the Ford-produced motion pictures on television, according to Robert O. Dunn, manager of the company's Motion Picture Department.

500,000 Groups Saw Films

Mr. Dunn said more than 500,000 group showings were recorded during the year, indicating that the films were being shown at a rate of 1,400 times a day. Showings to elementary and high school classes accounted for approximately 70 per cent of the total audience.

The current Ford catalogue of film offerings includes 29 titles. Six films included in the company's driver-education and traffic-safety series accounted for nearly one-third of the audience for Ford films last year. Another popular three-film series on the Leonard Bernstein concerts, was viewed by about 915,000 persons.

"American Cowboy" Most Popular

A color film titled *The American Cowboy*, the most popular individual movie, led with a 1962 audience of 1,900,000 viewers. It has been the top attraction in the Ford film libraries for 10 of the last 11 years.

The most recent addition to the film library is a color documentary, *The Invisible Bridge*, which portrays the company's far-reaching international operations and their impact on nations and individuals throughout the world.

Ford maintains film libraries in Dearborn, Mich., New York City and Oakland, Calif. The films are loaned without charge to schools, churches, farm and youth groups, and fraternal and civic organizations and civic groups. ☐

MPO Expands Sales, Services of the Repeater Sales Division

The Repeater Sales Division of MPO Videotronics, Inc., has greatly expanded its facilities in New York, and now offers sales and service at other MPO offices in Detroit, Chicago, Los Angeles and Toronto.

Don Woelfel, manager of the division, has moved his headquarters staff to 210 West 65th Street, New York, where the entire third floor will house new equipment and personnel for servicing MPO Videotronic 8 projectors.

Each of the branches will now provide film coating, magazine loading, special projects service and major repairs on the Videotronic 8. Normal maintenance and minor repairs will continue to be available from the network of 43 MPO service stations across the country.

Repeater Sales Division offices are at 1300 Buhl Building, Detroit; 185 North Wabash Ave., Chicago; 800 North Seward, Hollywood; and 19 Melinda St., Toronto.

MPO, one of the major film production companies, is offering film production packages in conjunction with the use of 'Videotronic 8' projectors, which are available on either a purchase or lease basis. ☐

Early Debate on Electricity Depicted in Journal Picture

Rarely does the student or the non-scientist get an opportunity to see and understand the forces that drive scientific exploration and discovery forward.

The American-Italian co-production film titled *Galvani and Volta: An Early Debate in Science*, tells of the scientific controversy between Luigi Galvani and Alessandro Volta during the time that their debate about the fundamental nature of electricity crisscrossed Western Europe and even extended as far as Benjamin Franklin in the continental United States.

Students of science history and scientific method will find pinpointed those details that were the major turning points in the controversy that lasted for 25 years at the close of the 18th century.

Original notes and sketches of the scientists in the film will have value for students of electricity in helping make clear the historical development of modern electrical theory. The laboratory experiments seen in the film were re-created.

For information on the film write to Journal Films, Inc., 909 W. Diversey Parkway, Chicago 14.

We're well equipped...

Miller Releases Braves and Packer Pictures

BIG LEAGUE SPORTS in Wisconsin are covered in two motion pictures just released by the Miller Brewing Company.

One is, *Around the League with the Milwaukee Braves*, an entertaining trip around the National League circuit for a look at the stars and plays which sparked the 1962 season.

The other is, 1962 *Green Bay Packer Highlights*, exciting sequences of the Packers' victorious march to the National Football League championship.

The film about the Braves baseball team pays special tribute to Maury Wills, who broke Ty Cobb's record of 47 years' standing by stealing 104 bases in 117 attempts during the season for the Los Angeles Dodgers.

An entertaining interlude examines the various reactions of ballplayers caught watching a third strike go by and then standing at the plate with nowhere to go. The results clearly show why umpires are lonely men who feel put upon and unwanted.

Earl Gillespie is narrator of the color film, which runs 28½ minutes.

Highlights of Packer Action

The Green Bay Packers' film packs excitement in its sequences showing bruising, bone-crushing man-to-man contact that spells football.

After a surprisingly easy 49-0 romp over the big bad Chicago Bears, the Pack comes up against the Detroit Lions in one of the most suspenseful games of the season. The Miller camera crew lets you watch as Herb Adderley intercepts a Lion toss with only 33 seconds remaining. This set up a field goal by Paul Hornung that puts the Packers out in front, 9-7.

Another thrilling segment shows Adderley sprinting to glory on a

Miller president Norman Klug (r) presents sports prints to Ernie Johnson of Braves, Wally Cruice of Packers; and counsel Robert Cannon.

103-yard kickoff return against the Baltimore Colts.

Other shots show the methodical precision, versatility, and complete mastery of the game that Coach Vince Lombardi has built into his goliaths.

The film includes highlights of the Packer-Giant tilt for the championship of the National League — a classic encounter that will be remembered for many years.

Each film runs 28½ minutes in 16mm sound. Both are highly polished professional productions that reflect great care in editing and cutting.

How to Obtain Loan Prints

Miller Brewing Company offers these two films without charge. Write Film Section, Miller Brewing Company, 4000 West State Street, Milwaukee 1, Wisconsin.

NEW!**SIEMENS****MODEL 2000****16MM SINGLE DOUBLE SYSTEM**

THE WORLD'S ONLY LOW COST 16mm *DOUBLE BAND* OPTICAL/MAGNETIC SOUND PROJECTOR

- Uses 16mm perforated magnetic film on a separate mechanically interlocked sound system!
- Plus all features of conventional optical/magnetic sound projectors!
- Permits record, re-record, mix and playback functions with positive synchronization!

THE MOST VERSATILE, MOST ADAPTABLE 16mm SOUND PROJECTOR EVER!

Preview Projector: Work print on one side and sound track on the other, and the Siemens 2000 16/16 gives you 16mm picture projection with 16mm sound interlock. Preview Theatre quality, too!

Quick Access: original 16mm film on the projector side—original 16mm sound recording on the 16mm magnetic channel, gives you interlocked, synchronous sound. It's portable, too.

Multi-track Films: Show multi-lingual, or other special purpose multi-track sound films, easily, inexpensively. Playback, or playback and record, too.

"One-show" films, "quickie" productions, limited-purpose "low budget" shows — whatever the special purpose, with the picture and sound features of Siemens Projectors, you can do them all to professional standards, and at low cost.

Plus many others

The modular designed Siemens 2000 Double/Sixteen offers a wide range of uses to serve virtually the entire spectrum of professional requirements. Its modular two-system assembly anticipates every application, assuring maximum adaptability to every sound projection. Permits as many as nine ways to record and re-record. The "Single System" side is designed for optical playback and magnetic recording/playback on full and half-track facilities. The "Double System" uses 16mm perforated magnetic film on an added rear sound channel, mechanically interlocked with the projector for absolute synchronization.

Use the Siemens 2000 16/16 as a one-piece sound studio, or as a special purpose Sound-Projector supplement to your existing facilities. No matter how "special" your requirements, you will find this the most adaptable and the most useful Sound Projector ever made.

B-I Photo Products Group Receives 2nd Academy Award

Bell and Howell Company won its second Academy Award this year.

The company's photo products group was honored for a new series of fully automated additive color motion picture printers that have brought a major improvement to the color balance and quality of Hollywood's entertainment films.

James L. Wassell, director of marketing for the group's professional equipment division, represented Bell & Howell at the Academy of Motion Picture Arts and Sciences ceremony in Santa Monica.

The 20th-Century-Fox film *Cleopatra* will be the first 70mm Hollywood motion picture to be printed on the new printer, which is manufactured in sizes ranging from 16mm through 70mm.

Bell & Howell's first Academy Award was won in 1954 for "47 years of motion picture pioneering."

The award-winning printers are capable of making extremely short scene-to-scene color corrections at high speed.

Formerly an over-all balance was pre-determined and an entire film printed to conform to this "average" tone, often resulting in unacceptable color quality in scenes that had to be removed before the motion picture went into general distribution.

The new printers have more than doubled the range of color correction, with 72 variations in each of three primary colors, compared to 31 variations in previous models.

Association Films Awarded a George Washington Medal

☆ Association Films, Inc., distributors of industrial, educational and informational motion pictures, has been awarded the George Washington Honor Medal of the Freedoms Foundation at Valley Forge.

The Foundation's National and School Awards Jury based its selection on a film project entitled *Films for Freedom*, a compilation of motion pictures on the American heritage, national defense, communism and fascism, private enterprise, and biographies of American leaders.

The award reads in part: "For free distribution of patriotic films.

An outstanding accomplishment in helping to achieve better understanding of the American Way of Life."

General Film Laboratories

Observes a Tenth Anniversary

☆ William E. Gephart, Jr., president of General Film Laboratories, Hollywood, commemorated his firm's 10th birthday anniversary recently by the shortest speech on record for such an occasion, with the remark: "We are surprised to be so big so soon."

A division of Pacific Industries, Inc., since 1956, General is a major Hollywood processor of professional motion picture film, with an annual total of nearly 140 million feet of color and black-and-white film. This includes theatrical feature films, TV programs and commercials, industrial, educational and government films.

During its 10-year span, the company reports, it has introduced to the industry the first automated control of printing processes, and the first computerized production-control system. Other novelties include development of high-speed processing for "hot" kines, which was the backbone of the company's business in its early years, and the pioneering and perfecting of the 35, 32 method of producing 16mm negatives and prints.

Arriflex Corporation Holds an Open House on May 1, 2

The Arriflex Corporation of America was host at an Open House at their showrooms, 257 Park Avenue South, New York City, May 1 and 2, from 4 to 8 p.m.

Both the new Arriflex-16M and the Siemens Double System 16mm Sound Projector were shown and demonstrated. The Arriflex-16-M, announced last fall, is a precision-made light weight 16mm motion picture camera, using 200, 400 and 1200 feet magazines, thus affording a wide variety of film capacities to meet specific filming situations.

In addition, the Arriflex-16M has built-in signal generator and electric start marker for easy matching of tape with films, providing positive lip synchronization.

Victor James and other members of Arriflex' executive staff were on hand to answer questions and help solve particular problems in applying both camera

and projector to fit individual needs.

Six Million See Thailand Picture in Nation's Theaters

☆ The Eastmancolor 10-minute travelogue, *Waters of Bangkok*, (reviewed in these pages last year) has been seen by more than six million Americans in local movie theaters since its Washington, D.C. premiere in 1962.

Keyed to the "klongs" or canals that thread through this Southeast Asian country, the film shows how these waterways form the economic fabric of the land. It was produced and directed by Mel London of Wilding, Inc.

Two 13½-minute companion films, also produced by Wilding, portray Thailand's customs and religious heritage. These 16mm Eastmancolor productions, *People of the Waters* and *People of Buddha*, are available for group showings and public service television use from the Eastman Kodak Company. Write: Audio-Visual Services, Eastman Kodak, Rochester 4, N. Y.

Maine's Dept. of Agriculture Reports 46 Million Audience

☆ Forty-six million people — the largest annual audience in the history of the Maine Department of Agriculture's documentary motion picture program, saw that agency's films on TV last year.

A Department summary reports that 199 TV stations in the eastern United States gave its motion pictures 920 free public service showings, an 18 per cent increase over the 1961 record of 779 showings, given by 164 stations.

Several hundred prints of 15 different titles describing Maine products and farming methods are mailed regularly to TV stations by the News and Motion Picture Service of the Department's Augusta office. Additional prints are offered to schools, and one film, *Maine Barbecue*, is in theatrical distribution in northeastern cities.

H. G. Hawes, of Hallowell, who has produced the films over a period of several years, said a June, 1961, release, *Adventures in Eating*, was 1962's most popular subject, having been given 121 TV showings.

13th Production Review Copies

☆ Extra copies of the big 13th Annual Production Review issue are available in New York at The Camera Mart and at Florman & Babb, while supply lasts.

Announce Plans for Film Editing Workshop

THE CAMERA MART, INC., will hold a Film Editing Workshop-Seminar during the week of October 7-11, 1963, at the Henry Hudson Hotel in New York. The Seminar will concentrate on the specialized film editing practices and problems encountered by industrial in-plant, university and government agency film editors.

Many prominent film producers and editors have agreed to participate as instructors, lecturers and guest speakers. Among them are Stephen Kambourian of Robert H. Klaeger Associates, Tak Kako and Frank McGovern of WABC-TV Film Department, Robert Yung and Len Appelsof of Elektra Film Productions.

Leading Editors to Participate

Other leading participants are Irving Oshman of Vision Associates, Fred De Croce and Edwin Pieker of Titra Sound Corporation, Anthony Termini and Bill Henry of Termini Film Editorial Service, Arthur Leigh and Stanley Buetens of Cinema Scores, Jerry Forman of Allegro Film Productions, Marcel Broekman of Professional Film Services, Hoyt Griffith of Visualscope, Inc., Paul Falkenberg of Paul Falkenberg Films, Ken Grubel of Grumman Aviation, and Mal Wittman.

Special guest speakers will include Maurice Levy of Eastern Effects, John Kowalak of Movie-lab, Calvin M. Hotchkiss of Eastman Kodak, Irving Sheib of CQ Motion Picture Titles, Arnold Eagle of Arnold Eagle Productions, and Jack Glenn of Jack Glenn, Inc.

Five-Day Program Is Outlined

Many aspects of film editing will be covered during the five-day program, through technical demonstrations, general lectures, workshop sessions on practice editing projects, scene by scene editorial analysis, and selected film showings. In addition, participants

will visit well known New York film editing facilities.

Attendance is limited to industrial in-plant, university and government agency film editors and related personnel. No charges will be made for attendance, except that participants will make their own arrangements for transportation, room and board.

Interested persons may apply to Charles Lipow, General Manager, The Camera Mart, 1845 Broadway, New York 23.

Unusual Films in Production

at Reid H. Ray Film Industries

Two unusual new pictures are ready for filming by Reid H. Ray Film Industries, St. Paul, Minn. The first of these is a 20-minute musical fantasy featuring Benny Goodman and titled *Adventures in Sharps and Flats*. The sponsor is H. & A. Selmer Company of Elkhart, Indiana, musical instrument manufacturer.

The second film in production is being sponsored by the American Medical Association and involves a subject of vital interest to the public.

A third picture, for which animation is being prepared, will trace the experimental stages and assembly of the communications satellite, *Relay*, for the Astro-Electronics Division of RCA, Princeton, N. J.

This 8-minute public relations film will include launch sequences and broadcasts of television signals relayed by the satellite to Europe, South America and back to the United States.

Hercules Gives Employees the Big Picture

Company's 50th Anniversary Motion Picture Explains Widely-Diversified Products Made Possible by Its 27,000 Employees

SPONSOR: Hercules Powder Company.

TITLE: *What In the World Does Hercules Do?*, 19½ min., and *Prologue*, 9 min., color, produced by Matt Farrell Productions, Inc.

During 1963, some 27,000 Hercules employees will see the company's new Fiftieth Anniversary movie, *What in the World Does Hercules Do?* The film, which tells the multitude of things the company is doing today is presented by Chairman of the Board Albert E. Forster in a prologue which goes back a half century to the beginnings of Hercules Powder in 1913, when the company made and sold just one product — explosives.

What in the World Does Hercules Do? explains that it might be almost easier to describe products Hercules does not have anything to do with than to list all those in which it does play an important part.

Products Everywhere Around Us

Answering a letter which asks the title question, a Hercules man starts out by saying that his company helps make the paper on which the letter was written, the inks, adhesive for the envelopes.

As he dictates, he notes that the insulation on the nuke cord, the recording discs and most of the objects on his desk were made with the help of Hercules products.

As the film progresses, a woman's voice plays the part of a Devil's Advocate, questioning, challenging, probing to bring out the information we see on the screen. One good sequence which might be called "Hysteria in the Kitchen" finds the woman's hands

in close-up touching different objects, constantly increasing in pace and becoming closer and closer as almost a blizzard of products come into view: a steak, the meat wrapper, refrigerator enamel, powder detergent, plastic utensils, knife, spoon, paring knife, tea strainer, food packages, telephone, radio, countertop, soap, paper towel, liquid detergent, Clorox, Pine Oil, hand lotion, bread, pie fillings, earpet — all of them produced with the help of Hercules-made ingredients.

Historical Scenes in Prologue

The prologue to the new Hercules film uses some interesting old footage to illustrate the company's history — growing from an explosive maker in 1913 to new fields in the 1920's, when a large scale expansion was made into the naval stores business. (And we can see an old cartoon featuring Turp 'N Time, two hard-working Hercules salesmen on the screen before the days of TV.)

Cellulose derivatives gained for Hercules a unique leadership in this field, and other research has brought the company to a broad base as a major member of the chemical industry.

Picture Is Available for Loan

What in the World Does Hercules Do?, with historical prologue, is now being scheduled for showing to Hercules employees at all plant and office locations during 1963. The main picture, without the prologue, is available to sales groups, service clubs and other organizations in Hercules plant communities. Write the company at Wilmington 99, Del.

'Anniversary Cotton' Observes 150th Birthday of J. P. Stevens

☆ J. P. Stevens & Company resolved to celebrate its 150th anniversary with a fabric of unparalleled quality. And that's why a film was produced, titled *Anniversary Cotton*.

Its primary audience: Department store people throughout the country, as well as the 35,000 Stevens employees in 55 communities.

The film traces the entire process of "tender, loving care." It begins on the huge Continental Ranch near Tucson, Arizona, with unique preparation of the soil for the finest cotton ever grown. It ends in one of the Stevens installations at Whitmire, South Carolina, with the final product emerging from a modern plant. Enroute, just about every facet of agriculture, science and industry plays a part in an unusual achievement.

Produced by Canyon Films of Arizona, the film runs 10 minutes, 16mm, sound and color.

Red Cross Short Subject

Promotes 50-Mile Swimming

☆ American Red Cross has released a new 4½-minute film, *Swim and Stay Fit*, to promote participation in its 50-mile swim program. The short film has been cleared for TV and is available in both color and black and white.

Featuring the Red Cross project, *Swim and Stay Fit*, which was inaugurated in September 1961, the film shows persons ranging in age from four to 80 swimming for recreation and improved health.

The film features Bud Wilkinson, special consultant to President Kennedy on physical fitness and University of Oklahoma football coach. He endorses the Red Cross project and recommends swimming as a means to health.

Chevrolet Film Gives Tips On Shopping for Used Cars

✧ An unusual new Chevrolet public service motion picture gives helpful tips that makes used car shopping as easy for Mom as picking out the week's groceries.

Titled *How to Buy a Used Car*, the 15-minute sound color film was produced by The Jam Handy Organization. It describes three easy tests by which even a non-mechanically inclined man or a woman becomes a judge of a used car's quality. The three steps are (1) the "look test," (2) the "dry run" and (3) the actual "road test."

The film is believed to be the first of its kind ever made available by an auto maker. Now released nationally, it can be obtained without charge by interested groups from Chevrolet Motor Division, Detroit 2, Mich. Expected to reach an audience of nearly four million in the next several years, the film is tailored to appeal to such groups as high school driver training classes, women's clubs, and other interested groups.

The film shows, for example, how by inserting a dime between tire treads, a person can estimate the rubber for wear and also get an indication of the wheel balance and alignment. Jumping on front and rear bumpers help show condition of shock absorbers and springs. Many other easy means are shown for looking into the condition of important components such as body, glass, oil seals, exhaust, steering and brakes.

Check points and tips come from used car experts, with years of experience in the field, according to Ed Cowan, Jr., Chevrolet national used car manager. Pamphlets containing a check list of all the important steps described in the film will be handed out to audiences, he said.

Fungus Infection Treatment Subject of Schering Picture

✧ A filmed report on the long-term use of Fulvicin in the treatment of fungus infections is now available from Schering Corporation, Bloomfield, N. J., pharmaceutical firm.

Titled, *Diagnosis and Management of Fungus Infections of the Skin, Hair, and Nails*, the film uses clinical case presentations by prominent dermatologists to illustrate the latest concepts in dosage, lengths of therapy and specific indications. For the first time,

BESELER VU-GRAPH

*The Right Hand
of Sales
Communication*

The Beseler Vu-Graph, a new and radically different visual tool for business meetings and sales training programs. Operated from the front of a fully lighted room the Vu-Graph is an "electric blackboard." Facing the audience at all times, the user projects what he writes, as he writes it! Or previously prepared transparencies are projected, in brilliant colors, as large as 11' x 11'.

At a sales meeting the key features of a new product appear on the screen the instant the sales manager makes his points. At a conference or board meeting figures and charts are projected, for all to see, without an instant's loss of time. At a sales training session a complex business technique, or a piece of machinery, is visually explained a simple step at a time.

Almost without effort the Vu-Graph becomes the user's "right hand of communication." To learn about the specific benefits of Vu-Graph overhead projectors, and the new visual presentation techniques they permit, use coupon below.

CHARLES BESELER COMPANY

Results in Cutting Tool Operations Shown in Film

The many things a cutting tool can effect are graphically explained in a new 20-minute, 35mm sound color slidefilm produced by the Microbore Division of DeVlieg Machine Co., Royal Oak, Mich.

The film points out the importance of measuring results against standards of tool cost, performance, accuracy and life; and against the 10 basic necessities required of any adjustable cutting tool for any production application. It also covers how the Microbore system of tooling meets these basics to provide productive chips that spell accuracy, productive spindle time, and profit.

Many cutting tool users will find the slidefilm an eye-opener. The film is available on request either from Microbore Division, or from its distributors.

T B Association Unveils a New Documentary

A NEW DOCUMENTARY film on respiratory diseases, *Signposts*, was premiered at a press showing in New York at the Overseas Press Club on April 2. The new film, which was produced by Vision Associates, is intended to spearhead a national effort to alert Americans to the warning indications of respiratory illness.

Signposts was made on location at Summit Park Sanatorium, Pomona, New York. It tells the story

Actor Eli Wallach was another award recipient at the premiere of TB Association's film "Signposts"

respiratory diseases and to seek medical advice and care should they possess the symptoms dramatized in the film story.

The picture will be available to local TB associations throughout the country both to augment the forthcoming respiratory diseases campaign in May and to later serve as a standard film wherever there are planned programs for health information. It will also be available to all community, civic and school organizations as well as to TV stations throughout the nation.

Industry, Sports, Education

1819 PENNSYLVANIA BOULEVARD, PHILADELPHIA 3, PENNSYLVANIA • LO 3-6413 • EDWIN M. SABOL, PRESIDENT

MEMBERS OF THE Industrial Audio-Visual Association, though limited in number by constitutional rule, comprise a healthy segment of company users of audio and visual communications media. IAVA held its annual meeting in Peoria, Illinois on April, 15-18 with executives from Caterpillar Tractor and LeTourneau-Westinghouse companies as their regional hosts.

Meetings and presentations were held at the Pere Marquette Hotel with occasional forays into Peoria industry for guided tours and a memorable dinner at the historic railway setting of Vonachen's Junction. But IAVA followed custom in holding its continuous working sessions, looking at the latest in films into the midnight hours and hearing from a notable group of speakers.

Introduced at early business meeting were new members John Creighton, Systems Development Corp.; G. K. Hall, National Cash Register Co.; and W. Shaw, Jr., of the DoAll Company.

Stanley T. Baryi of the Ford Motor Company gave a progress report on that auto maker's nationwide use of 8mm sound projection among Ford dealers, citing the principal problem of utilization. Kenneth D. Isaacs, speaking from the industrial designer's viewpoint, described the "black box" experiments at Illinois Institute of Technology in his talk on Environmental Communication.

Photographic problems at the forthcoming New York World's Fair was outlined by Union Carbide's member, William Connelly; Dan Rochford, Standard Oil Company (N. J.), described the function and value of his company's employee mass meetings.

The use of films to explain Minneapolis-Honeywell corporate capabilities was well-presented by William Ortman of that company, introduced by IAVA secretary, Harold Daffer, his associate. A telephoned interview with Ed Palmer of New England Bell Telephone in Boston was accompanied by slides as Mr. Palmer described

Picture of shirt-sleeve concentration: IAVA members give rapt attention to a convention speaker.

Industrial A-V Executives Convene at Peoria

Midwestern Companies are Hosts as Members of the Industrial Audio-Visual Association Hear Talks, Discuss Latest Developments in Communication Technique at Annual Meeting

IAVA officers-elect for 1963-64 term are pictured (left to right): Fred Woldt, treasurer; Harold Daffer, secretary; W. J. Connelly, president; Robt. McCaslin, 1st vice-pres.; John Hawkinson, Ill. v. p.

his work with closed-circuit television for employee training.

Paul Richards, Writing Supervisor, Caterpillar Tractor, shared his ideas on better written communication. Dean Miller, Art Director, Calvin Productions, Inc.

was a featured speaker on "Motion Picture Animation Today."

A final Wednesday afternoon program was devoted to program instruction which included talks by Jack O'Hara, Education Supervisor at Caterpillar and by member

Martin Broadwell of the Southern Bell Telephone Company.

Thursday (closing) sessions were headlined by Allis Chalmers' Dick Piasecki ("A TV Program Every 20 Minutes") and by John Deere & Company's Glenn Rohrbach who described a "5110 Tractor Promotion Meeting."

W. J. Connelly, Union Carbide Company, succeeded James Craig as president of IAVA for the coming year; first vice-president is Caterpillar's Bob McCaslin (who served as program chairman at Peoria); and second vice-president is H. LeRoy Vanderford, American Telephone & Telegraph. Re-elected for new terms were John Hawkinson, Illinois' vice-president; Fred Woldt, treasurer; and Harold W. Daffer, secretary. Don G. Peterson will again serve IAVA as assistant secretary.

Regional directors include Alan Yost, Eastern; Marshall Barnes, Northern; Paul Dowty, Central; Robert Strickland, Southern; and Walter Hardy, Western. Named chairman for the association's spring meeting was Mr. Dowty, member in the Chicago area.

Dan Rochford tells about mass meetings for employees of Jersey Standard.

Program chairman, Bob McCaslin, convenes the annual meeting in Peoria.

Retiring president James Craig takes gavel for a final business meeting.

New member W. Shaw, Jr. tells about DoAll's 8mm motion picture program.

Frank Greenleaf describes "Economic Commercials" of the U. S. Steel Hour.

Skyroads Lead to Manhattan

Sights and Sounds of "New York, New York" in a Superb Travel Picture

NEW YORK, NEW YORK, is a major destination for air travelers from all points of the compass. For American Airlines, which believes that motion pictures about its ports of call are significant motivators in the sale of tickets for vacation travel, a good movie about New York is of considerable importance.

An old AA film about New York — vintage 1954 — had about outworn its usefulness by last year. So much has changed in nine years. New York is almost a different city. Making a new film about New York — which has been photographed and rephotographed from every angle countless times — is not an easy project: the problem is how to show something different about the city — something that Mrs. Jones in Omaha has not seen a hundred times at the movies or on her TV screen. But a New York film was scheduled in 1962 and production was assigned to Audio Productions, Inc.

Working with Audio's staff on plans for the film, American Airlines' Sales Promotion Director, Meck Howlett, thought that perhaps a different approach could be developed

from the theme of "what do New Yorkers themselves like about their city?" Perhaps some less spectacular sights would create a new vision of the metropolis — the small shops,

little restaurants, quaint markets and quiet parks.

So Audio's production team and Mr. Howlett's task force at AA made lists of what they, as New Yorkers themselves, thought were the most interesting places in the city. This accumulation eventually reached 350 locations before it was finally winnowed down to 120.

Catching the Heartbeat of the Town

A script, written on the basis of "this is what New Yorkers like" was prepared, and while it did not seem to be exactly right to either the Audio production staff or American Airlines, it did seem to point in the right direction, and so it was decided to proceed with photography without a formal script, and based only on the "list of locations."

All during the summer of 1962, Audio photographic crews went out to shoot the city whenever conditions were right until a massive amount of beautiful material had been gathered.

By this time, a revised script had been written, and the film was edited to go with this script. But again, on reading it to the picture on the screen, the script did not seem to match the excitement and beauty of the visual images.

Matching Music, Sound Effects to Visuals

As time approached to deliver a final version, Hans Mandell, Audio's producer-director for the film, and Ted Westermann, Vice

Visitors tour waterfront in this film scene.

From skyline towers looming over the harbor to quaint bypaths, Audio cameras capture spirit of a great metropolis in "New York, New York."

President in charge of sales, proposed that they go ahead and complete a music track and a sound effects track, and see what the film looked like then — see what doctoring the script might need, if any. It was recognized on all sides at this time that the film was shaping up into something quite special.

On the day of decision, when the film, with music and "live" sound effects, but no narration, was shown to the American Airlines project supervisors, Mr. Howlett and Red Sutherland, Film Manager in the Advertising and Public Relations Department, the group sat around mulling it over for a few minutes, until Mr. Sutherland said, "This film is great just as it is — it doesn't need any narration, it tells our story perfectly without any words at all."

Wins Favor With Worldwide Audiences

And, this is the way it has been. For the past six months, *New York, New York* has been one of the most successful films in American Airlines' extensive film library. Top executives of the company have been most enthusiastic, and sales offices have reported exceptionally good audience reactions. In Tokyo, for example, American Airlines' sales manager has reported that it is the best film on the United States that his office has ever used.

In subject matter the film is not really untypical of the conventional travelog, but the way it is done is nothing less than superb. It presents New York as a city of contrasts where one can jog through Central Park in a hansom cab or roar beneath the streets in a subway; dine in old Bavaria, Chinatown, Little Italy or on a penthouse patio overlooking Park Avenue. The skyline at dusk is contrasted with the bright lights and bustle of Times Square where pizza palaces vie with motion picture palaces for attention. There are crowds cheering a home run at Yankee Stadium and

The bright facade of the United Nations Building is pictured in "New York, New York." art lovers at an outdoor exhibition in Greenwich Village.

The impressions are audio as well as visual since much of the film's effect is in its soundtrack; actual sounds of the city and appropriate

background music are used to convey the excitement of New York.

Many famous tourist attractions and unusual points of interest are shown including (CONTINUED ON THE FOLLOWING PAGE 63)

Circle Line "barker" points out landmarks as young visitors tour the waterfront . . .

Gateways to the world: Hudson River piers house great ocean liners between crossings.

Unusual coffee house in Greenwich Village is part of the "color" of the big town . . .

At Coney Island's Aquarium, there's Ookie the Walrus, a "star" with special talents.

Visitors can pause beside this familiar fountain in the Rockefeller Center Plaza.

And, along 17th Street, musicians do their shopping in a dozen or more emporiums . . .

East River skyline is backdrop for a New York Airways' helicopter.

Film Sells Helicopter Service

Picture of Dependable New Jet-Powered Equipment Helps Increase New York Airways' Business 56% in Six Months

SPONSOR: New York Airways.

TITLE: *The Skyline Route*, 13½ min., color, produced by Coleman Productions, Inc.

✧ For many years helicopter passenger service in the New York area had been irregular, depending greatly on suitable weather conditions. But in July, 1962, New York Airways, which flies a scheduled service connecting the three large airports in the metropolitan area, put new equipment into the hands of its pilots — jet-powered, twin-turbined Boeing Vertol 107 helicopters.

These greatly superior aircraft, offering speed, safety, large passenger capacity and all-weather dependability, gave New York Airways an important story to tell to its potential customers throughout the United States, and in other countries, as well.

Getting Message to Travel Agents

Now, travel agents who had previously hesitated to book their passengers via helicopter interchange between airports had to be told about the new helicopters quickly

Jet-powered helicopter circles the famed lady who greets N. Y. visitors

and convincingly. New York Airways decided that a motion picture would do the job best, and Coleman Productions, Inc., of New York, was engaged to do the film, through the agency of Informatics Center.

Harry Coleman directed and photographed the film in close cooperation with Carl Moller of Informatics Center. Harold Azine researched the project and prepared the script.

Shows Features of Boeing V-107

So, into the hands of its sales force, New York Airways put the film, *The Skyline Route*, depicting the advantages of helicopter between the congestion-separated airports and illustrating the several radically better features of the Boeing V-107.

In the last six months of 1962 when the new equipment and the new film telling about the equipment were in simultaneous use, New York Airways' business increased 56 per cent over the same period of the previous year.

Film "Played an Important Part"

Richard Wheatland, Vice-President in charge of the carrier's Sales and Service Division, says, "There is no question that the sales film played an important part in producing this leap forward in our business."

The Skyline Route was pinpointed to professional travel and traffic audiences — travel agents, airlines reservation and ticket people, and travel officers of large business firms.

Armed with 16mm prints of *The Skyline Route*, representatives of New York Airways arranged general showings before office and airport personnel of American Airlines, United Airlines, TWA. Pan

American, Northwest Orient, and other carriers in such major traffic originating cities as New York, Los Angeles, San Francisco, Detroit, Chicago, St. Louis and Washington.

Generally, the film was seen by employees during lunch and coffee breaks after it had received advance publicity through company channels. Other groups viewing the film were professional transportation and traffic clubs.

Shown at Conference in Paris

In Europe, the film was seen by similar professional and employee groups in London, Paris and West Germany, including a full-dress presentation before the Interline Sales Conference at Paris, a meeting of representatives from 72 international airlines.

Greatly facilitating projection to individual key executives was the 8mm Fairchild Cinephonic Repeating Sound Projector, which went along with NYA representatives. It was found that showings on the Fairchild were also easier in the small offices of independent travel agents. Many of them requested that the film be left running on

the loop in the office so that their passenger customers could also see it.

In addition to accomplishing its prime mission of advertising the speed, dependability and superiority of the Boeing V-107 and its secondary mission of establishing New York Airways in the minds of ticket-writing and passenger-routing personnel as a full-fledged scheduled airline service, *The Skyline Route* delivered a big bonus to its sponsors by incorporating a breathtaking scenic treatment offering birdseye views of the skyscrapers, streets, landmarks and waterways of New York, a panorama of sights not possible from conventional aircraft. One travel agent said she felt "associated with New York Airways as never before when I saw with my own eyes what a beautiful flight I will be booking for our customers."

It takes many reactions like that to account for the kind of increased business New York Airways experienced in the last half of 1962, and Dick Wheatland allowed that he was putting it mildly when he said that his company is "very pleased."

Phillips Puts Dealers on Road to Profits

Showing Moe Hammond How Courtesy and Service Build Sales

WHEN A SERVICE STATION dealer feels that he is doing his best and business is still below what it ought to be, what can he do? Well, when the Mountain doesn't come to Moe Hammond — *Moe Hammond Goes to the Mountain*, in a new 22½-minute film for Phillips Petroleum Company, produced by Centron Corporation of Lawrence, Kansas.

The mountain, in this case, is both a real desire on the part of the Hammond family to afford a mountain-resort vacation, and a symbol of the financial success that Moe has failed to achieve.

The film sets the theme in an animated sequence, and then follows the real family as they begin a trip to visit Mrs. Hammond's mother.

Moe's wife starts a family row when she suggests that he might learn something by observing other Phillips stations along the route, and for a while Moe's skepticism is justified. As he encounters some glaring errors in station manage-

ment, Moe feels rather pleased with himself.

Then, as a traveler, Moe begins to get a fresh viewpoint on the impact of courtesies and service provided by the better Phillips Service Stations. The real eye-opener comes when he stops at a station with an area potential very similar to his own — and he finds this dealer doing almost twice Moe's volume of business. What he learns by analyzing this man's business methods gives Moe new insights into his own potential.

This 22-minute color film provides dealers with an opportunity for self-appraisal as they share Moe's impressions of various stations. Much of the film was shot on location at actual Phillips Service Stations, with station interiors and process shots done in Centron studio.

The film is a collaborative effort by the same client-producer combination that last year produced *Help Wanted*, a Blue Ribbon Award winner at the 1962 American Film Festival.

Will the Moe Hammonds make it to the mountains?

Detroit Wins Bid for Olympics

Two Motion Pictures and Wide-Screen Slides Play Key Role in Major Team Effort That Won U. S. Nomination

TWO MOTION PICTURES, integrated with wide-screen slides, were key elements in a memorable example of business and civic teamwork which won Detroit the U. S. nomination as this country's candidate for the Olympic Games' site in 1968.

With 36 out of the 40-man United States Olympic Committee voting in favor of Detroit, the city's highly-effective presentation won the nod over Los Angeles, Philadelphia, San Francisco and Portland, Ore. Now attention shifts to the October 16 meeting of the 74-member International Olympic Committee at Nairobi, Kenya. Lyon, France; Buenos Aires; Mexico City; and Vienna are Detroit's world rivals for the Games.

Show City's Cultural, Economic Vigor

The Olympics' presentation was more than a city's bid for this world honor. It was a portrait in sight and sound and vigorous personal expression by city and state officials and other members of Detroit's dedicated 322-member Olympic committee of their city's cultural and economic vigor; a visualization of that historic era of reconversion back in '45 and of the leadership in arts, culture and sport which characterize the city today.

Detroiters came to the hour of decision in New York, where the U. S. Committee met on March 18th, with Governor Romney and Detroit Mayor Cavanagh heading the delegation. They came armed with presentation material conceived, created and produced through the combined efforts of two leading advertising agencies (Campbell-Ewald and MacManus, John and Adams and two of the country's leading communications' creators: The Jam Handy Organization and Wilding, Inc.

Task of Presentation Planning Committee

The Presentation Planning Committee was headed by Fred Matthaei, Jr. and Campbell-Ewald's Tom Adams headed up the effort on the presentation itself. Main theme of the presentation and the various subthemes were "hatched out" in committee meetings at the Detroit Club on successive Saturdays and in further meetings in Tom Adams' office. These

strategies formed the basis for the work of the presentation committee. The writing job itself was split into several pieces.

The over-all outlining of the presentation

Scene from the 1956 Olympic Games

went to Phil Mason of MacManus, John and Adams. He put together the "working track" on which this presentation ran. The writing team included Bob Liggett of the same agency, Dick Candor of Campbell-Ewald, Frank Brossi

City's cultural side was featured. This scene shows Detroit Institute of Arts.

of Wilding and Bob Casemore of Jam Handy. Senior vice-president Irv Shafer of the Handy organization supervised co-ordination of his company's production, idea contributions.

The Basic Elements of the Presentation

There were four basic points to be laid before the U. S. Committee:

1. The financial ability and stability of Detroit.
2. The city's plans for the new 110,000-seat stadium which must be built for track and field events.
3. The facilities to house both participants and judges: an entire Olympic Village must be constructed.
4. Facilities for spectators and visitors to the city, underscored by the city's past record in being able to get big jobs done.

From the beginning, it was felt that the financial reply to the questions that have been asked of Detroit was the most important single item. This was earmarked as a specific section of the presentation and it was Bob Casemore's job to research and to write. Facts for the financial section came from Mayor Cavanagh's office. For example, the proposed Olympic Village will, in reality, become a University City for Wayne University (304-acre site) and

All of the resources of modern Detroit are being drawn into plans for Games.

Above (and at left): Michigan's Governor Romney addresses the 322-man committee of Detroit leaders during organizational drive that helped to bring the U. S. Olympic Committee's nod.

Dynamic, growing Detroit is pictured in this waterfront view of skyline towers.

Five circles of Olympic flag were matched to gear sequence showing Detroit strengths.

TEAMWORK WINS BID:

(CONTINUED FROM THE PRECEDING PAGE) will later house both single and married students.

Detroit's mayor presented this section at the Committee's New York meeting, using projected graphics to support his theme visually. And he did a great job of it, strongly emphasizing the city's financial health.

The motion pictures were conceived as sequences with wide-screen slides integrated to aid Fred Matthaei, Sr., Mayor Cavanaugh and Governor Romney who introduced these segments. Los Angeles' delegates were plainly taken aback at the Midwest's adroit, hard-hitting use of their own medicine.

Jam Handy and Wilding people who teamed up on the visuals proved again their versatility, understanding of split-second timing and the hard discipline which has characterized similar

major presentations so often created for the automobile industry and other business giants. And out of Jam Handy came the two key motion pictures which first set the stage by exemplifying the Olympic ideals and later spread the city's facilities and talents before the plainly-impressed Olympic Committee.

Film Shows Organizational Achievements

"Detroit pools one of the world's greatest reservoirs of organizational talent," the sound track explained as visuals showed the city's tremendous fund-raising accomplishments and went on to recall the critical post-war adjustment phase when assembly lines were re-converted to peacetime production.

"Detroit's citizens, with their flair for organization, are rolling up their sleeves," the track elaborated and the film brought to New York the enthusiastic testimony of John F. Gordon, President of General Motors; Henry Ford II, Chairman of the Board, Ford Motor Company;

Lynn Townsend, President, Chrysler Corporation; and Richard Cross, Chairman of the Board, American Motors.

The sequences presenting these top officers of leading Detroit companies made a most significant contribution as they told the U. S. Olympic Committee of the backing which Detroit will take to the International meeting in Nairobi. The footage for these executive appearances, in the case of Mr. Gordon, Mr. Ford and Mr. Townsend, was supplied by the Photographic Departments of their respective companies. The sequence which presents the persuasive testimony of Richard Cross, filmed in the Jam Handy studios, brought in his long experience in working with both the U. S. and International Committees.

Here's Example of Top-Level Cooperation

Detroit's presentation group came to New York without benefit of rehearsal. If you can think of a better climax to the spirit of teamwork which prevailed for this determined group, consider that both Mayor Cavanaugh and Governor Romney came into Manhattan on late planes the Sunday evening before the meeting. Both men, when informed of the need for a final rehearsal, got out of bed and joined a complete run-through with all of the props and the slides and the motion pictures in the actual room at Olympic House where the meeting was held next morning.

Los Angeles, briefly a victor on an earlier "appeal" it had won, never really stood a chance as its colored slides delivered a "bland" travelogue pitch. But to Mayor Yorty's (and Governor Brown's) credit, these spokesmen for the West accepted in good grace the Committee's final and overwhelming choice of Detroit as the U. S. Olympic candidate.

Armco Steel Takes Employees to "Main Street U.S.A."

Producer of Specialty Steel Shows Research as the Essence of Its Progress

SPONSOR: Armco Steel Corporation

TITLE: *Main Street U. S. A. — Today*, 30 min. color, produced by Dynamic Films, Inc.

Armco Steel Corporation has prospered and grown strong through the years by a concentrated attention to producing many kinds of specialty steels just a little better than anyone else. The first rolling mill, metal-coated steels, and ore pelletizing are just a few of the processes for which the company is noted.

This film relates the improvements in steel-making and in steel products to the improvements of our standards of living. It traces

the times of the mid-twenties — of Babe Ruth, Mary Pickford and the tin lizzie — to the improvements of the past 35 years.

It says that what shaped the way we earned a living, what determined how we lived and how we enjoyed our leisure time was . . . scientific advance, notably . . . the automobile, electricity and the availability of natural gas. And underlying each advance (and the tens of thousands of minor revolutions that followed from them) was one — the great sinew of America . . . steel.

We see that in the heart of Armco is its Research Center, where for the past 60 years many of the changes that have altered America, that have revolutionized ordinary life, have had their origins. But research at Armco is not merely an aspect of corporate policy — it is the essence of the company.

Some might say that Armco is "research-oriented" but it is more fundamental than that: the company, its plants and its 40,000 people are one vast research system.

Main Street U. S. A. — Today is being shown to all Armco employees at plants in many parts of the country. It was directed by Dynamic's Herman Engel and supervised by Robert M. Nelson, Armco Manager of Special Programs.

Below: Armco research engineer observes corrosion collected within auto muffler during laboratory auto exhaust test.

Portrait of the Air Force

Film Shares "The Air Force on Canvas"

☆ Over the past few years, a hundred well-known artists — members of the Society of Illustrators — have taken part in a project to picture the activities of U. S. Air Force men on duty at home, in the cosmopolitan centers of Europe and the Orient, and in dozens of the most lonely outposts in the world. These paintings are now hanging in the Air Force Academy at Colorado Springs, Colo., and are also the focal point of an extraordinarily beautiful new film, *The Air Force on Canvas*, which not only documents the illustrators' project in work, but becomes a moving extension of the artists' brushes on the screen.

The 17½-minute color film was planned and carried out — un-sponsored — by a group of film-makers under the aegis of Pelican Films, New York, and headed by T. J. "Joe" Dunford. Others who took part in key creative roles were Dick Durrance, Robert M. Hertzberg, Jean Oser, Al Rezek and Bernardo Segall.

Live photography of Air Force Academy cadets casually walking about to study the paintings forms a simple framework for the film, but its fabric is the animation camera's facile mobility and the penetrating insights of the artists' works.

The illustrators bring to these canvases such

moments as B-17's lifting off East Anglian aerodromes in World War II; the "kinderlufte" which transported children from Berlin during the crisis; mementos of a three-day leave in Paris. Other paintings explore the lonely isolation of Alaskan air bases; the staccato action of an alert in a modern SAC base; jets screaming down the cold blue-black skies.

Joe Julian, a skilled narrator with the most "American" of all the voices on film, is exactly right to provide an understated explanation for the flashing excitement on the screen.

The Air Force on Canvas will be used by the Air Force in several different ways. The film is also expected to have a successful theatrical career in the near future. Other facets of its distribution are still being planned. ☐

Progress in Steelmaking

Oxygen's Role in "Steel by Stopwatch"

☆ The Jones & Laughlin Steel Corporation is one of the several U. S. steel makers to introduce the widely-discussed Basic Oxygen Furnace process. Within the 27½ minutes of a brilliant exposition on this important advance in steel making, titled *Steel by Stopwatch*, J&L shows how this process turns out 230-ton heats of quality metal in just 40 minutes.

Steel by Stopwatch (see front cover, upper left and scene above) is notable in other respects. The film has just been selected as one of the U. S. entries to overseas film festivals by the Committee on International Non-Theatrical Events (see page eight) and was the first major U. S. production by the talented Hungarian producer, Julius Potocsny, now vice-president and executive producer at Cinecraft-Continental Productions, Inc. of Cleveland.

Through scenes at the 230-ton BOF furnace of J&L in Pittsburgh, and at the company's research center, the picture steadily attains both photographic and content value. Music contributes to its audience interest as an original score composed by Zoltan Roznyai adds an imaginative dimension without distracting from the illuminating visuals. Mr. Roznyai is first assistant to the New York Philharmonic's Leonard Bernstein. His talent is notable.

The film's audience for the Jones & Laughlin Steel Corporation is obviously among potential clients and steel research scientists. But the audience for *Steel by Stopwatch* should well include other industrialists looking for an example of top professional skill in the film. ☐

The Human Element

Ranging Worldwide, an Important Film Shows Advances in Petroleum Research

THE ROLE OF PETROLEUM RESEARCH and science in helping man to adapt to his environment is portrayed in a new motion picture just released by Standard Oil Company (New Jersey) and produced by Pendulum Productions, Inc. The 30-minute color film, entitled *The Human Element*, is world-wide in scope, picturing man's age-old struggle to escape the enslavement of manual toil and to achieve a richer life.

Industrial research, as illustrative of man's curiosity and reasoning power, is a re-echoing theme of the film. An Indian chemist, working in an Esso laboratory in England, obviously has much in common with two American physicists arguing applications of the laws of physics at Esso Research and Engineering Company in New Jersey. Half a world away from them a laborer, farmer or engineer use the ultimate products of their skills.

Cutting Achieves Unity in Film, Aims

Through Editor Peggy Lawson's skillful inter-cutting of such diverse scenes, a unity of aspiration and purpose and basic need is demonstrated at almost every level of civilization in the world today.

Although oil's achievements in scientific research form a central focus for *The Human Element*, this is not primarily a film about scientists and laboratories. Research is shown as a tool enabling man to satisfy his unique demands. Fuels and lubricants become part of man's freedom to move, to enjoy life, to sustain himself, and to *think and inquire*.

Several of the commonplace products of oil take on a special interest in the film. Paraffin, for example, is shown serving the world in many ways — as a protective coating for fine cheese, as a polish for shoes, as a preservative for art treasures, as a water-proofing for the paper parasols of Japan.

Grease for Primitive Wheel, Outer Space

Greases lubricate the most primitive of wheels, but serve equally well the delicate machinery which makes outer space probes possible. A

At the Spanish Steps in Rome, a European favorite, the motor scooter, contributes a sequence seen within "The Human Element."

Red wax, coating loaves of Holland cheese, is subject for Gene Searchinger's lenses.

12,000 ton Japanese ship slides to sea on ways coated with a half-inch of grease, while a scientist in Linden, New Jersey, seeks in the beam of an electron microscope the means of making an even more effective lubricant.

Counter-balanced with the conventional products of petroleum are the wonders of petrochemistry — butyl rubber from oil, polypropylene and its products from petroleum refinery gases. A colorful new world of plastics, a marine hawser which floats, for example, is shown resulting from modern alchemy.

Filmed on Location in Eleven Countries

From dusty Arizona — scene of an agricultural promised land in the making — to the lush vineyards of Burgundy, the film ranges over 11 countries. From opening scene to final fade, the central theme is stressed: "Between earth and man the contest never ends."

For Pendulum, Gene Searchinger served as producer, writer and cameraman-director. The sound track, recorded on location by Louis San Andres, is interwoven with an original music score by Irwin Bazelon. Narration is by Ben Grauer.

After world-wide premiere showings and extensive intra-company use, *The Human Element* will become part of the Humble film library and will be distributed by Modern Talking Picture Service. ☐

Petroleum test tubes, handled by Indian scientist at Esso lab in Abingdon, England are related to colorful Japanese umbrella.

Showing the Way to Better Phone Service

A T & T Slidefilm Explains the "Flexible Appointment Plan"

ALWAYS ALERT to new procedures for increasing good service to its customers, the Bell Telephone System companies have recently put into effect a "Flexible Appointment Plan" for processing requests for telephone service.

With these orders for service rising and ebbing like ocean waves, the companies have always sought to make sure that customers get fast service and service when they want it.

Two Basic Audience Groups

A new sound slidefilm produced for the American Telephone and Telegraph Company and its Associated Companies describes the Flexible Appointment Plan. It is used as an aid to present the plan to the Commercial Department people who take the orders and make the appointments, and to the Plant Department people who do the work of installing and changing the telephones.

The film, titled *Appointments, Not Disappointments*, and produced by Gotham Film Productions, shows the new Appointment Board used in the Commercial business offices — with green, amber and red lights for each of the six working days of the week.

Helps Select Convenient Dates

This board gives service representatives the opportunity to work with customers in selecting convenient

appointment dates. At the same time it enables the Plant Department to appraise the work load, so that it can insure giving customers what they want when they want it.

The service representative will offer appointments for "green lights" days if the customer has not expressed preference for another day. The amber light indicates that Plant has a near maximum load for that day. In this case the "amber" day should not be offered, unless the customer really needs service — in which case the request will be granted. On "red" days, Plant already has a maximum load and will handle emergency cases only.

Lights Reflect the Work Load

The film explains that, as the work load develops, the lights on the boards in both Plant and Commercial offices are changed — for example, from green to amber, thereby indicating the appointments that the service representatives can make.

As the film shows, the service representative dials the number of "work units" represented by each order. This in turn registers the information on meters in the Plant Department. It is the accumulation of work units in these meters that enables Plant to make its work load appraisal in a practical way.

Appointments, Not Disappointments (CONTINUED ON PAGE 63)

Scene in "Appointments, Not Disappointments" as commercial representative checks the light board.

FILM PROMOTION SCOREBOARD

COLLATERAL MATERIAL such as posters, hand-outs, "take home" pieces and pre-show promotion are all too often neglected by film sponsors. The *Warning Bell* program is auspicious in its use of memorable print media. Two of these pieces are illustrated from this film's very complete promotional package.

Graphic two-color poster is part of "Warning Bell" kit which helps build employee attendance at film showings between shifts, at noon hours or during the evening. Posters are part of the complete package.

YOU HAVE JUST SEEN
"THE WARNING BELL"
 A MOTION PICTURE DEALING
 WITH THE IDEA OF

FIRST LETS SEE IF WE CAN'T
 CRYSTALLIZE THE THEME OF
"THE WARNING BELL"

Actually, the film interprets THE essential safety theme.

1 It stresses the point that a successful community safety program cannot be just a "one-shot" effort. Safety and simplicity can select even the most experienced community — unless eternal vigilance is maintained to KEEP SAFETY ALIVE and growing with the times.

2 It drives home the point that in the final analysis, the battleground of safety is located in the mind of every individual. Unless each of us develops our own personal warning bell — and ACTS on it when it rings — none of the cleverest warning signals safety has installed will be very effective.

LET'S LOOK AT THESE TWO POINTS A LITTLE MORE CLOSELY

The purpose of this booklet is simply to help you make use of this film in a positive manner. To provide the basis for further thought and action in a guide for camera action on your part.

That vital "second impression" which helps the film viewer to recall the key points made in *The Warning Bell* is especially well-summarized in the colorful "take home" piece illustrated above. This booklet goes a little farther than most as it outlines steps for personal action by the viewer; points up "positive" action which the individual can take to assure safety on the job and at home after the screen's images fade away.

SAFETY ON THE ROAD, at home, on the job remains one of this country's most critical problems. Americans work at it tirelessly and yet the awful record of traffic fatalities, crippling injuries and wasted lives and expense mounts. Is the answer in the individual, personal commitment of every possible man, woman and child toward stopping this needless, cruel waste?

A seemingly prosaic but unexpectedly powerful new motion picture, *The Warning Bell*, loudly tells this community challenge: every individual must be motivated to listen for his own personal "warning bell" and to act on it when it rings! The 30-minute black & white sound film was produced for a good corporation citizen, the Nationwide Insurance Companies of Columbus, Ohio by Wilding, Inc.

Are We Keeping Up With Facts on Growth?

The scene could be your town. "Anywhere U. S. A." Like "Maplewood" your town might have won a couple of National Safety awards and today is probably resting on its laurels despite current figures which show increasing populations — more cars and trucks on the streets and highways, more homes and a startling ratio of greater hazards, multiplied by these familiar American "growth" statistics.

And your town probably has one or more well-meaning "crusaders" like the film's "Herb Atwill." It's sure to have many "Dave Spencers" who can't see the dangers around them until near-tragedy strikes their own homes. Well-intentioned traffic police wave off their "neighbors" with a friendly warning; drivers swoop down on kids at street crossings; Dave's own garage is loaded with inflammable "junk" and he overloads his home wiring.

Sound familiar? It should, because this is your story, nearly every minute of it. Fortunately

An oncoming car swerves around school bus, narrowly missing youngsters at a crossing as Dave Atwill shows apathetic Dave Spencer how complacent town has become about safety.

"The Warning Bell" Sounds Out for Safety

30-Minute Safety Film from Nationwide Offers a Challenge to Every Individual

ly for Dave Spencer, a rail crossing incident (he might have beat that oncoming train) brings the "warning bell" into his life. He hears it, as every individual must, sooner or later. And you won't soon forget the film's familiar incidents. They happen all around us, all the time. Perhaps that is why hundreds of American business groups are acquiring prints.

Your Company Can Acquire This Picture

The heartening thing about this campaign is that a fine job of film production will go a long way toward fighting the accident menace. Available for purchase through Wilding, Inc., *The Warning Bell* is more than just a film. A complete package was designed around it —

with posters, mailing pieces and an audience reminder-review brochure—and these set a fine example which others might emulate for every type of sponsored picture.

A professional cast performs with integrity in the *Bell*; producer-director Orlando Lippert has another candidate for awards honors and the story concept by author-playright Junius Eddy is not the least of its formidable values. But the pay-off isn't in screen credits, alone. Only when *The Warning Bell* is seen and heard by millions of individual Americans and heeded in their everyday behavior on the road, in their homes and on the job will the sponsor or producer or anyone be satisfied. It's up to you!

"Talked him out of that ticket," crows Maplewood driver who had skipped a stop.

Cutting across traffic lanes to mailbox, a careless driver blocks oncoming cars.

Plug in another appliance and if the fuse blows, why just replace with a bigger one!

Trust Dave to find that bigger fuse in the junk-laden basement he means to clean up.

But the junk in Dave's garage caught fire and he finally heard "The Warning Bell."

Dave Spencer's son, Mike, reminds his dad that he does take chances, all the time.

Eye-filling rear-screen silhouette contrasts with projected view (right) of company's smart headquarters buildings in suburban Chicago.

The Salesman Stars in I M C Show: "The Big Sell"

Entire Convention Hall a Stage as "Show Within a Show" Blends Audio-Visuals for First Corporate-Wide Sales Meeting of International Minerals & Chemicals

A HUNDRED COMPLEX "mix-and-match" combinations of music, motion pictures, slides, live and recorded speakers all went into "The Big Sell," recent sales meeting of International Minerals & Chemical Corporation. At almost every second a new visual impact, a new sound sprang from somewhere within the specially-constructed theater-within-a-theater to further the Hollywood theme and keep audience interest high.

The occasion was the first corporate-wide sales meeting conducted by International Minerals & Chemical Corporation of Skokie, Illinois. Salesmen from IMC's several domestic and overseas divisions were made an integral part of a five-hour program designed to inform, inspire, entertain, and to set the mood for the departmental meetings that followed during the next two days, and to create enthusiasm that would persist throughout the balance of the selling year.

Meet in O'Hare Convention Hall

The convention hall of the O'Hare Inn, in suburban Chicago, with its high ceiling and more than adequate space, was selected as the meeting site. It was large enough to be divided into two separate areas.

The reception area was draped with theatrical backdrops which placed each salesman into a variety of geographical locations and eras; a second area was designed for a most flexible day-long presentation.

A direct mail campaign which

preceded the meeting set the stage and informed every salesman of the motion picture theme and of the fact that "he was the star in the biggest of all extravaganzas."

The salesman was not disappointed. From the moment he entered the large meeting room he

Dancers liven the tempo, add variety to the business of "The Big Sell."

was in the center of activity. The room was a veritable cyclorama draped entirely in white scrim cloth; and all about the floor surrounding the 260 canvas director's chairs were theatrical people — dancers, prop men, electricians, cameramen.

They're All Part of the Show

On the cue, "places everyone", the house lights dimmed and the sound of a pre-recorded stereophonic chorus and orchestra overture filled the room. A spotlight caught the figure of a motion picture director seated atop a huge camera crane which moved about and over the audience. The director was charged by an unseen "boss" with the responsibility of

producing the "greatest spectacular of all times," one that would prove to be a record-breaking box office attraction.

For five hours the director auditioned talent (salesmen). He looked at locations for filming (the company's many domestic and overseas production and sales offices).

In music, comedy skits, speeches, silhouetted dramas, the full story of IMC's philosophy and achievements — past, present and future — were conveyed.

Visuals on Three Wide Screens

The heart of the visual projection system consisted of three cinematoscope screens, each 8 x 20 feet, located at the front of the meeting room. The center screen was filled

Creative Manager Arnold Midlash is "viewing and cueing" the IMC show.

by front projection by either an arc 16mm motion picture projector or an arc 3 1/4 x 4 slide projector, or both.

The screens at the left and the right of the audience allowed for rear-screen projection, and each of these had stages that enabled performers to work in full view of the audience or as silhouettes behind the screen. Additional slides were projected from six ceiling-mounted 2" x 2" slide projectors which completed the 360° coverage.

Much of the audio was pre-recorded, which made it possible to rehearse the silhouette pantomime

well in advance of the actual performance. Pre-recording permitted the precise editing of motion picture footage to parallel this audio. Pre-recording also made it possible for unprofessional speakers to concentrate on fewer lines, even commit them to memory.

Gains Impact Through Variety

As the plot developed, as more IMC stories were revealed, additional impact was provided by variety. Magically a speaker could be made to appear anywhere behind the scrim material, or he could be spotlighted on a stage or be seen in silhouette surrounded by projected impressionistic art work. Together all the screens could be used to create one scene or impression or each could have a different scene.

The sound system was built around several Altec A7 speakers strategically placed around the audience so that no matter where a salesman sat he was in a near-ideal position to enjoy stereo music and narration. The speaker system was so arranged that voices could emanate from any desired location without fear of feedback caused by an open mike.

Written, Directed by Midlash

The show was company-conceived and produced. It was written by Arnold Midlash, International Minerals & Chemical Corporation's Manager of Creative Services. From a position behind the scenes he "viewed and cued" electricians, actors and projectionists. In all, a team of more than 12 technicians supported a cast of 35.

Below: a view of the control board for the show's audio and visuals.

Rear-screen silhouette shows importance of IMC overseas markets.

The Hotel Tradition

Wide Variety of Service
for Travel and Meetings

SPONSOR: American Hotel Association.

TITLE: *The Great Tradition*, 15 min., color, produced by Raymond H. Corwin Associates.

The variety of ways in which hotels serve travelers and their local communities is described in this new film now being distributed on a free-loan basis nationally by Erling-Movies U. S. A.

Seen are today's various styles of hotel architecture and room accommodations from the luxurious city suites and country resorts to modern and unique roadside motels.

Diversified forms of sports and recreation for hotel guests are shown along with tempting menu displays. The assurance of 24-hour service, security protection and quickly confirmed reservations are all portrayed as standard traditions of the \$3 billion-a-year hotel industry.

The film depicts facilities for large conventions, sales meetings, weddings and gala social occasions — important contributions to both business and society.

The Great Tradition also shares a candid "inside" view of the many different people who help provide comfort and convenience for thousands of people every day.

Tour of Washington

"A Leaf Through History"

Pictures Nation's Capital

SPONSOR: Snuff Information Center

TITLE: *A Leaf Through History*, 13½ min., color, produced by Thomas Craven Film Corporation.

A Leaf Through History is a new film released for free-loan to television stations, adult and industrial organizations by the snuff tobacco industry. It provides colorful glimpses of such famous Washington landmarks as the White House, Washington Monument and Lincoln Memorial, then takes the viewer on a detailed tour of the halls of Congress. Through the camera's eye and the voice of the narrator, the Senate and House chambers, Statuary Hall, the Rotunda, the Senate Offices of the President and Vice President, the Senate Subway and other areas of the Capitol are visited. The distributor is Association Films. 

THE NATIONAL DISTILLERS Products Company's "Old Taylor" brand distributors meeting in New York last month featured a morning-long series of talks illustrated by a wide-screen slidefilm presentation produced by Visualscope, Inc.

The Old Taylor Conference was attended by about 250 distributors from all parts of the country, and the presentation welcomed them with a regular old-fashioned photo album of their likenesses, both currently and in times gone by, since this was the first major meeting of the group since 1955.

"Setting Up" an Exact Task

Visualscope's part in the conference consisted of not only producing the visual materials — both film and live — but in setting the show up — which might seem almost as exacting a task as producing the film.

Marvin Green, Visualscope sales manager, supervised the setting up in the Biltmore Hotel Ballroom.

Visualscope's Pete Coyle checks the sound-cuing system on battery of three wide-screen projectors.

which took from 7 a.m. to 1 a.m. on the day previous to the conference, and from 6 a.m. to 10 a.m. on the day of the actual show.

This work involved putting up the big rear-projection screen, stretching almost from wall-to-wall of the ballroom, draping it in black velvet wings, erecting a rock-steady projection stand behind the screen with projectors exactly — to the quarter inch — centered to prevent "keystoning", setting the stage and podium (with three Teleprompters), and stretching about a half-mile of power and audio cables throughout the ballroom.

Stand-By Projector Is Ready

Three projectors were on hand for the show — two Visualscope "GP" widescreen projectors, and one Pictronics Powerhouse. While only one "GP" was actually used, one of the other projectors was loaded with film and frames were clicked off through all the performances with the projection lamp

Old Taylor market exec Jack Lethbridge introduces film

off, but ready to "take over" on a split second if any failure should occur.

Visualscope starts each screening of an important conference like this with brand new projection lamps in all projectors: these are bulbs that have actually been burned just ten minutes to "break them in" properly. Bob Taylor, Visualscope's president, says that most projection lamps — if they perform properly for the first ten minutes — will usually go on for their expected life with no trouble.

Meticulous Cleaning of Frames

Each frame of the films to be shown at the conference — and the standby's as well — are meticulously cleaned with an anti-static velvet cloth. This performance, as done by Marvin Green and staff, resembles a zoo-keeper and crew polishing a python. The long 20 to 30 foot film is carefully unwound by three or four helpers and stretched across the ballroom while Green goes down its length inspecting and polishing. Rewinding takes as much as 15 minutes to avoid all possibility of cinching and scratching.

For the live part of the Old Taylor Conference — a simulated

interview of Vice President Emmet Fleming by a WALL STREET JOURNAL reporter, Visualscope designed a set that would exactly simulate Mr. Fleming's own office decor, as well as the view out his window — accomplished by a rear-projected picture on a screen draped like a window. The set is ready to be put into place during a five-minute intermission in the show.

Decades of Brand Integrity

The Old Taylor Conference reminded distributors of the integrity of the brand over many decades, and the consistency of the \$21,500,000 advertising campaign that over the years has helped to make Old Taylor a leader in its field.

National Distillers has now established a "Hall of Fame" for some of America's unsung heroes — the salesmen "who keep the wheels of the world's greatest industrial nation rolling." In this case it is the Old Taylor Hall of Fame at Frankfort, Ky., where the names of the leading distributor's salesmen will be placed on a plaque in a new building close-by the old distillery of Colonel Edmund H. Taylor, Jr., the brand's founder and namesake. 

Conference set exactly simulates office of Vice-President Fleming.

Note unusual
background.

Tria/Scope Brightens Life of Henry Royall

Creative Use of Backgrounds Also Offers Budget Advantage

HAVING COMPLETED a successful assignment in sales development for The Bank of America, the 33-minute color film titled *The File on Henry Royall* is notable in two important respects:

First, the picture has accomplished its task of helping Bank executives move out from behind their desks and counters to contact prospective clients for the multitude of services available through this great financial establishment. Designed to convince these men that *selling* is necessary in today's world, *Henry Royall* also reassured the viewers that they, too, can sell and that they will find themselves welcomed on customer calls.

But the second attribute of *Henry Royall* lies in technique. For the producer, Parthenon Pictures of Hollywood, introduced its Tria/Scope process with this picture and has made a real contribution to both creativity and budget economy worthy of sponsor note.

Tria/Scope permits the playing of realistic live-action against impressionistic cartoon environment backgrounds, shot quickly and at practical cost savings. Essentially, set walls are of translucent plastic, backed by multiple-head rear-screen projectors. For conventional environment, a conventional wall

pattern or scene is projected and this is common-place among studios which have this equipment.

But the use of Tria/Scope is most effective where an impressionistic environment is desirable. Interviews with clients in *Henry Royall* take place in a novelty factory (the Angry Man's sequence); in the Harried Man's "Grower's Supplies" salesroom; in the Friendly Man's "Ideal Plating Plant" and there's a scene of the early-day Branch Bank. In all of these the projected background becomes impressionistic and invaluable to both mood and content.

The Tria/Scope projectors were also used with a "walk along" device to project the usual horizontal-progressing main titles; and, later with the addition of fog, they provide *Henry Royall's* daydream of the profits to come from his foreign operations.

There is good use of many other filmic techniques that help to make *The File on Henry Royall* a worthwhile example of what *can* be accomplished when both visuals and sound are employed with creative impact. For instance, two impressionistic sound tracks were created: for the Angry Man, and for another character when he "ran out of things to say."

Below: while crew prepares to film scene, rear-screen projection sets desired background mood.

"Top-ons" are possible in Fotomation. Note figures on cash registers.

Union Bag Scores with Fotomation Film

Economical Shirt-Sleeve Approach in a Short Sales Film

SPONSOR: Union Bag-Camp Paper Corporation.

TITLE: *Write-Right*, 8 min., color, produced for Lance by Animated Productions, Inc.

This short sales promotion film is an excellent example of the possibilities that can be achieved by a new, economical, shirt-sleeve type of production called Fotomation, the brain-child of Animated Productions' president, Al Stahl.

As evidenced in this film, Fotomation uses original, 2 1/4 inch square color transparencies — Rolleiflex-size — and by re-photographing them on motion picture film with an Oxberry animation stand and camera, the stills are transformed into pictures that not only seem to "move" but often do — through zooms and travels that carry the motion picture film into and about the scenes on the original stills.

The most interesting facet of the technique is that the small transparencies are mounted on cels, pegged as in normal animation, and are in exact register so that pop-ons can be used, as well as squeeze motion and stop motion anima-

tion. Al Stahl has this system down to such a science that zooms, travels, pop-ons and dissolves can all be done simultaneously and automatically using transparencies as small as 35mm slides.

Shooting on the stand is done at live-action speed. "Live action" photography is done with a Rolleiflex anchored with a rigid tripod and later carefully registered in cels. In addition to transparencies on the stand, other sources of material are photographs, drawings, charts, logos and newspaper and magazine clippings.

The Union Bag film describes a new display case and sales campaign the company is using to market its brand of paper school supplies — notebooks and the like. With a fresh jazzy score and sound cleverly synchronized to the action, the picture is aimed at jobbers and their salesmen. It is shown to them — in 25 marketing areas — on Fairchild 8mm "400" continuous projectors.

Edward Mandell, of Smith, Henderson, & Berey, Inc., was agency producer on the *Write-Right* film for Union Bag-Camp Paper.

Still color transparencies were used in these two walking scenes below:

New England Chapter Elects First Officers

Chairman Bill Muttitt Pledges Members Active Year

MEMBERS OF THE New England Chapter, IFPA, have named their first group of permanent officers. Elected at the February meeting in historic Concord, Mass. were William A. Muttitt, chairman; Major Albert H. Doe, USAF, program chairman; and John J. Sheehan, secretary-treasurer. Bill Muttitt is the chapter's former acting

Chairman William A. Muttitt

secretary-treasurer. He succeeds Jack R. Smith who served as acting chairman. Major Doe's post was filled by Capt. Arthur P. Thiesen, USAF, who was acting program chairman.

A native of New England, Mr. Muttitt is serving as senior editor for the MITRI Corporation. A graduate of the Rochester Institute of Technology, Bill was formerly associated with Bell Aircraft as a cameraman; was Film Supervisor at the Carborundum Company and Motion Picture Section Supervisor with Uhl, Hall & Rich, Engineers. Born and raised in Connecticut, he and his wife and three children now reside in Burlington, Mass.

Pioneer in Equipment Design

Major Doe, the Chapter's new program chairman, recently joined the Information Office of the Air Force's Electronic Systems Division. He brings 26 years of experience in motion pictures and television to his post as Staff Photographic Officer. Major Doe was most recently chief of Research Photography and Television at the Air Force School of Aerospace Medicine, San Antonio, Texas. He is credited with designing the photo instrumentation for the first prim-

Major Albert H. Doe, USAF

ate capsule fired into space and has designed and operated several pioneering closed circuit TV installations at various Air Force bases.

Cum Laude Graduate of Curry

Secretary-treasurer John Sheehan is a native of Boston and now lives in Burlington, Mass. with his wife and four children. A BA, cum laude, of Curry College in Milton,

Secy., Treas. John J. Sheehan

Mass., John was elected to membership in "Who's Who in American Colleges and Universities" in 1953. Formerly with Raytheon and the Laboratory for Electronics, Inc., where he served as script and technical writer, he is presently a film writer at MITRI.

Chapter Invites Film Makers

Chairman Muttitt's acceptance talk called for an active Chapter program in the year ahead. He invited film-makers and those in related fields to attend Chapter sessions. For meeting dates and membership data, contact Bill Muttitt at P. O. Box 150, Bedford, Mass.

Program Shaping Up for 4th Annual Conference June 13-15

Preparations are well along for the Fourth Annual IFPA Conference and annual "Cindy" Awards program to be held June 13-15th at the Ambassador Hotel in Los Angeles. Jack R. Goetz is the Conference vice-president in charge.

The Conference will open on Thursday evening, June 13th and concludes with the Awards Banquet on Saturday evening, June 15th. The trade show, an integral part of the meeting, will be held in the hotel's Boulevard Room.

According to Anthony L. Gorsline, Chapters' vice-president and chairman of "Cindy" awards competition, the 1963 film contest will be broader in scope than in past years and involves the voting participation of every IFPA Chapter.

Final details of the program will be covered in the next issue of the JOURNAL, just prior to the meeting on June 13-15.

* * *

Five Koreans Share Honors on Roles in Award-Winning Film

Five Koreans received Certificates of Award recently in recognition of their contribution to the success of a U. S. Army documentary film about their country, judged as the "best indoctrination and training film of the year" by the Industry Film Producers Association.

The film, *Korea, Battleground of Liberty*, was produced by the 1352d Photographic Group of the U. S. Air Force and was the recipient of a "Cindy" award presented at IFPA's 3rd Annual Conference. Honored were two of Korea's best-known performers, Kim Chi-Mi and Choi Mu-ryong; associate producer Hong Sung-Ki; art director Im Myung-sun; and sound mixer Lee Kyung-soon.

In appreciation of their contributions to the film, the Air Force unit sent the awards to Humphrey W. Leynse, USIS Motion Picture Officer, with the request that he present them to the artists designated and "convey to them our every good wish and sincere thanks for their assistance." The presentation was made in February at the Seoul NSIS Cultural Center in the Kaepoong Building.

Wolff Studio Hosts Visit by Southern California Chapter

RAPHAEL G. WOLFF, former board chairman and now a consultant to the studio company which bears his name, was host to members of the Southern California chapter at a recent monthly meeting held at the R. G. Wolff Studios in Hollywood.

Screening of the award-winning film *Integrity Plus*, was a feature

Host Ray Wolff (center) is shown with IFPA National President H. Eugene Burson (right), and Gene Huggens, So. Calif. Chapter chairman, during meeting at studios.

of session. The film has won an American Film Festival Blue Ribbon and a citation from the Belgium Ministry of Labor.

The meeting also included a "Stew Night" session in which "C. C." Pitts of S. O. S. Photo-Cine-Optics spliced together trims and out-takes brought by members. Michael Zois of the Arriflex Corporation was another meeting guest. He demonstrated features of the re-designed Arriflex 16 "M" model, recently introduced by his company.

Eastman's Pacific Southern Plant Holds an "Open House"

A visit to the Eastman Kodak Company's Pacific Southern Sales Division plant at Whittier, Califor-

Eastman's Pacific Southern Sales Division facilities were visited by So. California chapter members for a recent monthly program.

THE INDUSTRY FILM JOURNAL

nia was the subject of another Southern California Chapter monthly meeting.

With Eastman as the host for

this session, members viewed a screening of the Company's film, *Photography at Work, a Progress Report*.

Members Tour Aerojet-General's Facilities

A VISIT to Aerojet-General Corporation's 20,000-acre installation east of Sacramento provided the Northern California Chapter's second meeting program of the year on February 7th. Mitch Rose and Dan Leto of the Solid Rocket Motion Picture Section were hosts.

After dining at the cafeteria, the group made a quick bus tour of giant installation, located on land once churned up by gold miners of another era. They witnessed a static test firing of a Titan II solid fuel motor from a heavily-protected block house and were shown

through his section's facility in January, destroying his entire film library and most of his equipment. He closed the meeting with the showing of an employee film which reflected admirably on the skill of the section.

Capital Film Laboratories a New IFPA Sustaining Member

Add to the growing list of Sustaining Members of IFPA, the well-known name of the Capital Film Laboratory of Washington, D. C.

In a recent letter to Delaware Valley Chapter chairman Pete Stallings, James A. Barker, President of Capital, expressed his pleasure in "subscribing to the aims and purposes of IFPA and the opportunity to give support as a Sustaining Member to an organization which is advancing the motion picture arts in the industrial field.

Send Chapter News, Features to Our Editor, Pat Patterson

If you have a news item or a feature idea for the JOURNAL, remember to send it along to "Pat" Patterson, Head, Academic Communications Facility, UCLA, Los Angeles 24, California. Write now for your JOURNAL pages.

John P. Bean, staff animator in MITRE Corporations Film Services Unit, was featured speaker on animation techniques at the February meeting of the New England Chapter. He is a former Disney artist.

Bud Moulin Talks on Editing to Northern California Group

The Northern California membership heard Hollywood film editor Bud Moulin at its January meeting. Bud discussed editing techniques used in the entertainment film industry and their possible application to the industrial motion picture.

A member of the American Society of Cinema Editors, a group

Film editor Bud Moulin addresses Northern California members . . .

dedicated to the improvement of editing techniques, Moulin also showed two films produced by the Society. The first of these illustrated the control which the editor has in making or breaking a dramatic sequence; the second film deals with the variation in editing techniques as applied to a given number of scenes in a TV "Western."

The Chapter met at the United Air Lines' workshop located at the company's maintenance base at San Francisco International Air Terminal.

The JOURNAL's feature article of this issue, by Leo Persselin, begins on the following page.

a show stopper?

never!

Your show is one smooth, continuous performance from lights off . . . to the end, with this new KODAK PAGEANT Sound Projector.

No awkward setting-up exercise at the beginning. No embarrassing mid-performance interruptions. Everything exciting that happens will happen on the screen.

This could be the first movie projector you've ever really liked.

It's the first projector with a sound system that has no electronic tubes to burn out . . . no fragile photocells to fail . . . no touchy exciter lamp to quit on you. Not even any static, or hissing, or crackling noises.

The sound system in this PAGEANT Projector is entirely different from those in other projectors you've used. It's transistorized. Its circuitry is built to shrug off bumps and jostling. It should never require fixing. It should never cost you any money. You don't carry spare parts for it. You don't need any.

Power?—enough to pump good sound through an auditorium P.A. system and be heard crisply from first row front to last row balcony.

Fidelity?—clean, commanding, steady sound, played through its own large, 11 x 6-inch speaker. The sound this system reproduces encompasses the entire range it is possible to record on film.

Putting the show on the road is no project with this projector.

It sets up anywhere. Threading film is as easy as following a red line. Throw a lever, push a but-

ton, come back when the movie is over.

The lever you throw does everything but turn on the sound.

The button you push turns on the sound.

Instantly!

No waiting for warm-up. The sound comes on full and clear, the moment you push the button.

This projector operates so quietly it never calls attention to itself. Never distracts. Never interferes with the mood of the performance. In fact, all your audience will notice is the performance.

The brilliance of the picture, the beauty of the sound, the projector itself—all of these will be taken for granted.

The name of this new projector is the KODAK PAGEANT 16mm Sound Projector, Model AV-126-TR. We've written a booklet about it which you may have simply by writing your name and address here:

KODAK PAGEANT 16mm Sound Projector
(Model AV-126-TR)

Then send it back to us at the address below. Check this box ☐ and we'll have a Kodak dealer call you to arrange for a convenient demonstration of this new machine. No obligation, of course.

KODAK PAGEANT Projector 4-47

EASTMAN KODAK COMPANY

Dept. 8-V, Rochester 4, N. Y.

WITHIN RECENT MONTHS there has been a growing interest in the burgeoning technology of automated instruction — the technology of teaching machines and programmed learning.

For many of us in industrial film production and related areas of audio-visual communication there has been a vague feeling that this technology might — or should — have something to do with us.

As a matter of fact, auto-instructional technology *does* have something to do with the audio-visual communication specialist. Furthermore, it offers the possibility of such broad ramifications in our own field that we might do well to examine this technology from a very personal point of view.

To begin with, of course, we must have some understanding of what automated instruction is. Whole books have been written on the subject, but for the purpose at hand, we will satisfy ourselves with a few basic distinctions. At the risk of considerable oversimplification, these may be stated as follows:

1) Teaching machines do not teach. They merely present teaching material which has been developed and prepared in a special way. This material is called a program. It is the program, not the machine, which teaches.

2) The teaching machine program represents an effort to simulate the essential aspects of tutorial instruction. Each student is given the opportunity to proceed at his own pace. Via the teaching machine, instructional material is presented to him on an individual, one-to-one basis, just as it might be with a live tutor. The student is led toward the learning goal step-by-step in relatively small steps, each building on the preceding one.

3) An inherent part of the technique is that an active response is called for on the part of the student. Whenever the student makes such a response, he is immediately informed as to the correctness of his answer, and if he is wrong, provided with additional information to help him find the correct answer. It is here that automated programmed learning comes closest to approximating the tutorial relationship.

4) Automated instruction is not synonymous with programmed learning. Programmed learning as such refers to a system of instruction — an efficient approach to learning which can be applied advantageously to any educational or training situation. Thus it is of-

Auto-Instructional Technology and the Industry Film Maker

by Leo A. Persselin

ten said that the most effective teaching machine is a programmed teacher. Automated instruction, on the other hand, refers to a way of using that system — a refinement of subject matter presentation made possible by the system.

On the basis of these distinctions it should be clear that the term "teaching machine" is subject to broad interpretation. It obviously need not be restricted to mean only a certain type of mechanical or electronic hardware. A book, for example, can meet the requirements of a teaching machine if the material in it is properly programmed — and as a matter of fact there are such books. These programmed books fall into a classification of auto-instructional devices known as "paper teaching machines."

Dr. A. A. Lumsdaine — one of today's leaders in the field — has stated that automated instructional methods can be considered generally to include "any means, devices, or materials whereby teacher or tutor functions are provided by wholly or partially automated sequences of instructional segments that are completely prepared in advance of use, and that are capable of instructing effectively when presented with minimal direct participation by a teacher."

They may thus include not only individual teaching machines as such, but also several forms of

recorded instruction via film, tape, TV, etc.

Dr. Lumsdaine's view has particular significance for the audio-visual communication specialist. First of all, it hints at a derivational relationship between automated instruction and audio-visual technology. Secondly, it was under Dr. Lumsdaine's direction as head of the U.S. Air Force's Human Factors Operations Research Laboratories that much significant audio-visual and auto-instructional research was accomplished following World War II.

Although teaching machine research historically dates back to the 1920's, a great deal of today's self-instructional techniques and hardware may be traced directly from Air Force audio-visual work during World War II, and subsequent research by the Air Force Personnel and Training Research Center during the 1950's. We might do very well to examine some of this work.

As we all know, the primary audio-visual teaching tool during World War II was the teaching film. In order to meet the pressing needs of wartime instruction, Air Force training films were produced on nearly every conceivable topic. They were, of course, designed for group rather than individual training.

Furthermore, they were intended strictly as training aids, and not

designed to stand on their own feet as effective instruction. The idea of putting a complete course or even a course unit on film or magnetic tape as the primary vehicle of instruction did not emerge until 1954.

In that year the Training Aids Research Laboratory of the Air Force Personnel and Training Research Center came up with three important programs:

1) One of the first attempts was made to provide a full course unit by recorded instruction. At Keesler Air Force Base highly qualified instructors taught several classes a five-day course in Principles of Radio. Other classes were taught the same course by tape recordings and either a workbook or slides. The grades of the students who were taught by the tape-recorded lectures were found to be comparable to those taught by the instructors.

2) An attempt was made to train B-47 jet bomber technicians by recording lecture demonstrations on film. Test data showed that these filmed lectures closely approximated the effectiveness of live lectures.

3) A package course was developed which combined magnetic tape recording and motion picture film with workbooks, study manuals, answer sheets, and examinations to teach English as a foreign language to Allied pilot trainees in countries where experienced instructors were not available. The result was an instructorless, semi-automated film and tape course which was almost completely "programmed." The course was designed so that it could be applied regardless of the native language of the students. It was used successfully in France, Italy, Germany, and Spain.

We must note that all of these were still group-instruction programs which did not offer the individual-pacing advantage of the individual teaching machine. The tape-recorded and filmed lectures still basically retained the one-way character of any lecture instruction; no effective provision was made for frequent active student response and feedback. It is obvious that they fell considerably short of meeting our teaching machine requirements.

They are important to our discussion, however, in that they did effectively demonstrate a variety of possibilities for applying mechanized or partially automated audio-visual techniques to teaching. All of them demonstrated the very

A Biographical Sketch About the Author

An active member of IFPA, Leo Persselin has extensive communications background in radio and television as well as motion pictures. During the past six years he has been associated with film production in the Air Force's missile and space effort; as a motion picture writer-director for Ramo-Wooldridge Corporation and Space Technology Laboratories, and for the past three years in his present position as coordinator of production, Motion Picture Support Services, Aerospace Corporation.

He holds a B. S. in journalism from the University of Illi-

nois; and M. S. in television from Syracuse University and is currently completing work toward a Ph.D. in the Division of Communication at the University of Southern California.

This article stems from the author's research in advanced instructional technology. As part of this research, he recently completed a 216-page study titled: "A Guide to Programmed Learning and Teaching Machines in the United States Air Force." He shares his findings with the IFPA membership in this thought-provoking article covering a subject loaded with implications for the years ahead.

ARRIFLEX® 35

This 35mm motion picture camera was literally born a classic. Not through appearance alone ...but through function and performance! The very first Arriflex 35s, built in 1938, gave filmmakers unprecedented versatility, operating ease, technical capabilities, and money-saving advantages...through a completely original optical system designed around a mirror-reflex shutter. One of the few genuine innovations in cine camera engineering since the days of Lumière, Friese-Greene, and Edison... the mirror-reflex shutter is today's most desired and most imitated motion picture

**a classic
in its
own
time!**

camera feature. It provides continuous through-the-lens viewing while filming... eliminates parallax! And it all but antiquates an assortment of finder correcting gear most other cameras still require. Wherever film releases must meet the highest standards of theater-quality, Arriflex 35s are chosen. They're lightweight, so they make excellent newsreel and location cameras; rugged, so they can take extremes of climate; dependably precise under all conditions... ideally suited for every assignment from missile tracking to full-scale studio productions!

Write today for complete literature

INCOMPARABLE VERSATILITY! The Arriflex 35 is shown: as a hand camera (left), with 400-foot magazine, matte box, and 16-volt variable-speed OC motor; and as a studio sound camera, fully blimped with 400-foot magazine (center); and with 1,000-foot blimp (right).

(CONTINUED FROM PAGE 48)

real economic advantage for the training of small, widely scattered groups of technicians.

In the scheduling of the B-47 lectures it was shown how films could be presented immediately before their content was to be applied, forestalling the otherwise very large decrements in recall that take place during the lapse of days or weeks between presentation of a live lecture and its application on the job.

The foreign language program was perhaps the most significant, since it demonstrated how active-response features might be incorporated into an audio-visual program designed for group instruction. Each section of tape or film instruction presented to a class was designed to be accompanied by active practice through workbook exercises.

The course further introduced the concept of "educational engineering" — the idea of a system designed to fit specific situational requirements or restrictions, employ the latest appropriate technology and learning principles, and produce trainees having uniformly high proficiency.

In 1955, the year after the start of the three programs described above, the Air Force's experimental work in instructional technology produced the first hardware which could be truly called teaching machines, and which clearly displayed its audio-visual derivation. The Multipurpose Instructional Problem Storage Device (MIPS) and the Subject-Matter Trainer (SMT) were developed jointly by personnel of the Air Force Personnel and Training Research Center and the Hughes Aircraft Company.

The SMT device, although originally intended and designed as a research tool, was adapted for use as a teaching machine for the Air

Leo A. Persselin, author of this article, is coordinator of production, Motion Picture Support Services, Aerospace Corporation.

Handy-Dandy automatic-loading daylight 16mm sound film viewer has loop magazine containing 200 feet of 16mm continuous sound film.

Force's SAGE System. The MIPS device we shall refer to later.

The following year, 1956, produced a significant refinement of a familiar audio-visual device: a magazine loading sound film loop projector. Working from functional specifications developed in 1951 by Drs. Lumsdaine and S. M. Roshal of the Human Resources Research Laboratories, the prototype was built by Polan Industries, Inc. The Automatic-Loading Daylight 16mm Sound Film viewer (Handy-Dandy) was portable and extremely compact, with its own fold-out rear projection screen. Up to 200 feet of 16mm continuous sound film loop could be stored in each magazine.

At first glance, the Handy-Dandy would seem to be no more a teaching machine than any other motion picture projector. What brought it into the teaching machine category was the inclusion of controls enabling a viewer to manipulate presentation in a manner never before possible with a projector of this type.

The Handy-Dandy demonstrated that all conventional problems of film handling and threading associated with motion picture projection could be done away with. Furthermore, focus, loudness, tone control, etc. could all be preset. To project a film it was necessary only to put the magazine in its slot, turn on the power, and move a lever.

But above all — and most importantly — the projector could be stop-framed on any frame — preprogrammed by notching the edge of the film prior to its insertion into the magazine, or by the viewer pushing a button when he so desired.

Beginning with 1956 a whole series of self-instructional devices emerged from the laboratories of the Personnel and Training Research Center. Most of them turn-

ed out to be electronic devices, for it soon became apparent that while machines using still and motion picture presentation might be excellent for certain types of instruction, they were often too slow, inflexible, or otherwise unsuitable in meeting the stringent requirements of present-day military needs.

But the impact of early Air Force work in the field had already made itself felt. Thus, for example, today's AutoTutor teaching machine, manufactured by U.S. Industries, Inc., Educational Sciences Division, is a further development of the Air Force's 1955 MIPS device. The AutoTutor Mark I presents instructional material rear-projected onto a screen both from individual frames on a 35mm film strip, and in the form of short motion picture sequences.

What does this chain of developmental work by the Air Force mean to the industry film producer?

To begin with, it should now be abundantly clear that when we

AutoTutor Mark I: instructional material is rear-projected onto a screen from individual frames of 35mm filmstrip or via short motion picture sequences.

speak of auto-instructional technology we are talking not so much about special kinds of hardware as about how hardware can be put to use.

The Handy-Dandy, for example, could obviously be useful in any number of specialized instructional situations. In handling procedural demonstrations, for instance, the film could demonstrate assembly of several parts and then stop-frame while a trainee imitates the demonstration with actual parts. The next assembly would then follow.

The use of a device such as the Handy-Dandy as a teaching machine need be limited only by its application within the educational engineering context discussed above. It follows that the same could be said of almost any audio-visual presentation device capable of being designed as part of an auto-instructional system.

Furthermore, so broad are the implications of this technology that its use is by no means restricted to educational goals as such. In some applications the end result may even be directly opposed to teaching!

Thus, the Hughes Aircraft Company's Videosonic device is being used on industrial production lines

Videosonic System: 35mm slide magazine is synchronized with 1-7.5ips, four-track tape cartridge. Pacing is by machine or by user.

where it might well be called a non-teaching machine. Through reliance on Videosonic audio-visual procedural demonstrations, a worker may be put on the job with no necessity for prior specialized training in his task.

Opportunity for the Film Man

For the industry film producer all this certainly means new opportunity to put to use tools and techniques with which he is already intimately familiar. But it also means much more.

It would be incorrect to say that auto-instructional technology is the coming thing. It is already here. Today the basic question is not: "Should we have it?" but:

Handy-Dandy auto-loading 16mm sound film viewer with cover removed to show the mechanism.

"How much, under what conditions, and how soon?"

The answer is inevitably linked with the answer to another question — simply: "How?"

For the industry film producer this means: How can existing motion picture and other audio-visual communication techniques be applied to programmed learning requirements? How can the principles underlying these existing techniques be used to develop new techniques? How can existing hardware be used to meet auto-instructional needs? How can new hardware be designed where needed?

The experienced practitioner of motion picture and related audio-visual communication techniques is in a perfect position to answer these questions.

Full Scope Yet to Be Measured

The full scope of auto-instructional technology in Business, Industry, and the Military has yet to be measured. In one company alone — the corporation by which this writer is employed — interest in the technology has been expressed in every major Division, and in such specific areas as systems evaluation and analysis, technical data retrieval, training research and planning, procurement and administration, management systems, finance and control, contract administration, and security, among others.

The film producer earned his place in Industry when he rose to the historical challenge of showing Industry how the informational film could be put to use as an invaluable tool for industrial communication.

Automated instruction presents the industry film producer with an even greater challenge. More than an opportunity to merely advance with the state of the art, it is an invitation to once again take the lead in applying advanced technology to the increasingly complex demands of communication in industry.

Enterprising Brussels' University Group Holds a Festival to Study the Film Medium

Hats off to a group of enterprising students at Brussels Free University for making European industrial a-v history! Gerard Lob, 22-year old president of the School of Business Administration students' association, decided that the time had come to look at industrial commercial techniques in other lands and to study film as a means of communication. Students from the School of Engineering joined his committee and they soon had the backing of University authorities and, more than that, Prince Albert and the Belgian Foreign Minister!

28 nations submitted films. Thanks to their careful selection, the U. S. and France were represented by 36 films out of the total of 69 accepted by the committee of students and professors. 18 nations had to be told that their films were not suitable.

The University regarded the Festival as part of the curriculum and 1,200 students attended during the nine days of showings. They were joined by 750 representatives of industrial firms and the teaching staffs of the Universities of Ghent, Liege and Louvain and students from German, French, Italian and Swiss universities.

A jury which included University professors and lecturers under the chairmanship of the Film Service of the Belgian Ministry of Education awarded prizes to films on the basis of their content and educational value. These went to *Le Champs du Possible*, a French-sponsored film tracing the development of telecommunications up to Telstar; *Friendship Seven* (U.S.A.); *225 Km. h sous catenaire monophasé* (French State Railways); and *More Than Words* (Henry Strauss' U. S. production). The Strauss film gained the award as the most useful subject in the field of commercial training.

Sweden: "Film Days 63" Attract 1,500 Executives to Festival Film Showings

Sven Hallonsten, head of the Film Section of the Swedish Council for Personnel Administration and our correspondent in Sweden, has the answer, we think, to the often-asked question, "Why should we send films to Festivals?" Here is what he does with Festival winners, in his own words:

"During January and February we organized "Film Days 63" in four cities: Stockholm, Malmo, Gothenburg and Sundsvall — and a total of 1,500 Swedish industrialists, safety officials and educational people attended.

"Because of the great interest in industrial training and educational films, we included many of these subjects as well as the award-winning international films from the 3rd International Industrial Festival at Berlin. Sweden is a comparatively small language area and we find it difficult to produce this type of film from our own resources. We usually turn to overseas sources, particularly the U. S. A. for

Sweden: Sven Hallonsten (ctr) discusses films with delegates at Sundsvall, 300 miles north of Stockholm, scene of one of his Administration's "Film Days 63" held in four cities.

such films as *Breaking the Delegation Barrier*, the Dartnell and McGraw-Hill sales and management films.

"But even a small country can produce educational films of a high standard and this year we introduced a new film, *Stress*, sponsored by Atvidabergs Industrier AB of Sweden, which we feel has world-wide interest. The film deals with the current problem of stresses in modern life, particularly in business. It contains an analysis of the many factors contributing to neuroses.

"There is no direct reference to the sponsor (an office furniture manufacturer) except the hint that a comfortable environment and good equipment can contribute to the mental well being of the staff. The opinion of the delegates at our "Film Days" was that the film was very suitable for middle and top management and I am happy to say that it is available in French, Spanish, German, British English and American English versions."

Write our London office and your enquiry will be passed along to Sven Hallonsten if you're interested in obtaining this excellent subject which we've seen and fully endorse, including the British English! version.

Instrument Society Produces Film on Automatic Control

The application advantages of automatic control to a process in a small chemical plant are shown in *Automatic Process Control*, a 16mm sound and color film now available from the Instrument Society of America.

This 33 minute film, intended principally for career guidance, is aimed at the instrumentation newcomer and answers the questions: What is automatic control? What does it mean? What are its application advantages to industry? What are the modes of control commonly used?

Step by step, the film discusses the four modes of control — on off, proportional, proportional with reset, and proportional with reset and rate action — and illustrates how a typical company's product quality and economic returns improve with the addition of each mode.

The film also touches on how the relation of system analysis, centralized panels and computer control can assist in bringing about optimum process conditions at maximum output with minimum costs.

The film was planned and produced by a task force composed of members of the ISA Rochester Section under the auspices of the Society's Education Division.

Rental rates for the film are: \$25 to companies; \$5 to schools and other societies. Prints may be purchased for \$400. For further information contact: Publications Department, Instrument Society of America, Penn-Sheraton Hotel, 500 William Penn Place, Pittsburgh 29, Pa.

Inland Waterway Network Is Pictured in "Forever Free"

Transportation on America's network of free inland waterways, the problems and operations, are presented in *Forever Free*, a 27½ minute sound and color film produced for American Waterways Operators, Inc., by The Jam Handy Organization.

Historical antecedents of this country's 29,000 miles of inland waterways are shown. Highlighted are the efforts of Washington, Jefferson and Lincoln to keep water routes free and useable.

Raw materials and finished products from home and abroad are pictured in transit. Towboats as long as the Queen Mary move cargoes to factories and ports along our nation's rivers and canals. Association Films is the distributor.

The Wide World of Sponsored Pictures

Republic Steel Offers Famed "Order Makers" Film Library

15 MOTION PICTURES used in widely-successful sales development programs of the Republic Steel Corporation are being shared with other companies who may find good use for two series originally produced by Wilding, Inc. for this steel maker and fabricator. They are now available on free loan via regional sales office of Republic.

Eight of the films are on steel and plastic pipe products, their application and basic sales principles involved in selling. Seven pictures (all in color) deal with stainless steel products and fabrication.

All 15 pictures were key elements of Republic's famed Order Makers' Institute (OMI) sales training program. The \$3 million operation was widely applied among dealers and distributors and

has been described as one of the most successful sales stimulators in this decade.

The first group of eight films is of special interest to petroleum and utility companies, but is now being offered to other organizations. The titles are: *Arteries of a Nation*, *What You Would Like to Know*, *Let's Look Deeper*, *Pipelines to the Future*, *The Uncommon Carrier*, *Where the Line Begins*, *Quality You Can Measure*, *The Weevil Takes a Bride*.

Republic's stainless steel fabrication films are designed for architects, engineers, designers, fabricators, machinists, metallurgists and teachers. The films represent a compilation of the most practical knowledge available on fabricating and maintaining stainless steel.

Titles in the fabrication series are: *The New World of Stainless Steel*, *The Shapers of Stainless Steel*, *Not Difficult — Just Different*, *Forming and Bending of Stainless Steel*, *Deep Drawing of Stainless Steel*, *Finishing Stainless Steel in the Shop*, *The Care and Maintenance of Stainless Steel*.

All of the films are available for use by firms in the United States on a free loan basis. Contact the Republic Steel sales office in your locality to obtain prints.

* * *

Petroleum Research Goals Pictured by Standard of Calif.

Produced for showing to visitors at the Standard Oil Company of California's major centers of operation, *The Goal of Petroleum Research*, illustrates the methods and goals of research in the petroleum industry, and points up their significance to the consumer and the general economy.

The 14-minute color film traces the development of a single petroleum chemical — a raw material widely used in the manufacture of paints and plastics — through laboratory research and pilot plant testing to the marketing of the finished product. From that point it shows the abundance of products in everyday use which are derived from petroleum, products made possible, or greatly improved, through research.

Motion Picture Service Company, San Francisco, produced the film. It was written and directed by Terry Brickley and photographed by Chuck Eyman. Art work was done by Standard Oil Company's own artist, Larry Weber.

Copies are available for showing by schools and other organizations in the west, and prints may be borrowed without charge from the company's 10 film loan libraries, or by writing the Public Relations Dept., Standard Oil Company of California, 225 Bush Street, San Francisco 20, Calif.

Air Express tells shipping story.

Air Express Shows Speed in Film "Packages by Pegasus"

Packages by Pegasus is a new 16mm color film available from Air Express for showings to social clubs, educational organizations and business groups, in particular traffic managers, office managers, purchasing agents, airline personnel and others interested in traffic problems.

Running 22½ minutes, the film was produced by Robert Yarnall Richie and is narrated by Chet Huntley.

It features the speed and romance of nation-wide door-to-door air shipping service provided by Air Express, which is a joint enterprise of REA Express and 38 scheduled airlines.

Prints are available for loan without cost by writing on official letterhead to REA Express, Air Services Dept., 219 East 42nd Street, New York 17, N. Y.

Dimethyl Takes Leading Role as Chemical Killer of Weeds

☆ In a new film sponsored by Diamond Alkali Company, top billing goes to Dimethyl Ester of Tetrachloroterphthalic Acid, better known under the stage name of Dacthal. Of course, the film is titled *Dacthal*.

It is a chemical that keeps weeds from coming up — and it kept crews of Canyon Films of Arizona, producers of the motion picture, flying all over the West, Midwest and South to film the right crops at the proper seasons.

Dacthal will find its most appreciative audience among farmers. But early showings indicate city dwellers also have a stake in the battle against the weeds, especially when it includes lingering color shots of just about everything that's good to eat. A chemical which can keep weeds from coming up, by the way, is called a pre-emergence herbicide.

The film is on 16mm, running time: 25 minutes, sound color.

This slide presentation speaks for itself.

Different films for line and continuous tone are available. Polaroid Corp., Cambridge 39, Mass.

M. B. Reilly Is Elected

W. J. German, Inc. President

Miss M. B. Reilly (Mrs. James F. Burns) has been elected president of W. J. German, Inc., and its California subsidiary which handle the nationwide sale and distribution of Eastman Kodak professional motion picture films.

Miss Reilly formerly was executive vice-president and succeeds the late William J. German, well known industry film leader.

The film distributing company and its subsidiary also elected Morris H. Bergreen as senior vice president.

Miss Reilly began her long career in 1913 when she became associated with Jules E. Brulatour, who since 1911 had handled the sale and distribution of Eastman professional films.

In 1922, William J. German, formerly of Kodak, joined the Brulatour organization, and in 1952, he and Miss Reilly organized W. J. German, Inc., successor to J. E. Brulatour, Inc.

This year marks the 50th anniversary of Miss Reilly's association with the film business. During that long span, she played a major role in the development of the business of W. J. German, Inc., and its predecessors, so that now it ranks as the foremost distributor of raw stock in the world.

Bergreen has been associated with Miss Reilly and William German, as legal counsel, since 1946. In 1952, after assisting in the organization of W. J. German, Inc., he was elected a member of its board of directors and its general counsel.

Permacel Names Otto Vanoni to Products Manager Position

Otto V. Vanoni has been promoted to product manager, motion picture film splicing and processing products, at Permacel, New Brunswick, N. J.

Vanoni, a resident of New York City, joined Permacel in 1962 as an industrial products salesman, a position he held until his recent appointment. Prior to joining Permacel, Vanoni was assistant marketing manager at Fairchild Camera and industrial engineer at Republic Steel Corp.

Barth Joins Montgomery Ward as an Audio-Visual Producer

James P. Barth has been named audio-visual producer in the product sales training department of Montgomery Ward & Co., R. P.

BUSINESS SCREEN EXECUTIVE

NEWS OF STAFF APPOINTMENTS AND A-V INDUSTRY DEVELOPMENTS

Pettit, product and sales development manager, announces.

Prior to joining Ward's, Barth managed his own film producing company. He has also produced and directed film feature series for TV and educational use, and has been a director at the Fred A. Niles Communications Center of Chicago.

Florman & Babb, Inc. Appoints Cain Assistant to President

Florman & Babb, Inc., New York supplier of professional motion picture equipment, announces the appointment of Oliver E. Cain as assistant to the president, Arthur Florman.

Cain recently returned from San Juan, Puerto Rico, where he was assistant to the president of Alexander International and Delta Films International. He also serv-

ed as business manager of both firms. Prior to his association with Delta, he was sales promotion manager of S. O. S. Photo-Cine-Optics, Inc.

Peter DeMitre Joins Calvin As Production Services Head

Peter V. DeMitre, formerly with Coast Guard Motion Picture Section, Washington, D. C., and active in government motion picture circles, is now a director, producer services division, Calvin Productions, Inc., of Kansas City, Mo.

Associated with the Coast Guard for 10 years, he recently produced and directed the official Coast Guard *Firefighting Aboard Tankers*, 1962 bronze plaque winner in the National Safety Film contest. He has also produced many other outstanding Coast Guard films.

Gwen Smart Named Manager of Advertising, PR at Niles

Gwen Smart has been appointed director of advertising and public relations for the Fred A. Niles Communications Centers, Inc., it was announced by Fred Niles, president.

From the corporate headquarters in Chicago, Miss Smart will

Niles' Gwen Smart

co-ordinate advertising and public relations for all three Niles studios, located also in New York and Hollywood. Miss Smart had been midwest editor of Sponsor Publications since 1958, and prior to that was with Earle Ludgin & Company, advertising agency.

Frank Robinson is Production Manager at Fraser Studio, S.F.

Frank V. Robinson is now production manager at Fraser Productions, San Francisco motion picture producers.

Before joining Fraser company in 1962, Robinson directed the TV film series, *Expedition California*, for ABC and was a staff producer at Lockheed Missile and Space Division at San Jose on the Polaris and Samos programs. Robinson's credits include staff assignments in Sydney, Australia and with R. Beck and Associates, Honolulu.

Hosier to Direct Production at Society for Visual Education

Donald Edwin Hosier has been appointed director of production, a newly-created position, at Society for Visual Education, Inc., Chicago.

Under the direction of Walter Johnson, vice president in charge of the Editorial Department, Hosier will co-ordinate and supervise the overall production of SVE educational and religious filmstrips, including editorial, art, photography and operations.

Before joining SVE, Hosier was in charge of production of filmstrips used in merchandising training at Sears, Roebuck & Company.

RPL now offers
 16 and 35mm film
sound recording services

RECORDED PUBLICATIONS LABORATORIES
 1565 Pierce Ave., Camden 5, N.J.

Wherever movies are being made to-day—in Hollywood or NYC, in any business, educational or Government center—the recording of sound is turned over to specialists. The utmost in quality is essential. RPL engineers have many years of experience in top-quality sound recordings on disc, tape and slide film. Now, with newly completed facilities, we are able to extend our recording services to motion picture film.

Our facilities include the latest equipment for 6-channel 16 and 35mm magnetic film, interlock screening, mixing and transfer... a comprehensive library of sound and film scoring music effects... an acoustically perfect screening theater, announcers' booths, and control rooms. We have everything needed to provide highly specialized sound recording services for movie film.

Ross Develops Fast Service For Mole-Richardson Items

Charles Ross, distributor of the Mole-Richardson line for the New York area, has built up distribution to a point where delivery is almost immediate from New York stock on average orders.

Ross states that everything is carried in stock at its several floors located at 333 West 52nd St., New York. There is no longer any need to wait for delivery from California. All orders are filled and delivered from New York stock for Mole-Richardson lighting equipment and accessories.

Charles Ross has on hand a tremendous rental inventory which puts the company in a position to offer lighting equipment, grip equipment, generator trucks and accessories to supply immediate needs.

Equipment may either be picked up by the producers' own trucks or delivered by Charles Ross to any destination. For emergencies, equipment is on call 24 hours around the clock.

Paillard Consolidates Offices, Service Facilities at Linden, N.J.

Paillard Inc., U. S. Sales and marketing organization for the Bolex movie camera line and Hermes typewriters and adding machines, will consolidate executive offices and distribution service facilities in a new building at 1900 Lower Rd., Linden, N. J. Relocation from the firm's present New York quarters at 100 Sixth Avenue will be completed by May 1st.

Creaser Notes Growing Trend In West for Filmstrip Use

Reviewing a banner 1962 year of production, D. B. "Skip" Creaser, president and general manager of IdentiColor Laboratory, Inc., Hollywood, Calif., notes there is a growing trend toward greater use of filmstrips in the West by business and industry for use in sales and training.

Setting a record in 1962, IdentiColor mastered its 161st filmstrip on the last day of 1962. The firm reproduced nearly 300,000 duplicate 35mm transparencies last year.

A total of 57 different producers and companies had filmstrip masters made at IdentiColor Laboratory during the year. Longest filmstrip, Creaser said, was 214 frames mastered for Ardmac, Inc., a vitamin company in Palo Alto, Calif. Shortest filmstrip was four frames,

News Along the Film Production Lines

mastered as one of a series of 25 for the University of Southern California at Los Angeles.

Sarra in Larger Studios at 210 East Fifth in New York

Sarra, Inc. has announced new and larger studios at 210 East Fifth Street, New York 3, N. Y. The Editorial Department and Projection Room remain at 200 East 56th Street in New York.

Williams V. P. for Planning at Louis de Rochemont, Inc.

Louis de Rochemont, president and executive producer of Louis de Rochemont Associates, Inc., New York City, announces that Phil Williams has been named vice president in charge of planning.

Williams started his career with

de Rochemont at March of Time in 1937. He was with March of Time and Fortune divisions of Time, Inc., for 15 years. He also has been assistant director of TV for 20th Century Fox TV Productions, Inc., vice-president of Syndication Sales with ABC Films, Inc., and sales manager for United Artists Television, Inc.

Heads Rose-Magwood Editorial

Armond Lebowitz has been named head of the editorial department of Rose-Magwood Productions, Inc. He has spent 14 years in the film business as editor. In recent years, Lebowitz has edited *The Patti Page Show*, and *Big Playback* for Screen Gems. He is credited with creating the *Go Go Go Goodyear* TV commercials.

Warren Smith, Pittsburgh Lab, Buys Packaged Programs, Inc.

Warren R. Smith, Inc., motion picture laboratory, announces through its general manager, F. Jack Napor, the purchase of the complete picture laboratory facilities of Packaged Programs, Inc. Both firms are located in Pittsburgh, Pa.

Packaged Programs will continue to concentrate on production of TV commercials, industrial films, and programs for syndication to TV stations, Napor said.

Three Join Lawrence Staff

In line with expanded studio activities, John E. Cron, executive vice president of Robert Lawrence Productions, Inc., New York, announces the appointment of Cameron Applegate, Fred Thorne and Ray Lofaro to its New York sales staff.

Applegate is a director-salesman, formerly with Dallas Jones in Chicago. Thorne was formerly with BBD&O and Procter and Gamble in Canada, while Lofaro most recently headed his own artist's representative business.

Mercer Co. Develops Method for "No Matte" Matte Shots

Ray Mercer & Co. has developed an effective method of producing matte shots without mattes, in Mercer's program of expanding services to producers of sponsored, TV and entertainment films. The new system is a direct image procedure which entirely eliminates problems of register.

Mercer announces that patents have been obtained on method and apparatus for a liquid immersion process which constitutes a major improvement over the "liquid gate" process. Applicable to both black and white and color film, the system is used for printing 16mm to 16mm to eliminate scratches even of considerable severity, and for maximum quality blowups of 16mm to 35mm.

Other services of the 35-year-old firm include a broad range of optical effects, b/w or color CinemaScope, trick photography, animation, superimpositions, inserts, fades, wipes and dissolves.

More information on methods and applications for "no matte" matte shots and liquid immersion blowups of 16mm to 35mm or 16-16mm printing to eliminate scratches, together with special effects and art charts, may be obtained from Ray Mercer & Co., 4241 Normal Ave., Hollywood 29.

Graflex "16" Projector

Two 16mm Sound Projectors Announced by Graflex Corp.

Two new 16mm sound projectors have been unveiled by Graflex, Inc., Rochester, N. Y., a subsidiary of General Precision Equipment Corp.

Known as the Graflex 16 (Models 820 and 815), they are precise, versatile instruments which offer simplified operation through push-button controls and drop-in sound head loading. There are no fuses, no loops to bother with, no drive belts to engage or disengage.

Graflex 16 employs a revolutionary low voltage dichroic reflector lamp for brighter, more uniform screen illumination with less power required and less heat produced. The lamp requires but 250 watts of power, yet its screen brightness equals that of a high voltage 1,200 watt lamp used in conventional condenser-reflector systems.

Both models have a brilliance control that provides a selection of two high levels — "normal" and "hi". The Graflex 16 is available through any Graflex audiovisual dealer. Check NP # 1 in the convenient request form for additional data.

New Cine Voice Conversion Unveiled by Florman & Babb

Florman & Babb, Inc., has unveiled a new, improved Cine Voice Conversion for 400' and 1200' Mitchell magazines, designed by Ray Emeritz, chief engineer.

Most important feature is a true torque motor, powerful enough to pull an entire 1200' film load. Yet

Cine-Voice Conversion

AudioVisual Equipment TradeFair

the motor is kept cool, even during continuous operation because of a new system which causes it to idle at reduced (one-third) power. But when the film is running through, it resumes full power. Thus, the camera can be kept on and, ready for filming, for hours without excessive overheating.

Other features include rear camera running light, motor housing which completely encases the torque motor and Veeder counter.

For additional data, check the convenient Request Form NP # 2 on following page.

Beseler Overhead Projector Features Small Size, Economy

Priced to fit the most stringent budget, the new Porta-Scribe standard model 15710 overhead projector is compact and light weight.

Featuring a 10½" x 13" x 14½" base with a miniaturized projection head and supporting arm, and weighing only 17 pounds, the new unit accepts full-sized 10" x 10" transparencies in standard

New Beseler "Porta-Scribe"

mounts for projection up to 9 by 9 feet. Screen image is bright, sharp and clean, even in lighted rooms.

In the Porta-Scribe standard, Charles Beseler Company feels it has answered the need for a low cost overhead projector that fulfills the quality specifications of educators and sales, training and industrial users.

Porta-Scribe standard offers a unique tilting head which permits raising of the projected image up to 30 degrees with no effect what-

The latest in 16mm sound projection; aids for production

ever on the brightness, whiteness or definition of the image.

Porta-Scribe standard Model 15710, complete with 400-watt lamp and 15-foot power cord sells for \$169. Check the convenient Request Form NP #3 for additional information.

Busch Cine-Educator Projector Designed for Training Rooms

A new multi-purpose Cine-Educator projector designed to make training classroom film showing

Busch "Cine-Educator"

more efficient and effective has been announced by Busch Film and Equipment Co.

The Busch Cine-Educator shows a large brilliant picture in ordinary lighted training and conference rooms. No special darkened room is needed, no equipment set up is required, and no special room arrangement is necessary.

The Cine-Educator is mobile and can be used in every classroom in the plant. It can also be used with compact slide projectors or filmstrip projectors.

The projector is completely enclosed and can be easily pre-programmed with film and taken to any school classroom. A large 23" x 33" picture is projected from any standard 16mm film onto the non-glare rear projection screen giving a clear, sharp image even with ordinary room lights turned on during sessions.

Firms now using the Cine-Educator report up to three times as many films shown as before. Check the convenient Request Form NP # 4 for more information.

A Convenient Request Form Is Provided on Following Page

New 4-Speaker Unit Provides Optimum Audience Coverage

A new, two-section speaker unit for Kodak Pageant Sound projectors, featuring optimum power-handling ability and audience coverage is now available from Eastman Kodak Company.

The Kodak Duo-Twin speaker unit, Model A, has four speakers for more even distribution of sound and comes in a sturdy, compact case for portability.

Divided vertically, the two-section case is hinged at one end with removable hinge pins. Each section has two 11 x 6 inch oval speakers, 40-feet of speaker cord with phone-type plug, and a phone-type receptacle.

The unit is easily arranged in a four-speaker array by plugging the speaker cord in one section into the receptacle in the other section, and connecting the remaining cord to the projector amplifier.

Each section can be swung open to place the speakers in the same plane or at any angle less than 180 degrees. Or the hinge pins can be removed and the sections separated, placed at either side of the projection screen, at either side of a stage or platform, or otherwise located.

The Kodak Duo-Twin speaker unit, Model A, replaces the Kodak Deluxe speaker unit, Model B, which has been discontinued.

Check NP #5 in the convenient request form for additional details.

Soft Brushes, Static Bars Used in Simco Film Cleaning

Here's a *quick* film cleaner, the maker says. The new Simco film cleaner cleans and neutralizes photographic prints and negatives and other types of sheets and flat parts which attract and hold dust due to static charges.

In using the film cleaner, the operator merely passes the film or part between a pair of soft, scratch-free brushes and a pair of shockless static bars. The film first passes one of the static bars, then between the brushes which clean it easily and completely because both it and the dust are neutral.

The second static bar removes any static which has been generated by the brushes, thus assuring a completely static-free material to which dust will not re-attract.

The standard brush and static bar length is 8", but other lengths can be furnished from 4" to 24" in multiples of 4". For additional information, check Request Form NP #6.

Extension Plate in Use

Camart Offers Add-a-Unit Extension Plate for Moviolas

A new Add-A-Unit extension plate for Moviolas is now available from The Camera Mart, Inc., New York. The new model is said to allow for greater flexibility in adding extra sound heads to Moviola Series 20 editing machines.

The Add-A-Unit is attached to the Moviola, without drilling into the cabinet and bolting it to the chassis. It permits adding at least two more sound heads, so that the editor can check three separate sound tracks, if necessary.

The price is \$259.50 and the unit is available for immediate delivery. Check NP # 7 for useful literature from the maker.

Editing by Front-Projection With the S. O. S. Projectola

A new way of direct front-projection editing by means of a small bench or table mounted unit has been announced by S. O. S. Photo-Cine-Optics, Inc.

Measuring 7" x 6" x 7", this device is said to project a large image without flicker or distortion. Called the S. O. S. Projectola, it is designed for viewing by a number of persons simultaneously.

A four-element projection lens with front objective 40mm diameter comprises the optical system which has been coated and corrected for high illumination and sharp,

AV Program Pauses Possible With Use of Avacord Control

Now we have "the pause that reinforces." This is claimed for Avacord, a switch on the end of a 10 foot wire that gives student or instructor stop-and-go control of an audio-visual program. No tools are required to attach it to audio-visual equipment.

Avacord grew out of the need to interrupt audio-visual programs for discussion, note taking, answering questions, and other learning activities in which the pause in the program needs to be varied to suit the participants.

Avacords have been tested in use for over seven months by purchasers in 35 states. They are being used regularly in industrial

Here's new Avacord . . .

training, education, hospitals, medical schools, according to the manufacturer, Avaco, Winnetka, Illinois.

Avacords are made in two types: Avacord 103 remote power control cord for all AV equipment, priced at \$4.95, and Avacord 105 program interruption control cord for use with the Beseler Salesmate, \$6.95. Check Request Form NP #10 for additional information.

General Film Laboratories Issues Checklist of Prices

A new 16-page price list, with all data conveniently rearranged for convenience to producers has been issued by General Film Laboratories, Hollywood, Calif.

A step-by-step checklist describing the preferred method of ordering either processing or prints is a feature of the new list. Items include precise information on prices for processing 35mm and 16mm color or black and white motion picture, TV and slidefilms.

Other typical items are developing, dailies, trial prints, dupes, internegatives, interpositives, A & B and additional-roll printing, paper-to-paper printing, release prints, reels and cans.

Write General Film Labs., 1546 Argyle, Hollywood 28 on company letterhead for your free copy.

Holmes' Filmstrip Catalog Available on Letterhead Request

An 8-page catalog available from Frank Holmes Laboratories, Inc. on 35mm color filmstrips and color slide duplicates contains useful information for producers.

Included are descriptions of the services, facilities and prices available at Holmes Laboratories. The catalog is free on letterhead request, from Frank Holmes Laboratories, Inc., 1947 First Street, San Fernando, Calif.

Effective Slide Suggestions Provided in Eastman Booklet

How to prepare simple, effective slides to illustrate technical lectures is described in a new pamphlet published by Eastman Kodak Company.

Effective Lecture Slides (\$22) is an eight-page, illustrated booklet designed to help the author who must "go it alone" in the preparation of visuals. The publication is applicable to visuals used in a wide variety of instructional programs, as well as to use of slides to illustrate technical lectures.

The pamphlet points out that good slides clarify and amplify the verbal message, command audience attention, stimulate interest, and help the speaker stay "on the track."

Single copies are available free of charge from Sales Service Division, Eastman Kodak Company, Rochester 4, N. Y. Quantity copies are available prepaid at \$6 per

100, in units of 100; remittance must accompany order.

Guide to Meeting Plans

Available from 3M Company

A 30-page booklet designed as a guide to planning and staging better meetings and presentations of all types is available free of charge by writing Department L3-34, the 3M Company, 2501 Hudson Road, St. Paul 19, Minn., on your company letterhead.

Titled *More Effective Meetings*, the booklet includes helpful suggestions on speech preparation, selecting and arranging a meeting site and use of audio-visual aids. Also discussed are ways in which the overhead projector can add versatility, effectiveness and greater listener interest to presentations.

Quartz-King Light Data

Literature describing the new Quartz-King 500 series of lights for TV, still and motion picture photography is available from ColorTran Industries, 630 Flower Street, Burbank, Calif.

Quartz-King 500 is said to produce 2000 watts of controlled photographic light with no fall-off and at constant color temperature. For additional information, write Editor, Reference Desk, c/o BUSINESS SCREEN, 7064 Sheridan Road, Chicago 26, Illinois.

13th Production Review Correction

In one of the few omissions noted in this year's Production Review, we failed to list final credits for this studio:

WILLARD PICTURES, INC.

45 West 45th Street, New York 36, N. Y.

Phone: JUDson 2-0430

Studio: (Editorial, cutting, projection, recording, animation) 550 Fifth Avenue, New York, N. Y.

Date of Organization: 1932

John M. Squiers, Jr., *President*

David C. Hessey, *Vice-President*

S. H. Childs, *Treasurer*

Frank Brittain, *Charge — Production Dept.*

SERVICES: Industrial, medical, educational, sales and job training motion pictures and slidefilms; training films for U. S. Armed Forces and Governmental agencies; theatricals; television film shows and commercials. FACILITIES: Mitchell NC cameras and camera-top station wagons, portable generators, field sound recording instruments; pioneer in industry techniques and equipment; color production in East and South America for theatrical producers; animation department; projection and cutting rooms; creative staff.

RECENT PRODUCTIONS AND SPONSORS

MOTION PICTURES: 1962 *Washington Meeting*, (The Ad Council); *The Enemy Below*; *Geigy Universal*, (Geigy Chemical Corporation); *Management of Breast Cancer*, (Cyanamid of Canada, Ltd.); *The Last Case of Polio*, (Lederle Laboratories); *D D Overhand*; *Parts I & II*, (U. S. Navy); and others for the U. S. Navy, U. S. Army Pictorial Center, and U. S. Dept. of State.

THE EDITORIAL VIEWPOINT:

(CONTINUED FROM PRECEDING PAGE 12)
(only 1,254 last year). The commercials were sent in by 116 agencies, 72 production companies, 14 stations and 13 advertisers. Of the total, 1,265 were on film; 102 on video tape. Approximately 70% of the entries came from agencies (969) and 27% were sent in by producers (369). John P. Cunningham is Chairman for the fourth consecutive year of the TV Commercials Council which plans and judges the annual event.

"And Then There Were Four" Prize Safety Film Acquired for Re-Make by Parthenon

Remember the great safety motion picture *And Then There Were Four*? This classic picture will be re-made this year for a new sponsor by Parthenon Pictures, Hollywood, under executive producer Cap Palmer who wrote the original version. James Stewart's famous narration track will probably be retained in the updated version, since Parthenon has bought the original negatives as well as all rights. *And Then There Were Four* played to millions of viewers in over 20,000 national showings on its initial release.

NEW YORK, NEW YORK:

(CONTINUED FROM THE PRECEDING PAGE 35)
the United Nations, bizarre coffee houses in Greenwich Village and quaint Gramercy Park. The Gothic spires of St. Patrick's Cathedral loom in classic contrast to gay Rockefeller Plaza with its outdoor cafes. *New York, New York* visits some of the museums for which the city is famous: the majestic Metropolitan Museum of Art, the Museum of Modern Art, noted for its sculpture, and the Guggenheim, designed by Frank Lloyd Wright.

In 13½ minutes, *New York, New York* uses 34 musical selections, matched to no less than 226 scenes. Yet, the film is not just a montage of the city, it has a real point of view — that New York is more than the big sights and scenes, the stone and steel buildings; it is a hundred villages in one, a dozen nations, and a place inhabited by very human people, just as in Omaha.

All offices of American Airlines are using prints of *New York, New York*, and both Association Films and Modern Talking Picture Service are distributing it as well. The film seems slated for a long and useful life encouraging vacationers to head for New York.

Holland: Dr. H. J. Reinink, Director-General for Arts and International Cultural Relations, Netherlands Ministry of Education (left) presents 1,000th Technicolor print of "Glass" to producer Bert Haanstra. The film has won 16 awards; was sponsored by the Leerdam Royal Glassworks.

(CONTINUED FROM THE PRECEDING PAGE 40)

ments uses 70 frames of live photography, cartoon and technical art with some especially effective close-up shots of the Appointment Board and meters in action. The film was produced by Seymour Zweibel, directed by Susan Wayne — and supervised by A. T. & T.

SOUND RECORDING at a reasonable cost

REFERENCE SHELF:

Gordon Enterprises* Catalog Full of Camera Information

Gordon Enterprises' new catalog is 128 pages of information about motion picture and photo instrumentation equipment. It is tightly-packed, carefully descriptive and well-illustrated. Thorough indexing makes its use fast and easy.

Sectionalized for convenience, and with separate pages for related accessories, the content covers both silent and sound 35mm and 16mm cameras, tripods, heads, dollies and cranes, photo meters.

In the lens section, five pages of charts list over 7,300 lens and camera combinations to provide an invaluable guide to the cinematographer. All other phases of equipment are covered.

Gordon engages in engineering and manufacturing and distributing products of other companies. Its sales, rental and service operations are on a world-wide basis. Serious equipment-users may obtain a copy by writing on company letterhead to K. P. Knipe at Gordon Enterprises, 5362 N. Cabuenga Blvd., North Hollywood, Calif. ☐

A-V Calculator Is Offered

Filmack Studios has a supply of their Audio-Visual Calculators. This working chart is a tool that contains such useful data as a timing-footage-word allowance scale (mighty useful for creative and copy people); production specifications for slides and slidefilms (an aid for production men); a 35mm slidefilm footage computer; and other data helpful to those connected with planning and production of audio-visual material. The Calculators are available on letterhead requests from Filmack Studios, 1335 S. Wabash Avenue, Chicago 5, Illinois. ☐

* * *

USDA Stock Footage Catalog

A new stock footage catalog of agricultural scenes has been issued by the U. S. Department of Agriculture Motion Picture Service Stock Film Library. Copies are available to producers of TV, non-theatrical and university films. For the catalog, write to USDA Office of Information, Washington, D.C. ☐

Wakefield Fisheries Film Portrays Alaska Crab Catch

Adaq, King of Alaskan Seas, 28 minutes, sound, color, sponsored by Wakefield Fisheries.

☆ A saga of seafaring pioneers on the west coast of Alaska is chronicled in this film produced for Wakefield Fisheries, catcher and packer of Alaska king crab.

Lowell Thomas, Jr., himself a resident of the 49th state, narrates the film. Depicted is the work of men in small boats who fight vicious seas to catch the king crab in Alaska's only year-round fishery. The film also reports on life in the Aleutian fringes of Alaska separated from Siberia less by culture than by a few miles of cold sea. The camera witnesses a Russian Orthodox wedding, visits schools and homes in the Kodiak area. Ancient music of the Aleut people serves as background for the commentary.

The film also takes the viewer aboard the processing vessel, where the giant king crabs — some six feet from claw to claw — are processed and frozen.

Available for showing to civic, social and youth groups from Wakefield Fisheries, Inc., Port

Wakefield, Alaska; from Modern Talking Picture Service, Inc., 3 East 45th Street, New York 22, N. Y., or any of the 30 Modern Film Libraries located in principal cities throughout the United States.

Space Guidance Film Tells About Stabilizing Gyro

The AB-5 Gas Bearing Stabilizing Gyro, two training films, 16mm color, sponsored by the Eclipse-Pioneer division of the Bendix Corporation.

☆ This all-important gyro, which is the title and main subject of the film, is used as a sensing element in rocket and space vehicle flight guidance systems.

Bendix sponsored the films for the George C. Marshall Space Flight Center of the National Aeronautics and Space Administration. There is a 10½ minute version to be used by NASA and a 14 minute version for Bendix's Eclipse-Pioneer division.

Produced by Victor Kayfetz Productions, the films deal with the manufacture, assembly, testing and operation of a key component in systems that guide space vehicles and missiles to their targets.

WHEN THE COCA-COLA COMPANY WANTED A MOVIE DATE WITH TEEN-AGERS?

It's a ticklish task to both educate and entertain an audience at the same time. Especially a young audience. Too much entertainment and they might miss the point. Too much education and you run the risk of having them mentally turn you off. That's why The Coca-Cola Company called us in when they wanted to film "The Prom—It's a Pleasure," depicting the proper ways to handle the various social situations that arise during a high school prom. We had made similar types of films for them before that proved to be quite successful. In their new film, the accent's on the prom with just the right amount of product promotion mixed in. To date, it's been shown in hundreds of high schools across the country. And requests keep pouring in. This same kind of professional help with your sales promotion problems, whatever they may be, is yours for the asking from . . . **THE JAM HANDY ORGANIZATION**

TIME FOR INDUSTRY STATESMANSHIP

THE INTERNATIONAL JOURNAL OF AUDIO & VISUAL COMMUNICATION
NUMBER THREE • VOLUME TWENTY-FOUR • 1963 • PRICE FIFTY CENTS

THE CASE FOR SPONSORED FILMS:

Arthur R. Railton, Public Relations Manager, Volkswagen of America, Inc.

Volkswagen Drives a Bargain... (why VW sponsors 6 motion pictures)

"Our film program is a vital link in our communication chain. We have two basic stories to get over to the American public, and we consider films the perfect vehicle for delivering them subtly yet forcefully, pleasantly but with effective long-range impact.

When the first two Volkswagens were registered here in 1949 our particular type of automobile was unknown to the motorists of America. Automobiles were big and changed style by the year. A new car was a status symbol. In the face of this trend, we had to sell the concepts of economy and unchanging basic design. Motion pictures have helped materially toward our achievement of this goal.

The second and more important aspect of our story is that international trade is a healthy thing for the importer, the exporter and their respective countries, both economically and for the contribution such trade makes toward international peace and understanding.

The excellent acceptance of our motion pictures by audience groups all over the world—in community groups, schools, on television and in theaters—is a tribute to the skillful interpretation of our point of view by our film makers and of course to the wide distribution they've had. The results are good and in terms of their worth to us, reasonable in cost."

Partners in Success: Volkswagen of America, Inc., working with Marathon International Productions, Inc., and Modern, has achieved these impressive results in the United States:

Community Audiences

"Five Miles West"	27,048 showings	1,195,955 viewers
"The Give and Take"	15,728 showings	618,557 viewers

ARRIFLEX® 35

This 35mm motion picture camera was literally born a classic. Not through appearance alone ... but through function and performance! The very first Arriflex 35s, built in 1938, gave filmmakers unprecedented versatility, operating ease, technical capabilities, and money-saving advantages... through a completely original optical system designed around a mirror-reflex shutter. One of the few genuine innovations in cine camera engineering since the days of Lumière, Friese-Greene, and Edison ... the mirror-reflex shutter is today's most desired and most imitated motion picture

**a classic
in its
own
time!**

camera feature. It provides continuous through-the-lens viewing while filming ... eliminates parallax! And it all but antiquates an assortment of finder correcting gear most other cameras still require. Wherever film releases must meet the highest standards of theater-quality, Arriflex 35s are chosen. They're lightweight, so they make excellent newsreel and location cameras; rugged, so they can take extremes of climate; dependably

precise under all conditions ... ideally suited for every assignment from missile tracking to full-scale studio productions!

Write today for complete literature

INCOMPARABLE VERSATILITY! The Arriflex 35 is shown: as a hand camera (left), with 400-foot magazine, matte box, and 16-volt variable-speed DC motor; and as a studio sound camera, fully blimped with 400-foot magazine (center); and with 1,000-foot blimp (right).

Preface to Features of the Month

The results of three national awards programs, of which the National Safety Contest selections are most noteworthy, are featured in this issue, beginning on page 33. Our editorial opinion of this awards business is expressed in that column on page eight.

Keeping up with progress of the New York World's Fair is Bob Seymour's assignment (see page 20). It appears that a number of Fair exhibitors will be using films; many plan elaborate theatres.

Featured articles describe some current and outstanding new films for government, industry and for public showing by their producers. The widening application of 8mm sound, via those handy repeater projectors, is reported on page 37, closely followed by reviews of the light-hearted *but well-pointed* training film on Ford truck selling and a useful sound filmstrip on estate planning.

The sports-minded reader will find good film fare on page 42; those interested in police and law enforcement material should check pages 48 and 54 to get useful data on these applications.

Our correspondents, Mary Hoyt in the nation's capital and Peter Rigg, out of London, give you the latest in film news from those far-flung centers. All told, this is a well-filled issue with plenty of useful fare for our reader family. ■

Issue Three, Volume Twenty-Four of Business Screen Magazine, published May 31, 1963. Issued 8 times annually at six week intervals at 7064 Sheridan Road, Chicago 26, Illinois by Business Screen Magazines, Inc. Phone: BRiargate 4-8234-5. O. H. Coelln, Editor and Publisher. STANDARDS IN AWARDS

We Need Fewer Contests and More Quality

THE SEASON'S CROP of film awards has been pretty well harvested. All that remains by the time this issue reaches our most distant subscriber abroad are the traditional Columbus (Ohio) Film Festival of September, San Francisco's Festival, with its "Film as Communication" section at the end of October and, of greatest significance, the Fourth International Industrial Film Festival opening in Madrid, Spain in mid-October.

This latter event, in which the Confederations of European Industry join with our own National Association of Manufacturers in putting their best in competition, will bring to Madrid leading figures from all of Western Europe and, we hope, a sizeable and knowledgeable delegation from the U. S. A. For U. S. participation at the Third International in West Berlin last fall left much to be desired.

If you can make arrangements, *go to Madrid* and see the kind of exhibition we sorely need right here at home. You'll also see the best of Europe's imaginative film-making for industry and, if the NAM Committee handling U. S. selections does a good job, *the best of America's business films* as well.

Safety Awards Program Sets a Standard

Do we have a *standard* for this sort of film competition in the U. S.? Yes, the work of the National Committee on Films for Safety, whose selections are also reported in this issue, should be recognized as symbolic of the quality of knowledge and the specialization we believe necessary for adequate judgment. The heads of national safety organizations sit in review on films already checked by experts in the various fields of safety education before they reach a final, concentrated review phase.

We do not begrudge the earnest sponsors of film "festivals" the sizeable entry fees they now annually collect from willing competitors. It's a free country, as they say, and those who pay these \$25 fees and hope to garner some prizes, are entitled to play the game.

It's even become a commercial enterprise, highly profitable to those who stage these contests for eager contestants. Sales of exhibit space go hand-in-hand with handsome certificates and silver bowls. But where are the board chairmen and top corporate executives who should be seeing the best of our films?

Film Investment Merits Real Judgment

The climax of the National Safety Film awards contest comes in October — when really-deserving plaques are awarded their winners before thousands who attend the important National Safety Congress. Fees are non-existent; the honor is real. The competition is worthy and judgment of authoritative value.

Millions of dollars invested in the skills and creative processes which go into the making of business films are a sizeable annual investment by American industry. Only the judgment of the most able authorities who can be enlisted in the specialized fields of content involved can count. And only then will the decision-makers in the top echelons of companies, trade groups and government pay heed to the results and view the winners.

Cooper's 22-Orbit Flight

Filmed by Information Agency

A U. S. Information Agency motion picture crew was on the scene at Cape Canaveral when Astronaut Gordon Cooper began his historic orbital flight. Preparations and the launch were lensed for the complete flight films of *Faith 7* to be shown in newsreels and via television in as many as 106 countries abroad. The film's narration was dubbed in 45 languages.

TV stations and networks in 65 countries received a series of film clips, depicting Cooper and Shepard in training, the rocket equipment and launch preparations, together with a master script for translation.

* * *

Name John Reynolds Chairman of Int'l Broadcasting Awards

General chairman of the fourth annual International Broadcasting Awards competition, sponsored by the Hollywood Advertising Club, is John T. Reynolds, senior vice-president for the CBS Television

CBS executive John Reynolds

Network. Reynold's acceptance was confirmed by Robert M. Light, president of the club.

The new chairman will head the IBA committee which selects the world's best television and radio commercials broadcast during 1963 and the next recipient of the IBA Free Enterprise Award. Joining him as vice-chairman for television is Robert D. Wood, vice-president and general manager of KNXT-Television and the new vice-chairman for radio is Ben Hoberman, who has the same executive posts at KABC-Radio.

* * *

Announce New Categories for Int'l Film Festival of N.Y.

The privately-sponsored 3rd International Film Festival of New

York, presented by Industrial Exhibitions, Inc., has announced three new categories for film competition. The Festival will be held October 8-10 at the Barbizon Plaza Hotel in Manhattan.

The new categories in the Industrial Film section embrace Public Service and Agricultural films; in the TV Commercials' section, spots may be entered in series, with a requirement of no more and no less than three episodes. In this case only a single entry fee is required.

A further change in entry fees has been made for the screening of industrial films, providing for one uniform basic fee, regardless of the length of the subject.

* * *

George Murphy to Keynote at the National A-V Convention

Three outstanding personalities, representing widely-divergent fields of film production, audio-visual trade association leadership and urban school audio-visual administration will headline the program of the 1963 National Audio-Visual Convention, July 20-23, at the Sherman House in Chicago.

The keynote address will be made by George Murphy, vice-president of the Technicolor Corporation. The former film star and studio executive will present his talk, "Focus on Change," at the opening of the Convention's first general session on July 20.

Don White, executive vice-president of the National Audio-Visual Association, convention hosts, will present "The Challenge of Change," as a feature address at the same general session. A veteran of 25 years in the audio-visual field, Don White's career began with his 1936 appointment as head of the Audio-Visual Extension Service of the University System of Georgia, in his home town, Atlanta. At the close of World War II, during which he served as an aerial photographer in India and China, he was named to the Association post he holds today.

Alan R. Fiers, who heads production in the Audio-Visual Office of the Minneapolis Public Schools will demonstrate the cross-media approach to teaching in a presentation titled "Utilizing Media in a Teaching Unit."

General chairman of the convention is Robert P. Abrams. The 1963 convention program is expected to attract 3,500 people (CONTINUED ON PAGE SIXTY-ONE)

A CALL-BACK CALLS FOR A KEENER SALES DRIVE

Taa many salesmen consider a call-back a continuation of a previous sales presentation. They assume that the prospect recalls what was said at an earlier meeting.

Here is a color sound filmstrip that proves prospects seldom remember . . . and why; and that a harder-hitting presentation is needed, one more thoroughly detailed, to win the order. It's

"DEVELOPING THE RIGHT ATTITUDE ON A CALL-BACK"

. . . one in a series of six filmstrips that furnish you with material for 18 inspiring training meetings: —

Time for Industry Statesmanship

THE EDITORIAL OF THE MONTH

WE NOTE with gratification a growing awareness by the heads of principal studio and laboratory labor organizations of the special problems faced by producers and processors of films for business, education and government. Greater understanding at the highest level within such organized labor can lead to greater job security for these skilled craftsmen and technicians; it can also serve to improve the creativity and quality of these vital tools.

But, meanwhile, *the leadership of film industry organizations should also strive toward cooperation and unity.* Working in harmony with principal groups of professional film users, the presidents of these groups and of the companies involved have a tremendous opportunity to promote the wider use of these potent sight/sound media. They can also look into costly, wasteful practices which lessen understanding of films' value at the highest levels within business, education and government.

A positive agenda for group action awaits a *Combined Leadership Conference* for which this editorial is the opening call:

1. A nationwide, cooperative program of audio-visual promotion through the medium itself and in national financial and industrial publications as well as special publications. Such a program should stress the more complete understanding which well-produced films can help achieve in such national problem areas as: job training and vocational opportunities, human and race relations, safety and health education, democratic institutions and the merits of the free enterprise system, to name just a few.

2. Our greatest asset, *the industry's best films of the year*, should be shared with top-level management in ONE national awards program worthy of the name. With the possible exception of the National Safety Film Awards program, there are few "festivals" worthy of the price in fees and valuable film prints which must be allocated and now stand idle for months.

Current films of top-quality, *relevant to the interests of members of the U. S. Chamber of Commerce, the National Association of Manufacturers, the Association of National Advertisers, the Public Relations Society of America, the International Sales Executives and similar national groups*, should be selectively shown at their national meetings; judged by top-level authorities directly concerned with their content and value. Members of the Congress and Washington executives should be in an annual audience there.

3. Accurate measurement of industry growth does not exist. There is no *authoritative* census of film use worthy of the name. Industry sponsorship of such surveys and their evaluation is imperative.

4. International trade offers a tremendous field for both 8mm and 16mm film use. The industry should appoint responsible delegates to attend such important events as the Fourth International Industrial Film Festival being held in Madrid this fall. Representation should be made at once to bring this event to America in 1965, the second year of the New York World's Fair!

5. Scholarship and study of the arts and crafts of this industry can only be encouraged by industry action. Put aside a few thousands of dollars at the earliest possible date to start one program which has been totally neglected to date.

6. Working together, *with statesmanship and in full recognition of the impressive leadership talent available among these heads of organizations*, this industry and the powerful tools in its hands, can pull our product out of obscurity and onto the screens at major national gatherings in principal cities coast-to-coast. *That is the prime objective.* Other things, like the evolution of standards, the benefits of harmonious relationships with labor, better relations with governments, etc. must surely follow. —OHC

A large, abstract sphere composed of overlapping, translucent, and opaque bands of color. The colors include vibrant reds, oranges, yellows, and greens, with some darker, almost black, areas. The sphere has a dynamic, swirling appearance, suggesting movement and depth. It is positioned in the upper right quadrant of the frame against a dark, textured background.

color-correct[®]

byron motion pictures

"color-correct" prints

What do you want in a color release print?
Perfection!

Think you can get it? Yes—if you have your color printing done by Byron. Why? Because Byron's exclusive "Color-Correct" printing process is recognized throughout the motion picture film industry as representing the very highest standard for color duplication. Only Byron can give you "Color-Correct" prints. Byron can print additively or subtractively with color balancing from scene-to-scene. We can print fades and dissolves in any length from 16 to 96 frames. We can print with zero cut for extended scenes. We can cue magnetically, if required. All information is automatically cued into the prints from programmed tape. And you'll find that our optical masters on Ektachrome are absolute perfection. You, like most of our customers, probably will find it impossible to identify the master from the original.

Next time you want color prints, order "Color-Correct" prints made only by Byron. See perfection for yourself!

**Historian-Biographer Allan Nevins Lends
Stature to Henry Ford Centennial Picture**

A Pulitzer prize-winning biographer has brought new stature to the factual film medium. Famed writer Allan Nevins, former Columbia University history professor and president of the Society of American Historians, narrates an important new motion picture titled, *A Historian's View of Henry Ford*.

Sponsored by the Ford Motor Company as a focal part of that company's observance of its founder's centennial year, the new 32-minute sound film was produced (by MPO) at Henry Ford Museum in a reconstruction of Henry Ford's Highland Park office. It draws heavily on historic mementos of America's transformation from an agrarian to an industrial nation. Clips from historic film footage are used to highlight scenes.

Film Is Based on Interview Technique

But the "keynote" of the picture is Professor Nevins' description of Mr. Ford—born 100 years ago this July—as "one of the great industrial figures who bridged the gap between two eras of American history." As viewers "sit in" on an interview of Professor Nevins by Owen O. Bombard, his former associate at Columbia (and now manager of Ford's Stockholder Relations Department), the historian reviews an era of the past:

"I have a theory about the value of American history between the Civil War and the first World War. This was a period in which we did not produce many great writers or

artists . . . or many great statesmen; in which, happily, we produced no great generals.

"But we did produce many great industrialists who transformed the country in just the nick of time to meet the grim tests of the first and second World Wars."

Henry Ford—As An Historian Sees Him

Professor Nevins offers some candid views of Henry Ford's complex personality; his idealism and hatred of war; his patriotism, as he offered the full resources of his company for defense during both World Wars; and the probable reasoning behind his comment that "history is bunk" in spite of the millions he spent to cherish artifacts of history.

Summing up Mr. Ford's life, Professor Nevins says: "Born in the horse and buggy age, he died as America became the mightiest industrial nation in the world. Henry Ford personified this industrialization. He pioneered it and, in so doing, left an incalculable heritage to his nation and to all mankind."

The film is soon to be available for group showings through Ford film libraries in Dearborn, New York City and Oakland, California. We hope to bring our readers a pictorial review of significant scenes in an early issue.

**A Word of Tribute to Forrest O. Calvin,
Believer and Builder of the Film Medium**

The city he loved and helped to promote through the film medium will sorely miss one of its favorite sons. Forrest O. Calvin, 57, founder and chairman of the board of Calvin Productions, Inc., suffered a fatal cerebral hemorrhage at St. Mary's hospital in Kansas City, Mo. on April 24. Although he had chosen to take a less active role in company affairs these past several years, his associates and thousands of friends within the industry cherish the friendship and counsel he so willingly gave.

"Cal" was born in Pleasanton, Kansas and was graduated from Kansas University in 1928. His studies in the field of advertising intrigued him with the potential of the film medium and he turned to this field soon after leaving school. In 1931 he formed the company which bears his name, aided by his wife, Betty, who served as his active partner throughout the years of steady growth.

Always an innovator and with intense faith in the future of the 16mm dimension, Forrest Calvin developed both procedures and special equipment to carry out the ideas and techniques which he believed the field needed. This included the design and building of the light-weight Movie Mite projector.

During World War II, the Calvin Company turned to film production for government agencies and "Cal" became one of the first consultants to the Navy's Photo Science Lab. (CONTINUED ON FOLLOWING PAGE FOURTEEN)

WHAT'S A MINI MONITOR ?

IS IT A . . .

- playback monitor for tape recorders (Stellavox, etc.)
- sound reader, used with synchronizer
- extra booth speaker
- field amplifier
- field sound reader
- sound editing monitor
- sound reader for 8mm magnetic

- public address amplifier
- field p.a. amplifier
- phono amplifier, hi & lo impedance
- remote speaker system
- amplifier to drive auxiliary 8" speaker
- CONVERTS YOUR OPTICAL ONLY MOVIOLO TO OPTICAL MAGNETIC IN 30 SECONDS

IT LOOKS LIKE THIS:

Height—2¾ inches
Width—4¼ inches
Depth—3¾ inches
Weight—11 oz.

Price
\$49⁵⁰

THE ANSWER IS YES!

And it has dozens of other uses, too!

F & B MINI MONITOR. A miniature, transistorized, battery-powered (standard 9 volt transistor radio battery) magnetic sound reader, complete with amplifier and speaker. A compact unit which will be the handiest gadget in the sound room, the editing room, projection booth, or on location.

Synchronizer Bracket & Magnetic Head Connector Cable **\$6.95**
Moviola Magnetic Head & Bracket **\$25.00**

(CONTINUED FROM PRECEDING PAGE TWELVE)
oratory, also producing series of films for the U. S. Office of Education. After wartime, his company shared in the rapid growth of the medium and the industry of which it was a part. Installation of the first Kodachrome duplicate processing facilities outside of Eastman Kodak was a milestone. Another was the concept of the Calvin Workshop, born in 1947 and a steady contributor to the multitudes of individual film makers who have attended its annual sessions at the Kansas City studio-laboratory.

In addition to hundreds of films produced for education and industry, Calvin Productions have given worldwide publicity to their founder's hometown. A member of Rotary International, the Round-the-World Club and SMPTE, "Cal" could look back, in these late years of retirement, to a company which employs nearly 200 persons and uses more than 18 million feet of 16mm film each year!

Our heartfelt sympathy goes to Betty Calvin and his two sons, Gary and Corby. But we also share their pride in the memory of a builder and a believer!

Distinguished Engineering Alumnus Award of University of Denver to Don Hyndman

★ Congratulations to assistant vice-president Don Hyndman, manager of Eastman Kodak's professional motion picture film dept. on the recent 1963 distinguished engineering alumnus award given this Kodak executive by the University of Denver. The award recognizes his contributions in the fields of science, engineering and research.

A citation describes Hyndman as "a tireless researcher, a devoted scientist and a dynamic administrator." It credits him with "exemplary achievements, not only those directly associated with his company's endeavors but also as a result of his diversified work in motion picture and television engineering." His many colleagues in the industry and especially those fellow members with whom he has worked these many years in the advancement of the Society of Motion Picture & Television Engineers join us in a fervent "amen!"

U. S. Film "This Union Cause" Wins Award at 4th International Labor Film Festival

— The United States shared award honors at the Fourth International Labor Film Festival held in Tel Aviv, Israel this year from May 5th through the 10th. The winning U. S. entry was *This Union Cause*, accorded top honors as the best trade union educational film. For the first time since ILFI (The International Labor Film Institute) came into existence, Afro-Asian countries sent observers to the screenings.

Of special interest is word from our correspondent, Peter Rigg, that the Institute is considering a plan submitted by the Auto Workers' president, Walter Reuther, for the production of films by the trade unions for the developing countries.

WASHINGTON FILM COMMENTARY

by Mary Finch Hoyt

Capital Correspondent for Business Screen

Defense Film on Preparation for Unconventional Warfare

... Guerrilla warfare — the increasingly familiar face of war in our time — is the subject of an important new Dept. of Defense film, titled *Unconventional Warfare — The Third Challenge*. This 45 min., 16mm color motion picture, designed for the armed forces, points out that we are hard at work training for the elusive, shadowy war of the Communist. And that it is now our responsibility to pass on these skills to the military forces of little countries in danger. Regaining the confidence of the villager is a must in this battle against the Reds. So we are teaching special force troops about medicine, communications (even how to build sunlight projectors) — all tools for winning friends.

It is interesting to note that this D.O.D. film emphasizes the versatility and cooperation of the four branches of the armed services. Additionally, the new unified Strike Command is explained. There is little doubt that, in the case of guerrilla warfare, all branch-

escent of the Huntley-Brinkley election set).

While this film has been produced basically for military personnel, a 28½ min. TV-length version has been cut which should intrigue civilians, for it is a definitive portrayal of the emergence of a new type of war — and a statement against everything for which communism stands.

* * *

Navy Appoints E. L. Randall to Film Post in Weapons' Bureau

... E. L. Randall has been named successor to Tom Cassidy, former Head of Training Film & Motion Picture Branch, Photographic Management Division, Bureau of Naval Weapons. Mr. Randall has been a motion picture project supervisor with the Navy since 1955 and has produced many films.

* * *

J. L. Oliver Assumes Golden's Post at Commerce Department

... James L. Oliver has succeeded Nathan D. Golden as Head of the Scientific, Photographic and Business Equipment Division of the Department of Commerce. Mr. Oliver was Director of the Business Equipment section under Mr. Golden for ten years.

* * *

Secretary McNamara's Report to People on Defense Program

... Secretary of Defense McNamara's annual report to the people has been filmed and is now available through the libraries of the Armed Forces. This 28 min. documentary of a troubled year has been titled *The Pentagon Report*. Following the general pattern of last year's *The Eagle's Talon*, this year's film dwells on counter-insurgency, cold war, Cuba, of course, and advancements in rocket technology.

* * *

National Cultural Center to Have Suitable Film Theatre?

... Through the efforts of U. S. Information Agency motion picture chief George Stevens, Jr., the film industry may yet get deserved recognition and a suitable theatre within the capital's National Cultural Center. Convincing evidence was given NCC Chairman Roger L. Stevens (no relation) that facilities in the Center's legitimate theatre were unsuitable for pro-

a new breed of warrior ...

es of the service are heavily involved.

Woven into the picture is a story line about a mythical country which is in the throes of a communist instigated "popular uprising." U.S. troops, thoroughly indoctrinated, take over and assist the military forces of the country in trouble. But before this happens, of course, we learn about the intricate procedures which the U.S. employs to produce the new, "unconventional," warriors.

Filed partially in Panama, and at Army, Air Force, Navy and Marine special forces locations, the picture incorporates some realistically bloody live-action, as well as question and answer techniques and film clips. The latter are smoothly slipped into the film on a three-panel screen device (remin-

jection. Plans are now said to call for a smaller 600-seat screening facility atop the Center and not affecting the Edward Stone design.

Film Explains Economic Role of Unemployment Insurance

... *The Power of a Pot Roast* is the intriguing title of a new film designed to dispel common misconceptions and myths about unemployment insurance. Its thesis: unemployment insurance is poured back into the mainstream of our economy. It is not charity.

With a story line bound to intrigue the general public, this 26 minute film tells about a highly skilled watchmaker who temporarily loses his job when his

Choin reaction from a pot roast ...

plant closes. He fails to apply for the insurance which is rightfully his, meanwhile seeking employment without success.

Actually, the film stresses, his community and his country are inadvertently affected by his failure to realize that these monies help in stabilizing the economy. The title of this film gives away its plot, for the chain reaction of buying one pot roast with unemployment insurance money,

NEWS FILM PRODUCER WANTED

Well established public relations and news service firm is looking for a man to take full charge of film and television activities. can, inoeeed, be felt all the way across the nation.

This 26½ minute film was produced in 16 and 35mm black and white by Henry Strauss & Company, Inc. for the Division of Employment, N. Y. State Dept. of Labor, in affiliation with the Bureau of Employment Security, U. S. Dept. of Labor. Bookings can be made through local State Unemployment Insurance agencies. Civic groups, business groups, schools and PTA's will be interested in this new approach to a controversial issue.

First "Producer's Showcase" Offered by D. C. Film Council

... The first "Producer's Showcase," an evening of films sponsored by the Washington Film Council, featured local producers Nick Read of Potomac Films, Inc. and Stuart Finley of Stuart Finley Productions, Inc. First in a series of three, the evening screenings afforded an opportunity for producer and audience to discuss techniques and answer questions.

Four films were screened, including *Headed for Trouble* & *The Green City*, both reviewed elsewhere in these pages. In addition, Finley previewed his *City in Trouble*, a film about urban renewal in Washington which is truly an artistic coup — Nick Read's enchanting *Big Day in Bogo*, a UNICEF film called "a modern fable from Africa" brought cheers for its simplicity and Bogo-land dialogue which included lines like these: "Someone spoiled this motor" and "Oh brother, what a lot of merrymaking."

Other Washington producers to exhibit films will be Norwood Studios, Inc., National Film Studios, Inc., Washington Video Production, Inc., and Creative Arts.

Scatter Radar Techniques in Space Research Are Explained

... *Scatter Radar: Space Research from the ground* has been released by the National Bureau of Standards in Washington. The 23-minute color film was lensed by members of the Bureau's Lima, Peru staff against the background of the awesome Andes. It tells how the Jicamarca Valley was chosen as the site for an observatory where scatter radar techniques are being employed to study the upper atmosphere and outer space, via ground observation.

Details of present-day Peruvian life are threaded into a story which shows how high-frequency radio waves are sent beyond the iono-

* * *

... In one of the nicest surprises in recent months, the Air Force has "adopted" a new North American Aviation, Inc. film called, pleasantly, *The Quickest Draw in the West*. This fast, clever film, which starts out to be an apparently delightful travelogue, turns out to be a real lively yarn about the big sheriff in the sky — the Strategic Air Command's B-52 bomber.

This B-52 sheriff, the big guy here, has the deadliest guns you ever saw. His Hounddog can knock the eye out of a squirrel at 500 miles. And he doesn't have a notch on his gun.

Is there some reason why more films of this calibre about military subjects are not made for the general public? Surely, this is a fine way to interest the taxpayer in weapons systems.

And what a good way to double the use of the thousands of feet of film shot by contractors for

43 DISTRIBUTION LIBRARIES SERVING THE NATION

A VISITOR DRIVING by the chaos of construction that is now the Long Island Expressway viewpoint of the New York World's Fair could hardly believe that here — in less than ten month's time — will open what seems certain to be the greatest Fair in history.

Robert Moses, president of the Fair, speaks of the irritating delays in roadway construction, and points out that foreign nations cannot be ordered about or unduly pressured in implementing their commitments, but he is confident that all will wind up ready to go on the big day — April 22, 1964.

Those who have watched Moses on the move in the past will have no doubt his predictions will come true.

Many Exhibitors to Use Films

As more plans are revealed of the visual presentation aspects of the Fair, it is evident that a large proportion of exhibitors will use films in one way or another — either as major attractions in large theatres, or as "in-the-wall" traffic stoppers within many other exhibits.

Among the International Exhibitors, Italy has just announced a Circarama theatre which will show an exciting film of a tour through

NEW YORK WORLD'S FAIR REPORT

Eastman Kodak's N. Y. Fair pavilion is under construction (foreground). It has two theatres; is topped by 80-foot tower of giant color photos.

that country. The theatre will also be the central theme for an area devoted to exhibits of travel and industry.

Hong Kong expects to make extensive use of sound to simulate the real atmosphere of that exotic island colony.

Recent increased schedules of press conferences, ground-breakings and other events show that ex-

citing plans are underfoot in the Industrial Area.

Theatres for IBM, Johnson Wax

A raised oval theatre will be the main feature of the IBM Pavilion. The audience will be elevated into the 80 foot high theatre to view entertaining explanations of complex computer problem-solving techniques. Surrounding exhibits will be located in a covered gar-

den. Charles Eames is the designer on this project.

A suspended theatre will be the major part of the Johnson's Wax Pavilion. Seating 600, the theatre appears like a large gold lozenge and will be entered from beneath.

A wedge-shaped building will house the Hall of Education, in which industrial exhibits, contemporary educational materials and concepts of tomorrow will be on display. Ground was broken this year. Great minds and personalities will participate in *Dialogues in Depth*, a unique audio-visual program of discussions. They will be taped and preserved for future generations. Exhibitors in the Hall of Education include U. S. Industries, Inc., New York Daily News, National Catholic Educational Association and the Willkie Foundation.

Within the Bell System's floating wing will be an armchair ride in which the audience will see and hear an original presentation of human communications from early speech through global and space transmission, and describing the Bell System's activities in improving man's capabilities in communications.

displays by duPont will explain the company's newest contributions to our health, progress and economy and contributions made by chemistry to man's basic needs.

The most complete and colorful exhibit ever assembled to display photography's impact on our lives is promised in the Eastman Kodak Pavilion. Towering over the two-level exhibit will be the world's largest color photographs, specially illuminated for day and night viewing.

State Exhibits Have Theatres

Among the states exhibiting at the Fair, Maryland will have a 130-seat theatre which will be the scene of a dramatic presentation of the Battle of Fort McHenry and the writing of *The Star Spangled Banner*. New Jersey will also have a central theatre tying together the various elements of its exhibit, and New York expects to have a circular theatre with a panoramic motion picture of the state.

In the Protestant Center Pavilion will be a 372-seat theatre to house a specially-produced film which will later be made available to Protestant groups all across the country. Two other Protestant groups, the Church of Jesus Christ of Latter-Day Saints and the Billy Graham Evangelical Association will also feature theatres as important parts of their exhibit. □

Port Authority Plans Film

The New York Port Authority has already announced plans for an impressive circular film theatre in which a color film, produced by the Fred Niles Communication Centers is to be a key visitor feature. □

* * *

Third in Series of New York Fair Report Films Being Shot

The third in a series of filmed progress reports on the New York World's Fair is now in preparation by John Campbell Films. Lowell Thomas has been signed as narrator-host.

Wearing his familiar western hat, Thomas is seen on a tour of the upcoming Fair, describing exhibits, models and highways being constructed for the expected 70 million visitors.

Preview III has been preceded by two other pictures about the Fair. The first, filmed in 1961, featured H. V. Kaltenborn as narrator. A current film, with Bob Considine on the sound track, is being distributed by Association Films. Twelve million viewers are said to have seen it thus far. □

torn film?

It threads itself!

no other 16mm
sound projector does

our sound films! (automatic threading is the cure).

The Specialist AUTOLOAD Filmosound projector automatically prevents the distractions that reduce the effectiveness of training or public relations films. Consider: *Finger fumbling?* Embarrassing delays in threading? You may lose your audience before the show starts. But it can't happen with an AUTOLOAD. This one threads itself. No wasted time, no wasted motion. *Film flutter?* Lose a loop? Until now you had to stop the show when this happened. But the AUTOLOAD has automatic loop and system restorers that save time and embarrassment. *Off-key sound?* Film slack around the sound head? Automatic threading is accurate and precise, maintains proper tension. *Torn film?* Not likely with an AUTOLOAD, because film is never handled (or mishandled by someone in your organization who is inexperienced.) Films last longer, budgets stretch farther. The AUTOLOAD is also 20% lighter, 34% brighter than ordinary sound projectors... so it offers amazing new versatility to the way you can make use of films. Ask for a demonstration now.

BELL & HOWELL Dept. BS-1
7140 Midway Rd., Chicago 45, Ill.

Robert D. Mitchell Is Elected President of Association Films

☆ Association Films, Inc., one of the major distributors of film to 16mm audience groups, television and theatres, has a new president: Robert D. Mitchell, recently vice-president in charge of operations for the company. J. R. Bingham, who had been president for many years, becomes vice-chairman of the company's board and treasurer.

Other changes in management assignments saw A. L. Fredrick, a veteran of over 40 years with the company, becoming vice-president and mid-western representative; Robert M. Finehout, continuing as vice-president for corporate advertising and public relations; and Robert W. Bucher as vice-president in charge of Association Instructional Materials.

Mitchell was formerly manager of employee relations of the Okonite Company, a division of Ken-

AF president Bob Mitchell

necott Copper Corp., and developed a thorough knowledge of film use in this position. He joined AF in 1958, and was made a vice-president in 1960.

AF's new chief executive lives in Hasbrouck Heights, N. J., and has long been active in community affairs, education and youth activities. He is Commissioner of Finance of the Borough Council and formerly was president of the Board of Education. Mitchell has a Master of Science degree in Business Administration from Columbia University's Graduate School of Business. He is married to the former Dorothy Fredrick of Hasbrouck Heights. They have three children.

J. R. Bingham, now vice-chairman and treasurer of Association Films, joined the company in 1944 as director of the YMCA Motion (CONTINUED ON PAGE 63)

BUSINESS SCREEN INTERNATIONAL

NORWAY has a new national audio-visual organization, formed under the leadership of Mrs. Igma Millar, our correspondent (Kjell Austad) reports. The group was formed following a recent a-v seminar sponsored by the Oslo Sales and Advertising Association and the Norwegian Productivity Council. It plans monthly meetings featuring discussions led by specialists in the a-v and business community. The first Norwegian A-V Handbook, containing details on equipment, etc. is an early project of the group, now in production.

Ireland Has an Animation Studio in Dublin; Schools Report 250% Increase in Film Use

Eire's first animation studio, we're told, has been set up by Eise Toonder in Dublin. Son of the famed Dutch cartoonist, Marten Toonder, Eise's company has been named Toonder Films (Ireland) Ltd.

Although Ireland's schools booked 250% more motion pictures in 1962 than they did in 1957, J. J. Jennings, chairman of the National Film Institute of Ireland notes with regret that his country's schools are "giving only partial recognition to media which have proven to be the most effective teaching aids yet devised by man." The Institute reported the booking of 12,005 reels by Eire's schools last year.

**As Reported by Robinson P. Rigg
European Editor of Business Screen**

Distribution Analysis of Prize BP Film Shows Wide Use by Schools, Youth Groups

Sponsors interested in the use of business films in Britain should take note of the breakdown of non-theatrical distribution of the British Petroleum's prize film *Giuseppina*, a charming narrative about roadside life in Italy.

Principal groups requesting the film were: high schools, 15.5%; other schools, 29.84%; youth organizations, 5.16%; commercial and industrial companies, 6.45%; city authorities and government departments, 7.85%; primary schools, 3.22%; colleges, technical schools, professional societies, 8.97%; Low on the list were political organisations, .23% and local business groups, .12%.

Survey of 8mm Sound Films Being Made by 20 Users in Britain, Association Reports

The British Industrial Film Association reports that more than 20 films and groups in Britain are surveying the use of 8mm sound films. Among them are Ford (a selection of the company's factual films are already available in 8mm sound versions); British Motor Corporation (using 8mm sound to demonstrate

a new car model on the U. S. market); the General Dental Council (with an 8mm sound film to show children dental care in exhibition booth showings); and the Stanley Works (demonstrating hand tools via 8mm sound).

This pilot programme seeks to answer questions as to wear, effect on magnetic track, problems of inspection, cleaning, etc. Desk top 8mm sound projectors available in Britain include the Fairchild, Vicom's Vicaudio and, of course, the MPO Videotronic "8" among the U. S. models.

"This Week in Britain" a Four-Minute Reel Has 40 Million Viewers on Five Continents

Charles Beauclerk, Director of the Television and Newsreels Division of Britain's Central Office of Information told B S that over 40 million people on five continents watch *This Week in Britain*, the Division's four-minute news report on events, developments and life in Britain. Over 200 editions of the program have been released since its inception in 1959.

Noting that the reel gains 7,000 viewing hours on the world's screens, Beauclerk said that some eighty suitable episodes had to be found each month. Consequently good industrial and commercial footage, suitable for the

Revolutionary projector sells your product anywhere. In sound and color. In broad daylight. Sets up in 10 seconds—and repeats automatically. Let us demonstrate:

Technically, the Fairchild 400 is an 8mm rear screen sound movie projector. It works more like a TV set, except you don't have to fuss with the focus.

The Fairchild weighs less than a portable typewriter and takes up less than 2 sq. ft.—wide open.

It shows up to 20 minutes' worth of color sound film. Requires no warm-up. Takes just 10 seconds to set up, plug in and turn on. *On is when it counts.*

You can demonstrate snow removal in July, a turbo-prop on a desktop or review a year's research in a minute. Take your customer on a field trip, a test run, or a tour of the plant. Right where he signs the orders.

When the commercial's over, the Fairchild's ready to repeat, automatically, up to 3000 times per print.

As we said, the Fairchild is an 8mm machine—the most reliable and modern ever made—but any 16mm or 35mm film can be quickly and easily reduced to 8, sound and all.

Thousands of Fairchild 400s have gone into use in the first 12 months. They're helping salesmen multiply sales of

automobiles, building materials, tractors, staplers, bowling alleys and brassieres. They're converting par salesmen into crackerjacks. Demonstrating product advantages everywhere. Concisely. Dramatically. If you have a product the Fairchild might help, clip the coupon. We'll rush one over and plug it in.

Multi-Lingual Educational Television Net to Serve Schools in Rhodesia, Nyasaland

☆ In June 1963 Rhodesia and Nyasaland in East Africa will have its own educational television network and the studio will contain the first 16mm kinescope recorder to be used south of the Sahara Desert.

The basis of the Schools Educational Television programmes in the Federation is multi-racial, and the problem of supplying material in the many native languages was insurmountable. In the case of higher education, English will be used; but at the primary school level programmes will be transmitted in nine languages.

Recently Mr. H. C. Butler, Director of Schools Audio-Visual and Television Services, visited Europe to recruit staff and obtain material for his TV programme.

He visited with BUSINESS SCREEN and told us that sponsored informational material could play a big part in school and higher education in Africa and he would be grateful for advice and assistance from industry's A-V specialists.

Mr. Butler may be reached c/o Federal Ministry of Education, Salisbury, Federation of Rhodesia and Nyasaland, Africa.

Britain's World Wide Pictures Enters the Italian Field With New Studio in Milan

An Anglo Italian film venture has been launched by producer Jimmy Carr, president of Britain's World Wide Pictures, who recently formed an operating company in Milan, Italy. Says Jimmy, "Italy is famous for film

making and Milan is the center of Italian business and industry."

The new company is headed by Jo Varley, active in the Italian film and television fields the past five years. It is called World Wide Srl and will be self-contained, making extensive use of local facilities.

Castle Films Contracts for Sales Rights on Films of 1964 New York World's Fair

☆ The New York World's Fair may be having its difficulties in this always-rugged construction phase on the Flushing Meadows (see page 20) but audio-visual coverage is certainly assured. Latest to sign up is Castle Films, the United World subsidiary, who have obtained the rights to 8mm and 16mm films of the fair, destined for sale through this com-

United World president Jim Franey (left) signs Fair film contract for Stuart Constable (right) as U.W. vice-president Murray Goodman looks on.

pany's worldwide distribution outlets. Stuart Constable, vice-president of operations for the World's Fair Corporation, signed the pact with United World president James Franey and Murray Goodman, in charge of Castle Films' operations.

John Campbell Films (see page 22) is the licensed producer of all motion pictures taken at the Fair and can supply footage (at a price) to exhibitors. Hearst Metrotone News, Inc. has the contract for all commercial news film; United Press International is licensed for all commercial still photography. There's still a question about the use of Fair footage in industrial films after the Fair is open. Such material would publicize the big show widely. It's sure, however, that any motion picture work on the Fair grounds will have to be handled by fully union crews, supplied by organized companies or by New York locals.

View of Madrid's handsome skyline: the Calle y Puerta de Alcalá

Make a Date to Visit Madrid in October Site of the Fourth International Industrial Film Festival

THE FOURTH INTERNATIONAL Industrial Film Festival, being held in Madrid, Spain in mid-October, is taking form. The appointment of Javier de la Cueva, head of the International Organizations Department, Servicio de Relaciones Exteriores Sindicatos, as secretary general of the organizing committee for the Festival has been announced.

Spain was recently called the next "miracle country," and progress being made is rapidly confirming that premise. Industrial production in 1962 was up 6.5 percent. The production rise was led by the chemical industry (up 11.5 percent); construction increased by 7.7 per cent; iron and steel output by 7.5 percent. Net capital inflow from foreign capital was \$94 million last year with some 40 percent of these funds coming from the U. S.

The unshackling of 70 percent of Spain's total trade has helped in the recovery. An excellent banking system contributes to the coun-

try's new-found prosperity, backed by reforms that increase the flow of credit.

The Festival, which will bring top management executives from all over Europe and the U. S. to Madrid, will be held in a city as beautiful as it is historic. High above sea level, climate is ideal.

Running through the center of the city is the Avenida Jose Antonio, the Spaniards' Gran Via. An ideal starting place for tours is the Plaza Mayor, dating from the 17th century. From here one proceeds to the Toledo bridge and to the Palacio Real, the former royal residence. Farther on is the vast modern campus of Ciudad Universidad. Not to be missed is the vast Prado Museum with the greatest single collections of Goya and Velasquez paintings.

In the evening Madrid offers exciting night life after the customary late dinner. A variety of folk-dance spots and stage musicals plus a lively opera season may be topped off by a visit to a club. ☐

IN POLITICS"

A 3-hour seminar of political instruction, of which 2½ hours is film.

The opening and closing films ("HOW TO STAND UP AND NOT BE COUNTED . . . AND BE COUNTED ON") are cinematically novel. The voice is contemporized Pete Smith — music is not "scoring", but a musical commentary. Most striking is the visual setting, in a new technique called "Ambient Limbo" — realism within impressionism against infinity. That is, the foreground is realistic, though styled, and the people are played for naturalism and conviction . . . but the walls are composed of impressionistic shapes, and the background is infinity limbo, painted with colored light. The effect is very bright, "truer than truth", utterly sharp and contemporary.

Sponsor: American Medical Political Action Committee (AMPAC) "STAND UP" opening/closing: 27 & 12 min. 16mm. EK Color. No Public Release.

ARRIFLEX at work — ONE OF A SERIES *

A pioneering step toward global communication was made by Bell scientists! An actual picture was transmitted, from the Bell Telephone Laboratories' tracking station in Holmdel, New Jersey—to the Echo I satellite in space—to the Jodrell Bank antenna in Manchester, England. The Arriflex 16 was actually mounted on the frame of the radar dish. A cross-hair reticle super-imposed on the satellite picture verified the accuracy of radar positioning. • Arriflex is proud to have contributed to these advanced experiments in world communication. In Project Echo (involving a man-made satellite) and in the Moonbounce tests with a

ARRIFLEX® tracks satellites for Bell Laboratories

natural "sky mirror"—co-axially mounted Arriflex cameras dramatically documented correlation of radar tracking, compilation of azimuth and elevation of the radar dish, satellite position, and the elapsed time of the tracking period. • Why Arriflex? Because of its precise registration-pin movement, advanced mirror reflex shutter system, and extreme versatility—and because all

this is packaged in the most compactly designed professional camera. As always, Arriflex has done the job better, faster, more economically. On location, in the plant, in the laboratory, or in the studio—it can do the same for you!

From the microscope to the missile range... from spot locations to sound stages... Arriflex professional motion picture cameras are the dominant choice of filmmakers in science, industry, and entertainment. They're lightweight, rugged, tremendously versatile — uniquely suited to a range of applications virtually without limits. Here are some of the features that give Arriflex cameras their remarkable capabilities:

- MIRROR-SHUTTER REFLEX VIEWFINDER • REGISTRATION-PIN FILM MOVEMENT • 21° DIVERGENCE 3-LENS TURRET • CONTOUR HAND GRIP • FRAMES-PER-SECOND TACHOMETER • COMPLETE ACCESSORY SYSTEM... lenses, standard and special-purpose electric drives, power supplies, time-lapse equipment, film magazines, sound blimps, tripods.

Award Plaques to Year's Best Safety Pictures

Highest Award to 11 Subjects; 10 Others Share Merit Awards for Occupational, Traffic, Home, General Safety in 20th Annual Contest of National Committee on Films for Safety

ELEVEN BRONZE PLAQUES will be inscribed with the names of winners of the 20th Annual Safety Film Contest and presented to the sponsors and producers of the outstanding safety films of 1962 by the National Committee on Films for Safety. Ten other films were voted the awards of merit by this distinguished group of leaders of national safety, traffic and related organizations. The awards will be made this fall at a general assembly of the National Safety Congress, meeting in Chicago.

The awards are made annually in recognition of outstanding new motion pictures, sound filmstrips and television commercials on occupational, traffic and transportation, general and home safety themes. There were 86 entries, a record number, in this year's competition.

Committee's Chairman is Henry G. Lamb

The National Committee represents 52 national organizations and seeks through this program to improve the public knowledge of safety through visual media. Committee chairman is Henry G. Lamb, director of technical services, American Standards Association. William Englander, director of films and posters for the National Safety Council, is secretary of the group.

Before a final group of awards candidates are screened by the full committee, experts in the specific fields involved review all entries for authenticity and accuracy in the safety areas they represent. Two plaque awards went to Charles Cahill & Associates this year in the field of traffic and transportation safety.

Bronze Plaque Award to "Warning Bell"

Another outstanding winner, in the general film category, was *The Warning Bell*, sponsored by Nationwide Insurance, and now being widely acquired by companies and safety groups throughout the country through a special educational kit which they may purchase outright. Wilding, Inc. is the producer and the source of *Warning Bell* program material.

The AAA Foundation for Traffic Safety continued its aid to driver education in high schools through the plaque-winning production of *Stay Alive*, produced by Calvin Productions, Inc.

Only one sound filmstrip received top award honors this year. The plaque winner was *Here Today . . . and Here Tomorrow*, stressing safeguards for linemen working with high voltages. Bay State Film Productions, Inc. was the producer for the Edison Electric Institute.

Another very important area was served by *Are You Sure?* produced by Depicto Films Corporation for the National Board of Fire Underwriters. This film provides industrial employee audiences with understanding of the individual's responsibility in fire prevention. *Are You Sure?* consists of dramatizations of five examples of irresponsibility; in each case, the individual suffers the consequences of a serious fire at the place where he works.

Awards of Merit Go to These Pictures

Award of merit winners included: *Analysis of a Bulk Plant Fire*, produced for the American Petroleum Institute by Wilding, Inc., and, in the same occupational safety group, *Safe Handling of Light Ends*, produced for the du Pont Petroleum Chemicals Division by John Sutherland Productions, Inc.

Right From the Start shared merit award honors in the traffic and transportation film group. It was produced for the Ontario (Canada) Department of Transport, Highway Safety Branch, by Chetwynd Films Limited. *Seat Belts Your Life Insurance*, produced for the Deputy Inspector General, U. S. Air Force by the 1365 Photo Squadron, Orlando, Fla. and *Stop, Look and Think*, produced by Charles Cahill & Associates were the other merit winners in this class.

Another Calvin Production also won an award of merit in traffic and transportation as *The Safest Way* was accorded that honor. The sponsor was the AAA Foundation for Traffic Safety.

Fun 'N Fathoms also brought the Aetna Life Affiliated Companies a merit award in the general safety group and *Safety With Animals* won the same honor for Grover-Jennings Productions, Inc. Another general safety merit award winner was *Midsummer's Nightmare*, produced for the U. S. Public Health Service (in cooperation with the American National Red Cross) by VPI Productions.

Congressman and Mrs. Horace Kornegay (Dem.-N.C.) get popcorn treat from Bill Terrell, field supervisor of Amoco public relations.

Amoco Hosts Previews in Washington

"Happy Holidays Along the Potomac" Are Shared With Members of Congress, Editors and Leaders in Trade

The American Oil Company is taking film viewers on a *Happy Holiday Along the Potomac* later this year as a new 28-minute color film by that title is released. Parthenon Pictures is the producer.

First pre-release showings were held last month in Washington, D. C. Luncheon showing for members of the capital's Convention and Visitors Bureau was followed by evening previews at the Congressional Hotel and the National Democratic Club. 275 members of the Senate and House were in the audiences with their wives and staff people.

A fourth show concluded these successful openings as editors, government agency executives and business leaders saw this "different" picture of their home town with a new perspective seldom he-

Congressman Fred Schwengel (R-Iowa) is at left of Miss Sylvia Salata of his staff during chat with producer Cap Palmer.

fore given this often-lensed tourist mecca.

American Oil's public relations people, especially Judge Hardy and Bill Terrell are to be commended on the picture and their handling of these preview events.

Below (l to r) Harry Swanson, Eastern Area public relations mgr., Am. Oil.; Congressman William St. Onge (D-Conn.); Dan Kater of Modern's Chicago office; Congressman Bernard Grabowski (D-Conn.) chat over projector at capital preview of Amoco's film.

Views to Enlighten the Future of Films

Where Are the Great Films Which Industry Can Sponsor?

Are the social forces that will eventually determine industry's freedom and progress beyond the scope of its public relations and educational efforts? Does industry only react to violent challenges such as those days of post-war union attack on "big business?" Or can men of vision in the high echelons of management do something about the many areas of potential sponsorship for which the latent power of these sight, sound media are so patently useful?

Too many current films are putting out "brush-fires" of human problems. Some are reflected in this issue. But where are the stirring pictures of the last decade, films which drew out emotional as well as thoughtful responses from the millions who eagerly await their creation? Will we see the equal of *Miracle in Paradise Valley*, that powerful safety message; or that good labor picture, *With These Hands*?

The "accountants" have done a great job of maintaining financial stability of business and in government. Now let them heed the admonition of Pope Pius who called such films "that great pathway into your hearts and minds!"

* * *

List of "Top Ten" Pictures: How to Equate "Viewership"

Don't overlook those two lists of the "Top Ten" films of 1962 which were reported in a recent issue of MODERN MIMOS, the newsletter of Modern Talking Picture Service, Inc. This national (and international, in fact) distributor of sponsored films has equated the immense viewership of these films in television and among community audiences. *Viewership*, according to Modern, is the sum of a number of parts: production quality, subject matter, title appeal and the number of prints in circulation.

All of the films on these two lists were produced by competent professionals and many of them are award-winners. *Project Hope*, for instance, won the Academy Award for the best short documentary of 1961.

All of the pictures are popular with viewers and some of them have appeared on this list for years. Procter & Gamble's *Scrub Game* has been showing youngsters the importance of cleanliness for the past 17 years; had to be re-made

several years ago to bring clothing styles and settings up-to-date.

Union Carbide's *The Petrified River* (MPO) deals with the peaceful applications of atomic energy and has been on the "Ten Best" television list for the past eight years, has had two network showings and probably will continue as popular TV fare for the balance of its useful life.

* * *

Non-Fiction's "Best Sellers" Are Source of Useful Films

Why don't more sponsors and producers go the non-fiction shelves of their nearest library or bookstore and check out the "most popular" current titles for possible factual film themes? Worldwide readership of some of these books would indicate a tremendous audience potential that long ago was being harvested by the entertainment film makers and on the legitimate stage as it drew from the fictional "best sellers."

We're thinking about a column of potential "film books" for these pages and a few hours of pleasant reading has convinced us that their is gold in those pages . . . that can be shared at economical cost by writers and publishers, both of whom are aware that film versions can only increase the sale of their volumes in subsequent months.

* * *

How to Preview and Promote That Valuable New Picture

The adjoining columns spotlight another sponsor opportunity: the opening preview event held at an important and appropriate site. Sometimes the plant show is sufficient; other films won't merit this kind of unveiling. But when you sponsor and produce a "natural" like Amoco's *Happy Holidays Along the Potomac*, what better place to preview it than Washington, D. C.?

Dividends in important audience attendance were implemented by plentiful news publicity, which Amoco's showings received. The good sponsored film is a property of value and it should be so recognized and capitalized upon. Give you any ideas?

* * *

I.A.V.A. to Meet in Rochester

The Industrial Film Association has voted to hold its annual fall meeting this year in Rochester, New York. That city was first choice of a large majority of members of this society of audio-visual executives within principal U. S. companies, coast-to-coast.

Sears-Roebuck's Frank Collier (at left) received American Film Festival Blue Ribbon award from Julian Bryan at recent ceremony.

Leslie Schoenfeld (Radiant Films) receives Blue Ribbon from John Flory (Eastman Kodak) at American Film Festival awards program

Educational Film Library Association Holds Fifth Annual American Film Festival

53 Motion Pictures and Filmstrips Share Blue Ribbon Awards

BLUE RIBBON AWARDS were presented to 33 motion pictures and 20 filmstrips at the American Film Festival held at the Biltmore Hotel in New York, on May 1st through 4th.

The awards and screenings of 105 outstanding films selected from an original entry list of 656 were the principal attractions of the Fifth Annual Festival, held under the auspices of the Educational Film Library Association. About 50 registrants attended the sessions and an overflow crowd of 100 was at the banquet at which time the winners were announced.

Address by Dr. Samuel Gould

Speakers at various luncheons and seminars held in conjunction with the film judging events included Dr. Samuel B. Gould, controversial head of New York's educational-cultural television station, WNDT; Nicholas Read, of Potomac Films; Tom Daly, of the National Film Board of Canada; and independent producers Hilary Harris and Nicholas Webster.

Of the 33 motion picture and 20 filmstrip award winners, 23 were produced for industrial concerns, trade associations and government bureaus.

Winning Sponsors Are Listed

Among these were the Water Resources Association, NASA, the Association of State Universities and Land-Grant Colleges, the New York State Employment Service in affiliation with the Bureau of Employment Security of the U.S. Department of Labor, Manufacturing Chemists Association, Sears Roebuck and Company, Bethlehem Steel Company, Bank of America, British Petroleum Company, Karolien Envelope Company, The Louisiana Association for Mental Health, Baxter Laboratories, Pure Oil Company, Catalina, Inc., Ral-

ston Purina Company, RCA Service Company and Illinois Bell Telephone Company.

Awards at the banquet were presented by L. C. Larsen, dean and director of the Indiana University Audio-Visual Center, Julien H. Bryan, director of the International Film Foundation, John H. Flory, chairman of the Committee on Non-Theatrical Events, and Dorothy Oshlag, director of Columbia University's Center of Mass Communications.

The Blue Ribbon winners of the Festival will now go out on "road-show" screenings to various film societies and educational television stations across the country.

Blue Ribbon award winners are as follows:

Category: Agriculture,
Conservation and Natural Resources

"Marshland Is Not Wasteland"

Roy Wilcox Productions, Inc.

Filmstrip: "Compact With Nature"

Training Films, Inc.

for the Water Resources Association

Category: Citizenship, Government,
City Planning, Int'l Relations

"The Cars in Your Life"

National Film Board of Canada

Classroom Films: Lower Grades

"Christopher Columbus"

Churchill Films

Filmstrip: "Cows Don't Say Moo"

William P. Gottlieb Company

Category: Current Events

"Friendship Seven"

General Dynamics Astronautics
(Nat'l Aeronautics & Space Adm.)

Category: Economics

"Mr. Europe and the Common Market"

CBS (News) Reports

Education and

Child Development

"Next Year Is Now"

Jurors Who Selected Blue Ribbon Finalists

A sizeable number of school and college people helped to select films for the American Film Festival from among the 656 entries. Here are representative samplings of these jurors:

Category Number 1

Agriculture, Conservation and

Natural Resources

Chairman: John C. Gibbs, Director, Audio-Visual Programs, The Conservation Foundation, New York City

Jurors: Conservation Foundation staff; S. H. Ordway, President, George Brewer, Vice-President, Stephen Blodgett, Secretary; Noel D. Eichhorn, John Milton, Martha Munzer, Associates; Madelyn Pickens, Audio-Visual Assistant, Hannah Williams, Teacher, Riverdale Outdoor Laboratories.

Category Number 2

Citizenship, Government, City

Planning and International Relations

Chairman: Enoch J. Peltier, Chief, Audio-Visual Dept., Boston Public Library, Boston, Mass.

Jurors: Boston University: Robert Steele, Professor of Motion Pictures and Communications Arts, School of Public Relations and Communications, Eugene B. Stevis, Frederic Underhill, Cinema students; Gaylen B. Kelley, Assistant Professor of Education; Boston Public Library: Kathleen B. Hegarty, Deputy Supervisor of Work with Adults, Veronica T. Yotts, Audio-Visual Librarian; James A. Boudreau, Director of Library, Bentley College; Peg Clark, Film Publicist, Paul Levi Associates; Russell Connor, Television Lecturer, Boston Museum of Fine Arts; Gaspar Jako, Executive Director, International Institute of Greater Lawrence (Children's Cinema Inc.); Tilak R. Khanna, Assistant Librarian, Audio-Visual Dept., Simmons College.

Category Number 4

Current Events

Chairman: Dorothy N. Lynch, New Rochelle Public Library, New Rochelle, New York

Jurors: Patricia M. Appel, Larchmont-Mamaroneck Motion Picture Council; Brandt Enos, Elizabeth Enos, Brand Enos Associates; Natalia L. Goodman, New Rochelle Adult Education Program; Louis S. Goodman, Teleregister Corp.; Rose Hoffman, New Rochelle Board of Education; Muriel Horowitz; Mrs. L. Lewis, County Congress of Parents & Teachers; John F. Ryan, New Rochelle Public Library; Harold Sokolsky, Boy Scouts of America

Category Number 5

Economics

Chairman: Sidney Pleskin, Professor, Yeshiva University, A-V Center and Film Library, New York City.

Jurors: Dr. Edward Altman, Instructor in Accounting, Richard King, Supervisor, A-V Center, Hunter College; Elaine Neuburger, Film Librarian, Yeshiva University Film Library; Dr. Lester Weinberger, Supervisor, A-V Center, C. C. Baruch School.

Category Number 8

Guidance, Personal

and Vocational

Chairman: Herman London, Audio-Visual Coordinator, Hunter College, A-V Center, New York City.

Jurors: Hunter College Staff: John P. Caban, Deputy Coordinator, Maxine Herell, Supervisor, A-V Equipment Operations Lab, Conrad Evangelista, Film

Scheduling Assistant, Rose Gifford, Margaret Taylor, Projectionists, A-V Center; Dr. Gerald Lesser, Teacher and Research Psychologist, Dr. Margareta Altheim, Dr. Phillip Freedman, Dr. Kathern M. McKennon, Teachers, Education Department; Dr. Patricia L. Jackson, Faculty Member, Reeva Salim, Psychologist, Guidance Clinic; Dr. Bernard Katz, Dr. Arnold Buckheimer, Guidance Clinic and Counseling Research Project, Gerald Sircus, Julia Tu Wu, Research Assistants; Dr. Wilson W. Woodcock, Professor, Physics Department; Sheila Elbach, Audiologist, Speech and Hearing Center; Charlotte B. Fox, Harriet Schueler, Instructors and Guidance Counselors, Hunter College High School; Dr. Marguerite C. Holmes, Head, Nursing Education Program, Sister Mary Aloisianne, Lydia Diaz, Joan Herman, Edith Schwartz, Waleria Wysolowski, Graduate Students, Graduate Nursing Program; Celia M. Anderson, Vera Falconer, A-V Consultants, EFLA; Esther Chevien, A-V Consultant; Mortimer Goldberg, Film Editor, Bureau of A-V Instruction, Board of Education.

Category Number 10

Home Economics

Chairman: Kathryn L. Carlin, Supervisor of Audio-Visual Materials, Dade County Public Schools, Miami, Florida.

Jurors: Dade County Public Schools: Martha Lee Henderson, Coordinator of Home Economics Education, Mildred Callahan, Ada Crabtree, Margaret Hogsett, Home Economics Teachers; Carol Ann Fiesler, Home Economist, Florida Power & Light Co.

Category Number 14

Social Documentary

Chairman: Violet F. Myer, Head, Films Department, Enoch Pratt Free Library, Baltimore, Md.

Jurors: Enoch Pratt Free Library: Edwin Castagna, Director, Margaret H. Commiskey, Administrative Assistant, Films Dept., Eve Davis, Head, Civics and Sociology Dept., Dorothy Sinclair, Coordinator, Adult Services, Lyn Hart, Asst. to Coordinator; Irene Diegs, Professor of Sociology, Morgan State College; Goucher College: Lincoln F. Johnson, Jr., Associate Professor, Fine Arts Dept., Mickey Gibson, Anthropology Instructor.

Category Number 15

Sports, Recreation, Physical Education

Chairman: Donald W. Smith, Director, Audio-Visual Dept., Kansas City Public Schools, Kansas City, Missouri

Jurors: Kansas City Public Schools: Lawrence Bates, Supervisor of Physical Education, Wayne W. Breeze, Audio-Visual Specialist, Bernard Greene, Director of Work-Study Program, Andy Nurski, Director of Athletics, Gordon Wesner, Director of Curriculum; Bertha Northern, Film Librarian, Kansas City, Missouri, Public Library.

Category Number 17

Graphic Arts and Architecture

Chairman: Charlotte A. Shatkin, Adult Services Librarian, Free Public Library of East Orange, East Orange, N. J.

Jurors: C. Ross Carter, Assistant Director, Plainfield Public Library; Henry Charles, Director & Producer, Henry Charles Studios, Edison, N. J.; John L. Dorothy, Vice President, Lewis Studios, (LIST CONTINUES ON PAGE SIXTY-ONE)

56 "Clios" to Year's Best TV Commercials

Winners Receive Statuettes from Advertising Executives
at the Fourth Annual American TV Commercials Festival

FIFTY-SIX "CLIOS", the newly-named golden statuette awards of the American TV Commercials Festival, were presented to winners at the fourth annual conclave of the Madison Avenue clan in the Grand Ballroom of the Waldorf-Astoria in New York, May 24. Presentations were made by the council of 135 prominent advertising executives who back up the activities of Festival Director Wallace A. Ross.

The winners represent 33 different product categories, six special category citations, three regional awards, and 14 citations for craftsmanship. Four of the special awards are sponsored — given in the name of the major suppliers and services: Minnesota Mining, RCA, Eastman Kodak and Movie-lab.

Leading Agencies and Producers

Leaders in the number of winners from among the 1367 commercials submitted to the Festival this year were Doyle, Dane, Bernbach, Grey Advertising and Young & Rubicam among the agencies. Leading award-winning producers were VPI Productions, Elliott, Unger & Elliott, WCD, On Film and Pelican. It was notable that the awards were spread amongst a large number of production houses — almost 40 receiving at least one award.

This year the judges voted to withhold an award in the Cigarette and Cigar product category, in the belief that no exceptional advertising was introduced during the past year that made one commercial or campaign stand out from the rest.

No Winners Among Dentrifices

The judges also killed a "Best" award for dentrifices, in the belief that no exceptional advertising

Winning Polaroid camera spot was created for Doyle Dane Bernbach by Elliot, Unger & Elliot, N. Y.

Procter & Gamble's Ivory spot, a winner for Compton Advertising, was produced by On Film, Inc.

had been done in this product area in the past year.

A technical workshop preceding the luncheon featured panel discussions and demonstrations of new film, video tape, sound and color equipment. The workshop also included a discussion of commercials from a client's point of view by Andrew S. Gantner, Advertising and Sales Promotion Manager of the Hertz Company.

Trends Reviewed in "Quick Cuts"

To introduce the reel of award winners, a film review of the year's trends, called *Quick Cuts* of '63 was shown. Like last year's *Heartbeats* of '62, it is an "over the shoulder" look at TV advertising and represents the industry's foibles and favorites. Into the film's preparation went clips from almost 100 top commercials of the past year, supplied by the ad agencies and production companies involved. All creative and production services were contributed by the industry's foremost talent. Bill Van Praag, of the Film Producers Association of New York and Gordon Webber, of Benton & Bowles, were producers.

John P. Cunningham, Chairman of the Executive Committee of Cunningham & Walsh, is this year's chairman of the Festival's Advisory Council. Among the industry leaders seated with him on the dais was Barton A. Cummings, President of Compton Advertising, who succeeded to the chairmanship at the luncheon.

Judged by Expert Professionals

Later, discussing the judging process of the Festival which took eight weeks to complete, in five cities, Director Wally Ross said, "Collectively, the TV Commercial Council represents the most thoroughly professional group of

"Clio" winner was this Jax Beer commercial produced by Pelican Films, N.Y., for Doherty, Clifford, Steers & Shenfield agency.

experts ever assembled to do a job in advertising."

He pointed out that the Festival is cooperatively sponsored by the advertisers, agencies, production companies, suppliers and services that contribute to the substance of television advertising. The Festival is keyed to focus recognition upon the outstanding television commercials of the year. By distributing the reels of the award winners to advertising groups, the Festival aims at stimulating higher standards of taste and creativity in all TV advertising.

Nationwide Meetings to Follow

The New York awards luncheon, attended by 1200 advertising and production people, will be followed by Festival meetings at the Royal York in Toronto on June 5, in Chicago at the Sherman House on June 6, and at the Advertising Federation of America's International Convention in Atlanta on June 17. The Advertising Association of the West will see the winners in Los Angeles during the last week in June, and ad clubs all over the country will feature them at luncheon programs during the year.

Smith Kline and French to Sponsor Film on Mental Health

Production of a new motion picture on mental health has been awarded to Vision Associates by Smith Kline and French Laboratories. The film will be a one-hour motion picture produced from a script by Emily and Dave Alman that translates in cinematic terms the biography of a breakdown.

Titled *The Ninety-First Day*, the film calls for more than 45 speaking parts and over 40 sets. Lee R. Bobker will direct; Helen Kristt and Richard Wolf will act as assistant directors and production coordinators, and Irving Oshman will be the editor.

THE GENERAL TIRE Company's premium line — the Dual 90 — sells for something like \$250 a set, which is substantially higher than the cost of factory-equipped tires, or the average grade of replacements. Dealers are faced with the problem of persuading and proving to their customers that Dual 90's are really worth the cost.

For the past 15 years or so, many General Tire dealers have used films to show dramatically the various safety and long-wearing features of the premium line. They have almost always been high in praise of the film's usefulness as a sales help, but some have not always been so keen on the maintenance problems of the projectors they have used.

Film and Projector in Package

Recently, General Tire has offered a package plan of an 8mm version of the latest Dual 90 film and an MPO Videotronic-8 repeater projector to its dealers and the

Salesman George Crisp of Stamford General Tire Company is firm believer in film results.

results have been so good that the company is now actually making another film to convince more of its dealers to adopt the 8mm projector system.

The company has noted such comments as this (from Herb Jordan, owner of General Tire of New Jersey, in East Rutherford):

"In the years since I've been with General Tire — back to 1949 — we have had several projectors we have used to help us sell our premium tires. The most important feature of this particular projector is its trouble free performance and absolute lack of maintenance. We run this projector for hours on end. It doesn't build up any heat and our maintenance has been kept down to a minimum. This is most important because we not only keep the projectors in the showroom, but we send them over to some of our car dealers who also use them to sell their General Dual 90's."

Fred Pohl, of Pohl-Crisp Gen-

Salesman Mort Humphries (left) shows Mr. and Mrs. James Boyle the Dual 90 tire film at Nassau-Suffolk General Tire Service, Inc.

General Tire Shows a Quality Line on 8mm

Dealers Report Sales Results on Dual 90 Premium Tires Thru Customer Showing With Repeater Sound Projectors

eral Tire Company, White Plains, N. Y., thinks the Videotronic-8 in his store has increased his sales by at least 30 per cent, while Edward Rodier, of Rodier-Rooney Motors, a White Plains Chrysler-Plymouth dealer, says:

Sells "Premiums" to Car Buyers

"The projector has sold tires. We usually use it after the car is sold. We bring the customer to this little machine and let it run right through the film, and by the time it's finished he is pretty well convinced that he should have Dual 90's on his car. The nice thing about the machine is that it runs itself and is always ready to use."

Out on Long Island, Joseph Callahan, owner of Nassau-Suffolk General Tire Service, said his MPO Videotronic-8 had increased retail sales about 25 per cent.

The Machine That "Never Tires"

"The biggest and most important thing about this projector is

that it never tires," he says. "It keeps telling the same story at nine in the morning and at four in the afternoon. A salesman does get tired. This is terrific."

Mort Humphries, one of Mr. Callahan's more tireless salesmen, said he liked to use the film because it acted as a guide for him, and at the same time, he helped the film. "We can both bring out different points of the same story."

General Tire has not released a new film especially for 8mm — its regular 16mm Dual 90 picture was easily reprinted on 8mm stock for use with the Videotronic-8. Currently, more and more of the projectors are going to work in General dealers' showrooms across the country.

EDITOR'S NOTE: increasing use of 8mm sound (and silent) films for dealer promotion and for direct selling via home demonstration is a noteworthy trend in American business and overseas as well.

Stamford (Conn.) General Tire dealer Howard Morris (at left) is showing customer Gus LaBella advantages of General's Dual 90 premium tires.

Spectacular aerial shot of the "Big E" is featured in new film report.

Day at Sea Aboard the Carrier "Enterprise"

THE NUCLEAR-POWERED aircraft carrier Enterprise — the largest ship in the world — is the subject of a new 13½-minute color film, *Inside the Big E*, just released by the American Petroleum Institute. A typical day at sea is reviewed as the giant 85,000 ton vessel surges through the Atlantic on maneuvers.

The picture contains some spectacular shots of the supersonic F8U's and Phantom II jets being catapulted off the flight deck at the rate of one every 15 seconds, the same planes slamming into the ship's arresting cable at 150 miles an hour, a re-fueling of a destroyer at sea while both ships are under way. There are informative scenes inside a radiation lab as petroleum scientists shoot cobalt 60 gamma waves into lubricating oils to test their effect.

The photography inside the radiation laboratory and aboard the Enterprise at sea was directed by Carl Ragsdale, a lieutenant commander in the Naval Reserve when he is not working in the field of film production.

The film also shows how 4,600 men are fed 14,000 meals daily, what their living is like during the busy days at sea — days that could run into years since the ship is capable of traveling the world without re-fueling for years, and how this sea-going metropolis contains nearly every convenience that can be found ashore.

United World Films is distributing the film to television stations and prints for non-theatrical audiences are also available without charge from the Committee on Public Affairs of the Petroleum Institute. □

On the deck of the carrier Enterprise, her planes poised for action.

Automated Data Processing in the Air Force

A Top-Quality Film from IBM Clearly Explains the Role of Computer in Handling Multitude of Air Force Tasks

A STUNNING FILM which draws together the myriad problems and details of our modern, mechanized lives, has just been produced by International Business Machines with the cooperation of the U.S. Air Force. With the simple, thought-provoking title, *Inquiry*, this motion picture gracefully handles the hard, dull subject of automated data processing.

Using the Air Force as an example of the ways in which man must "keep track", make decisions, handle time and choice, Henry Strauss & Company, Inc.

But through this film, the detached viewer cannot help but realize how vital this could be to him in case of emergency. Members of the Air Force, on the other hand, who are doubtlessly conscious that they have become, from necessity, punch-card numbers, cannot help but be impressed with the management of the tremendous organization to which they belong.

Consider these problems: How long does it take to train a cook? What will Canaveral weather be like on Friday? How many jet

Computers are helping the Air Force manage its worldwide problems.

socks the audience with the enormity of "multiplicity of things" in our lives today. But most of all, he points out that machines are helping man make the *most* of what little time he has on earth.

Using the screen as a canvas, Strauss has splashed color and image like a modern painter. With filters and filtered light, and complementary colors throughout, like the abstract artist, he has carefully built a picture which is bound to affect each viewer in a different way. The general public, for instance, might not be consciously concerned with whether or not the U.S. airmen and the millions of items which support him are where they belong at the moment.

fuel storage tanks are needed in a certain place where the temperature is hot? Or where it is cold? Men, planes, runways. Helmets, ICBM's, paychecks. Confirmations. Corrections. It would take acres and acres of secretaries, mathematicians and bookkeepers to do the work of the IBM machines. Somehow, *Inquiry* drives this fact home.

This is a bright film which has evolved from an intelligent script, excellent photography, and glossy editing. Accompanied by contemporary music, it runs 13½ minutes. Both the U.S. Air Force and IBM should be proud of their success in presenting a big, esoteric subject in a short, good film.

Report on America's Aerospace Industry

SPONSOR: Aerospace Industries Association of America.

TITLE: *All Systems Go*, 28 min, color, produced by Arthur Lodge Productions.

☆ This film chronicles the giant strides our nation is taking in the space race — from the first U. S. manned orbital flight to today's massive 16-story Saturns and mini-

future electrical propulsion systems, such as ion engines. It also highlights the vast research and development programs the aerospace industry is carrying out to produce the necessary hardware for future space exploration, including the proposed flight to the moon.

The film was produced with the cooperation of the Department of Defense, NASA, U. S. Army, Navy and Air Force, as well as the Atomic Energy Commission. It also includes footage taken by cameramen of AIA member companies.

"The Gentle Doctor" Shows Progress in Veterinary Science

100th Birthday Tribute to
American Veterinary Medicine
is Offered by Gaines

Right: This statue of "The Gentle Doctor" is symbol of his work.

SPONSOR: Gaines Dog Research Center

TITLE: *The Gentle Doctor*, b.w., 20 min. produced by the Institute of Visual Communications.

Burgess Meredith stars in this new film which traces the coexistence of man and animals through the centuries. Using old prints, photographs and other fascinating memorabilia, the picture has been produced to salute and honor the veterinary medical profession on the 100th anniversary of the founding of the American Veterinary Medical Association in 1863. The film shows the invaluable role played by the veterinarian for 4,000 years in caring for and protecting the well-being of domestic

animals, including pets. It also explores some of the discoveries credited to veterinary science, and dwells on the work of veterinarians as guardians of our animal food supply, veterinarians engaged in government agencies, educational institutions and private industry, and in research of new drugs, vaccines and serums intended to make life better for man and animals alike.

Produced by William J. Ganz

The Gentle Doctor was produced by William J. Ganz for the IVC. It is available for showing on television, before veterinary societies, dog owner groups and clubs of various kinds. Institute of Visual Communications, New York, is the distributor of this film.

On camera: Burgess Meredith narrates scene for "The Gentle Doctor."

Audio-Visuals Help to Sell "Saf-T-Climb"

Motion Picture and Sound Filmstrip Prove Key Elements
as a 66% Sales Increase Is Noted by Air Space Devices

"WHAT DO I THINK of audio-visual sales tools? I'll tell you," answered Harold A. Lane, vice-president of Air Space Devices, Inc., Los Angeles. "We've found them the best sales tools there are!"

There's good reason for the strong statement from the man who directs marketing activities of this smallish firm which is in a highly competitive field. In the six months after the company's documentary motion picture, *Safe Climbing With Saf-T-Climb*, went into the field to work, sales rose 66% over the same period in the previous year.

Device Prevents Tower Falls

"Saf-T-Climb" is a patented device which positively prevents men on towers and other high-climbing situations from falling when a misstep, a slip, unexpected vibration, or any similar hazards would more than likely be fatal.

The device truly is a life-saver, cinching itself so that the man using it is held; he might find himself dangling, but he's not shattered on the ground. The equipment had been available to buyers for more than a dozen years, but nothing much happened until a new management team took over — Lane, and Bernard J. Stjernquist, president of the company.

Sales Plan Includes Two Films

Setting out to change the situation, they went to work with Anderson-McConnell Advertising Agency, Los Angeles, to plan a sales campaign. It could justifiably be termed ambitious, considering not only its scope and challenge but also its limited budget.

Included in the plan were audio-visual materials, new literature, advertising and general promotion, and an aggressive system of follow-up on sales attitudes. As the program developed it became apparent that the key elements would be a documentary-educational motion picture, and a hard-sell color-sound filmstrip. Each item was pin-pointed for entry into the total marketing effort throughout a 12-month period.

Motion Picture First in Field

The motion picture was first in use, followed shortly thereafter by the new brochure and a modest trade-advertising schedule.

At the end of the first three months, sales had risen from 1961's \$66,000, to more than

\$110,000. New business continued to show an increase at a rate of 8% to 12% each month, over the preceding month.

Adding the second three months, Air Space Devices' total sales since start of the program exceeded \$270,000 — where they had amounted to only \$200,000 for all of the previous year.

"You can see why we're such strong boosters for audio-visual sales tools," Lane observed, adding, "and the filmstrip is just now going out into the market."

Share Problems With Producer

When Stjernquist, Lane, and the Anderson-McConnell executives first sat down with Chapman 5 Productions, Inc., of Glendale,

Here's Saf-T-Climb device on the job, helping insure worker's safety on tall oil derrick.

Calif., they said, "We've got a problem."

At first glance their problem was like that of most companies: small budget, minimum time in which equipment could be tied-up, immediate need for the final product. Where it differed was in the requirement a motion picture, a filmstrip, black and white publicity shots, pictures for advertising material, and special stereo photos all be made at the same time. The difficulties were compounded to a degree when it was seen that the motion picture was to be documentary-educational, and the filmstrip hard-sell.

James Flint and Robert Lieban of the producing company held research and planning meetings with the two officers of Air Space Devices and the agency account executive. Flint turned out finished drafts of scripts for both the movie (CONCLUDED ON PAGE SIXTY-SIX)

Film's principals are the eager-beaver, Ken Burroughs (left) played by Ron Stokes and "old hand" Ed Hardesty, acted by Don Haggerty.

Hardesty Learns the Art of Selling Trucks

Well-Aimed Human Comedy Makes Converts of Ford Salesmen

HOW DO YOU GET working automobile salesmen, successful and, just as often, cynical, to identify with screen characters and action? In other words, how do you produce a successful sales

training film in this well-worked, yet highly-important, field of selling?

A light-hearted but aimed-at-the-button example was recently used as the closing event of three-

day truck sales workshops held by the Ford Marketing Institute for that company's dealers and salesmen. It was also added to the agenda of dealer-management courses. The film: a 34-minute black & white subject, *The Hardesty Case*, produced by Parthenon Pictures.

Objective of the picture was to increase sales effort by passenger car salesmen for the company's extensive light truck line. Do they feel it beneath their dignity to sell trucks or is it simply a lack of knowledge to properly handle many types of customers for these models?

Ed Hardesty is the wise, experienced "hot-shot" of the picture. Immediately recognizable to every man out-front, he's fervently trying to duck handling truck inquiries. He mutters, "... options, options, a million options; axles, transmissions, engines — my customer asks me his first two questions about a truck, I'll look like a jerk!"

But when a young eager-beaver, Ken Burroughs, starts turning up

those extra commissions, Ed "wises up" and starts to learn that truck information isn't hard to master... and the rewards are plenty good. The film plays as human comedy with every laugh indigenous to the subject, making the essential points much more effectively than a "straight line" could have done. Realizing the need for identification, Ford had the courage not to sweep negative attitudes under the rug but to bring them out, fair and square, into the open.

A secondary function of the film is to serve as a review of the truck sales workshop. Therefore, during the plot action, every one of the key elements in the course is shown (not talked about) and demonstrated in actual plot action: prospecting, qualifying, position-selling, closing, etc.

As a bonus, though the film is ostensibly about truck selling, salesmen learn a lot from it about selling cars. And by the same token, viewers can learn just as much about selling anything from houses to insurance.

GOOD CASTING OF "THE HARDESTY CASE" CONTRIBUTES TO AUDIENCE IDENTIFICATION BY SALESMEN

"You want to buy what? ... a truck? What do you want a truck for?"

"Think I can locate that for you, Sir, here in the Yellow Pages."

"... it has to haul 12.7 cubic yards of bat guano 9.3 miles of 4% grade?"

"... now, let's see, did you want a red one or a blue one ...?"

"... the Sales Manager wants to see me? Something about trucks?"

"... nothing to worry about, just use a little Hardesty razzle-dazzle ..."

"You wanted to see me, Sir? Kind of busy out there on the floor now ..."

"A promotion? New responsibility? You're looking at the right man!"

Time to Think About Your Family's Future

New Estate Planning Filmstrip Shows Tragedies of Postponement
Triumphs of Pre-administering an Estate with Expert Counsel

ESTATE PLANNING has a remote kind of meaning to the average man, as if it were (and too often is) something to be "taken care of" in those later, "golden" years when financial houses are put in order.

By that time, the man of property who has something to worry about has already passed the worrying stage and a confused, harried widow and the rest of his family face staggering problems: how to meet Federal estate and income taxes, State inheritance, income and property taxes, creditors' claims, executor's fees, and various other sudden demands.

Leads to Forced Liquidation, Double Tax

These all too often lead to forced liquidation, loss of income for the heirs, and double taxation at their deaths. Then, too, conditions change, new tax rulings go into effect and, very frequently, these gravely affect — even destroy — all that busy, successful men devote their lives to building.

Other, wiser men have begun to look at "Estate Planning" in younger or middle years and recognize the useful role of specialists, Trust Departments, tax advisors. But the first real educational contribution came last month as a new sound and color filmstrip, *Which Way?*, made its debut in Los Angeles.

Aims to Motivate Men to Seek Protection

To acquaint and motivate more men to take immediate, protective steps, this new filmstrip has been produced by Rocket Pictures and released by the Better Selling Bureau. It shows how — through Estate Planning — final taxes can be lowered, "double" taxation at the death of heirs can be avoided, and a tax-free cash fund can be established to meet extraordinary final expenses. Since all who counsel successful men meet relatively the same problems with their clients, *Which Way?* should make a wide appeal.

This sound filmstrip was created in collaboration with William R. Spinney, Trust Officer

The lawyer tells a widow how forced liquidation and heavy losses could have been avoided, had a tax-free cash fund been created to meet the exceptional outlays death demands.

and Manager, Estate Planning Department of Title Insurance and Trust Co., Los Angeles, who is recognized as the West Coast's Estate Planning authority. He is the author of "Estate Planning" — now in its sixth edition (published by Commerce Clearing House, Chicago).

For Use by Life Insurance Underwriters

Designed primarily to aid the life insurance underwriter to present the involved subject of Estate Planning concisely and with clarity, to inspire busy men to recognize their need and take immediate steps to meet it, this filmstrip represents a new aspect of creative salesmanship, and is Rocket Pictures' initial step in serving the financial world.

In telling its story, this new filmstrip shows the necessity for professional collaboration of

The prospect's attorney, his accountant, and trust officer — as well as the prospect's wife — should be present at an Estate Planning meeting, as new filmstrip makes clear.

the prospect's lawyer, accountant, trust officer and his insurance representative. Simultaneously, it provides the latter with solid information which enhances his confidence and success.

Also Useful to Trust Companies, Officers

For owners of all kinds of property unaware of tax pitfalls affecting their daily business activities and the devastating effect which death taxes can have upon their estates, this filmstrip dramatizes, with third party power, the facts essential for Life Underwriters who play an important role in this specialized field.

In addition, trust companies and trust officers in banks will find this filmstrip a valuable means of conveying a clear picture of estate planning problems to their staffs, as well as to their clients.

Available in Automatic, Manual Versions

By its vivid contrasts — between the tragedies that develop when Estate Planning is neglected, and the benefits which are assured when a man pre-administers his estate — *Which Way?* creates clear and unforgettable

William R. Spinney (right) — Trust Officer Estate Planning, Title Insurance & Trust Co., Los Angeles — receives first print and pressing of *Estate Planning* from Dick Westen, President, Better Selling Bureau.

visual evidence that spurs most viewers to prompt action.

This color filmstrip contains 99 frames, with choice of high fidelity microgroove 7" 45 rpm record, or 12" 33 1/3 rpm record with automatic and manual controls. For preview information or price data write the Better Selling Bureau, 6108 Santa Monica Boulevard, Los Angeles 38.

A life underwriter can perform no more valuable service than to familiarize successful men with pitfalls that shrink estate assets, and show such men how to make tax savings.

Sound Filmstrips on Free Enterprise

The third in a noteworthy series of sound filmstrips on free enterprise is *The True Revolution*, sponsored by Walter Knott of Knott's Berry Farm fame. Two previous subjects, *Our American Heritage* and *America's Secret*, received awards from the Freedoms Foundation.

This latest 20-minute color strip reveals why the American Revolution differed from all others in history, replacing despots with a new code of government based on the Bill of Rights.

All three color strips, with recordings, are available in a set at \$59.50. Write the Freedom Center, Knott's Berry Farm, Buena Park, California for complete information.

Sailing Saga: "The America's Cup Races"

Hard-Fought Contests of Gretel and Weatherly Captured in an Exciting Color Film from Thomas J. Lipton, Inc.

SPONSOR: Thomas J. Lipton, Inc.
TITLE: *The America's Cup Races*
1962. 28 min. color, produced by Agnew Fisher.

The 1962 America's Cup Races were among the most colorful, exciting and hard-fought in the entire 111-year history of this international yachting classic. The Australian challenger, *Gretel*, competed gamely against America's victorious *Weatherly*. *Gretel* took the second race (thereby becoming the first challenger in 28 years to win a single race in the series) and lost the fourth by the narrowest margin in the history of the races — a mere 26 seconds.

A new film, presented by the tea and food concern, Thomas J. Lipton Company, highlights the 1962 series of five Cup races, the suspenseful summer tryouts, and shows the exciting deck action of the crews handling sail, working "coffee-grinder" winches, tacking and taking advantage of every wind shift along the course.

Lipton an Appropriate Host

The connection of the America's Cup and Lipton is, of course, a natural one, for Sir Thomas Lipton, founder of the company, had an integral association with the famous trophy during five challenges over a period of many years.

At a premiere showing at the New York Yacht Club in New York last month, Lipton's president, W. Gardner Barker, said he hoped the new film would rival in popularity the ones his company sponsored of the 1958 America's Cup races which have now been seen by an audience of 60,000,000 people.

Two Versions of the Picture

The 1962 films were produced for Lipton by veteran yachtsman-moviemaker Agnew Fisher, who shot 8,000 feet of film over an 18-month span to get the footage finally used in the 28-minute film and a 40-minute version made especially for yacht club use. Additional footage was made in Australia. As a yachtsman, sailing out of his native Greenwich, Conn., for 35 years, Fisher seems to have the knack of knowing where to be and when to start shooting during a race. He had to be able to anticipate the moves the competing 12-

meters would make, and equally important, anticipate them without getting in the way of the race.

Fisher had new problems to solve in shooting from the pitching, rolling deck of a powerboat. His solution during the 1962 races was to use a battery-operated gyro-stabilizer on his camera. With the stabilizer attached to the bottom of his camera, the photographer held the camera loosely with both hands, allowing the stabilizer to do its work of holding the camera at a true horizontal.

Now Going Into Distribution

In the next few weeks, prints of the new films will begin going out to clubs, community groups, television stations and yacht clubs all over the country, via Association Films, Inc.

Accompanying the expanded 40-minute version sent to yacht clubs is a letter from the United States Olympic Committee and signed by the Chairman and Secretary of the U. S. Olympic Yachting Committee respectively, Julian K. Roosevelt and Emil (Bus) Mosbacher, Jr. — skipper of *Weatherly*.

The letter invites membership contributions from yacht club members to help make it possible for the best qualified sailors to be on the 1964 American Olympic yachting team which competes at Sagami Bay, Japan, in October 1964. In previous years, only those financially able to bear the burden of meeting their own expenses could take part.

Since 1958, many yacht clubs around the country have been using the Lipton 40-minute America's Cup film as a fund-raising vehicle — charging admission and contributing the proceeds to the American Olympic Yachting Team Fund.

Sports Films Guide Scheduled for Publication This Fall

You've read about the widely-popular professional baseball and football championship films in these pages, available for nationwide showings. To serve audience interest in the sports film field, we're building a convenient new film guide embracing all titles in each subject area from archery to wrestling. Watch for it!

On the grid with the big bombs ready to spring into roarin' action.

Auto Classic: Racing for Fun

Sports Car Racing Enthusiast Cal Dunn Creates The-Life-Sound Film of Amateurs in Action as "They Race for Fun"

YOUNG OR OLD, when they mount their throbbing, rumbling sports cars, you can bet that *They Race for Fun*. Their saga, in pictures and sound gleaned from thousands of candid shots and taped recordings of races and drivers in action and between, is brought to the screen with breath-taking reality by one of their own, film producer Cal Dunn.

This sports racing buff drives his own Ferrari, rubs elbows at Elkhart Lake and Meadowdale with those other rugged individualists who mix violent ferocity on the turns with loving care in the pits. How else could this "first real story of amateur racing" have been born? This accolade was given *They Race for Fun* by drivers who attended the recent national

gathering of the Sport-Car Club of America in Chicago.

The picture should be called a "motion slidefilm" in that fast-changing *still* photographs make up its visual sequences, but you'll never believe that when the roar of track action backgrounds swiftly-changing scenes of race action, faster than the eye can follow their rapid transition. Thoroughly professional, it bears the hallmark of Cal Dunn Studios, maker of business films and television commercials.

The script for *They Race for Fun* begins the film's titillation of "heart" for the subject. Written by Carl Hixon, one of advertising's top creative writers, it conveys the authority of Hixon's national license for his amateur auto racing.

"Bombs Away!" as drivers flash speed in hot competition for sports car racing honors; one of hundreds of such scenes in "They Race for Fun"

etually, the still technique is ide for the subject. It permits det ed study of the cars in action, drivr expression and crowd re-ct n that would have been next o possible to achieve through "in-screel" type coverage. More tha 10,000 pictures were made anicollectd for the 26 minutes of serin action. Photography was by Be Denison and Ray Boldt, who sho the scenes at various mid-west tracs over the past five years.

Captures Authentic Sounds

ound, equally authentic and of-er-tirring, was directed by John Gldin and recorded over the ere past summer as drivers per- ed, repaired and simply talk- d on the tracks they favor. The ne film was set to an original ne score with lyrics, using theemporary folk idiom to tell history of this special breed. The se, "That Big Red Ferrari" was ten by Hixon and Dunn, rec- ed by the Fleming Brown Trio. Animation director Art Spring-er of the Dunn Studios did the pic- ture selection from the original 10,000 photographs available. Slinger estimates that he spent ne than 1,000 hours in the crop- p, mounting and animating of th scenes on the studio's Oxberry animation stand.

Good-Humored Look at Racing

arry Elders narrates this good- hored look at the people in rac-ir—the drivers, crews, officials ad the fans. Their sound and onversations were recorded on- t-spot, in the pits and stands and e the starting grid at major Sports Or Club of America events all ound the country. Small wonder t men who participate in this d of racing have received

"their" film with the enthusiasm it merits because of the careful at- tention given to details and to fine- point accuracy.

The Ferraris and the Maseratis roar their throaty challenge from the screen; the perky MGs snarl defiance to the rumbling Sprites. You may not be a racing buff before you see *They Race for Fun* but it will be making a lot of converts wherever screens light up with these thrilling scenes.

Clubs Are Purchasing Prints

To share that experience as widely as possible, prints of *They Race for Fun* are being acquired from Cal Dunn Studios by individual clubs. But this picture should have industrial sponsorship and go into nationwide free loan distribution. Meanwhile it is "open" for rental from the Chicago studios of the Dunn organization.

"They Race for Fun" Reminds Sponsors of Film's Potential

With literally thousands of men and women in the memberships of sports car clubs throughout the U. S., not to mention the tremendous interest in this subject among teen-agers, there should be a huge potential audience for *They Race for Fun* and for more pictures just like it.

Foreign versions of films like *They Race for Fun* would also have a very large audience of influence, especially in Europe where sports car racing is popular.

The "professional" racing angle has been well covered by a number of good films featuring the Indianapolis "500" but the sports car buff spurns any mention of that event . . . at least until one of their own wins it!

Surrounded by hundreds of photos, producer Cal Dunn (left) checks storyboard with animation director Art Springer. The action sequence at left captures fast-changing tempo of this true-to-life sports film.

IFPA JOURNAL

CAPTURING ACTION UNDERWATER AND FROM THE SKY

It's Fourth Annual Conference Time!

Program Highlights for the Daily Sessions

"Cindy" Awards Banquet at Los Angeles' Ambassador
Follows Talks and Showings by Noted Personalities

THESE JOURNAL PAGES reach subscribers on the eve of IFPA's Fourth National Conference and the traditional "Cindy" Awards program at Los Angeles' Ambassador Hotel. Members gather on Thursday evening, June 13, for the advance segment of a conference program replete with outstanding talks, technical papers and filmed presentations. The 1963 events conclude with the annual Awards Banquet on Saturday evening in the Ambassador Ballroom.

Featured on the first day of the conference sessions, June 14, is Stan Freberg, the nation's foremost plotter of offbeat television commercials. Ernest Rose, widely travelled USC director, lecturer and advisor in the field of documentary films, will discuss "The Fallacy of the Target Audience."

"Communism and Mass Media"

The first day's program continues with a presentation by Wolfran Von Hanwehr, USC Department of Cinema, who conducts special studies on Communist propaganda through the mass media. Robert C. Scott, an IFPA past-president who is government relations and audio-visual specialist for the Aerospace Corporation, will present the story of "Closed-Circuit Color Television at Air Force Space Systems Headquarters."

And then, on Saturday, June 15, we'll be hearing Walter Wise, veteran screen writer, director and producer of documentary and entertainment films, who will hold forth on the "Scriptwriter's Responsibility in Military Public Information Film Production." Walter's talk is followed by a program highlight on "Underwater Photog-

raphy in Industry," in which Albert Tillman, underwater photographer and lecturer will be joined by a panel of diving experts as he explores the world beneath.

Talk on High-Speed Technique

You'll also share the experiences of industrial film and television producer Charles Cahill as he presents "High-Speed Photography (auto-collision studies) and the Documentary Film." Mr. Cahill recently received two bronze plaques and an award of merit from the National Committee on Films for Safety for his contributions in that field. (see page 33)

Technical papers include data on the new 8mm optical and magnetic sound projector being developed by inventor-designer John Maurer. This presentation is being

made by Russell Holslag, a close associate of Mr. Maurer. Another highlight of the interesting, informative conference program is bringing Dave Burt, producer of parachute training films and television subjects. Mr. Burt's talk is on "Free-Fall Motion Picture Production."

Awards Banquet Is Climax

The conference will be climaxed by the Annual Awards Banquet in the Ambassador's Ballroom on Saturday evening. "Cindy" awards will be presented to producers of the best industry-made films of 1962 and the Jay Gordon Memorial Award will be given on the basis of "individual contribution to the industrial film profession." The award, made possible through the generosity of Gordon Enterprises, honors the memory of IFPA's first

In the Conference picture panel at left (from top to bottom) are pictures of featured speakers on the 1963 program. Flanking our "Cindy" is USC's Wolfran Von Hanwehr and at right, our own Bob Scott. Below right is underwater expert Albert Tillman and (at left) screen writer Walter Wise is shown at work. The program on "Free-Fall" films is illustrated by the scene and producer Dave Burt's picture is immediately below (right). Finally we introduce USC's Ernie Rose.

resident, the late Jay Gordon (no relation). Special "Cindy" awards will also be given to individuals who have provided outstanding support to the motion picture industry as an important communications vehicle.

The awards presentations follow another IFPA tradition as they are handed to their recipients by leading Hollywood film celebrity. Advance reservations indicate that the 1963 Annual Conference will be well-attended and that all Chapters, from coast-to-coast will be represented during the outstanding program arranged by this year's program chairman.

The next issue of the JOURNAL will bring a full report on Conference proceedings as well as a resume, in text and pictures, of the "Cindy" awards and Jay Gordon Memorial presentation. ■

Delaware Discusses Animation Followed by "Cindy" Judging

At the March 28 meeting of the Delaware Valley chapter, "Duke" Taylor, animation art director and Dick Olmstead, animation cameraman, both presented views on in-plant animation, giving members and guests a look at the RCA approach. Taylor demonstrated the technique used in laying out and plotting animation sequences; Olmstead demonstrated the operation of the professional animation stand and hotpress equipment.

On April 25, the chapter screened entries to two categories of the IFPA "Cindy" awards in the RCA Little Theatre in Camden. Several invited guests took part in the judging, in addition to regular members. Installation of the 1963-64 officers (see other columns) was another program event. ■

Don't forget to send mss. for these JOURNAL pages to "Pat" Patterson, editorial vice-president.

Members of the Industry Film Producers' Northern California Chapter are glimpsed during the March 15 program.

Northern California Hears About New Films

Kodak's Dr. Simmons Describes Progress in Emulsions

On March 15, the Northern California Chapter of the I.F.P.A. met at Eastman Kodak's modern facility in San Francisco. Ray Jaeger, program chairman, presided in place of president Mitch Rose, who was absent because of illness.

Nominations for chapter officers for chapter elections to be held in April were conducted by Saul Jacobs, representative of the Nominations Committee. The nomination slate will be: Roy Jaeger, chairman; Ed Carroll, secretary; Ira Thatcher, program chairman; and Dan Leto, member-at-large.

Kodak's West Coast Manager

Speaker for the evening was Dr. Norwood Simmons, West Coast Manager of Eastman Kodak's Mo-

what the motion picture industry could expect in technical advance in the not-too-distant future.

A Revolution in the Offing

Kodak feels that a small revolution will take place when a new 16mm color film will be introduced replacing Ektachrome Commercial. This new film will have far greater speed, reduced grain and greater sharpness. The film will have a new emulsion that will withstand the 130-degree viscous processing solution which will develop the film in a matter of seconds.

In the field of black and white motion picture film, Kodak is trying to develop a new emulsion that will have a fixed gamma in spite of processing variables.

With the eventual advent to high-speed, high-temperature processing, Kodak sees many processing labs mounted on wheels that can move to location sites or near studio. The filmed scene can be viewed shortly after it has been shot. The color television industry is greatly interested in the development of a high-speed, rapidly-processed 16mm product. Kodak is very interested in the development of a kinescope recorder where the electron beam scans directly on a special slow-speed, almost grainless emulsion.

"Sanctity of Magnetic Tape"

Dr. Simmons concluded that with the development of the above-mentioned photographic films and processes, it will seriously imperil the sanctity of magnetic tape.

Following Dr. Simmons' address, Roy Jaeger served as moderator in a panel discussion among chapter members who are connected with film processing. Many provocative questions were asked by the audience and by the panel itself at this session. ■

Dr. Norwood Simmons addresses the Northern California membership.

tion Picture Film Department. Dr. Simmons is responsible for Kodak's tight control on her high-quality film products and technical assistance to the motion picture industry.

Re-Elect "Pete" Stallings as Chairman of Delaware Chapter

☆ IFPA's Delaware Valley Chapter has re-elected Peyton M. Stallings as chairman for the 1963-64 term. The results of an April mail ballot also confirmed the election of Ron McNally as program chairman; James Preston, secretary; Charles Gindhart, Jr., treasurer; and James Seeley as member-at-large of the board. These officers were installed at the April 25th ceremonies held at RCA in Camden, N. J.

McNally succeeds former program chairman Frank Weikel, who continues as editor of the chapter's newsletter, *FRAME LINES*, in the newly-established post of publications' chairman. Preston and Gindhart share the secretary-treasurer's job held by Raymond Rock this past year.

"Pete" Stallings was the motivating force in the creation of the chapter, which serves the Mid-Atlantic States area. Under his guidance it has grown to 30 active members and 20 associates. He is a writer-director in RCA's Motion Picture Production unit at Camden. But more frequently than not he is in Greenland, Alaska or abroad, directing cinematography for the RCA BMEWS project.

Ron McNally, who also serves RCA at the Moorestown, N. J. plant with secretary Jim Preston, has had a long career in the film field. Charlie Gindhart is with the Federal Aviation Agency's experimental center at Atlantic City, while Jim Seeley serves with the RCA Camden group following long service with the newsreels. Jacques Van Vlack, recently named membership chairman, is a research technologist on a joint project of Temple University and the Eastern Pennsylvania Psychiatric Institute.

Delaware Valley's meetings are held on the fourth Thursday of each month in Camden, N. J. ☐

BUSINESS SCREEN EXECUTIVE

Here's Background on Our Annual Awards

Facts About "Cindy" and Jay Gordon Memorial Awards

AS WE NEAR the time for annual awards with a great number of new members on our rolls, it is appropriate to take a look at the background and significance of our two awards.

The older of the two is IFPA's film award. Past President Robert S. Scott, 1960-1961, provides us some background on CINDY: "This year's convention will bring the presentation of the sixth annual IFPA film awards. It will be CINDY's third appearance. CINDY

terminated by vote of the assembled membership of the largest chapter. Last year the screening committee functioned precisely as before but in an effort to get greater membership participation, the final selection was made by delegates attending the national conference.

This year the final selection will work similarly but in order to achieve even greater membership participation each chapter will have a category to judge and select the two finalists prior to the conference.

Our Memorial to a Founder

The other award is the younger of the two. Past President Robert J. Gunther, 1959-60, provides the background on it. "On September 29, 1960, the Executive Board of the Industry Film Producers Association approved the establishment of the Jay E. Gordon Memorial Award to be presented to the individual who in previous years had made the greatest contribution toward the utilization of motion pictures in industry.

"It was particularly fitting that the name of the late Jay E. Gordon be associated with such an award. One of the original founders of the association, Jay served as Vice-president, President, and later Chapters Vice-president from 1957 to 1960. He gave generously of his time during the early days of the organization and much credit for the success of IFPA belongs to him.

Rules Governing the Awards

"The rules governing the presentation of the award are simple. The President appoints a representative committee of seven active IFPA members to nominate candi-

dates for the award. Three months prior to the Annual Meeting, the committee presents a maximum of three names for approval by the Executive Board. The chosen candidate is notified immediately and an invitation extended to him to attend the Awards Banquet. The award is inscribed with the name of the recipient as well as that of the donor. The donor for the award is selected from IFPA Sustaining Members.

Past Recipients of Honors

"Past recipients of the award have been Ott H. Coelln, Jr., editor of *BUSINESS SCREEN* and John Flory, Advisor on Non-Theatrical Films, Eastman Kodak Co. Gordon Enterprises of North Hollywood, California, was the donor of the awards and the honorarium."

Two of the many reasons for attending the annual conference, besides the technical sessions, are the new ideas and techniques available from viewing the finalist films and the opportunity to associate for several days with a man of sufficient stature to qualify for the Memorial Award. Each member should make a special effort to attend for his own and ultimately his company's benefit. ☐

* * *

Let Us Heed the Admonition of Pope John: Help the Weak

☆ Mankind will long cherish the memory of the departed Pope John who earned the respect of all faiths and even of the faithless. His special concern for the people of South America should be noted by all who work with films. His admonition that the strong should help the weak and the more advanced, the less developed, reminds us that only a single film (sponsored by Ford International) has moved along that vital route.

Film makers everywhere can share this great man's vision. ☐

"Cindy" symbolizes film excellence.

inherited her name from CINEMA and INDUSTRY". The film award was first presented in March, 1958, at a one-evening affair. The following year the first annual conference was held, a three-day get-together culminating in the awards.

For the first few years, a screening committee narrowed each category's entrants down to two contestants. The winner was then de-

Los Angeles' Police Department Uses Film for Investigation. Security and Traffic Study

by Lient. John C. Bigham, Suprv., Photographic Section*

THE BASIC CONCEPT of photography as it applies to Criminal Investigation is to discover, record, and preserve visual evidence so that it may, at a subsequent time, be reproduced to further an investigation or be presented to a Court under the best evidence rule.

Inasmuch as it is not usually possible to restore the scene of crime or accident, photography becomes the ideal medium to recreate such incidents for further study. The possibility of re-examining a crime scene, by means of the documentary photograph is especially important when aspects of the case, which did not seem relevant in the initial stages, take on a new meaning as the investigation progresses.

The Picture Must be Authentic

In that all photographic evidence, which includes photography of a record nature, must be factual, it is imperative that each and every technique utilized conform to standard photographic practice. In the practice of commercial or illustrative photography, the print is considered the end product and any method to obtain the desired results would be proper.

In investigative photography all phases of the process used may be questioned to determine the authenticity of the scene which is depicted by the furnished print. Under these conditions the photographer must be meticulous in truly recording a scene exactly as it existed.

Well-Equipped for the Tasks

To accomplish the necessary photographic function for the Los Angeles Police Department, the Photographic Section of the Scientific Investigation Division maintains a complete still and motion picture laboratory covering over 20,000 square feet of floor space, including a 40 foot by 40 foot sound stage and re-recording facility. The laboratory has installed modern equipment for automating those functions which are adaptable to such techniques, such as the semi-automatic printing and continuous processing of prisoner identification pictures (mugs).

The Section is administered and supervised by a Lieutenant with

* Lt. Bigham's article was originally presented at the Third Annual Conference of I.F.P.A. It is reprinted by special permission because of many requests for his data.

two Sergeants and one Policeman as assistants. The entire administrative staff are qualified photographers, cinematographers, and technicians. The burden of establishing new techniques, budgeting, supply, and the training of other personnel falls on the administrative staff. A total of twenty-three civil service photographers, two photo copy technicians and three clerks comprise the balance of operating personnel.

Still Work is Most Extensive

The very nature of investigative and forensic photography is such that the still photograph will consume most of the efforts of the section. These photographs may be in black and white or in color. They may be the common garden variety of photographs or photomicrographs or photomicrographs. They may be made with normal lighting techniques or they may utilize infra-red or ultra-violet light.

In many cases it is necessary to experiment with various techniques so that all possible facets of the evidence, which may be revealed by photography, can be recorded. The negatives of each and every photograph so made, are permanently filed as an integral part of the investigative record.

Two Men Handle the Details

The motion picture unit is composed of two photographers who devote their entire effort to the printing, processing, and editing of 16mm film. Photography and related sound recording is accomplished by these two photographers augmented by officers from the administrative staff.

Equipment includes three 16mm professional cameras and record-

I.F.P.A. JOURNAL

ing facilities for single or double system sound, both optical and magnetic. Also available are 16mm hand cameras and special purpose cameras such as might be used to record the robbery or burglary of a business establishment and which would be activated manually, electronically or optically. One of the single system cameras is permanently utilized for the purpose of recording Kinescopes and is primarily used for the obtaining of evidence of fraud as may be practiced in false advertising.

All black and white film is processed and printed in the laboratory. A continuous contact printer and continuous processor is used for this purpose. Color film is processed under contract with commercial film laboratories. All work prints are made, and edited, in black and white as an economy measure. In addition to the processing of 16mm film the laboratory also processes all of the Department's micro film, in the same continuous processor.

Surveillance to Training Aids

The use of motion pictures in criminal investigation covers almost every aspect from the surveillance of thieves at work to that of training aids to assist in orienting and training police officers in new techniques.

Perhaps the greatest use of motion picture is in the field of surveillance. A fairly recent case involved a ring of burglars who were delivering stolen cameras, guns, radios, television sets, and a variety of similar articles, to a parking lot adjacent to a large business concern. The investigation disclosed that employees could order a particular type or make of radio and it would be stolen and delivered within forty-eight hours.

To obtain unimpeachable evi-

When the Soviet Premier was in Los Angeles, and while he was in any public place, continuous motion pictures were made of him and the persons who were in his immediate vicinity. This coverage was made in cooperation with the U. S. State Department and was to assure that the Russians could make no claim of incidents that

Sergeant Frank Cooper in L.A. police helicopter which carries 16mm Auricon unit for aerial, traffic work.

(CONTINUED FROM PAGE 49) ment of the island by the State Highway Department.

All motor vehicles which are purchased by the Police Department, prior to competitive bidding, are tested at the Pomona Fair Grounds "drag strip". The vehicles tested are furnished by the manufacturers with such modifications as are specified for vehicles to be used in "freeway-interception" and in general police work. The vehicles are tested for acceleration, top speed, and especially for handling and roadability.

Motion pictures are made from within the cars, from straightways, and from curves. Pictures are at standard speed and in slow motion. A study of completed films may reject a particular model of vehicle as unsafe, uneconomical, or of not meeting required specifications. The films are used by other government agencies as a guide to police vehicle operations.

On occasion, particular problems have been solved by the use of motion pictures. It was found that motorcycle officers involved in traffic accidents, where the helmet was the first part of the officer to make contact with another object, were experiencing excessive skull injury which should have been partially eliminated by the helmet and helmet liner materials.

A test was made by projecting a helmet at various speeds from thirty to eighty miles per hour and then suddenly stopping the helmet. A study at 1,000 frames per second indicated that the initial "whiplash" as the officer was thrown from the motorcycle was dislodging his helmet forward on his face, thus not protecting the skull area. A simple change in supporting straps solved the problem.

Training films are made for the entire department and are sold to

Los Angeles' Police Department Uses Film:

other law enforcement agencies as a method of defraying the cost of production. In many cases it is not necessary to photograph a training aid as such, but to edit clips from ordinary surveillance, traffic, etc., adding proper narration and examples to show defects in police activity and corrective measures to be taken. This type of training film is perhaps the most effective as it depicts an actual incident which may be studied and analyzed.

Training Films in Sound, Color

The basic training film, of course, is a formal production usually in color with lip sync, sound effects, and proper narration. Such a training aid starts with any Division of the Department which submits a story to the Photographic Section. The Section determines its possibility from a

technical standpoint, cost, and availability of funds for production. The story is forwarded to a review board composed of Deputy Chiefs of the Department who accept or reject the story. If accepted the Section must then, if a script has not been submitted, put the story in script form, make a shooting script, and the thousand and one things that go into a film production.

The film is shot using the technical direction of a member of the requesting Division who must determine the continuity and context of subject matter being filmed. When completed, a rough cut, in black and white work print, is presented to the Control Board for approval. After such changes as may be recommended by the Control Board are incorporated into work print, the film is complet-

Department cameras followed tour of Soviet Premier through Fox studios and elsewhere on West Coast visit.

ed by normal industry practice. All narration, effects, and scoring is done by the Section. Music scores, for background, are recorded by the Police Band from original compositions of their members.

The Police Department, within the scope of applicable practices, makes every attempt to incorporate the latest techniques in the production of motion picture films. We are greatly indebted to all segments of the motion picture industry for the assistance which has always been made available in solving our problems.

"City of the Bees" Filmed by the Moody Institute of Science

☆ Bees are more than busy — they're educated!

To maintain their city, bees tell time, measure distance, solve geometry problems, operate an air conditioning system and even have a highly-developed language all their own.

"When a scout bee returns to the hive fairly bursting with good news of a nectar find, it tells the other bees what kind of food is available, its sugar content, how far away it is and in what direction," says Dr. Irwin Moon, director of Moody Institute of Science in West Los Angeles.

Most of this information is conveyed through an intricate figure-eight dance which nearby bees follow with their antennae.

Interpret "Language" of Bees

In the latest Moody science film, *City of the Bees*, released February 1, the viewer is taught to understand this language of the bees. In fact, man is on the verge of being able to get a message through to the bees by "talking" to them in their own language, the film shows.

Agriculturists are beginning to appreciate the economic value of

BAY STATE FILM PRODUCTIONS, Inc.

BOSTON 80 BOYLSTON ST. MA 2-8804	SPRINGFIELD, MASS. P. O. BOX 125 RE 4-3164	NEW YORK 200 W. 57TH ST. CI 5-4799
--	--	--

bee, not only as a honey producer but, more important, as a pollinator. If some catastrophe destroyed all the bees on our planet, some 100,000 species of plants would disappear and man would be hard put to eke out a living. In fact, crops have been increased 1000-fold simply by placing many hives of bees nearby. This amazing film reveals that the queen bee is not only capable of laying twice her weight in eggs a single day, but she can control the sex of her babies as well.

Moody Films' Dr. Irwin Moon with large scale model of bee used in test of science film series.

The unfertilized eggs become drones whose sole purpose is to impregnate the queen. The fertilized eggs develop into workers endowed from birth with expert skills in a succession of such diverse jobs as janitor, nurse, builder, policeman, air-conditioning engineer and field bee, or forager.

In the hive there is no unemployment because the foragers literally work themselves to a premature death. The queen and drones are killed as soon as their usefulness has passed.

Ruthless Efficiency of Hive

The efficiency of the hive is an utterly ruthless one in which the state is everything, the individual is nothing. "Suggesting that man follow such a system," says Dr. Moon, "is a direct outgrowth of the view that man is nothing but a beefsteak with a nervous system."

It has taken more than 10 years of work with especially designed photographic equipment for the Moody Institute of Science staff to obtain the footage upon which *City of the Bees* is based. The film is presented by the Moody Bible Institute of Chicago, of which MIS is a division.

PROTECTING OUR GRAIN RESERVES

American Cyanamid's film shows proper use of protective equipment within storage bins such as the flat aerated type structure pictured above.

SPONSOR: American Cyanamid Company

TITLE: *Protecting Our Grain Reserves*, 27 min, color, produced by Tiesler Productions.

☆ The grain business has received a vast amount of irresponsible and inaccurate publicity over the past several years. But the full story of how grain is handled and protected makes clear the complexity and the importance of the grain storage business; for a well-handled grain reserve not only protects this country against shortages but also helps reinforce our program for peace in other countries.

Beginning with an explanation of why the term "grain surpluses" is a misnomer, which should in fact be "grain reserves," *Protecting Our Grain Reserves* then presents the straightforward facts. Over eight months in production, the film covers every phase of the grain storage business, including a step by step tour through a number of modern grain storage elevators, a visit to a grain exchange and some interesting extreme closeups of the insect pests that attack stored grain.

Since grain is a living organism, it cannot be just piled away and forgotten, like sand or gravel. In fact, grain must be stored in good structures with adequate temperature controls and massive equipment for loading and handling. It must be continually protected against excessive heat and moisture, bird and rodent contamination and insect pests.

A number of specially developed chemicals work to support the program of protection for this great national resource and American Cyanamid's trained personnel

and in planning protection programs.

Interestingly enough, the proper maintenance of our grain reserves not only results in clean nutritious flour and flour products for the consumer, but also, the cost to the average American family works out to something less than the cost of a pack of cigarettes a month.

Protecting Our Grain Reserves is distributed by Modern Talking Picture Service.

* * *

Ski Holiday in Wintry Aspen

SPONSOR: Aspen Skiing Corporation

TITLE: *Aspen — Winter Mood*, 28 min, color, produced by Dick Durrance Films.

☆ This new film designed for ski experts and tyros alike highlights a

winter holiday of skiing and relaxation at Colorado's famous Rocky Mountain ski resort. It is available to clubs, ski groups, adult organizations and TV stations from Association Films, Inc.

The film shows slalom, downhill and jump competition; ski classes where enthusiasts as young as three years learn from the experts; and professional skiers cutting graceful patterns on Aspen's snow-covered slopes. To convey the sensation of skiing, many of the scenes were actually filmed on skis along the swift, winding trails and on the two-mile continuous descent.

Aspen — Winter Mood also features the relaxing side of a ski vacation and the facilities available for the entire family — an outdoor pool, sun decks, dog-sled rides and dining and dancing at Aspen's many restaurants and night clubs.

The winter poetry of snow and sun provides a sparkling backdrop, with the beauty of white-topped peaks and snow-laden trees — colorful complement to the action on skis.

Aspen — Winter Mood was photographed and directed by Dick Durrance, written by Joe Dunford, edited by Jean Oser. Musical score is by Corelli-Jacobs, and narration by Joseph Julian.

* * *

Better Profits Off the Feed Lots

SPONSOR: Massey-Ferguson, Inc.

TITLE: *How to Beef Up Feed Lot Profits*, 15 min, color, produced by Creative Visual Media Productions.

☆ *How to Beef Up Feed Lot Profits* is a new film which shows exactly what its name implies. Documentary in nature, the picture focuses on two successful farm operations in Iowa which include an automated method for the feeding out of hundreds of head of cattle.

On the Alan Foret farm, a switchboard is shown that looks like one to be found in a small factory. And that's just what it turns out to be — the controls for a "homemade feeding factory." The camera views silage systematically being troughed by a unique auger conveyor system. This efficient operation in itself suggests several ways to cut down on farm hand needs and livestock feeding time.

How to Beef up Feed Lot Profits is being distributed on a free loan basis nationally by Sterling Movies, U. S. A.

IF YOU OWN A BERTHIOT ZOOM LENS, YOU WILL NEED THIS

F&B TAKES THE WIGGLE OUT OF ZOOMS WITH THE BEELAND ELECTRIC ZOOM CONTROL

Here is a rugged yet light weight control that assures you of smooth zoom action from start to finish of each shot. Mounts directly on the lens barrel, no camera attachments are required. Interchangeable mounting clamps allow the same control to be used for the 17mm to 70mm, and 17mm to 85mm lenses for 16mm cameras, and the 38mm to 150mm lens for 35mm cameras.

\$185⁰⁰
Regular

\$275
Super- Quiet

The cameraman can control the picture size by eye or can pre-set the zoom range by quick-set limit stops on the quadrant. A silicon loaded slip clutch and mechanical limit stops provide precise control of the zoom range. The control box is equipped with instant contact push-buttons for easy finger-tip operation of zoom-in or zoom-out. The box mounts on a tripod handle, or directly on the camera for hand-held operation. It also may be held and operated by an assistant. Speed range is rheostat controlled and adjustable from approximately 2½ seconds to 10 seconds of zoom time. A special feature is the very efficient motor which operates for hundreds of moves on one set of 5 type "C" flashlight batteries. Two models are available: Regular, where noise is not a problem. Super-quiet, where whisper-quiet operation is needed for sound recording.

- Smooth, quiet zoom action
- Easy finger-tip operation
- Precise zoom range control
- Zoom speeds from 2½ to 10 seconds
- Interchangeable—for 16mm and 35mm cameras.
- Mounts directly on lens barrel
- Uses type "C" flash light batteries

The Oil Industry at Work

Arabian American Oil Company Films

Show Science and Exploration for Oil

SPONSOR: Arabian American Oil Company

TITLES: *The Science of Oil*, 19 min. and *The Explorers*, 27 min. b/w. produced by Robert Yarnall Richie Productions in cooperation with Film Counselors, Inc.

Both of these films are designed to provide a better understanding of the vast research, skill and perseverance required in the oil industry.

The Science of Oil traces the origins of petroleum, showing the recomposition of pre-historic life under tons of sediment and stratified pressures to form oil-filled caverns deep beneath the earth. It then shows geologists using technical knowledge and seismograph equipment to locate new reserves which lie within the subterranean pools.

The Explorers documents a search for oil in Saudi Arabia. Showing a team of Americans working in cooperation with the Arab government, there are many good close-ups of geologists at work. The film reveals how principles of physics, chemistry, mineralogy, and engineering are combined to evolve equational portraits which aid in exploration.

The Science of Oil and *The Explorers* are being distributed on a free-loan basis to TV stations by Sterling Movies U. S. A.

10th Anniversary of introduction of the 16mm Arriflex camera into U. S. was observed at recent Photokina in Cologne. Receiving silver cup from Dr. Robert L. "World Medicine" film script is reviewed by advisor Malcolm Dooley and producer Jerry Fairbanks during recent studio press conference.

Aid to Wounded in Laos Is Pictured in "World Medicine"

Scenes of medicine from America being administered to actual casualties in the current Laos hostilities were filmed within recent weeks by Jerry Fairbanks Productions. A new motion picture, *World Medicine for World Peace*, is currently being produced by Fairbanks for Parke-Davis and the U. S. Air Force.

Malcolm Dooley, brother of the late Dr. Tom Dooley, is liaison aide on the color film which is being shot in nine lands abroad. Within sound of gunfire, footage was lensed at the Tom Dooley Hospital at Ban Houei Sai in Laos. Robert Scrivner, Fairbanks' vice-president, was in charge of that unit before his departure for additional sequences made in India. Release date for the new picture will be announced at a later date.

Defence Board Shows Launch of Canada's First Satellite

The building, testing and launching of Canada's first satellite, *The Alouette*, is the subject of a new 16mm color motion picture produced by Crawley Films Limited of Ottawa for the Defence Research Board of Canada. Animation demonstrates the purpose of the satellite—to carry out "top side sounding" from above the ionosphere — and explains the sounding and other electronic investigations carried out. It also shows how a two-stage rocket launched the satellite into polar orbit.

The film lays emphasis on the cooperation between the U. S. and Canada as the *Alouette* was designed and built by the Defence Research Board of Canada with

what's new in pictures

Canadian industry manufacturing several important components. Assistance with the text program and launching of the satellite is part of an overall program for space investigation by the U. S. National Aeronautics and Space Administration. The new 14-minute film is available through the National Film Board of Canada.

"Search and Seizure" Covered in New Law Enforcement Film

☆ A new police training film, *Search and Seizure*, is available for rental or purchase by the Institute of Law Enforcement Education, Princeton, New Jersey. The 25-minute sound film explains proper procedures for search and

seizure, under a new interpretation of the law which has resulted from the U. S. Supreme Court decision in the now-famous Mapp vs. Ohio case.

In deciding the Mapp case, the Supreme Court ruled that evidence obtained by searches and seizures in violation of the Constitution are likewise inadmissible in any state court. Frederick C. Bright, director of the Institute, says:

"This is the first training film of its kind to be released specifically on this important subject. It dramatically demonstrates many situations faced by law enforcement authorities and shows how each should now be handled. It discusses reasonable search, defines probable cause and empha-

sizes the need for properly-issued warrants."

The Princeton (N.J.) borough police force provided weapons and equipment as well as clearing off-duty officers for the production. The film was written and produced under the technical supervision and reviewed for accuracy by police training authorities in New Jersey. Rental is \$45 for two days; purchase is \$295 from the Institute of Law Enforcement, 195 Nassau St., Princeton, N. J.

Four New Sports Pictures Are Released by Johnson Motors

☆ Johnson Motors, an active spokesman for the film medium, has supplied its dealer family with a group of four new color motion pictures ranging from water skiing, exploring in the Everglades, fishing in Mexico, to a tour of Hawaii. Titles are available for loan through dealers.

The spectacular climb in water skiing interest is shown in *Ski Boom*, which also shows how a couple of youngsters use homemade items to enjoy the sport. The Everglades are explored in *Land of Forever* and viewers get a new look at deep-sea fishing with small craft in *Trekkin' Boat from Texas*. Outdoor writer Bob Brister of Houston, Texas, designed and built an outboard for deep-sea fishing, trailed it over the mountains to Mexico for an ocean fishing adventure.

Hawaii's traditional greeting, *Aloha*, is the title of Johnson's fourth new film on the 50th state. Surfing, boating, sightseeing and even bird watching make an entertaining visual visit to the Pacific island. A new list of all Johnson films is available at these dealer sources.

LaBelle Industries, Inc. Dept. B • OCONOMOWOC, WIS.

Oklahoma Governor Bellmon (right) is briefed for film scenes by the producer, Carl Stevenson (center) as cameraman Bill Wadsworth sets up a television spot sequence.

Films Helped Elect Oklahoma's First Republican Governor

☆ Filmed television spots produced by an energetic young Oklahoma film production company helped play a key role in the election of the first Republican governor in the history of that state.

One of the first projects of Stevenson Film Productions, Inc., of Oklahoma City, was to produce 19 film spots for Governor Henry Bellmon's successful campaign. "We tried some new and fresh ideas," says producer Carl Stevenson.

"Actually, the versatility of the motion picture proved quite beneficial to Mr. Bellmon's image during the campaign," he notes. "We were able to show him loading hay and driving a tractor on his farm in Billings and then cut

to him in a business suit, seated at a desk giving dictation to his secretary. From there we cut to a scene with Mr. Bellmon standing over highway plans with a construction engineer.

"We also employed the still picture technique for scenes that were impossible to shoot live. One example was a still photograph of Mr. Bellmon and former President Eisenhower shaking hands at Mr. Eisenhower's Gettysburg farm.

"The scene opened with a frame-filling shot of the handshake, then zoomed out to reveal Bellmon and Eisenhower as our announcer said, 'This is Henry Bellmon, the man who is making political history in Oklahoma!'

"And he did!"

Decline in Job Accidents Is Traced to "Safety at Work"

☆ The requirements for a successful industrial safety program are outlined in *Safety at Work*, 19-minute color motion picture recently released for national distribution by the Aetna Life Affiliated Companies.

The film shows how the use of accident prevention methods and safety equipment is causing a decline in work injuries and deaths. It stresses the key safety role played by job foremen and other plant supervisory personnel. The film was lensed at The Stanley Works in New Britain, Conn. and features Donald G. Vaughan, assistant vice-president, engineering department of Aetna and Alfred B. Auerhan, safety director at The Stanley Works.

Safety at Work is available for free loan from the Information and Education Dept., Aetna Life Affiliated Companies, Hartford 15, Conn.

Home Economics' Useful Role

A sound filmstrip intended to help the teacher or other home economist explain the contribution made by home economics education has been co-sponsored by the American Home Economics Association and The Pillsbury Company.

Education in Essentials—The Story of Home Economics in Our Schools tells what it is, what it seeks to accomplish and why it is essential for young women whether or not they will go to college. It is designed especially for school administrators, vocational counselors, teachers and also for parents and home ec students.

Checking Effectiveness of TV Commercials

"Target Testing" Unveiled by Niles Communications Centers

THE SEARCH for pre-release confirmation of audience response to filmed television commercials, emphasized by mounting time costs, was illuminated last month by a Chicago producer. Through

Studio executive: Fred A. Niles

an arrangement with James Witherell & Associates, advertising research firm, the Fred A. Niles Communications Centers is offering minimum-priced research in combination with commercial production.

Niles calls this a "Target Testing" system and offers it in this sequence:

Series of specially-produced spots will be tested through Witherell's established channels in four divergent metropolitan areas, widely-separated geographically to

allow for regional consumer preferences.

From this tested series, commercials which test out as most "on target" for the advertiser's specific marketing needs will be refined and delivered for campaign scheduling.

Jim Witherell believes that research must produce eight pieces of information:

1. Attention Index: the measure of "stopping power" on the television screen.

2. Theme Registration: research must report what viewers feel about your message, brand claims, benefits claimed, etc.

3. Format Registration: do the animation, actor, announcer or action on the screen aid or hinder the sale?

4. Brand Value Index: a good commercial should increase the

Researcher: Jim Witherell

way viewers value your brand, certainly not decrease it.

5. Audience Reaction Profile: according to specifications, spots should be aimed at certain age, sex, income, user, etc. Are you reaching your "Target" audience or one you don't want? Why?

6. Buying Intent Index: how many viewers are persuaded, mentally rehearsing use or purchase of the advertised product?

7. Involvement Score: did viewers understand or were they left cold?

8. Summary: what the commercial accomplished and what it did not accomplish.

"Target" testing was announced as reliable, economical and fast. It will be made available soon through the several Niles' offices. □

NOW, whoever that was who said that Frank Willard is an eccentric must have been jealous of the fact that Mr. W. has built the South's most modern film studio by producing some of the most imaginative and effective motion pictures that ever copped a clack of awards. So there.

If you want it best, fast, and pretty reasonable, contact

Firestone veteran Art Weitzel

Art Weitzel, 45-Year Veteran of Films, Retires on July 23

☆ A real veteran of business films and nearly every phase of industrial photographic work has announced his retirement after a 45-year career in these fields. A. G. Weitzel, director of photography at the Firestone Tire & Rubber Company, will round out four and a half decades of service on July 23.

Art Weitzel's career began in 1915, 1916 and 1917 when he worked as a projection booth assistant in the Lyric Theatre in Cincinnati where Lyman Howe circuit films (silents) were played. Since that time he has worked with all of the leading motion picture studios, newsreel companies and now heads a department with 13 people at Firestone.

Art's Been to the Races . . .

Auto racing is a special forte. For the past 34 years he has covered and directed the photography at the Indianapolis Auto Races as well as highspeed events on the Utah Salt Flats. Millions of feet of both silent and sound film have passed through his cameras.

Stars, political dignitaries, sportsmen and business leaders have been among his subjects through these years. Firestone's film vault contains millions of feet of 35 and 16mm positive and negative footage as well as hundreds of thousands of still negatives dating back to 1915. The images cover the development of the rubber industry as well as valuable documentary footage of historic events.

Keeping a Hand in the Game

Art Weitzel isn't really leaving the business. Between periods of well-earned relaxation in Florida during the winter months, he plans to remain in Akron where he will "concentrate on a few ideas that I have on developing continuous projection equipment for industry,

along production lines

equipment which has become very popular. I have a few ideas you will hear about in the future."

And he'd like to hear from old friends throughout the industry. Write Art at the Weitzel residence, 486 Reynolds Avenue, Akron 13, Ohio.

Tom Valentino Announces 8th Catalog of Background Music

An Eighth Edition catalog of background music has been released by Thomas J. Valentino, Inc. 150 W. 46th St., New York 36, N. Y.

The new Mood Music Catalog contains the latest in recordings for videotape and filmed commercials, television films, theatrical and factual motion pictures as well as for radio and newsreel use.

Receiving Freedoms Award (at right) is Robert Finchout, vice-president, Association Films. Dr. Kenneth Wells, head of the Freedoms Foundation (at left) made presentation of George Washington Honor Medal to national film distribution company for its "Films for Freedom" program.

UNITED AIR LINES SELECTS...

Each year, United Air Lines will train 1200 stewardesses and 7000 managers better and faster with audio-visuals projected on...

17 RADIANT AUTOELECTRIC PROJECTION SCREENS

The right Radiant Screens mean sharper, clearer, brighter projection of motion pictures, film strips, slides and overhead transparencies. That is why United Air Lines selected 17 convenient, Radiant electrically operated Screens, including 7 new, economical COMPACT models, to equip its 2 million dollar Education and Training Center. Whatever your audio visual requirements may be—classroom, lecture hall or auditorium projection—projection in darkened or partially lighted rooms—you will find exactly the wall or tripod screen you need in Radiant's wide selection of models and screen surfaces in every price range. **ASK YOUR RADIANT AUDIO VISUAL SPECIALIST TO MAKE A SCREEN SURVEY WITHOUT OBLIGATION!** For full details of Radiant's complete line of quality projection screens, write to Dept. Marshall Faber Back in Films: Opens Own Studio in Denver

☆ A former Washington, D. C. producer has opened his own film production facilities at 312 S. Pearl St., in Denver. Marshall Faber, former Director of Program Development for the Mullins Broadcasting station, KBTU, Channel 9, in Denver, owned and operated a Washington studio for 11 years. He entered television in 1950, serving in every capacity from cameraman to station manager.

Faber served as consultant to the McClatchy Broadcasting Company in Sacramento, Calif. before joining KBTU. For both McClatchy and Mullins he worked with architects in designing studio facilities. Outstanding film productions at KMJ-TV in Fresno, Calif. and at the Denver station brought awards from the DuPont Foundation, the National Association for State and Local History and the American Broadcasting Company. He also acquired first place honors for tv commercials given by the Denver Advertising Club.

Two More Design Awards to Technicolor's 8mm Projector

☆ Two major design awards have gone to a Technicolor Corporation engineering team for its work in developing the company's Instant (8mm) projector.

Clarence O. Schrader, Technicolor consultant who headed the five-man group, accepted a Materials in Design Engineering trophy on May 20 at the Americana Hotel in New York. On May 22, he received a 1963 Master Design Award at Hotel Pierre ceremonies in the same city. The latter prize is presented by PRODUCT ENGINEERING magazine.

The equipment previously received the Certificate of Design Merit from the Industrial Designers Institute and the 1962 Zinc Die Casting of the Year Award from the New Jersey Zinc Co.

Muller, Jordan & Herrick Move

☆ Muller, Jordan and Herrick, Inc. has moved to new custom-built offices at 757 Third Avenue in New York City. The new quarters will house the company's 35 employees.

Equipment Section Next Month

☆ The next issue of BUSINESS SCREEN will feature an Audio-Visual Equipment Trade Fair section, reviewing the latest in projection equipment and accessories.

Mini-Monitor Sound Reader

Mini-Monitor is First Small Battery-Powered Sound Reader

The new Mini-Monitor, the miniature, transistorized, battery-powered, magnetic sound reader, complete with amplifier and speaker, is announced by Florman & Bass, Inc., New York City. Weighing less than 8 ounces, the Mini-Monitor is about the same size and width as a pack of cigarettes. Actual dimensions are 5 1/2 by 2 inches.

Mini-Monitor has many uses — it can be carried in a pocket for field and location use for checking and playing back magnetic tape. It can be attached to the editing table's synchronizer recorder or sound processor; in fact any place where magnetic tape is being used.

Mini-Monitor has both low and high impedance input and will drive an auxiliary speaker up to 8 inches in size. Price complete is \$150. Check NP # 1 in the convenient request form for additional data.

Omnitar True-Telephoto Lens Is Now at Birns & Sawyer

Said to be a new and exciting development in the field of refractive optics, the 1000mm F4.5 Omnitur "TT" (True-Telephoto) lens has been announced by Birns & Sawyer Cine Equipment Company, Hollywood.

The lens is a superb five-element apochromat designed specifically to cover the 70mm (1 1/4 x 1 1/8) format, although adapters are being prepared to utilize the lens on all motion picture and still cameras. The new Omnitur is claimed to be the fastest telephoto lens developed anywhere in this format length and format. Its development was timed to coincide with the new 70mm high speed motion picture cameras utilizing color film for missile tracking, where the combination of high speed film movement and slow emulsion factor makes the "super" lenses necessary.

Presently made in Germany, the Omnitur lenses, patents and engineering

AudioVisual Equipment TradeFair

are of American origin. Birns and Sawyer is negotiating to produce the lens in the United States. Allow six months for delivery. For complete information check NP # 2 in the convenient Request Form on this page.

Mitchell Offers Angenieux Lens

New 10 to 1, 25mm to 250mm Angenieux zoom lenses are available on order from the Mitchell Camera Corp. Shipment of the advanced zoom lenses are being made within 30 days following receipt of orders. For further data on these advanced optics check NP # 3 in the convenient Request Form on this page.

New Tripod Triangle Offered Has Strong Center Construction

A new tripod triangle is now being offered by The Camera Mart, Inc., New York. The Camart triangle features center construction with a recessed casting to eliminate unsteady hinges. One stationary triangle bar arm and two moveable bar arms allow the triangle to be collapsed into a flat position for compactness when not in use.

Construction of the center piece channel and bar arms is all aluminum, while screws and bolts are nickel plated. The shoes for the tripod leg tips are deep cast at an angle with a stop rest.

Tie-down clamps are of the floating design for centering of the tripod legs. The tie-down knob fits the hand for pressure application. Tie-down bolts are threaded to provide a lock.

The complete shoe assembly of the triangle can be unscrewed from

the latest in tools for film production and for projection

Camart's Tripod Triangle

the triangle arms for use as a camera car-top tripod leg clamp set. The Camart triangle is priced at \$34.95. Check NP # 4 for additional literature on this item.

Telescreen Converts Projectors For Rear-Projection Showings

A low-cost rear-projection system, the Telescreen, that converts movie and slide projectors into rear-screen projectors has been introduced by Hudson Photographic Industries, Irvington-on-Hudson, New York.

Designed for sales or advertising presentations, for teaching purposes, for theatre lobbies, convention displays and other audio-visual applications, the Telescreen can be used without darkening rooms. It uses a built-in plastic screen that is said to surpass conventional ground glass in light transmission and is free of grain. Light is evenly dispersed, without hot spots, and there is no fall-off in brilliance when the screen is viewed from a sharp angle.

The Telescreen is not connected to the projector. The image is focussed through a clear glass window onto a front-surfaced mirror and thence to the special screen. The entire optical system is housed

in a plastic case which seals the system against dust and fingerprints. Chromed rails permit adjustment of height and a convenient handle.

The Telescreen is available at \$16.95. For additional data, check NP # 5 in convenient box on this page.

Balanced Voice Conversion for the Auricon Camera

Two accessories for the Auricon camera have been announced by S. O. S. Photo-Cine-Optics, Inc. These are balanced Cine-Voice Conversion and an improved Transist-O-Sound Amplifier with an exclusive built-in limiter.

The S. O. S. Cine-Voice Conversion consists of cutting down the Cine-Voice Camera to the lowest practical point and mounting a machined anodized plate assembly to accept standard Mitchell 400 feet or 1200 feet magazines. Installation includes an external silent torque take-up motor to handle loads from 400 to 1200 feet. This also includes a footage counter. The entire operation has been priced at \$495.

The new Transist-O-Sound weighs 2 and 3/4 pounds with the added exclusive feature of a built-in limiter. The original Transist-O-Sound is used by over 100 stations in daily newsfilm work. The new model 2CSA-1L permits two low microphone input impedances of 35 or 250 ohms, permitting high quality broadcast type mikes to be used at front under the lens. There is a separate gain control for each channel with 20 per cent more available microphone gain per channel than the old unit.

The new Transist-O-Sound is available either as a permanently attached unit with no wires, or a separate unit which can be quickly attached through tripod stud holes. It is priced, complete with batteries, at \$425. Check NP # 6 in the New Products Form for complete data.

DuKane Has Auxiliary Speaker For the Micromatic Projector

A new auxiliary speaker for use in conjunction with the DuKane Micromatic automatic sound filmstrip projector, is announced by Howard Turner, sales manager, audio-visual division, DuKane Corporation.

The new speaker, model number 6A235, is a lightweight, high-fidelity speaker that attaches to the bottom of the Micromatic case for convenient carrying. It is equipped with a 30-foot cord that plugs into

Audio-Visuals Build Sales:

(CONTINUED FROM PAGE 39) and the filmstrip. One week later, Lieban and his production crew arrived at the location sites with approved scripts and a brochure layout supplied by the agency.

Scripts called for full pictorial coverage as the Saf-T-Climb device was installed on the 80-foot-tall Crown-Zellerbach Corporation water tower in southeast Los Angeles, and on a towering steel-framed derrick at the Baker Oil Tool Company, not far away.

Shortly after daybreak the Chapman 5 and the safety device installation crews began work simultaneously. Lieban synchronized direction responsibilities for his crew, with Frank McGuire a busily-coordinating production manager. Wayne Mitchell used a 16mm Bolex, and William Garnet was loaded down with stereo, 4x5 and reflex cameras.

There was little or no staged action, and equally small opportunity for retakes. The pace necessarily was frantic, but judgment had to be cool and accurate. Total shooting was finished in three days, and delivery of all projects was made two days ahead of the target date.

19 Prints Hard at Work

Today, 19 motion picture prints are hard at work, one with each of the company's representatives. Another pair of prints fill places of usefulness in continuous-loop projectors in exhibit booths, one on the east coast, one in the west. Another eight prints are on a loan-circuit over which, so far, they have traveled nearly 100,000 miles, telling the story of the device which gives total protection from falls to men on their way up, or down. An estimated 28,000 buyers and users of safety and climbing equipment, not only in the United States but also abroad, have viewed *Safe Climbing With Saf-T-Climb*.

Now that the hard-sell filmstrip is in the hands of company representatives who are equipped with DuKane's newest Automatic Flip-Top Projectors, Stjernquist and Lane have set their sales target at a 100% increase over last year.

A few days ago, Air Space Devices' production manager Bill Gardiner, enmeshed in the still-rising tide of orders, overheard his two bosses bragging about what a great job the film is doing. "Oh, come on, you guys," he said. "You just say that because you acted in the picture." He should talk, though. He was in it, too, and he'll be seeing the results in his department for a long time to come. □

... WHEN THE MICHIGAN CONSOLIDATED GAS COMPANY WANTED TO WARM UP MICHIGAN'S BUSINESS CLIMATE? Michigan has a romantic past and rich future potential as an important business and industrial center—but The Michigan Consolidated Gas Company felt that not enough people realized it. So they called on us to help get the Michigan story told. This is how The Detroit Free Press reviewed the result: "For any whose faith in Michigan needs restoring, we recommend a 28-minute color film called 'The Michigan Story.' It is a venture into public service that comes off splendidly." Groups throughout the U.S. have viewed it. Others will continue to do so. Film clips from this movie were used on "The Perry Como Show" the week it featured Michigan. This is the kind of work we can do for you, too. All we need to know is what good idea you want to share and with whom—employees, dealers, customers, the general public. We'll help you say it just the way you want it said. **THE JAM HANDY ORGANIZATION**

NEW!**SIEMENS****MODEL 2000****16MM SINGLE
DOUBLE SYSTEM**

THE WORLD'S ONLY LOW COST 16mm *DOUBLE BAND* *OPTICAL/MAGNETIC* SOUND PROJECTOR

- Uses 16mm perforated magnetic film on a separate mechanically interlocked sound system!
- Plus all features of conventional optical/magnetic sound projectors!
- Permits record, re-record, mix and playback functions with positive synchronization!

THE MOST VERSATILE, MOST ADAPTABLE 16mm SOUND PROJECTOR EVER!

★ ★ ★

Preview Projector: Work print on one side and sound track on the other, and the Siemens 2000 16/16 gives you 16mm picture projection with 16mm sound interlock. Preview Theatre quality, too!

Quick Access: original 16mm film on the projector side—original 16mm sound recording on the 16mm magnetic channel, gives you interlocked, synchronous sound. It's portable, too.

Multi-track Films: Show multi-lingual, or other special purpose multi-track sound films, easily, inexpensively. Playback, or playback and record, too.

"One-show" films, "quickie" productions, limited-purpose "low budget" shows — whatever the special purpose, with the picture and sound features of Siemens Projectors, you can do them all to professional standards, and at low cost.

Plus many others

The modular designed Siemens 2000 Double/Sixteen offers a wide range of uses to serve virtually the entire spectrum of professional requirements. Its modular **two-system** assembly anticipates every application, assuring maximum adaptability to every sound projection. Permits as many as **nine** ways to record and re-record. The "Single System" side is designed for optical playback and magnetic recording/playback on full and half-track facilities. The "Double System" uses 16mm perforated magnetic film on an added rear sound channel, mechanically interlocked with the projector for absolute synchronization.

Use the Siemens 2000 16/16 as a one-piece sound studio, or as a special purpose Sound-Projector supplement to your existing facilities. No matter how "special" your requirements, you will find this the most adaptable and the most useful Sound Projector ever made.

"Focus on Change" at National Audio-Visual Convention;
Dealer & User Groups Open Sessions in Chicago on July 20

CHANGE IS THE THEME of the 23rd Annual Convention of the National Audio-Visual Association as it opens its four-day program (July 20-23) at the Sherman Hotel in Chicago.

The keynote presentation, "Focus on Change" will be made on Saturday morning, July 20, when George Murphy, vice-president of the Technicolor Corporation, presents "an analysis of the new direc-

NAVA Keynote: George Murphy

tion which our industry and its markets are taking in the continuing effort to shorten the distance between learners and subject matter."

Following the stage, screen and television star on the opening program is NAVA's executive vice-president Don White, who will present a highly-visualized examination of several of the more prominent types of a-v equipment as he predicts their roles in tomorrow's audio-visual instruction in "The Challenge of Change." Both men will be introduced by Robert P. Abrams of Philadelphia, general chairman of the convention.

The opening general sessions will be followed by numerous equipment manufacturer and producer sales meetings held throughout the day. Others, such as Bell & Howell, Graflex, Kalart Victor and RCA will hold their sales meetings on the preceding day.

The Sunday program will fea-

ture a NAVA tradition: the Audio-Visual Worship Service. In the afternoon, members of the NAVA Industry and Business Council, of which the Publisher of BUSINESS SCREEN is a member, will hold their annual meeting in the Gold Room.

Introduce the New Officers

The Convention's second general session, on Monday, July 22nd, will find retiring president, Harold A. Fischer of Orlando, Florida at the gavel for the annual business meeting of the association. The concluding event of that session, the introduction of new officers and directors, will be followed by a presentation, "Utilizing Media in a Teaching Unit," conducted by Alan R. Fiers, audio-visual consultant, Minneapolis Public Schools.

Numerous audio-visual organizations from the fields of education, industry and medicine will hold seminars and luncheons during the NAVA Convention. The Audio-Visual Education Forum, first initiated by the Illinois Audio-Visual Association in 1960, will hold its fourth annual sessions. Donald W. Smith, director of the Department of Audio-Visual Instruction, Kansas City Public Schools is chairman of the Forum. These meetings will be held on Monday, July 20, in the Crystal Room at the Sherman.

Industry, Medical Groups Meet

The National Visual Presentation Association will hold its Midwest "Day of Visuals" program on Monday in the Gold Room. The A-V Conference on Medical and Allied Sciences will also be held that day, beginning at 9:00 a.m. in the French Room, and will continue on Tuesday morning.

A luncheon of the Industrial Audio-Visual Association is also planned during the Convention period for the convenience of local and national members attending the Trade Show exhibits.

A major attraction of the Convention is the NAVA Trade Show. This year some 230 booths, fea-

The MPO Videotronics Center at 222 East 44 Street shown in an artist's rendering. In the background is Grand Central Terminal and the new Pan-Am Building. The new studio Center houses management offices for all MPO divisions, as well as shooting stages and film finishing operations. The Company makes sponsored films and television commercials, does sales meetings and sound filmstrips, offers complete communications counseling.

The MPO Studio Center at 800 N. Seward in Hollywood, California. As a truly national film making organization, MPO can photograph on either coast, edit in East or West regardless of where the film was shot. Personnel are interchangeable. And, of course, MPO produces many location films, both in the U.S. and 'round the world.

Enter: A New Era in Film Making

The sponsored film industry enters a new era with the completion of the MPO Videotronics Center. Here, in the heart of mid-town New York, is the most complete motion picture facility ever housed in a single structure. It contains nine air-conditioned shooting stages, complete production shops, and the most advanced recording, editing and screening facilities.

As the headquarters of a nationwide film organization, the MPO Videotronics Center was planned and built to provide our clients with greater efficiency and creativity in film production. Film making is easier and simpler at the Center because every requirement is close at hand. Technicians and creative personnel are in constant and close communication throughout every phase of film making.

We're proud of our new facilities and believe they will be interesting and exciting to everyone in the film business. If you buy, supervise or produce motion pictures for your company, call Judd Pollock at TN 7-8200. He'll be pleased to arrange for a tour.

Your Invitation to Madrid, Spain and the 4th International Industrial Film Festival

Dear Friends,

The Confederation of Spanish Industries extends this cordial invitation to business and industrial executives concerned, as we are, with progress being made in better communication through the medium of motion pictures and other audio-visual techniques, to attend the Fourth International Industrial Film Festival, at Madrid, beginning on October 14th.

Spain bids you visit the cultural and industrial sites of special interest to you on this important occasion.

Plans are being made for an Industrial Film Festival of international interest, with films of all Western Europe, the Americas and many other countries in the world competing for honor awards.

We assure you of a most pleasant and profitable visit to our country and of the hospitality for which Madrid is justly famed.

Cordially Yours

Javier de la Cueva, Secretary General
Organizing Committee, IV Int'l Festival

July, 1963

Select 14 University Films for UFPA Permanent Archives

☆ Fourteen films produced by ten universities have been selected for the permanent archives of the University Film Producers Association. UFPA annually nominates titles deemed worthy of historical preservation and these become part of its archives in Rochester, New York. John and Elizabeth Flory are in charge of the collection.

Latest films to receive recognition include: *Boredom at Work*, University of Oklahoma; *Careers in Data Processing*, University of Southern California; *The Cattle Feeders and Nozzleman*, Iowa State University; *Football As It Is Played Today and Futures in Welding*, Ohio State University; *Motion Picture*, Southern Illinois University; *The Pioneer Blacksmith*, Indiana University; and *The Second Show*, Yale University.

Five student productions were also selected for the UFPA archives from universities throughout the country which nominated them.

Gran Prix for U. S. at Cannes Ad Festival Chevrolet Film Cited in International Ad Film Awards

TELEVISION COMMERCIALS and one 55-minute advertising film from the United States shared the Gran Prix and three first-place awards at 10th International Advertising Film Festival concluded last month in Cannes, France.

The Gran Prix winner was the Chevrolet Division (GM) "truck egg test" commercial out of Campbell-Ewald agency. Produced by Ty Thyssen in association with David Greene, the Festival's top award-winner shows the smooth ride of a Chevrolet truck even when eggs are placed in baskets attached to a bouncing rear axle.

Chevrolet and Campbell-Ewald also took a first in the cinema film category with the 55-minute picture, *Four Different Kinds*, produced by Arco Film Productions. Three other first-place awards in the television field went to these spots:

1. The Mennen Company, via Grey Advertising, won a first in the live-action, over 45 seconds group, for its Baby Magic lotion spot produced by WCD Productions and Saul Bass & Associates.

2. Eastman Kodak and the J. Walter Thompson Co. shared honors for "turnaround boys" a camera spot produced by Sutherland Associates. It was first in the use of animated objects, over 45 seconds group.

3. Goodyear Tire & Rubber, through Young & Rubicam, was another "first" in 60-second, live action category with *Woman's Day* and *Prototype* spots produced by VPI Productions.

U. S. Takes Three "Seconds"

There were three second-place U. S. winners:

1. Redfield Importers (Martini & Rossi vermouth) and Reach McClinton & Co. agency won a second in the "live action up to 20 seconds" group. The spot was pro-

Polaroid's "Trumpet" created by Pelican Films for Doyle Dane Bernbach Agency won a second award in its category at Cannes.

duced by Columbia Pictures-Screen Gems.

2. Mishawaka Rubber and Campbell-Mithun agency's spot, *Spring Sprong*, won a second award in the live-action, 20 to 45 seconds' class. Sarra, Inc. was the producer.

3. The Polaroid Corp., through Doyle Dane Bernbach agency was awarded a second prize for its "trumpet spot" in the live-action, over 45 seconds group. Pelican Films, Inc. was the producer.

68 of 602 Television Spots

U. S. participation in this specializing Festival included 68 of the 602 television commercials entered, attendance by delegates and jury service by Cleo Hovel, vice-president of Leo Burnett Co. agency, Chicago, and Harry Wayne McMahan, advertising consultant.

The Festival is sponsored by the Screen Advertising World Association Ltd. Peter Taylor, managing director of the affair since 1955, noted that 1,030 films were screened during the five-day competition which ended June 21st. In addition to the 602 tv commercials there were 428 screen advertising spots. 1,300 delegates attended the event at Cannes.

N. A. M. Panelists Select U. S. Entries for Madrid

THE 15 MOTION PICTURES selected to represent American Industry at the Fourth International Industrial Film Festival have been announced by the National Association of Manufacturers. The festival will be held in Madrid, Spain this year on October 14-19 under the sponsorship of the Confederation of Spanish Industries. (Also see other pages, this issue.)

The only annual film festival devoted exclusively to business-sponsored European and American motion pictures is under the patronage of the Council of European Industrial Federations (CEIF). Films are accepted only through national associations or federations of manufacturers in each participating country. The NAM is the official sponsoring organization for the United States' entries.

Total of 77 Entries Viewed by Panel

Under the Association's sponsorship, a group of five industrial audio-visual specialists reviewed a total of 77 pictures submitted by U. S. companies. Members of the panel were: Otto Niendorff, of The Anaconda Company; William O'Brien, of the Schering Corp.; Willis H. Pratt, Jr., of the American Telephone & Telegraph Co.; Jack Siegal, of International Business Machines Corp.; and Frank Rollins, of the E. R. Squibb & Sons Division of Olin

Mathieson Chemical Corp. Janet R. Wilkins, NAM audio-visual producer, was coordinator of the project.

European Juries Are Making Selections

Juries in European lands are also active in selecting their respective countries' films for the Madrid showings. BUSINESS SCREEN's European Editor, Peter Rigg, is taking part in the British panel's current previews; other groups in West Germany, France, Italy and Belgium report widespread interest in this specializing industrial film program.

The 15 U. S. selections are listed on this page; as lists of European entries are received, they will be provided to our readers in subsequent issues.

* * *

Board Chairman of Bell & Howell Bids for Nomination as Governor of Illinois

Long active in national Republican affairs, Charles Percy has surrendered his post as chief executive officer at Bell & Howell to enter Illinois' politics. Making an early start for the Republican nomination as governor in next year's primaries, this brilliant and youthful leader in our industry has begun a downstate tour to learn voters' views and to make *his own* policies better known throughout the area.

Although he faces formidable obstacles in both parties, we know the tremendous capacity of this man. Illinois sorely needs his intelligent leadership; this industry's loss will be a tremendous gain for the citizens of our home state. *Lay it on the line, Chuck!*

WASHINGTON FILM COMMENTARY

**Murrow Reviews U. S. Information Agency Film Program;
 Cuts to Be Made if House Budget Slash Is Not Restored**

FACED by impending budget cuts for the U. S. Information Agency, director Edward R. Murrow answered the House of Representatives slash of \$15 million from the Agency's requested \$157.9 million for fiscal 1964 with a review of programs which may now be pared.

In a June 19 address to the Advertising Federation of America convention in Atlanta, Georgia, Murrow noted that "600 million people a month see USIA films produced in 52 languages. We produce television, placing over 500 programs every year in 61 countries.

"Let me share with you what we may have to face eliminating," he said, "Latin America and Africa are our two prime areas of concern.

Cites Aims in Latin-America

"In Latin America we asked for \$10,747,000 to cover our operations in 23 countries. The United States, in concert with the other American republics, seeks in Latin America a social revolution across the span of an entire continent within a few years without resort to violence. In all the noble deeds of man best chronicled by history there are no examples of success on so comparable a scale.

"The modest commitment of our Agency's resources to this effort may have to be pared. We had plans for more films to show the failures of communism, to relate the Castro experience as part of a world wide pattern of failure.

"We planned films in addition to those already done to illumine the concept of the Alliance for Progress, films that would emphasize the self-help of Latins and the need for participation not just by governments alone but by people as well. But we shall probably not have enough dollars to tell the story of the extent we consider adequate and necessary. . .

Posts in 33 African Countries

"Or take Africa," he noted, "We are staffing today 56 posts in 33 countries. Five years ago we were in only 16 countries . . . The increase we had requested in Africa was only 1.8 million. What had we planned to do with it?

" . . . We had hopes of a series of documentary films on how the United States is aiding Africa in the formidable task of educating

a continent of people who see education as their springboard into the 20th Century. We would have filmed AID construction for the University and colleges in Ethiopia, or the vocational training school in Guinea. Or films on the Food for Peace programs, where the U.S. has averted famine and provided jobs."

Film Medium's Expanded Role

Later in his talk, Murrow outlined the Agency's use of the film medium with these words:

"This Agency has spearheaded the intelligent use of the motion picture in the national interest to a degree unprecedented in the United States with the possible exception of World War II. This development has taken place in the last year. Its success is evidenced by the response from overseas as well as by the favorable appraisal of the effort by the press, officials in government, and members of the Congress.

"Now that the USIA has put the government in the position of having the operating potential to make use of American film-making resources, it is indeed a setback to receive a vote of no-confidence from the House of Representatives. On last year's limited production budget, we produced examples of what might be done in various fields with motion pictures. In fiscal year 1964 we had expected to have funds available to put America's most talented film-makers to work on themes of priority importance. The necessary funds included an increase in picture costs and an increase in the number of pictures.

Plans for Other Film Series

"We had intended to treat such issues as America's racial challenge in a series of films which would explain to the world this most basic of American problems. We wanted to do 30 films on such subjects as Disarmament and the need for a Test Ban, Progress Through Freedom on the U.S. social scene, the results of communism. The budget cuts may slice this plan in half.

* * *

"The Only War We Seek" Shows Objectives of U. S. Foreign Aid
 ☆ The Agency for International Development describes the foreign aid program of the U. S. in a new

3-minute b&w sound motion picture titled, *The Only War We Seek*. The film defines the Agency's organization, operations and objectives, largely in human terms, and also describes "shirt-sleeves diplomacy" in action — aid at the person to person level.

In this worldwide panorama of need, action and hope, American citizens are shown putting the weapons of modern technology to work combatting man's traditional enemies of poverty, hunger, disease and ignorance.

In a mountain village in the Andes, a boy and his father sit together in a new classroom learning to read; in North Africa, a farmer tills his field with a steel plow for the first time. In Southeast Asia, a concrete bridge spans a river linking formerly isolated farm areas with market centers of the city. These are typical sequences, derived from films of the U. S. Information Agency, the United Nations or shot at American assistance missions around the world.

Available on free loan to group audiences from nationwide educational film libraries (write AID, Washington 25, D. C. for the distribution source nearest you). *The Only War We Seek* is also available for outright print purchase at \$40.65 from Capital Film Laboratories, 470 E. Street, S. W., Washington, D. C.

Color Film for India's People Shows President's Visit to U. S.

The visit to the U. S. of His Excellency Dr. Sarvepalli Radhakrishnan, President of the Republic of India, was the subject of a 20-minute color documentary produced for the USIA by Owen Murphy Productions, Inc. of New York. The film is a documentary conveying to the Indian people the significance of the visit to the U. S. by their President and a view from his vantage point of America and American life.

Goals of Central America Are Shown in "United for Progress"

President Kennedy's visit to Central America was filmed under the direction of Charles Guggenheim. The 30-minute color film, *United in Progress*, was narrated

by John Huston. It chronicles the history and development of the Central American community and common market within the framework of John F. Kennedy's meeting in March with the six Central American presidents.

Part of a major motion picture effort to create understanding and support for the Alliance for Progress, the film will be exhibited in English, Spanish and Portuguese versions in approximately 3,000 theaters plus subsequent non-theatrical showings.

George Stevens, Jr., Director of USIA's International Motion Picture Service, expressed the U. S. Government's appreciation for "John Huston's generous contribution of his time and talent." Prior to this, Houston has narrated only three other films — all his own. These included two classic war-time documentaries, *The Battle of San Pietro* and *Let There Be Light*, and his recent feature film, *Freud*, the official U. S. entry in the Berlin Film Festival this year.

National Live Stock, Meat Board Premieres Aerospace Picture

More than 400 leaders in the nation's livestock and meat industry previewed the new 15-minute color motion picture, *Stars in Their Eyes*, at the June 26-27 annual meeting of the National Live Stock and Meat Board in Memphis.

Sponsored by the Meat Board in cooperation with the United States Air Force and the President's Council on Physical Fitness, the new film was produced by Douglas Film Industries of Chicago and will be distributed through the Air Force film library as part of that Service's cooperative sponsored film program.

Designed for teen-age viewing, *Stars in Their Eyes* depicts the nation's aerospace program as exemplified by Air Force students in training at Edwards Air Force Base in California. Goal of the film is not necessarily to motivate youth toward being a space age pilot but to encourage young viewers to use the same sound principles of health and diet required in space flight.

Meat, the film shows, plays an important role in the diets of space cadets and servicemen consume three times as much of this protein-rich energy food as the average American. The need for strong bodies through exercise and well-balanced nutrition is stressed in a short talk by Col. Charles E. Yeager, Commandant of the Aerospace program at Edwards.

KALART VICTOR MOVIEMATIC AND DUOLITE MODELS

where will your next prospect be

... out in the barn ... in the office ... the factory ... or on a convention floor? Wherever he is you can picture the solution in the best selling atmosphere, next to his problems, with the versatile single-case Moviematic repeater 16mm projector. With Moviematic you're not selling in the dark: you can watch your prospect's expression as your sales points are made on film ... see what piques his interest ... then close the sale on the spot. How? The Moviematic projects on its own built-in screen under daylight conditions. OR, for large-group showings, the Moviematic projects on a remote screen. How about operation? Just plug it in! Film is already in the projector ready to show. That's because the last time you showed it, the film was rewinding itself getting ready for this time. No rethreading or rewinding. Moviematic is versatile, too, because it can show any of your present 16mm optical sound films. No expensive new productions or alterations required. And, it will show anyone else's 16mm films as well. You can purchase, lease or lease-to-buy ... long term or short. Ask your Kalart/Victor dealer or write:

Read to Be Program Chairman of the 94th SMPTE Convention

☆ Morton H. Read, president of Bay State Film Productions, Springfield, Mass., has been named program chairman for the 94th Convention of the Society of Motion Picture and Television Engineers. The convention will be held October 13-18 at the Somerset Hotel in Boston.

Mr. Read is serving under the SMPTE's Papers Committee Chairman, C. Loren Graham of Eastman Kodak's Color Technology Department, Rochester, N. Y., and the Society's Editorial Vice-President, Herbert E. Farmer of the University of Southern California.

Associate Program Chairman is Lowell Wentworth, also of Bay State Film Productions. Rodger J. Ross of the Canadian Broadcasting Corp., Toronto, is Associate Chairman for papers from abroad.

List Topics and Their Leaders

Topics and Topic Chairmen for scientific and engineering papers to be presented at the semi-annual convention are:

Photography in Medicine, Mr. Wentworth; 8mm and Small-Format Film, William D. Hedden, Calvin Productions, Kansas City, Mo.; Instrumentation and High-Speed Photography, Charles W. Wyckoff, Edgerton, Germehausen & Grier, Boston; Laboratory Practices, John J. Kowalak, Movielab, Inc., New York City; Motion Pictures, Television and Education, Hartford W. Gunn Jr., WGBH-FM and TV, Cambridge, Mass.

Other Subjects and Chairmen

Other topics and their chairmen are: Sound Recording, Robert C. Lovick, Eastman Kodak; Space Technology, Edward Palmer, New England Telephone & Telegraph Co., Boston; Television Engineering Developments, Willard H. Hauser, WBZ-TV, Boston; and Short Film Subjects, John C. Mahon, Jr., New York University, New York City.

Reid H. Ray, president of Reid H. Ray Film Industries, St. Paul, is president of the Society.

ARRIFLEX "chases" the X-15 at North American Aviation

In the hands of North American's photographic team, Arriflex motion picture cameras share one of the most dramatic assignments of all time: film coverage of the X-15's history-making flights. Tracking the supersonic aircraft—from chase-plane or ground positions—is a sure and precise work with an Arriflex. Its reflex

viewing system gives the cameraman a direct, brilliant, and continuous through-the-lens image of his subject. He can follow-focus critically frame his target with positive accuracy. And on the projection screen, his footage is consistently sharp and rock steady. Arriflex: a capable match for the fabulous dynamics of aerospace research.

ARRIFLEX goes hunting
with the Missouri Conservation Commission

Filming a hawk's swift plunge calls for sharp follow focus and accurate centering of the viewfinder image. That's one reason biologist Charles W. Schwartz uses an Arriflex, in his motion picture studies of birds and animals for the Missouri Conservation Commission. The slider image is formed by the taking lens itself—parallax free.

framed and focused exactly the way it's being filmed. Another reason wide-angles and telephotos can be mounted side-by-side on the Arriflex turret, which diverges lens axes a full 21° to eliminate optical and mechanical interference. Arriflex: extremely mobile, fast-handling, and precise — best in the field!

ARRIFLEX covers every angle in upside-down film!

The complete *Archie* has no changes in annual subscriptions and photocopies are available by mail under a variety of rates applicable down to one year. The change program was initiated by "Lionel Lincoln," a pseudonym for the publisher, who is also known as the *Waterbury Corporation of Boston*. Employing a variety of "dodge" angles, the publication sought to induce high school students to subscribe. The company was arrested through investigation by the FBI, and the publisher was charged with conspiracy to defraud. The *Archie* has been taken down, and the publisher is facing charges in the production of this material.

ARRIFLEX
special assignment
at
Western Electric

Key projects at Western Edison Princeton Research Center are transposed from color slides to motion pictures through the use of this bench top "studio," designed by John Carnevale, head of the Center's photographic team. The slides are driven by an animation system that produces optical effects are achieved and extension tubes. Creative functional advantages pro-

...sonal results with a minimum budget and virtually no outside service. Precise focus and hair framing are easier with an Arriflex than with most other cameras. The camera can also be viewed identically to the filmed image and is identically framed. This reflex finder simplifies animal, time-lapse stop-motion, aerial, and zoom techniques as well.

***NOTE TO ARRIFLEX USERS:** These case histories are from a current "Arriflex at work" ad series appearing in selected industry publications. If you have an interesting application, please write.

1963 marks the 10th Anniversary of the Arriflex 16. During this decade, it has become a dynamic historian of Man's most ambitious ventures —
"from missiles to microbes."

There is no greater tribute to a product than to say it has kept ahead of the demands made upon it by a sophisticated technology. In this respect, Arriflex has proven itself an indispensable cinematographic tool in such diverse fields as Science, Industry, Education, Government, Medicine, Research, News, Sports and Entertainment.

In expressing our gratitude to the cinematographers who have accomplished so much with Arriflex, we pledge that our progressive program of research and development will maintain Arriflex's unique status as "the most versatile, most dependable, money-saving professional motion picture camera."

The coincidence of Photokina '63 and the 10th Anniversary of the introduction of Arriflex 16 Professional Motion Picture Cameras into the United States was highlighted by the presentation of a congratulatory silver cup to Mr. Paul Kingenstein (R), president of the Arriflex Corporation of America, by Dr. Robert Richter (L), president of Arnold & Richter, Erich Kaestner, chief design engineer of Arnold & Richter, shares in the happy event.

CFI
CONSO

SCREEN INTERNATIONAL

films across the frontiers

by Robinson P. Rigg, European Editor of Business Screen

"Much lip-service has been paid to the part which the audio-visual media, especially the cinema, can play in fostering cultural exchanges between the nations. When one turns, however, to how the exceptional powers of the film medium can be applied to the betterment of international understanding, many problems still arise."

—Anthony Haigh, Chairman of the Administrative Board of the Cultural Fund of the Council of Europe*

THE BIG QUESTION for a-v executives in many progressive companies these days is "How can I get really effective distribution of our films in overseas territories?" Conversely, B S readers ask, "How can we see sponsored films from other countries?"

If there is a direct sales motive for showing films, there is no problem. Commercial non-theatrical film libraries exist in many countries — many of them members of Inforfilm, a global distributors' association with a head office in Brussels, Belgium. General Secretary Jan Koterians tells me that international audiences for sponsored films increased by 25% last year and that Australia, New Zealand and Japan have recently joined the Inforfilm family. (The U. S. member is Modern Talking Picture Service, Inc.)

A Service Founded on High Standards

All members guarantee high standards of service, wide user coverage, accurate audiences statistics, publicity, film care and inspection. They make a moderate service charge for each booking, varying from country to country. In general, the European rates are somewhat lower than in the U. S. A. or Canada.

Or, overseas agents and associated companies in foreign locations can make their own arrangements to ensure that customers and the public see the films. The Royal Dutch/Shell Group of companies is spread throughout the world and they distribute their films by direct contact. Shell Oil, in the U. S. A., lodges prints on permanent loan with many school a-v departments, libraries and other outside agencies who carry out further distribution. Getting statistics from such sources does remain a constant problem but Shell also promotes its library direct to projector owners through catalog mailings and news releases from its New York headquarters.

Shell Libraries in Canada and Africa

Shell Oil of Canada operates its own libraries in Toronto, Calgary and Vancouver. In Rhodesia, Africa, Shell invites users to apply for membership in the Shell Film Library; a similar scheme in Turkey trebled the company's distribution in one year. Altogether Shell films

are seen by annual global non-theatrical audience of 70 million.

The big problem for sponsors arises when films have a high subject value and are widely demanded in those foreign countries in which the sponsor has little or no commercial interest and cannot justify a free loan operation.

Two other main outlets for distribution are worthy of note. Films of special merit may be distributed on rental terms through a government or commercial non-theatrical film library or they may be served up as "entertainment" or "public service" fare in cinema theaters or via television.

Training, Technical Films in Demand

Rental potentials exist for management and staff training films, or they may be offered for outright print sale; Inforfilm members handle some of the best of these. Technical and other films showing new processes, research and techniques, find their way into official and semi-official government libraries such as the O. E. C. D. film distribution system.

Prestige films, documentaries, art films and general interest "shorts" move through both commercial and government libraries and the best of these will be handled by theatrical and television specialists for all types of cinema houses, including the news and art theaters, or on regular feature programs. These last up to three hours in most European countries and there is a shortage of second-feature films. One U. S. film which will play British houses this fall is *The Ballad of Soup du Jour*, produced by The Jam Handy Organization for Campbell Soup.

Films shown abroad are subjected to customs duty and, in many cases, to censorship and to import control, even for non-theatrical distribution. In France, for example, the definition "non-commercial" is still subject to legal argument — just to complicate things. B S arranges a showing of prize-winning international industrial films in Britain each year and many times this London office has felt that sponsored films were regarded by civil authorities as being only one step removed from narcotics in the list of undesirable imports.

Governments Recognize the Problems

Fortunately the world's governments are recognizing the difficulties in moving cultural and educational films from one country to another and a number of international agreements have been reached through UNESCO. These two agreements will be of greatest interest to sponsors:

1. The Beirut Agreement of 1954, which was designed to assist "the dispatch from country to country of visual and auditory materials serving the interest of education, science and culture." If the main purpose of a motion picture is to "instruct or inform, or to promote the spread of knowledge and international un-

(CONTINUED FROM THE PRICEDING PAGE)
derstanding" and the exporting country certifies that it is of an "educational, scientific or cultural character" the film will be treated by the importing country as though it was of local origin and can be imported free of duty and other restrictions.**

2. The Florence Agreement of 1952 is similar in purpose to the Beirut Agreement, but in application the big difference is that no certification by the exporting country is required. Instead, the goods must be consigned to an institution or organization approved by the importing country.

U. S. Signs but Congress Must Ratify

The United States has signed both agreements but has not yet become a party to them; among the countries which are parties to both agreements are Denmark, Greece, Norway and Pakistan. Canada, Salvador, Iran and Iraq are among the countries which have signed the Beirut Agreement only and Britain, Germany, Italy, Netherlands, Ghana and Nigeria are among the countries which are parties to the Florence Agreement only.

In spite of the agreements, the sponsor who is asked for a film for preview by a foreign user will quickly find out that these Customs conventions do not apply to temporary imports and that both the importer and the sponsor are liable for duties on the incoming and returning trips. A lecturer or a company representative visiting a foreign country will find it easier to get his bicycle or car across the frontier than the motion picture he wishes to use.

Countries May Take Different Views

Assuming that the film is acceptable for use in the importing country, it can be imported duty free under either the Beirut or Florence Agreements. At this stage, however, the sponsor may come up against interpretation of the Agreements. Under the Beirut Agreement the national certifying organization, generally the Ministry of Education abroad, may take too narrow a view with regard to the film's purpose and refuse to certify it as "educational" or "cultural." Under the Florence Agreement, the exporter may find that the institutions approved by the importing country are quite unsuitable to distribute his film.

Two years ago, over 100 a-v specialists and government officials from 15 European countries and nine international organizations met in London to examine the up-to-date position with regard to moving films across frontiers. After three days of discussion, it was agreed that what was essential to the improved distribution of films was that each country should set up a national center for co-ordinating information on sponsored and other non-theatrical films produced within its territory and should issue a national catalog listing the nature and source of available films. Among

many other recommendations, a mention was made of the role of the International Chamber of Commerce to remove barriers to the free interchange of films and it was urged that procedures should be simplified without delay.

For example, it was felt that films for preview or on temporary importation should be covered by a "carret de passage" similar to that used for automobiles.

The first big step in that "national catalog" phase has been taken in Britain. This Spring, the British National Film Catalogue Limited, a non-profit organization, was formed under the presidency of Charles Dand, formerly of the British Information Services in New York. Editor Bernard Chibnall is responsible for the first regular comprehensive service of published film information for an entire country. The British National Catalogue will publish six times a year, followed by a cumulative annual volume. It is available to overseas subscribers for \$17 a year, contains details of films produced in Britain (producers, technicians, sponsors and brief synopses of content) all classified according to the Universal Decimal System.

Several other European countries are in active preparation of similar national volumes. It may soon be possible for a film sponsor to know that his film will be listed in many countries. The next stage is the assurance that his film is available in those lands.

It Helps to Understand the Customs

At present, the distribution of sponsored films in lands abroad requires skill and patience coupled with real understanding of the customs and national character of each land involved. Audio-visuals are still a comparatively new means of communication between peoples (who are still having problems with Gutenberg's invention) but, like the printed word, they may soon span boundaries and prejudices to bring the greater understanding of techniques, skills and ideas which is inherent to sight sound media. With a little more action in those lands which have not yet attained official ratification of the Beirut Agreement and a lot more push from all of us interested in achieving international film usage, the usual "thousand years" required for historic change may be shortened considerably.

Subsequent pieces in this first of a series on "Films Across the Frontiers" will include detailed information on the distribution opportunities in Britain, Germany, France, Netherlands, and Scandinavia now being compiled with the invaluable help of our correspondents in those areas.

** U. S. readers are reminded of the excellent definitive article on the work of Attestation and Review Staff, U. S. Information Agency, written by its Chief, Wilbert H. Pearson. This appeared in our Number Three, Volume 23, 1962 issue. This Agency certifies U.S. films intended for shipment abroad.

NB: B S readers may address Jan Botermans at Inforfilm, 147 Avenue de l'Hippodrome, Brussels 5, Belgium or write the U. S. member, Modern Talking Picture Service, Inc., 3 East 54th St., New York 22, N. Y.

NEW YORK WORLD'S FAIR REPORT

Film Preview of Fair from the American Gas Association

THE FIRST EXHIBITOR at the New York World's Fair 1964-1965 to contract for space and to break ground at the Fair site was the American Gas Association, whose exhibit, Festival of Gas, is planned to be, primarily, a place of fun and entertainment for young and old. In a splendid building designed by Walter Dorwin Teague Associates visitors will be regaled with demonstrations of the handsome kitchens of tomorrow, watch world-famous chefs do their stuff, and visit a theatre to see a three-screen puppet show on film.

All this is told in a new film just put out by the AGA called *Come to the Fair*. Thirteen minutes in length, and featuring Jinx Falkenburg as hostess-narrator, the picture shows through art, models and live photography what the Fair — and the city, too — will be like next year.

Production by Owen Murphy

Come to the Fair, which will be distributed through members of the American Gas Association, was produced by Owen Murphy Productions, which is currently busily engaged in doing the revolutionary three-screen puppet film which will be featured in the exhibit. Tom Tichenor is the designer of the puppets and Marc Siegel is the writer of the film.

Action in the 15-minute puppet film will be unusual in that it will take place on one, two, or three of the five-foot screens, which will not be butted together but mounted separately. Thus, tantalizingly, some of the action will take place *between* the screens.

Originally planned with children in mind, tests have shown that adults are so enchanted with the puppets that it will be impossible to keep them out of the small intimate theatre that will house the presentation.

Owen Murphy Productions is also doing an exciting visual presentation for the Telephone Company pavilion, which we hope to tell you about in our next issue.

"World Children" Pepsi Theme

Pepsi Cola Company has signed an agreement with Walt Disney Productions and UNICEF to present an attraction designed by Disney which will probably be some sort of ride, or rides. The exhibit will not only advertise Pepsi but will contribute substantially to the objectives of the

United States Committee for UNICEF and the United Nations Children's Fund to promote the health and happiness of children throughout the world. Further details of the exhibit will be announced when Disney's plans are more complete.

Disney is also creating a "Progressland" for General Electric Company, which will include an auditorium in which the seated audience will be moved from one to another of six stages where life-size, life-like talking figures will perform. The first demonstration of nuclear fusion ever presented for the general public will be one of the main attractions of the exhibit.

U. S. to Have Cinerama Show

The United States Government will present a combination film and three-dimensional exhibit designed and operated by the Cinerama Camera Corporation.

According to Commerce Department Under Secretary Franklin D. Roosevelt, Jr., the exhibit will cost two million dollars and will depict the "pioneer spirit of America in the past, present and future."

The Cinerama exhibit will be installed on the second floor of the U.S. Pavilion. Three thousand visitors per hour will be able to see the exhibit from a specially designed vehicle which will carry them on the "ride".

Guy Hearon, of Cinerama Camera Corporation, a subsidiary of Cinerama, Inc., is working out details with Norman K. Winston of the United States Commission for the Fair.

A "People Wall" seating 400 and rising 53 feet into an elevated theatre by means of a hydraulic mechanism will be the featured attraction of the IBM exhibit at the Fair. Puppet-like devices explaining such subjects as computer logic, data processing systems and probability curves were among the plans disclosed for its

pavilion by International Business Machine Corporation.

The pavilion has been designed by Charles Eames and Eero Saarinen and Associates. It will be used by IBM to tell visitors the story of modern information handling techniques.

Continental Insurance Companies' exhibit will provide the setting for recreation of the events attending the birth of our nation. It will present great moments in the American Revolution through the use of advanced graphic techniques, including outdoor, daylight slide projection.

Other recent audio-visual plans announced by Fair exhibitors are a theatre to be included in the Spanish Government pavilion, and a complete recording studio to be part of the State of Louisiana building.

Closed-Circuit TV Network at American Dental Convention

A closed-circuit television network, bringing news, interviews, top-level discussions and films to all hotel and motel rooms in Atlantic City will serve the American Dental Association at its 104th annual convention in that city on October 14-17. The "ADA TV Network" will be sponsored by the Colgate-Palmolive Company and Wyeth Laboratories.

Program times are being arranged so as not to conflict with any segments of the regular scienti-

fic, social and business events. The ADA-TV Network was originated at the 1962 session in Miami Beach. A survey was conducted to determine its effectiveness. 75% of those responding had watched some part of the programming and 97% of those viewing expressed the desire to have the telecast repeated at future ADA sessions.

Jack Bernard, Board Chairman of Rapid Film Techniques, Dies

A pioneer in the field of film restoration and rejuvenation, Jack Bernard, chairman of the board and president of Rapid Film Technique, Inc., died at his home in Scarsdale, New York on June 6th. He was 59.

Known in the industry he served since 1940 as "The Film Doctor," Mr. Bernard opened his first laboratory at 21 West 6th Street in New York City. In 1954, Rapid became a public corporation and

The late Jack Bernard

the laboratory was moved to its greatly-expanded quarters in Long Island City. A subsidiary for television film shipment was also initiated from the new plant and, in 1960, the company introduced its service to the 8mm amateur field, franchising several hundred retail outlets across the country.

A key factor in lowering film replacement costs and improving screen presentations, the processes developed by Jack Bernard have now been recognized as an integral part of the industry. Rapid's founder was active in all professional and trade groups of the industry and in such groups as the National Association of Credit Management and the Motion Picture Credit Association.

Rapid Film Technique, Inc. is now under the active direction of Mr. Bernard's long-time associate, Henry Lloyd, its secretary-treasurer, and his son, Marvin, executive sales director. Another son, Lawrence, international editor of ADVERTISING AGE, and his beloved wife, Sylvia, survive this widely-liked friend and fellow worker in the industry.

Announce Winners at Tenth "Day of Visuals"

Visual Presentation Awards to Wide Variety of Media

THE 10th ANNUAL AWARDS Banquet of the National Visual Presentation Association was held on June 5th in the Commodore Hotel in New York, in conjunction with the Association's 10th "Day of Visuals."

Specially-designed ceramic plaques, framed in hardwood, were presented to representatives of the winning motion pictures, sound filmstrips, slide programs and non-projected visuals.

Chapter Heads Present Prizes

William J. Connelly, of Union Carbide Plastics Company, President of the National Visual Presentation Association, presided and awards were presented by the presidents of NVPA's two area chapters: William A. Klauber, of Metropolitan Life Insurance Company, President of NVPA's New York Chapter, and Howard Turner, of DuKane Corporation, President of NVPA's Midwest Chapter.

In conjunction with the Awards Banquet, three full days of seminar programs dealing with visual presentation techniques were held from June 4th through 6th. In addition, an Audio-Visual Exposition of equipment and services rounded out the program.

Hear Speakers at Seminars

Speakers in the seminars included Leon Kreger, Wilding, Inc.; Martin Myers, Charles Bessler Company; Irving Oshman, Vision Associates; John Lord, Du Kane Corp.; Joseph T. Holahan, Young & Rubicam; Robert Randall, Western Electric Company; Norman Lindquist, Fred Niles Communications Centers; and Peter Yung, Elektra Studios.

Here are the titles of winning entries in each of the awards' categories:

MOTION PICTURES

General Public Service Films

1st Prize

Air Force on Canvas, U. S. Air Force; produced by Pelican Films.

2nd Prize

Television in Education, The Bell System; produced by Parthenon Pictures.

Merit Award

Telstar, American Telephone & Telegraph Co., produced by Audio Productions.

Sponsored Educational Films

1st Prize

Adventure in Color, Pittsburgh Plate Glass Company; produced by Dynamic Films.

2nd Prize

St. John's College, St. John's College, produced by Fordel Films.

Employee Relations Films

1st Prize

Main Street, U. S. A. Today, Armco Steel Company, produced by Dynamic Films.

2nd Prize (Ties)

Invitation to the Future, IBM Corporation, produced by Film Enterprises.

Potential Unlimited, U. S. Department of Agriculture (also producer).

Employee Training Films

Safe Handling of Light Ends, Petroleum Chemicals Div., Du Pont; produced by John Sutherland Prods.

2nd Prize

Are You Sure?, National Board of Fire Underwriters; produced by Depicto Films.

3rd Prize

We Plan, Mobil Oil Company; produced by Pan Media Company.

Ted Barash (left) of Bureau of Advertising, ANPA, receives top awards for sales promotions from chairman William Klauber.

Sales Training Films

1st Prize

Positive Action Sales, produced and distributed by Calvin Productions.

2nd Prize

Out in Front, Frigidaire Div. of General Motors; produced by Fred A. Niles Communications Centers.

3rd Prize

Say It With Service, Atlantic & Pacific; produced by Portafilms.

Industrial Sales & Promotion

1st Prize

Eye of the Beholder, Bureau of Adv., Amer. Newspaper Publ. Assn.; produced by Elektra Studios.

2nd Prize

Newspaper, Bureau of Adv., American Newspaper Publ. Assn., produced by Elektra Studios.

Write or call John Rosenthal for New Promotion Program for Producers

Service is Keynote at Socony

New York Headquarters' Training Center of Socony Mobil Shows Constant Increase in Company Use Over Seven Years

THE SOCONY MOBIL OIL COMPANY'S Headquarters Training Center made important a-v news when it began operations in 1956 at the firm's new building on 42nd Street in New York. (BUSINESS CREW No. 2—1957). The impressive (7,800 square feet) training facility was hailed at the time as the last word in audio-visual training centers and it has become a model facility for emulation by other companies.

The Center was designed to provide ever-increasing services to this world-wide company and to be

standing of the subject matter results.

1,032 Meetings in Past Year

The activity report of the Center shows that attendance at meetings and rehearsals totaled 88,751 over a six-year period. 15,694 attendance at 1,032 meetings was reported in 1962 alone. Motion picture preview attendance during the six-year period was 10,799 at 2,493 previews. There was a 1,748 movie preview audience in 1962 at 393 showings.

During the 1957-1962 period, 10,249 requests for the use of the audio-visual equipment by management were made and it required 17,987 units of equipment to handle those 10,249 requests.

Showing Tools at "Open House"

The Training Center frequently promotes "open house" programs to acquaint more top management people and their key personnel with visual aid tools which are available at headquarters, so it is presumed that figures for succeeding years will continue to reflect growth of the Center — a proven asset and key factor in the continuance of efficient communications techniques throughout the company.

Showing key personnel at Socony how to use visuals for best results, Michael Kelly of Training Center Staff lays transparencies on an overhead projector.

On this page and others that follow, we preface this month's Audio-Visual Equipment Trade Fair section (beginning on page 43) with reports on audio-visual tools at work. Thousands of companies,

in the U. S. and abroad, are utilizing films, filmstrips, overhead projection and closed circuit television. Yet all of them will benefit from experiences reported in the pages of this issue.

Socony exec rehearses audio-visuals with D. G. Treichler.

versatile enough to meet unforeseen requirements as well as immediate needs.

Report Progress to Management

How well has it succeeded? According to the latest report to management by D. G. Treichler, in each of the first seven years of operation, the Training Center has experienced an increase in the use of facilities and of audio-visual equipment. Mr. Treichler is Supervisor of the Audio-Visual and Facilities Section under which the Center operates.

In addition to extensive use of the Center for formal and informal training programs, the facilities are frequently used by management to rehearse presentations where audio and visual aids are used. Socony Mobil management encourages the use of a-v aids because they are convinced that when these tools are used correctly and in their proper place, a more effective job of communication and greater under-

Typical of Training Center's model facilities, this conference room is in daily use by key personnel at Socony.

Visualscope crew sets up the big "Lumenoscillator" screen for the ABC show.

Lighting Up the ABC Schedule

Unique "Lumenoscillator" Technique "Ties-In" Visuals to Preview Network's Television Programs to Stations

ONE OF THE DECISIVE MOMENTS in the television network's annual calendar of events is the presentation of next year's schedule. It is vital to the networks that individual affiliated stations be impressed with the schedule, for disenchantment can sometimes lead them down the road to local programming of old Hollywood films in prime time.

For the American Broadcasting Company, this year's schedule was particularly important. Slated for unveiling in Chicago during the National Association of Broadcasters convention in March, the schedule presentation was complicated in that time switches and program changes were taking place almost daily right up to convention time.

Thus, the more conventional methods of presenting the schedule visually — via motion pictures, or a "canned" audio-visual presentation, could not be used.

ABC's Ted Fetter, Director of

Night-time Programming, George Corwin, set designer, and Fred Schuman, production coordinator, approached Visualscope, Inc., a specialist in solving unusual presentation problems, to think up a new way of doing the job so that it would be visually stunning, novel, impressive to executives of affiliate stations, yet flexible enough to be changed on a moment's notice.

The visuals would be planned to augment ABC's other key attractions — speeches, entertainment and live appearances by such ABC stars as Jerry Lewis, Ozzie and Harriet, Jack Palance, Ernest Borgnine, Patty Duke and Lawrence Welk.

After a lot of thought and experimentation in the back rooms, Visualscope's president, Robert Taylor, came up with a new technique and new equipment which has now been dubbed a "Lumenoscillator."

As shown at the ABC conven-

More Audio-Visual Tools at Work

tion, it is a large screen, measuring 15 feet by 20 feet, which was used for high-quality rear projection as well as standard front projection. It is self-contained, movable, and has no wings or curtains.

Programs on 35 Light Boxes

Behind the screen were large light boxes, individually mounting large transparencies of the various TV shows, which could be quickly interlocked together to form one large structure measuring exactly the 15 by 20 foot surface of the screen. Thus, all 38 of the light boxes combined to illustrate the titles of *all seven* of ABC's daily schedules from 7:30 p.m. through to the 11:00 p.m. news. (See illustration).

As an example, Sunday at 7:30 p.m. will have *The Travels of Jamie McPheeters*. After the light box behind the screen presented

could easily be unclamped and switched in positions or replaced. A lighting control panel with individual and master switches controlled the illumination process.

Topping the whole performance off was the introduction of ABC's big Jerry Lewis show, scheduled for Saturday night at 9:30. For this place on the massive chart, Visualscope went to Hollywood and filmed Lewis so that a full screen motion picture could be masked off optically with the exception of the box for the Lewis show.

Is He Live Or On the Screen?

In this box, a six-foot high, life-size Jerry Lewis first engaged in some spirited badinage with ABC president, Tom Moore, then walked out from behind the screen in person, same size and same clothes as on screen, returned into the picture, and finally appeared again in person as the big screen was moved off and Jerry Lewis and his Band took over.

On the spot, the three-hour show won a terrific ovation from the 3,000 affiliate station executives in the audience. The presentation was later acclaimed in the broadcasting trade press as a "bold, direct challenge for leadership."

Another fall program is premiered: scene from "Arrest & Trial" program.

Rear-projection lights out: screen shows "Travels of Jamie McPheeters."

this show in its proper place in the weekly schedule, the front projector came on to illustrate some rousing motion picture scenes from the McPheeters saga.

Making Allowance for Changes

Flexibility was assured right up to show time because the boxes

Here's the full ABC fall television program schedule on screen. Jerry Lewis is about to make his personal appearance at special Broadcasters' premiere.

Westvaco Wins Viewers at Packaging Show

West Virginia Paper Company's Short Film an Eye-Catcher

HOW TO HOLD the attention of a packaging show audience, distracted by a thousand and one sights, has been hopefully solved by West Virginia Pulp and Paper Company through the use of a unique film which employs a wide variety of techniques to try to keep the viewer glued to the screen.

The film, featured in the paper company's exhibit at the AMA Packaging Show recently held at McCormick Place in Chicago, aimed to get across in five minutes of entertainment, the message that

Westvaco is a leading innovator of packaging and packaging systems.

While not losing sight of its basic job of telling the company's story, the film tried to make it painless by the use of color, animation, exciting motion, modern jazz and a fetching model. There are no spoken words or narration.

Build Theater Into Exhibit

To show the film, a specially fabricated theatre was built into the exhibit. The booth contains a rear-projection unit which beams the 16mm film onto a 30 by 40 inch screen. Prints of the film are

Hooded rear-projection screen is at right center in Westvaco exhibit above.

on a reel which can be run at intervals, or continuously.

To see the film, the viewer stands in a carpeted area which is set apart by a "roof" which extends fan-shaped from the top of the booth to the edge of the aisle, a distance of 14 feet. No loudspeakers are used. Instead, the music is piped to a series of 24 high-fidelity earphones which are divided among four pedestals within comfortable reach of the viewers.

G geared to Corporate Advertising

When the paper company's packaging and marketing people began to plan the context of the exhibit and the film, they concluded that the booth should reflect Westvaco's corporate advertising theme by physically displaying the company's wide range of packaging products and demonstrate with actual working models

its new packaging systems. The film is designed to accomplish the same goal, primarily for the hurried viewer, but in a twinkling of an eye, so to speak.

The film was made for Westvaco by PGL Productions of New York.

Fashion model Gretchen Harris is shown in scene from Westvaco film.

Films Attract Visitors at the Trade Fair

Repeater Projectors Score in Chicago's McCormick Place

THIS YEAR's edition of the International Trade Fair, held in McCormick Place on Chicago's

— Aerospace theater in Chicago.

lake front was replete with repeater-type, self-contained projection equipment. Exhibits of the U. S. aerospace program (see cut below), Pan American Airways, Bruning and General Electric were among those using Busch, Vicaudio and similar equipment to attract and hold Fair visitors.

Union projectionist restrictions again hampered free use of films by exhibitors in Chicago but Fair sponsors provided the comfortable facilities of the Little Theater for scheduled showings of travel films furnished by exhibitors.

A pictorial report on these Trade Fair projection setups will appear in the following issue. Watch for it!

A Sales Maker for Kelvinator

Appliance Dealers Turn Prospects Into Buyers as They Switch on Technicolor 8's in Consumer Viewing Center

A DRAMATIC SALES-BUILDER is serving the Kelvinator Company as this appliance maker puts into nationwide service its new "Consumer Viewing Centers" featuring the Technicolor "8" Instant Projector with a special engineering adaptation made for this client.

Appliance dealers are reporting that 80% of prospect viewers are being converted into buyers in many locations where the Viewing Center has gone into action.

The special innovation is an automatic shut-off device, activated upon completion of the film. Technicolor also supplied the Kelvinator cabinets with an interlock mechanism which turns on a display light as the film ends.

Produced by Wilding & Dramaturgy

Wilding, Inc. produced the series of four 8mm films for these displays and its subsidiary, Dramaturgy, Inc., was responsible for design and construction of the Consumer Viewing Centers.

The four Wilding-produced 8mm films with color by Technicolor give "See the Proof" demonstrations of the Kelvinator appliance line — the "No-Frost" refrigerator, automatic washer, electric range, and Foodarama, a deluxe upright refrigerator and food freezer.

Bought by the local dealer, the

"Viewing Center" is five feet tall, standing on metal legs, and is 19 inches wide. Its screen size is 12 inches wide, 9 inches high. Inside is the Technicolor projector with its automatic shut-off triggered by an inch-and-a-half-long milled-out section of film opposite the sprocket-hole side and outside the picture area.

Snap-in Change of Film Cartridge

A lift-up door on the front of the unit provides immediate access to the projector for snap-change, no-threading cartridge-inserting, and for starting the machine. Cartridge storage space also is provided inside. A brightly-illuminated sign displaying the Kelvinator name calls attention to the Viewing Center until the film starts, when it goes off, coming on again when the showing is completed.

While continuous projection was considered initially, study of plans and needs quickly showed it preferable to let the individual salesman operate this selling aid according to his need of the moment. Is his prospect interested in a washer? Then he slips in the cartridge film on the Kelvinator washer, pushes the start button, and the demonstration is underway. A freezer? Just as quickly he inserts the Foodarama film, and gets an immediate customer reaction.

Far from being a crutch for in-

Here's "Consumer Viewing Center" as it appears on appliance dealer's floor.

INSTANT SALES:

effective sales efforts, the Viewing Center might well be described as a "closing center." At the Jesion Furniture and Appliance store, where the program had its initial four-month test before national release, early this year, 90 showings were made to prospects who either were actively shopping for a new appliance or were "just looking." From these demonstrations, 72 Kelvinator sales were closed — an astonishing 80 per cent conversion. The firm's Henry P. Jesion calls the program "the most important retail selling tool ever to come along in our business."

"Our Salesmen Liked It . . ."

"Our salesmen liked it from the first," he said, "and the more they used it the more convinced they were that here, at last, was a visual selling aid that would actually help them convert only slightly-interested prospects into sold customers."

While Jesion's high-close ratio stands as the spectacular, dealers elsewhere are reporting 50 to 70 per cent conversions, a fine figure in anyone's selling league. There are few retailers — or marketers of any product or service — who wouldn't be happy at being able to turn half the prospects into customers.

Kelvinator plans additional films to expand dealers' libraries.

The Kelvinator model is a custom-built item, especially made for that company. However, Technicolor has an exciting new device in its Model 700, an off-the-shelf item which may be used by any merchandiser without special adaptation or attachments. Due for presentation at NAVA, Technicolor expects Model 700 to achieve for merchants throughout the nation what the Kelvinator model has been accomplishing for its appliance dealers.

Keeping Score on Film Results:

Better Business Bureau's Five-Year Film Program Factor in National Growth

Right: one of the public service television slides currently being provided to stations and networks by Association of Better Business Bureaus.

AN ACTIVE USER of the film medium since the release of its first 28-minute sound motion picture in 1958, the Association of Better Business Bureaus will release its fourth film in September. Meanwhile, the ABBB has also entered the field of television media, using a series of public service slides backed by off-screen announcements for station breaks.

The Association's first film, *The Better Business Bureau Story*, is still being widely shown to audiences in the U. S., Canada and abroad five years after its premiere. Two other films (including the 1962 release, *Too Good to Be True*, produced by Audio) are also bringing the Association's important stories to business and employee groups, clubs, schools and nearly every segment of the consumer public for whom they were created.

70,000 More Member Firms

Better Business Bureau officials consider the success of this five-year film program relevant to the Association's constantly improving statistics: in 1958, there were 110 Bureaus, 101 in the United States and nine in Canada. In June, 1963, 127 Better Business Bureaus served the U. S. (113); Canada (10) and others have been created in Mexico, Puerto Rico, Venezuela and Israel. In 1958 some 80,000 business firms and corporations held membership in local Bureaus; five years later, in 1963, membership has grown to 150,000 member companies.

"This domestic and overseas expansion must be attributed to many factors," Bureau officials note, "but the ABBB educational film program has played more than a minor role and its importance continues to increase."

"When the business leaders of a community decide to organize a BBB, they look for help from the Association's New York offices. Always included among the organizational and promotional aids are the ABBB films. The pictures are

shown on television and to businessmen at service club luncheons and special meetings. In this way, both the consumer public and the business community are introduced to the functions and services of the BBB in advance of formative discussions and the needed stimulus is provided."

Local Bureaus Develop Shows

Routine distribution of this Association film program is handled by local Better Business Bureaus as they reach out to business and community groups, serving practically every social aggregate which may come to mind. Working relationships are maintained with local television stations and BBB films are frequently shown as public service programs.

Beyond these customary distribution patterns, there have been tangible demonstrations of interest by advertisers and media as both groups have voluntarily promoted the BBB ideals of "truth in advertising" and "business self-regulation." Twice in the past five years, the National Broadcasting Company has premiered the Association's films on nationwide closed-circuit telecasts to business leaders.

Major TV Networks Helping

The ABC, CBS and NBC television networks also recently advised all of their affiliated stations of the new ABBB public service television slides. And a number of utility and telephone companies have purchased prints of Better Business Bureau films for their own customer service programs; other companies are using them in their employee relations programs.

For example, the Singer Company (long concerned with the problems of bait advertising) made it possible for each BBB to purchase prints of the 1962 release, *Too Good to Be True*, at a substantial discount. Then Singer also sponsored prints of the same film for schools and, along with the Electrolux Corporation's similar donations, school systems in ten

PROMOTES PUBLIC CONFIDENCE IN BUSINESS

cities have received one or more prints.

Typical of educators' responses to the film was this one from Paul E. Long, Director of Audio-Visual and Museum Education in the School District of Philadelphia:

"This title has been recommended by our office for use in the secondary schools for both commercial education and social studies. It is also recommended for adult groups. The film review committee rated it as excellent."

"This is an illustration of cooperation between industry and schools which is of great value to systems like ours. The film relates to our course, is not promotional, and of excellent technical quality."

Significance of the Program

What, ABBB officials ask, is the significance of this filmed communications effort and the increasing attention it is drawing from the business community?

While much of the answer lies in the future, they believe that this first half-decade has provided some valuable preliminary conclusions.

1. The general public is receptive to information about consumer transactions and to the constructive emphasis these films give to the value of advertising and selling in the economy.

2. It has been demonstrated that future consumers, community leaders and business professionals in the secondary schools and colleges are receiving economic instruction through the films.

3. Finally, business and industry get an assist through the increase in public confidence encouraged by this dramatic way of telling the story of good business.

In the fall of 1963, another chapter of the ABBB story will be presented as the Association unveils its fourth motion picture. This title deals with home improvements, a subject of importance to homeowners everywhere and to members of a giant industry involving every service and manufacture phase imaginable.

By Richard S. Piasecki*

CLOSED - CIRCUIT TELEVISION, based on the "live" demonstrations of production testing of its engines, paid off handsomely in attracting and keeping visitor interest in the Allis-Chalmers' exhibit at the recent Construction Equipment Exposition and Road Show held in Chicago.

Planning and results are spelled out from our experience to evaluate these two key phases in terms of your own exhibit program.

To paraphrase slightly, "Competition is the Mother of Innovation," and when it's "Road Show Time," all the innovation stops are pulled! The usual ingredients for an exhibit are bound to be similar to those of the competition. Attractive displays and settings, articulate sales representatives, charming hostesses and teams of literature are among the obvious to which can be added "giveaways" and sales premiums. Now, what else can be done to out-exhibit competition?

The Mission and Its Result

Our mission: to develop an audio-visual display to effectively convey the Allis-Chalmers "World of Power" message to anticipated thousands at the show.

The result: a diorama display incorporating an illuminated relief map to pinpoint plant and activity locations; a color motion picture to show the many A/C products at work; attractive hostesses to direct attention to various areas on the map; and, our key tool, a live television pickup from the Allis-Chalmers Engine Plant at Harvey, Illinois.

Plant Visitors Gave the Cue

We took our cue from the interest shown by thousands of farm tractor customers who visited this plant in December. Tours to the plant for Road Show dealers and customers were planned as an added attraction. So the live, closed-circuit TV portion of the large-scale diorama presentation, showing the actual production testing of the engines which powered all the construction machinery displayed at the show, was a "natural" for tying-in these tours with the rest of the show.

By adding closed-circuit TV direct from the Harvey Works, now visitors who couldn't take me for the trip were taken on the tour right at the exhibit! Our one-minute "World of Power"

Dick Piasecki is Supervisor of Photographic Operations for the Tractor Group Allis-Chalmers, Milwaukee, Wis.

This is the "World of Power" exhibit ready for action on behalf of Allis-Chalmers at Construction Equipment Show.

A "World of Power" in Closed-Circuit Television

Allis-Chalmers Scores Road Show Exhibit Hit With Telecasts from Nearby Engine Plant

Road show visitors gather at Allis-Chalmers' "World of Power" exhibit. Hostesses are about to announce live telecasts from nearby Harvey engine plant.

presentation included a world-wide tour of manufacturing facilities and equipment in action at home and abroad. And live TV, incorporated into the overall diorama presentation, served to add immediacy and authenticity to our theme of reliability, quality and product acceptance. Three 21-inch receivers presented the most dramatic segment of engine manufacture: the testing operation.

How We Set Up for Telecasts

Behind-the-scenes production details began with the retention of Telecasting Services, Inc. The day before the Road Show's opening, their mobile TV unit equipped with monitoring, audio and amplifying gear, along with two studio-type TV cameras, moved into our Harvey plant. Technicians included two cameramen, a switcher for picture pickups, a shader to control picture quality, and an audio man to monitor the sound.

Chicago free-lance announcer Ed Cooper narrated the four-min-

ute segment. Four engine test cell operators at the Harvey Works performed their regular duties before the cameras. Each operator was equipped with a set of earphones through which he could hear the narration and perform his role in the demonstrations as called for.

Because of the relatively high noise level in the engine test cell area, a TV studio was built nearby. From there, Cooper opened the presentation by stating point of origin of the telecast and the time. The camera then cut away to show the lines of engine test cells and details of the control panels. These points were explained by the commentator.

The test cell presentation closed with a shot of an engine which had completed its test run and was being rolled out of the area. Each segment ended with an invitation to make a personal tour of the plant. To further enhance the live TV aspect, Cooper presented a

five-minute newscast every hour, utilizing a UPI news wire installed to provide the copy. Periodically, the newscasts were replaced by on-the-spot interviews with construction industry personalities.

Communications between the remote crew at Harvey and the stage manager at the Road Show were served by an open television line. The TV signal was relayed by the Illinois Bell Telephone Co. via microwave transmission to a receiver mounted atop a Chicago hotel and then fed by coaxial cable to the Amphitheater.

7,000 Viewers at Road Show

Results confirm our faith in this idea. Actual presentation of the diorama with its live TV segment was made on the average of three times each hour of a seven-hour period. Attendance was spot-checked at the show.

We "played" to an average of 155 viewers each hour for 45 hours, gaining about 7,000 viewers for the period of the Road Show. Statistically, about 10 percent of the registered show attendance spent at least ten minutes at our "World of Power" exhibit, plus an (CONTINUED ON PAGE 63)

Video camera focuses an engine test for the closed-circuit telecast.

Growth of the Individual Is His Life Work

FOR THE PAST TWELVE YEARS, a highly-articulate and thorough believer in communication has had a profound influence on the business film medium. Henry Strauss, 48-year old president of the Manhattan communications company which bears his name, is a *specialist* in those kinds of pictures he believes in most: motivational, attitude-building, role-playing films.

Surrounding audio-visuals with related and integrated media which help get the screen message deep into the hearts and minds of viewers, he has won a good many long-term sponsors and the gratitude of millions of viewers who have benefited from such programs.

The very word "*attitudes*" is an ideal starting point from which to explore this spirited and often unorthodox operation. While the programs and tools created and developed by the Strauss organization relate to a broad spectrum of industrial, governmental, educational and social problems, there is a uniform principle that stands as the company's hallmark.

Each project is based on the fundamental of personal involvement, the conviction that *facts* as facts are acceptable to people only when presented in a way that gives them validity in terms of feelings and emotional drives.

This idea is scarcely revolutionary in 1963 and Strauss would be the first to admit that it oversimplifies the complex process of imparting new ideas and stimulating real action on those ideas.

Helping People to Enjoy Their Work

In 1946, however, when Strauss began to articulate "motivational thrust" as the prime force, for example, in making an employee happier in the job and *thus able to do it better*, the formula was a pioneering one. Paradoxically, it was his equally unconventional approach to prospective clients that enabled him to win a test of his theories.

John Shaw, at the time a vice-president of A.T.&T., now retired, recalls it as follows: The Bell System had a very high turnover rate among operators. Girls were hired easily enough, but far too many, far too quickly, left for jobs in other industries. "After listening to our problem," says Shaw, "Henry told us he would have to study it before he could say whether or not he thought he could help us solve it. In contrast to the average industrial film salesman's approach, Henry's attitude was utterly delightful."

Strauss spent several weeks in direct contact with the operators, talking over their feelings about the job. "Then one day," Shaw continues, "Henry came into my office knowing more about our problems than we did. Any other film producer would have asked us what kind of film we wanted. Strauss *told* us. He said our communications with our operators were poor mainly because we had analyzed our relationship with them incorrectly. We had assumed that our indoctrination program wasn't strong enough, but Henry proved to us that the girls were strongly pro-company — at first —

and that only after several months did their interest in the job slacken.

His prescription was a half-hour film, *The Big Day*, designed to show young operators the actual importance of their work, as opposed to what they might have thought it to be.

The film made no mention of the Company's benevolence toward its employees or the wonders of its scientific achievements; but it was marvelously effective in showing operators that their work was of genuine and lasting importance, that they provided vital services to people like themselves."

According to John Shaw, "Henry's films are, in their way, works of art. He has now made over 20 for A.T. & T. We kept on hiring him

... he cares about what goes on inside people

because we were convinced from the first that he was striking in the right direction ... that unless you reach the *insides* of people, whatever you try to say falls on deaf ears."

Other clients, to say nothing of friends and associates, would undoubtedly agree that Shaw struck the one basic chord in Henry's complicated and sometimes mercurial temperament. His interest in what goes on "inside people" amounts to a pre-occupation. Almost by instinct, he tends to look at a situation in terms of the feelings, aspirations and ideas of the men and women involved.

A Wide Range of Projects Undertaken

Strauss himself, acknowledges that herein may lie his major strength as a communicator. There is no doubt that an unfaltering focus on basic human values underlies his organization's talent for "communicating ideas" in an impressive diversity of areas. During the past seventeen years, Strauss projects have embraced such topics as the U.S.E.S. and the U.S.S.R. ... sales and safety ... management of money and management of men ... public health, air

travel, national security and marketing. And this is only a random sampling.

The very first advertisement for the Strauss organization expressed the philosophy that "*Growth of the individual*" is the yardstick for effective communication." The yardstick has stretched in recent years to measure continually more complex, increasingly sophisticated problems in motivation, education, training and public information. Yet no single project has escaped the single-minded concentration on development of the internal human resources.

Breaking Down Walls That Separate Us

No lover of even the most classic clichés, Strauss insists that every man *is*, to some extent, an "island" ... walled off from his fellows not only by language or nationality, but by differences in outlook and perspective, experience, economic background, purpose and life-pressures. He develops methods and tools for communication with sensitivity to these differences; but he works also with *basic* emotional drives and intellectual mechanisms that all people share to some degree.

Strauss admits that this philosophy has its conflicts, and leads to some experiences which are "like picking your way through a mine-field." "You can never be sure," he says, "that a buried fear or resentment won't suddenly blow up in your face."

But he also feels that this line of direction is responsible for his demonstrated ability to handle client problems ranging, quite literally, from in-plant to international. And certainly the "Strauss touch" has earned him the enviable reputation of having fewer client restrictions, over more successive years, than is customary in such relationships.

Exploring Problems in Overseas Trade

One of his latest productions (for Pan American Airways, a 12-year client) is in the field of world trade. It is a far cry from his first efforts in terms of subject matter, technique, scope and potential effect. Titled, *We'll Talk About It in the Morning*, filmed on location in Milan, and prefaced with an official introduction by Secretary of Commerce Luther Hodges, it undertakes to interpret the United States Government's role in encouraging trade expansion overseas.

The film explores key questions an American business firm must resolve before entering the European market; but it does so through the dramatized personal experiences of a fictional businessman charged with making the crucial decisions.

Thus, with the protagonist, the audience is mentally and emotionally involved in taking the first steps to realistic action; yet the film's design enables it to avoid the limitations and contradictions that might normally beset a story directed at viewers whose *specific* problems are enormously varied. As it happens, the picture also serves as a vehicle for PanAm Cargo Sales Personnel's understanding of concepts they will encounter in their customer service role.

Strauss' entrance into the business film field came in 1938, two years after graduation from New York University and following a short stint in his brother's lace importing business.

He was a free-lance writer at the time; and came across the first issue of *BUSINESS SCREEN* in the New York Public Library while doing research for a magazine article.

Leafing through the magazine, it struck him that here was an industry with a high potential of creativity and artistry — a powerful medium which put its skills to use for something other than just itself. His career in film production began the next day, when his application for a job was accepted by Caravel Films, one of the leading Eastern producers of the time. Two years followed, in which he sold exactly one 15-minute slidefilm (to Utica Knitting Mills Company), an inauspicious beginning from which he was rescued by imminent war and the United States Navy.

Received Field Commission as an Ensign

As a raw Quartermaster, 3rd Class, Strauss shipped out on a supply ship right into disaster when his vessel went aground on the rocks of the Newfoundland coast while running from a Nazi submarine in a 90-knot wind. For extreme heroism in attempting to rig breeches buoys from his foundered ship to the rocks, he was awarded a field commission as ensign.

After patrol craft training he took command of a sub-chaser and was sent to the South Pacific. "Sub-chaser 668," Henry says, "was a grubby little 110-foot tub that the rest of the Navy hardly recognized as a fighting ship. We were completely expendable. As soon as we got a gun crew trained for our own ship's protection, here would come some destroyer or cruiser and strip us of our gunners, leaving a group of apprentices in their place."

It was during this period of stress that Strauss learned first-hand about translating "selfish" desires into constructive action. "Learn to shoot that gun — and quick — or tomorrow you can damn well be dead!"

His methods of leadership over many months' time achieved such impressive success that the Navy transferred him to Miami as an instructor in Patrol Craft Training School. From there he was later sent to the Bureau of Ships and assigned to the production of films applying motivation theory to industrial incentive problems.

The Search for a Meaningful Life

After the war Strauss returned to civilian life armed with practical experience, some strong convictions on the nature and effect of training films, and a clearcut personal philosophy. He was motivated by the feeling that somehow he had to give his life some meaning which he could not get just by material career success. He took his ideas to the Patheoscope Company, which employed him as an independent producer. He gave himself two years in which to prove his theories or abandon them, and with them the film business.

His dominant objective was to direct his talents toward bringing people closer to one another, and closer to realizing their common hopes and aspirations. He chose the channel of industrial film, because he believed that during the coming five years the country would face

(CONTINUED ON THE FOLLOWING PAGE 69)

The 106,500 dwt. super-tanker S. S. Manhattan is lensed during a trial run.

Hull 1679: the Building of a Giant Tanker

Bethlehem Steel Records Building of Largest Commercial Ship from a U. S. Yard

THERE IS DRAMA in the fact that the 106,500-ton S. S. Manhattan is the largest commercial ship ever constructed in the United States. This super-tanker was completed in Bethlehem's Quincy Shipyard last year and the story of her building, from keel to trial runs, is told in the briefly-titled 28-minute color motion picture *Hull 1679*, recently released by the Bethlehem Steel Company for distribution via Modern Talking Picture Service libraries.

Hull 1679 was scripted and produced by Audio Productions, Inc. from dramatic footage supplied by Bethlehem. The Manhattan has been in service for many months, delivering 30 million gallons of oil to U. S. ports. She has the capacity of 3,000 tank cars, equals a freight train some 20 miles in length.

Sequences begin on that September day in 1959 when the keel was laid and amass convincing evidence of the many skills and trades required to put together the 30,000 tons of steel that went into this super vessel, the largest ever built in an American yard and the

biggest, also, ever to fly the American flag.

The picture points up the importance of maintaining these skills by building such ships in American yards. *Hull 1679* calls attention to the need for a healthy U. S. merchant marine, especially in times of crises.

The building of the Manhattan was a high point in a 12-year tanker program at Bethlehem. Long before the day of her christening, the huge steel frames were rising along the ways; in an adjacent sub-assembly area (off to the side of the ways), portions of the ship were completed in a technique developed by Bethlehem during World War II.

Erectors put together seven-story bulkheads; boilers and turbines, condensers and oil coolers, water distillation equipment all come together as *Hull 1679* begins to take shape. Special steels of durable alloys went into her huge shafts; a maze of pipes for oil, steam and water thread the inside structure.

Americans will view with pride this record of achievement by one of this country's great integrated industrial establishments.

The Manhattan's 45-ton stack is hoisted into place on the after-deck house.

Mural on wall of Board of Directors' room is now on a sliding panel (partial view above), disclosing the audio and visual equipment housed behind it.

Booth equipment includes Zenith tv set; Kodak Carousel slide projector with Buhl wide-angle lens; Scott AM-FM radio and Viking "85" tape recorder.

Ed Palmer shows how translucent and white matte screens slide conveniently behind the decorative mural panel which conceals the entire installation.

An Audio-Visual "Center" in the Board Room

New England Telephone Company's A-V Executive Finds Place for Most-Used Tools

THE BOARD OF DIRECTORS ROOM at New England Telephone and Telegraph Company headquarters in Boston was set up before the use of audio-visuals had become important to many of their deliberations. There are no convenient closets adjacent for protection facilities and the room cannot be darkened easily. Yet, audio-visual materials are becoming more and more important to the directors.

As a result, at most meetings equipment had to be rolled in and out, set up and taken down, causing considerable distraction and waste of time.

Edward Palmer, responsible for many of the company's audio-visual activities, was called in to work on the problem. He discovered that behind a mural of Alexander Graham Bell working in his garret was a 30-inch space in-

side the wall which had been used to store some chalkboards.

By careful planning, this narrow space was redesigned to accept four of the audio and visual tools most frequently required for board meetings. As a result, the room has not been changed in appearance but is easily set up.

Above: a high-fidelity H. H. Scott "Stereomaster" tuner provides board members with choice of either AM or FM radio programs; slides back into cabinet for convenient, dust-free storage.

☆☆☆

Left: this Viking "85" tape deck is also drawer-mounted for ready access when needed for Board meetings. Four most-used a-v tools are provided.

Flexible hood spreads its wings behind the translucent screen to which it is attached, helping to keep ambient light from interfering with images.

With the hood in place, the rear-projection screen provides a bright, full-size picture. Mr. Palmer is holding remote control of the Carousel projector.

The matte-surface screen board has a cork surface on its opposite side for mounted displays. Screen is used for motion pictures, overhead projection.

what business wants in equipment for projection

THE MACHINES MUST STAND UP IN THE FIELD

THE A-V EXECUTIVE of one of our leading international companies made the point:

"Our men in the field turn on their projectors from three to more than a dozen times *every working day*. Compared to amateur, home use of film equipment, we estimate that these machines get 24 years of use within twelve months.

"It *has* to stand up, it has to give our men trouble-free performance and be backed up with convenient access to service facilities when we need fast replacement or repair. But we also make clear to our board members and purchasing people, when they compare values, that we're *not* buying home movie equipment.

"A precision-made and durable piece of machinery that puts a bright, clear image of our important pictures on the screen and has *good* sound reproduction is as important to my department as lathes and millers are to the shop superintendents."

Yes, business wants *trouble-free* performance. But it also expects maximum portability and convenience in a-v equipment because more and more programs are going into the field where they be-

long: meeting dealers, distributors, managers, employees and, most of all, customers and prospects.

Professional business films must come up bright and true on front or rear-projection. High-fidelity sound and a minimum of "gadgets" were among the high-points of a recent BUSINESS SCREEN interview-survey of large and small companies. "Let's have fewer turn-off, turn-on buttons and bows; put the money in the works," one respondent said.

The "cartridge load" principle is catching on. 8mm sound repeater-type projectors have been bought in lots of thousands, hundreds and by the dozen. Business welcomed the "fumble-free" self-threading innovation in 16mm sound (Bell & Howell); and the real "testers" agree that the Kodak "8" stands up with the best. Disc sound is very much with us for sound filmstrip equipment but new ideas, like Kalart's optical sound-on-the-strip and adaptations of hi-fi tape with strips and slides are in the field.

What business *wants*, business eventually *gets*. *Weight* has long been a bone of contention among companies whose representatives carry projectors on planes, in their cars and via train trips to dealers, branch plants and to buyers in the field. Such companies have turned to the diminutive but mighty Technicolor Instant 8, to DuKane's "Flip-Top" and similar sound and silent filmstrip and slide presenters. And they're the ones who are taking out the Fairchild, MPO Video-tronic and Vicaudio 8mm repeater projectors!

New metals out of the aerospace industry; *new electronic developments* and *sharper film bases* are combining here and abroad to push a-v communication methods and materials to wider horizons of useful service. *They're welcome!* □

Part 2: a buyer's guide and

Audio-Visual Equipment TradeFair

the sight/sound projection equipment and relevant accessories reviewed in the pages of this section were submitted by the makers as the **best and latest** models offered in their respective lines. In months to come, this equipment will be **put to the test** through long and hard business and industrial use.

equipment makers have come up with some solid, useful innovations in projection this past year. there are **few completely new developments**, but many improvements have been made in last year's major new models. the business buyer is getting **better 8 and 16mm sound projection, more convenient filmstrip (and slide) equipment** and more for his money.

16mm Sound Motion Picture Projectors

Specialist Autoload Filmasound Broke the "Fumble-Barrier"

The Specialist Autoload Filmasound, with its automatic threading feature, was a major advance from Bell & Howell in mid-1962. The business user welcomed this break of the "fumble-barrier" and Model 552 with Autoload remains the key to this company's audio-visual lines.

Model 552 was engineered to require minimum maintenance and its modular or "building block" type of construction permits components to be easily removed or replaced.

A covered guide system permits insertion of the film at top; within three seconds it glides into take-up position, completely threaded. Lost film loops are automatically

Bell & Howell's Model 552 Specialist Autoload Filmasound

restored; a "systems restorer" also corrects lost tension at the sound drum. Specialist Autoload weighs 30 lb., 13 oz.; has f 1.4 lens. 

Graflex 16 Simplifies Controls; Auto-Threads Sound Drum

☆ When film used on the new Graflex 16 reaches the sound head, it is simply slipped into a slot and "automatically threaded." The

—Graflex' 16 Sound Projector

other key features of this projector include: color-coded, interlocked pushbuttons for simplified control; a brightness-change option which changes low-voltage, 250-watt lamp to equivalent of 750-watt high-voltage, thus extending lamp life. Photo transistor feature is said to provide "cleaner" sound reproduction. The two models (820 and 815) accept interchangeable lenses; Model 820 has "stop-action" still feature. Both are housed in lightweight fiber cases. Power output for sound, distortion free: 15 watts. Weight: approx. 40 pounds. 

New 16mm Arc Projector from Victor Animatograph Corp.

A new model 16mm carbon arc projector, the Model 70-1600, has replaced the Victor Animatograph "1600" arc as the newest member of the Kalart Victor Series 70 line of sound-on-film projectors.

The portable, three-piece unit incorporates the Series 70 optical system shutter and film drive mechanism which, along with a carbon arc lamp and selenium rectifier, delivers 1800 lumens to the screen with virtually no light fall-off from center to edge.

25-watt amplifier has projector head permanently attached. Controls are top-mounted (including a microphone jack). Projector mechanism handles 2000-foot reels (standard on Series 70) and features such as safety film trips, offset film loop, stationary sound drum and 180-degree swing-out

lens are standard. New are: improved cooling system; improved lens mount and pressure plate. 

New 16mm Carbon Arc Projector is Kolort Victor Model 70-1600

Advanced Transistor Circuitry for Kodak Pageant Projectors

The Kodak audio-visual projection line includes several excellent "Pageant" models. AV-256-TR, for example, has a 25-watt transistorized amplifier, life-time exciter lamp, solar-cell sound pickup. Single-switch projector control makes operation easy for business use; instant reverse from the powered sound drum is another feature. This model has an 11 x 6" speaker in its lift-off baffle cover and fidelity control for optimum sound quality; safety gate and spring-loaded sprocket. Pageant models have printed-circuit construction. Weight of Model AV-256-TR is 37½ lbs. Lamp is standard 750-watt. 

Below: Kodak's Magnetic-Optical 16mm Projector: Model AV-105-M

Kodak 16mm Sound Projector — one of Pageant series: AV-256-TR.

☆ For company use where magnetic-optical projection is desirable, Kodak's Model AV-105-M provides recording, play-back and projection on a single machine. The Super-40 shutter is noted as adding screen brilliance at either silent or at sound speed. Controls of the AV-105-M are well-organized on single panel. Weight, including speaker, case, projector and microphone, is 39 lbs.

Accessories available for recording include a synchronizing brake kit which enables user to slow the machine to precise 24 frames per second; a synchronous motor kit and a two-projector synchronizing kit. These are optional on the AV-105-M. 

Siemens 2000 Double-Sixteen Sound Projector Is Introduced

Siemens 2000 double-sixteen optical-magnetic sound and recording projector.

☆ The Siemens "2000" double-sixteen sound projector has been recently introduced in the U.S. by its well-known maker through the facilities of the Arriflex Corporation of America. Built up from a system of basic modules, the machine consists of two major assemblies in a unique combination: a highly-capable single-system optical-magnetic 16mm sound projector; an additional 16mm magnetic film record and playback channel. A reliable and inexpensive in-

terlock is noted as an outstanding feature of this versatile machine. In the Siemens 2000, film is transported by a triple claw, well-controlled by a special, double cam. Three-direction adjustment of the projection lamp socket permits the choice of 250 to 1,000-watt lamps. Lamp is switched on with under-voltage to reduce initial current surge (extending life); current is then increased to rated intensity with rheostat and built-in ammeter. A 15-watt amplifier is standard. 

Cinebox Offers Push-Button Choice of 40 Sound Color Films

☆ U. S. distribution of the novel Cinebox with its push-button selection of 40 sound films (each three-minutes long) brings this Italian-developed "jukebox" type equipment into the business field.

21-inch rear-projection thru a series of mirrors; film rewind is automatic (15-18 seconds). Two speakers are located to right and left of the screen, which is framed to shade off ambient light. Entire unit weighs 328 pounds.

An Estey Electronics subsidiary, Cinevision Corp. of America, will rent the Cinebox for business, exhibit and promotional use. 📺

—Selecting films on the Cinebox

8mm Sound and Silent Projectors

Fairchild Announces Improvements on "400" Repeater Models

☆ An improved model of the now widely-known "400" repeating projector (Model B) has been introduced by Fairchild Camera & Instrument Corp. A new sound head provides an increase in frequency response and improved fidelity. Silicon transistorized electronics;

—Screen view of Fairchild 400

—Interior of the Fairchild 400 shows film threading path.

4 x 6" oval speaker are standard. The 400 weighs 17 lbs.; shows up to 20 minutes of 8mm sound film continuously; the film is encased in a clear plastic cartridge that contains no moving parts to cause wear on the film. No price change.

MPO Videotronics 8 Has Power-Driven Feed; Cycling Device

Recent introduction of an automatic "cycling" device permits the viewer to activate operation of an MPO Videotronic 8, automatic repeater 8mm sound projector.

This accessory widens the already generous range of this self-contained unit. Desk-top or conference room; counter or exhibit

The Videotronic 8 with cyler

Mechanism of MPO Videotronic 8

area are its "theaters" where up to 15 minutes of sound film may be shown. Weight: 19¾ lbs., it fits under a plane seat with room to spare. Extremely short film path and a power-driven film platter with specially-designed rollers, gate. Film comes in pre-loaded plastic magazine, with automatic rewind for continuous shows. 📺

Kodak's Sound 8 Projector Sets Pace for Durability

☆ The Kodak "8" sound projector is being used as the basic mechanism for repeater-type machines. Extremely durable, this equipment has record and play facility with separate input for mike and phono connections. Record level and warning lights are features. 500-watt projection lamp; 10 x 2" oval speaker; weight: 30 lbs., including levels, for showing (bright) and lower for use when recording. A quality pulldown and shutter combination keeps picture steady, jump-free; also contributes to quiet operation of this sturdy unit. 📺

(see source list on p. 49)

AudioVisual Equipment TradeFair

Kodak's "8" has magnetic sound.

New Wide-Angle Models of Technicolor "Instant" Projectors

☆ Two new industrial models of the Technicolor "Instant" 8mm cartridge-load silent motion picture projector are announced: Models 800WA and 500WA feature wide-angle zoom lenses for large image in desk top use or for rear-projection screen. Same lens will zoom to proper picture size for conventional show. Technor lens has high-speed f/1.5 aperture. 📺

Rear-projection case for "800"

Technicolor's "800" Projector.

A new flip top rear projection case, Model C106 (at left) is now available for use with either the 800WA or 500WA Technicolor "Instant" projectors (see new models noted above). Priced at \$59.50, case is only slightly larger than attache-size; holds projector firmly in position ready for use and also has storage space for up to eight Magi-Cartridges of film. 📺

Vicaudio Mark II Proves Dependability Under Heavy Use

The Vicaudio Mark II, with its large 9 x 12" picture screen area and light weight (less than 20 pounds complete) is Vicom's prime entry in the 8mm sound repeater projector field. The continuous magazine shows up to 20 minutes of film (at 24 fps standard) with 16 fps optional. It employs the Phillips 8 volt, 50-watt internal reflector lamp to provide maximum light and life of lamps. A plug-in transistorized amplifier feeds a 10 x 1.5" oval speaker.

The Vicaudio Mark II is all nylon-gear (no belts); it has a high-speed, wide-angle projection lens; swing-away film gate for easy cleaning and is permanently lubricated. Optional accessories in-

clude: larger screen sizes and a front projection kit.

Durability has to be strongest factor of the Vicaudio; heavy-duty construction of the projection mechanism will take plenty of wear and tear out in the field. 📺

Vicaudio "8" shown in action.

Sound Filmstrip and Slide Projectors

The "Displaymate" is Beseler Company's Latest for Point-of-Sale Use

Three years of design and testing preceded the introduction of the Beseler Company's sound filmstrip viewer, the "Displaymate," a point-of-sale companion to that company's widely-used "Salesmate" projectors.

TV-size image shows automatically-synchronized pictures with hi-fi sound. The showing can be continuous and repeated for 20 minutes or for 20 weeks. The "Dis-

The new "Displaymate" provides strong point-of-sale filmstrip use.

A "Discussion Switch" on this "Salesmate" interrupts the sound.

playmate" utilizes standard "Salesmate" film and tape cartridge on continuous loop. The maker notes that preview showings to three large companies brought in orders from all. Cabinet has handsome walnut finish; picture size is 23" width. "Displaymate" went 672 continuous running hours in test. ☆ Beseler's "Salesmate II" is a new model of this sound filmstrip machine with three variations to select: the "Discussion" type; a new "Picture Partner" and the 35-minute capacity "Long Play." ㊦

For Wide-Screen Slides or Filmstrips: the "Gold-Plater"

☆ Commercial Picture Equipment is an experienced supplier to business and industry for those *important* shows! When the picture has to go *big and bright*, their "Gold-Plater" puts filmstrips or slides up there via its 1,000-watt lamp and 2,000 lumens. Vista-Strip attachment provides for showing of wide-screen filmstrips. The model shown also has synchronized control for sound and picture change. Major companies whose pictures

have been carried on 30-foot wide screens are "Gold-Plate" users. ㊦

Commercial Picture Equipment offers the "Gold-Plater" at right.

DuKane Has a New Automatic Version of the "Flip-Top"

The new "automatic" version of DuKane's "Flip-Top" sound filmstrip projector utilizes the same

There's a new automatic model of the DuKane "Flip-Top" machine.

35mm single-frame film; sound is provided by 33-1/3 rpm recording (up to 20 minutes of sales message per side). Film rewinding is automatic with the exclusive DuKane Redi-Wind system. Pictures change automatically by means of the same (patented) DuKane inaudible signal system which is employed on other DuKane sound filmstrip equipment.

The "Flip-Top" weighs 19 lbs., 8 oz. The screen size is 11" and is of the rear-view (Polacoat) glass screen material. Comes in attache style, scuff-proof saddle (vinyl covering) case which has storage for films, records, push-button control and power cord. ㊦

DuKane "Auditorium" Projector Designed to Handle Big Show

DuKane's 576-85 1,000-watt "Auditorium" sound filmstrip projector services audiences from hundreds to several thousand. Versatility is assured: it handles both 35mm single-frame filmstrips and 2 x 2" slides. Filmstrip is advanced by remote control push-button; or it can be completely automatic when used in combination with the model 14B247 Auditorium Sound Unit. Has coated optics; 5-inch Simco f2.8 lens; turbine cooling.

Model 576-85 is a 1,000-watt DuKane Auditorium-type projector.

New Slide Cooling a Feature of Harwald's "Sonomatic" Cabinet

☆ A new model of the well-known "ADmatic" cabinet-type continuous slide projector, utilizing 30 2 x 2 slides is available. The sound model is the "Sonomatic" and it shows each slide for six seconds. 750-watt illumination puts a good, bright image on the 16 x 23-inch Polacoat screen under most display situations. The new model is finished in beige hammertone with a gold anodized grill and polished chrome trim.

Key to "Sonomatic's" good performance in the field is a new cooling system which the makers say will permit slides to be used for months in continuous service. Harwald is the builder of Inspect-O-Film electronic film inspection and other speciality items for a wide range of audio-visual uses. ㊦

The "Sonomatic" version of the widely-used Admatic slide cabinet.

Kalart's "Soundstrip" Offers a New Audio-Visual System

☆ Kalart's "Soundstrip" is based on a new audio-visual system which provides *both* pictorial *and* audio message on the same 35mm filmstrip. The "Soundstrip" film is a composite photographic print on 35mm film, either in color or b&w, from (a) a 35mm picture negative or (b) a 35mm sound negative.

The result eliminates either tape or disc for still-picture projection.

Picture is in double-frame format with four picture and four sound frames on each foot of film. With an average message of 12 seconds for each frame, a 100-frame, 20-minute "Soundstrip" can be produced on 25 ft. of 35mm film. Projector has automatic threading and advance, rewind tape-up. Weighs 25 lbs., has 3-watt amplifier and removable speaker. *It's new!*

It's economical to produce, duplicate strips for Kalart's "Soundstrip" unit.

LaBelle Combines High-Fidelity Tape Sound With Filmstrips or Slides

☆ LaBelle Industries' sound filmstrip equipment utilizes either cartridge or conventional reel-type tapes for sound reproduction. The "AV Tutor" is the company's combination dual-track, transistorized tape and automatic filmstrip projector. It has silent signal synchronization and the versatility needed for either desk top or for large screen showings. The maker says "ideal for sales work or for training," and we agree! 📺

The "Maestro II" will record, play-back and project 140 slides.

The "AV Tutor" combines tape player with automatic filmstrips.

☆ The "Maestro II" is LaBelle's "big-capacity" sound-and-slide machine, with its 140-slide capacity. The "Maestro" delivers 90 minutes of continuous, automatic operation of 35mm slide-sound presentation. Instant slide changes are activated by silent signals.

The user can record (on tapes), playback and project with this one-piece, complete A-V system. LaBelle is featuring both "Tutor" and "Maestro" models currently.

Tape mechanism is of high-fidelity type with fine sound quality. 📺

McClure Projector "61" a Compact with Impact in Field

☆ McClure Projectors call their Model 61 "compact" the sound filmstrip projector *with impact*. It sets up in seconds, weighs only 11 lbs. Has automatic rewind and 150-watt lamp with proximity reflector. 2½-watt amplifier feeds a 4-inch speaker. There's an "interruption switch" which permits user to stop program and resume without loss of continuity. 📺

The 11-pound model "61" is a McClure "compact" for soundstrips.

Revere "435" Puts Magnetic Sound on New Type of Slide

☆ The Revere P-345 is a sound and slide projector using a new principle. Exclusive Sound-Slide Holders carry up to 20 seconds sound per slide (recorded on machine); it projects both 35mm and super slides; has micro-focusing. 40-slide magazine contains ten Sound-Slide holders. Has a transistorized record/playback system. A 3M Company product. 📺

Viewlex Features Self-Contained "Table-Top Automatic"

☆ Viewlex is featuring the "Table-talk Automatic" a portable, fully-automatic (or remote-controlled) sound filmstrip machine. Utilizes 35mm filmstrip projection synchronized to regular or long-play records via an inaudible 30-50 cycle signal. Large 8 x 10" screen for table-top viewing. Compact attache case contains entire unit *plus* the storage of 12" records and strips. Viewlex engineering has made the "Tabletalk Automatic"

easy to carry and to operate. 📺

Viewlex "Tabletop" Automatic

Slide Projectors for Display, Training & Visual Presentation

Choose Either the "Executive" or "Inspector" from C.O.C.

☆ Compactness plus the convenience of automatic film rewinding are key features of the C.O.C. Inspector filmstrip projector. Ultra-fast, professional quality f2.5 3-inch lens provides bright, good images. At 11 feet, it will fill a 30 x 40" screen. Because of the film-feed feature, no time is lost.

Below: the C.O.C. "Inspector."

AudioVisual Equipment TradeFair

36-slide magazines are feature of the handy C.O.C. "Executive."

The C.O.C. Executive combines a built-in screen and a semi-automatic slide changer all in a smart and light-weight carrying case. Up to 36 slides (per magazine) are projected via precision optical system on large 8 x 8" "Lenscreen." Precision optical system. 📺

Kodak Quality Insures a Bright Picture with the "Carousel"

☆ Kodak's Carousel slide projector (Model AV-580) carries a big name and its operation merits the reputation. Automatic or semi-automatic slide presentation (35mm) is its job. A color-coded control panel makes the operation easy; fan-cooling keeps the show on the road. A lamp air switch automatically turns off the lamp if the fan is inoperative. Available nationwide from all Kodak AV dealers. 📺

Model AV-580 Kodak "Carousel."

The Random-Access Selectroslide — It's Still Ahead of Field

☆ Two Random-Access Selectroslide projectors, the SLS-750 and the Dual SLX1750 were contributions of Spindler & Sapppe last year. The company outdid itself with new and useful a-v tools, including the introduction of the Manual Selectroslide, its Speed Dissolve System and the Slide Commander for remote control.

Finger-tip control of the SLS-750 or SLX-750 operates up to 96 slides with the flexibility of immediate return to any slide as required by the user.

The Speed Dissolve System util-

izes two 1,200-watt projectors coupled to the system, enabling an

Strong Introduces Slide Projector With Xenon Light Source

For permanent business theater installation or convention shows, the Strong Electric Corporation has developed a new slide projector employing the highly-efficient Xenon light source. Unveiled at the NAVA Trade Show, new model is equipped with precision optics, portable stand. Write the maker for further details.

Right: Strong Electric Company Slide Projector With Xenon Light

Overhead Projectors for Portable Use

Small Size, Economy Are Features of Beseler Porta-Scribe

Weighing only 17 pounds, this new model 15710 overhead projector, the Beseler Company's "Porta-Scribe," has 10½ x 13 x 14½" base with a miniaturized projection head and supporting arm. It accepts full-sized 10 x 10" transparencies in standard form. The new model comes with a 400-watt projection lamp and a 15-foot power cord. There is no diffusion in brightness, whiteness or definition of the image when transparencies are placed on its platen. See facing page for source data.

Left: Charles Beseler Company Porta-Scribe Overhead Projector

Portability Key to Ozalid's Porta-Lite Overhead Projector

Ozalid Products introduced the Porta-Lite line of extremely light weight portable overhead projectors last year and the product has been well-received by business and industry. Lamp wattage ranges from 500 to 750 (in Porta-Lite 7's) and up to 1,000 watts in the Porta-Lite 10 model. Low silhouette minimizes obstruction of images; it has tilting head but level platen. Model 7 takes 7 x 7" transparencies; Model 10: 10 x 10".

Right: Porta-Lite Model 10 Overhead Projector from Ozalid

Buhl MicroWide Lens Cuts Projection Distance in Half

A new Buhl MicroWide lens cuts in half the normal projection distance required for DuKane MicroMatic, Standard 666 and similar sound and silent filmstrip equipment. Easily mounted (comes complete with mounting adapter) in front of conventional 3-inch focal length lens of projector, it reduces it to 1.5 inches. Easily removed for normal projection.

The Latest in Projection Screens

Large Fast-Fold Rear and Front Projection Screens from CPE

Carrying really large screens into the field by car or plane is greatly simplified by the Commercial Picture Equipment Company's line of "Fast-Fold" screens. The size range is from 43 x 58" up to 10½ x 14-feet. Mat-white screen surface (velvet embossed vinyl); fungus-proof, fully-washable and foldable; the frame has tilt control (Tilt "T" Leg) and is adjustable for height. Pola-Vu surface is available for rear projection; flannel board type has "flannel-hook" surface. Carrying cases go down to 39 x 7 x 7" up to the maximum of 44 x 10 x 12" size.

Above: Fast-Fold Projection Screen: Commercial Pic. Equipment.

Da-Lite Push-Button Beaded Screen in New Dress for 1963

Enameled in smart beige with subtle gold veiling, Da-Lite's latest Golden Challenger screen model (and companion silver lenticular Wonder-Lite) have the new hi-lo height adjustment feature. Choice of two surfaces is offered: White Magic II Chemi-Cote is a refinement of glass-beaded surface.

Finer graded beads are chemically-coated to resist moisture. Sets up ready for projection in just six seconds from floor to show.

Below: Da-Lite's '63 Challenger has new colors plus hi-low feature.

U.L.-Approved Electrol Screen

Underwriters' Laboratory approval to the Da-Lite Junior Electrol projection screen (may also be hung from or recessed in a ceiling). White Magic II Chemi-Cote glass-beaded fabric is standard with mat white or Da-Tex translucent (rear-projection) surfaces optional. Available in all sizes from 50 x 50" up to 12-feet.

New, Larger Sizes for Radiant's Lenticular Wall Screens

Development of a unique positive tensioning device for new, larger size lenticular projection screens up to 70 x 70" sizes is announced by Radiant this month. (see illustration right). Screen features the silver lenticular "Opti-Glow" surface introduced by this company in 1952. Its aluminum-silver-coated fabric resists ambient light from sources other than the projector. Screen was previously available in standard 50 x 50" size until development of Radiant's "Tension Bar" which assures tensioning required for proper picture clarity. Screen is one of "Educator" series for a-v field.

Below: Radiant Lenticular Wall Screens, available in large sizes.

Polacoat Research Improves Lenscreen for Rear Projection

A specialist in rear screen materials now widely employed by other accessory makers, Polacoat of Blue Ash, Ohio utilizes high-transmission panels of glass, plexiglas and other plastics coated one side with a profuse layer of tiny lenses. This "Lenscreen" has low-reflectance quality on the surface which permits rear-screen to face high levels of lighting in the field.

Continual testing (see illustration right) helps improve these materials. The outdoor test pictured was held in mid-afternoon on a very bright day. A mirror recessed in a darkened enclosure behind screen panel caught the projector beam. Image light was re-

verted through the screen in full color and rich contrast.

Polacoat "Lenscreen" material shows image in outdoor sunlight.

Hudson's "Groupshow" Screens Add Flexibility to Field Use

The AV Industrial Products Division of Hudson Photographic Industries features the popular "Groupshow" rear-projection accessory screen that converts any existing 35mm, 16mm or 8mm projector. Unique "black" screen

Another Hudson product is the desk-top rear-projection slide projector: 10-Square Slide Theater, with its 10 x 10" screen.

Weighing only 11 lbs., it folds down into a deluxe carrying case. Theater includes one 36-slide tray (2 x 2 slides) and will accept super slides, CBS Lamp, 75-watt, 120-volt, AC or DC operation and convection-cooled.

This is an extremely handy device for sales, demonstration, or any field use where slides serve as a flexible medium.

Below: Hudson Photo. Industries offers 10-Square Slide Theater

HIP Rear Projection "Groupshow" Screen in Junior, Senior Models

yields brilliant, contrasty pictures under normal room light.

Optical system includes a flat, front-surface mirror. Folds to only 3 x 24 x 31" and "Senior" has 18 x 24" in screen surface; "Junior" model has 12 x 12" screen size.

New Inspect-O-Film Model Q Mark IV Electronic Film Editor

The latest model of the widely-used Harwald Inspect-O-Film electronic 16mm film editing machine is the "Editor" Model Q, Mark IV. Improvements include DC drive with transistorized control (eliminating all solenoids), reduction in number of relays through solid-state circuitry, disc magnetic brakes and clutches. Only one belt remains. The "Editor" combines viewing and sound for previewing and editing; speed of machine is adjustable to 650 frames per second both forward and reverse.

Optional models include power-

ed editing spindles; automatic electronic scratch detection and recording; electronic cleaning.

Mark IV Inspect-O-Film Editor

Screen Accessories; Editing Equipment & Cabinet Projection

New Design for the Busch "Universal" Cine-Educator Cabinet

A daylight projection unit for use with any standard 16mm or 35mm slide or filmstrip projector is made possible by the design of Busch Film & Equipment Company's latest Universal Cine-Educator. Projection is completely enclosed inside a 40" wide x 25" deep and 72" high cabinet. Equipment and film are protected from dust and damage; room darkening is eliminated. Unit has a 20 1/2" x 27 1/2" Lenscreen. Ruggedly-constructed wood cabinet is equipped with 5" heavy-duty casters for easy mobility in the plant.

Low cost is an added feature from this long-established maker of rear-projection cabinets. See source list below for more data.

AudioVisual Equipment TradeFair

Above: Universal Cine-Educator Busch Daylight Projection Unit

Movie-Mover RP from Wilson Corporation for Daylight Use

The "RP" Movie-Mover is a fully portable rear-projection cabinet which accommodates all standard motion picture and filmstrip projectors, etc. It has screen equal in size to 30" TV receiver, suitable for groups up to 50 persons; is caster-mounted for transport anywhere in salesroom, factory or office. Nominal cost, plus wide-angle lens as required for projector used in this cabinet. Shown in auto dealer's salesroom (right).

Delta Finds the Key to A-V Service

New Orleans' Dealer a Specialist in Films and Equipment

THE AUDIO-VISUAL DEALER is the man-in-the-middle. His key role includes both service and sales of projection equipment and accessories; within his area he is also providing more special a-v tools for meetings, conventions and demonstrations. And when the dealer is also a major film library source, his company is an invaluable asset to the community in which he serves. That description fits Delta Visual Service, Inc. and its founder-president, Francis J. Didier, of New Orleans.

Delta is well-named. Situated in that historic port city, at the threshold of all Latin-America and in the focal center of the Deep South,

The company occupies a restored, historic firehouse at 715 Girard St.

the company occupies a restored landmark, the former firehouse of Volunteer Company No. 2 (circa 1837). But the people at 715 Girard Street look to the future and are well-equipped to meet it.

A long-time licensee of Modern Talking Picture Service, Inc. and a specializing Kodak audio-visual dealer, Delta is well aware of its role in the city that has long been a prime convention and meeting site. Serving business as well as schools, churches and all manner of civic groups, the Didier company concentrates on serving the industrial-commercial a-v user.

Provides Tools for Meetings

For this clientele it provides projected television, closed-circuit equipment, background projection for stage presentations, translucent (rear-projection) screens and all types of automatic 2 x 2" and 3 1/4 x 4" slide projectors. It has on hand, for rental or sale, the most-needed types of sound equipment, including the new wireless mikes, arc projectors, plus CinemaScope

Delta president Francis Didier and 3,000-watt Genarca projector.

screens, cueing and speaker timing devices.

Frank Didier personally supervises this key activity; he has creatively aided clients in the development of meeting themes, slogans and the visualization of executive presentations.

Service That Saved Money

One of the slides developed by tive's talk was so appropriate that it was incorporated without change in the company's outdoor billboard program the following year. On another occasion, converted 10 x 10" hectograph negatives for use on the VuGraph went into printed meeting booklets at minimum expense.

Medical groups, including the American College of Surgeons (who were equipped for 11 simultaneous showings of motion pictures, slides and opaque materials), have been regular Delta clients. The Surgeons' group has already contracted for meeting requirements in 1964, when the College again visits the city.

Yes, New Orleans is a great place to work and to visit! And for those who value the audio-visual media on the job, in meetings and for education or recreation, this model a-v dealer helps make the media work and keep working. ☐

Electronic film inspection is safeguarding these valuable prints.

PERSONALITY

Screen Writer Harvey Langee Aims for a Career in Medicine

An experienced production consultant and screen writer has turned to professional medicine as his life-time career. Harvey Langee, former vice-president of Film Counselors in New York, has just completed his fourth year as a Stanford University medical student. He entered the University at 32, after 10 years in the Eastern production field.

After joining Film Counselors in 1956, he handled the I.B.M. and California Texas Oil Company accounts as well as work on A.P.I. A.B.A. and other film programs. Prior to that he had his own production company and had produced films for Bell Telephone Laboratories.

His medical education has been financed through free lance script work and as associate producer of the NET television series, *The Computer and the Mind of Man*. He has been able to continue his film work as a result of the Stanford Plan where the four-year medical course is spread to five years, permitting time for outside employment. Langee has also been engaged in a research project to study the diurnal cycle of the EEG (brain waves). A report on this work was presented at the meeting of the American Academy of Neurology in April.

His present plans are to continue free lance script writing and medical research until February, 1964, then medical school from February to June, when he will receive his medical degree. This field will not lose a film-minded, experienced hand, but we predict that medicine will gain a dedicated communications' expert to enrich the future. ☐

Screen Directors International Guild Re-Elects Don Hershey

☆ The Screen Directors International Guild has re-elected Don Hershey to a second term as president. Paul V. Falkenberg and Robert J. Kingsley are the 1963-64 first and second vice-presidents of the Guild.

Other elected officers are Leslie Goldman, secretary, and Robert Braverman, treasurer. Members of the Executive Board are: Shirley Clarke, Peter H. Cooper, Shamus Culhane, Herman Engel, Lewis Jacobs, George Jacobson, Sidney Meyers, Leo Seltzer, George C. Stoney, Willard Van Dyke, and

Harvey Langee

Albert Wasserman. Alternate Board members: Andrew L. Gold, Mauri H. Goldberg, Ira Marvin, James M. Rose, Yael R. Woll.

Named members of the Auditing Committee were Nox M. Lempert, Joseph Lerner and Shephard Traube. By unanimous vote, a new three-year contract between the Guild and the Film Producers Association of New York was approved with members noting important gains in wage increases and improved fringe benefits. ☐

Franklin Heads Western Office for National Television News

☆ Tom Franklin, veteran broadcast newsman, has been appointed western manager for National Television News, with headquarters at 1542 North Genesee Avenue, in Hollywood.

NTN, which is based in Detroit, provides free newscast on behalf of major national companies to more than 500 television station news departments throughout the U. S. Franklin is presently on-the-air-editor of *Executive Wire*, a new five-minute daily business and financial news program on KFI, Los Angeles.

He will continue with this program, as well as working with business firms in the planning, production and distribution of television newscasts. From 1950 to 1953, Franklin was radio and television director for Kaiser Motors Corporation and is the author of "Broadcasting the News," a basic text used by many schools of journalism. ☐

Portman to Direct Engineering at Camera Service Corporation

☆ Warren Portman has been appointed Chief of Engineering of Camera Service Center, Inc., New York. He will supervise CSC's manufacturing activities and head CSC design and development. ☐

IFPA JOURNAL

INDUSTRY FILM PRODUCERS ASSOCIATION, INC.

Fourth National Conference. Awards Banquet Wind Up an Eventful Association Year

THE FOURTH NATIONAL Conference, held this year in the comfortable surroundings of Los Angeles' Ambassador Hotel from June 13th through the 15th, brought together a program of highly-interesting speakers, some of the year's most unusual films, a change of officers and the culminating event: the Annual Awards Banquet in the Ambassador Ballroom.

Jack Goetz of the Aerospace Corporation is IFPA's president-elect and, from New England, Jack R. Smith of the MITRE Corporation, assumes the post of executive vice-president. Everett C. Kelly (Lockheed-California) is our new financial vice-president; Ken Maurer (also of Aerospace) has taken Tony Gorsline's post as chapters vice-president. Conference vice-president for the coming year is another Lockheed California man, Joseph M. Gulli and your new editorial vice-president, responsible for these JOURNAL pages, is Autonet's Ed Hayes.

Conference Speakers Share Ideas

There was charm as well as experience and good new ideas as

this year's Conference speakers shared know-how with visiting delegates and guests. Following Gene Burson's welcoming address on Friday morning, June 14, moderator Art Ballinger introduced Stanford's Ernest Rose who spoke on "The Fallacy of the Target Audience." Foreign relations expert Wolfran Von Hanwehr's informative talk on "Film Production Behind the Iron Curtain" concluded the first morning session.

Saving Time, Improving Scripts

Our own past-president Bob Scott described defense communications' capabilities in "The Challenge of Real-Time Communications" as the opening event of the afternoon session on Friday. Script expert Walter Wise cited "The Scriptwriter's Responsibility in Military Public Information Film Production" in another of the highlight talks of the Conference.

The widely-appreciated talents of Stan Freberg, producer of radio and television commercials, climaxed the first day's program as he presented his ideas on "Communications for Laughs . . . and

Retiring IFPA President H. Eugene Burson reviewed an active year . . .

Sales!" Visits to the Trade Show and a cocktail party in the Boule- (CONTINUED ON NEXT PAGE)

A Word of Introduction to Your Association President

Our Jack Goetz, newly-elected president of the Industry Film Producers Association, is manager of Motion Picture Services for the Aerospace Corporation at El Segundo, California. Graduated from Pennsylvania State University in

Jack R. Goetz
IFPA President, 1963-64

1947 with a degree in journalism. Jack has had continuous experience in the missile and space industry, both in publications and in motion picture production.

From 1952 to 1954 he was Supervisor of Guided Missile Technical Publications at the Goodyear Aircraft Missile Division in Akron, Ohio. Later, from 1955 to 1956, he was Supervisor of Technical Publications and Motion Pictures in the Atlas Division of the Burroughs Research Center, Paoli, Pa. In 1956, he became Manager of Motion Picture Services, Missile and Space Vehicle Department, General Electric Company. He joined the Aerospace Corporation in 1961, bringing to his new tasks a world of special experience.

IFPA looks forward to a great year under his leadership, founded on the tradition of progress which has continued under our capable presidents of former years. □

IFPA 1963-64 officers left to right: Joseph M. Gulli, conference vice-president; J. Kenneth Maurer, chapters vice-president; president Jack R. Goetz; Jack R. Smith, executive vice-president; and Everett C. Kelley, financial vice-president. Editorial v.p. Ed Hayes not present

NATIONAL CONFERENCE REPORT:

(CONTINUED FROM PAGE 51)
ward Room topped off the day.

With Maurice Hart as moderator, the Saturday morning program was opened by Russell Holslag's "Discussion and Demonstration of New 8mm Optical Sound Equipment" as developed by John Maurer but not yet available. Al Tillman and his panel, including the lovely Gale Perry, described the problems and potentials in "Underwater Photography in Industry" as the final event of this morning session.

High Spots on the Program

Opening the final Saturday afternoon program, Charles Cahill, producer, described the National Safety award-winning techniques used in "High Speed Photography (Auto Collision Studies) and the Documentary Film." Cahill recently was awarded two bronze plaques for his safety motion pictures.

The chills and thrills of "Free Fall Motion Picture Production" were visualized and described by specialist Dave Burt to wind up an instructive and highly-interesting Conference talk program.

National Conference coordinator for this year, as before, was John W. Gregory. IFPA is indebted to its many friends within the West Coast segment of the factual film industry for their contributions to our social events, programs and convention printing.

Among the exhibitors whose products were displayed in the

Trade Show area were Arriflex, Bach-Auricon, ColorTran, Fairchild, Glen Glenn, Magnasync, the Ralke Co., and S. O. S. Photo-Cine-Optics. Their equipment displays were well-attended throughout the Conference period.

New Editor of Journal Invites Contributions

To Our Members:

During my term of office, which I shall enjoy, it is my intention to do my best to perpetuate the standard of excellence set by the preceding Editorial Vice-Presidents.

I would like to see these pages continue to reflect your news and views. Each issue of BUSINESS SCREEN can bring controversial, informative and timely material to your attention. But to accomplish this, your participation continues to be necessary.

We will get in touch with you when we believe that any member has comments and suggestions of value to us all. We would deeply appreciate your "closing the loop" by keeping us informed of your activities through Ken Maurer, Chapters Vice-President. Use our Hollywood Box Number (564) to write!

Ed Hayes
Editorial Vice-President

PAST AND PRESENT OFFICERS PICTURED AT CONFERENCE

Our officers, past and present. 1 to 11: H. Eugene Bursan, Jock R. Smith, James Wasson, Roy Fielding, Mitchell Rose, Oskar Potterson, Jack R. Goetz, Joseph Gulli, J. Kenneth Maurer, Everett Kelley. Seated in foreground: retiring chapters vice-president Anthony Gorsline.

Gale Parry, photographer, actress and skilled skindiver, lent charm and beauty to the platform as she discussed "Underwater Photography for Industry."

Charles Cahill, award-winning safety film producer, described the use of "High Speed Photography (Auto Collision Studies) and the Documentary Film."

Stan Freberg, head of Freberg, Ltd., has made humorous commercials a major factor in TV and radio. He shared experiences on "Communications for Loughs . . . and Sales!"

Robert C. Scott, Aerospace Corporation (an IFPA past-president), spoke on the "Challenge of Real-Time Communication," at the Air Force Space System Headquarters.

Walter Wise, independent writer and producer, outlined "The Script Writer's Responsibility in Military Public Information Film Production."

Russell Holslag, of J. J. Developments, Inc., lead IFPA members through a "Discussion and Demonstration of 8mm Optical Sound Projection."

Dave Burt, of Parachuting Associates, Inc., brought thrills and chills with his presentation of "Free-Fall Motion Picture Production."

Ernest Rose of Stanford University offered utilization data of real value in his talk on "The Fallacy of the Target Audience."

HERE ARE THE FOURTH ANNUAL INDUSTRY FILM PRODUCERS AWARDS

Jack R. Smith and Paul De Mello (at left, right above) receive a Cindy award for their film, "Loser" from Tony Gorsline (center).

Technical Information

CINDY AWARD
"Laser"
Produced by: The MITRE Corporation.

FINALIST AWARD
"Aleutian Manning"
Produced by: U. S. Air Force, Air Photographic & Charting Service (MATS), 1352nd Photographic Group, Lookout Mountain Air Force Station, Hollywood, California.

Finalist award to Southern Pacific Co. for the film "To Save Your Skin" was accepted by Edward Corroll (l) and Frank Colbough (ctr), assistant to SP's president. Tony Gorsline is at right in photo above.

FINALIST AWARD
"You Call the Shot"
Produced by: Lockheed Georgia Co.

Kenneth Farrar (left) vice-president for manufacturing of Douglas Aircraft Co. accepted the special Cindy award on behalf of his president, Donald Douglas, Jr. Allan Reed, master of ceremonies, made presentation.

Special Award

to
Donald W. Douglas, Jr.,
President of Douglas Aircraft Company, a special
"Cindy Award"

Honoring Mr. Douglas' outstanding support of the motion picture in industry as an important communications vehicle. The award was made by master-of-ceremonies' Allan Reed, a film star.

Accepting Cindy awards to Aerojet General Corp. are Mitchell S. Rose (l) on behalf of "Two Dimensional Grain Design" film, and Frederick Giermann (r), for "The Power of the Individual." Chapters v.p. Tony Gorsline made the two presentations.

Out-Plant Production

CINDY AWARD
"Two-Dimensional Grain Design for Solid Rocket Motors"
Produced for: Aerojet-General Corporation.

FINALIST AWARD
"Mastery of Space"
Produced for: The National Aeronautics & Space Administration.

Conference Coordinator John Gregory and Mrs. Gregory enjoy the annual dinner festivities.

Projector pointers are given to Conference delegates during an interlude for viewing the Trade Show.

Three Important Additions to 1963 Conference Program

☆ The 1963 Conference Program, brought together with good taste but in the usual rush which accompanies a pre-convention period, had the inevitable (but few) oversights which we now acknowledge:

Sustaining Member: ColorTran Industries, 630 S. Flower Street, Burbank, California.

Conference Sponsor: Hollywood Film Enterprises, Inc., 6060 Sunset Blvd., Hollywood, California.

Companies Represented in IFPA: General Dynamics/Astronautics, 5001 Kearny Villa Road, San Diego, California.

Our apologies and thanks to

Conference delegate checks the Fairchild camera exhibit, listening to reproduction of its 8mm sound.

THE INDUSTRY FILM JOURNAL

Exhibiting its progress at the 1963 National Conference, the Delaware Valley Chapter's display made an impressive visual contribution.

them to for their continued support ☆ Conference talks will appear in these pages in coming months. ☐

Meeting chat: (l to r) are Wilber Blume, Aerojet General; Ray Jewell, Lookout Mountain Air Force Station; and Delaware Valley Chapter chairman Peyton Stallings (Radio Corp. of America).

Lee Davis is Guest Speaker as Delaware Greets Wives

☆ It was "Wives' Night" at the May 23rd meeting of the Delaware Valley Chapter. Hosted by membership chairman Jacques Van Vlack at the Eastern Pennsylvania Psychiatric Institute in Philadelphia, the program was attended by a large number of members and their wives.

Featured speaker at the meeting was Lee Davis, vice-president of marketing for Calvin Productions, Inc., Kansas City. Mr. Davis showed two of his company's "Workshop" films: *The Vicious Circle* and *Overs and Outs* and both pictures brought the visiting ladies a view of their husbands' problems.

Program chairman Ron McNally launched his new career in that post with an exceptional film program which included *Color Collage* (Eastman Kodak); *New York, New York* (an Audio production for American Airlines); and *Information Machine*, produced by Charles Eames for IBM.

Concluding the interesting events was a tour of the motion picture production facilities at the Institute and an explanation by host Van Vlack of the application of films to psychiatric study. ☐

Camera equipment drew an interested crowd of Conference delegates in the trade show area this year.

SHOW OFF?

NEVER! You should never have to apologize for this movie projector's actions.

This new KODAK PAGEANT Projector is put together so that you have no parts to attach, or find, or wonder about when you're setting it up. You have nothing to lose.

Even its power cord is permanently attached. And its cord is a long, 12-foot double length so you can forget about looking up or hooking up extensions.

Politely, this projector shows you how the film goes. Just follow the red line when you thread it and you should never have to ad lib your way into a movie again.

No awkward waits for sound system warm-up. Push a button. Hear sound instantly!

This KODAK PAGEANT Projector has a new, space-age sound system that won't act up during a performance. It's electronically quiet (no hiss, no static, no popping, no crackling). You'll probably never need to have it fixed. You can definitely forget about carrying or storing spare parts for it.

It's all transistors. Which means no vacuum tubes to worry about. It also has a lifetime solar cell. Meaning noise-free sound, without the problems of the fragile photocell it replaces.

It has rugged printed circuitry that can't be jostled or bumped out of kilter. And it has a new idea in exciter lamps. The one that comes with the projector should be the one you trade in with the projector years later.

With all these excellent features, you can keep volume at a level that won't disturb people in the next room, yet everyone at your show hears the slightest whisper on the screen. They are never distracted by machinery noises. There are so few moving parts and they move so quietly, the machine never calls attention to itself.

The picture your audience sees is always bright, yet with no eye-fatiguing "hot spots." Picture brilliance is the same all over the screen—the picture is fully visible even in hard-

to-darken rooms, thanks to the exclusive KODAK SUPER-40 Shutter.

The sound your audience hears is never mush-mouthed. It speaks up, out of a big, 11" x 6" baffled speaker—a speaker sized to handle full amplifier power, reproducing every sound it is possible to record on the film.

If you like a lot of switches and dials to fiddle with on a movie projector, we're sorry. This machine has only one button for sound, and one dial for volume, another for tone. That's all.

If you'd like to show off a little with a projector that won't steal the show, ask for this KODAK PAGEANT 16mm Sound Projector, Model AV-126-TR. To see and hear it work, or read illustrated literature about it, write your name and address here:

.....
.....
.....

Then send it back to us at the address below.

Check this box ☐ and we'll have a Kodak dealer call you to arrange for a convenient demonstration. No obligation, of course. 7-47

How to Sell Tires

Kelly-Springfield Points "Open Road" for Dealers

SPONSOR: Kelly-Springfield Tire Company

TITLE: *The Open Road to Tire Sales*, 12 min., color, produced by Animatic Productions.

The purpose of this new slide-film is to convince service station operators that they can sell tires. Kelly-Springfield knows that many service stations miss out on tire sales because dealers and their men don't know quite how to go about selling tires.

It isn't hard, Kelly-Springfield tells dealers. What you need is the right perspective — someone is going to tell customers when they need new tires . . . so why not you? Have confidence, the film says, you don't need to use high pressure, don't need to be a glib talker, just know the product and be honest and straightforward. And use some *showmanship*, identify your station as a tire dealer, put up some displays where they can be seen.

Specifically, the film points out, how to sell tires is to look for worn tires, point them out, show new tires, answer objections, and it's not too hard to clinch the sale — four out of five drivers needing tires buy from the first person who asks them.

Kelly-Springfield is now using *The Open Road* successfully in several versions — for Kelly-Springfield independent dealers, for dealers handling Kelly-Springfield-manufactured private brand tires, and 100 prints for Sunoco dealers, who regularly handle the Kelly-Springfield line.

"Food—or Famine?"

United Nations Film Shows Critical World Food Needs

SPONSOR: Food and Agriculture Organization of the United Nations

TITLE: *Food — or Famine*, 45 min., color, produced by the Shell Film Unit (England).

The plight of more than a billion people who today are ill-fed and hungry is the subject of this new film introduced for the first time in world-wide premieres May 27th.

Food — or Famine shows that today's serious food problem could become critical by the end of this century when the present world population of three billion people will have risen to six billion. It also demonstrates that the food problem could be solved through scientific agriculture which could produce much more food, through protection of crops and stored foods against pests and spoilage and by better distribution.

These have been the aims of FAO since its establishment in 1945. The five-year Freedom from Hunger Campaign was launched in 1960 to give private industry and private organizations and individuals an opportunity to support FAO's program by giving even wider publicity to the world food situation and by supporting development projects.

The film is based on an original treatment by Michael Orrom and was produced by Stuart Legg. It includes footage shot in Europe, Southeast Asia, India and Latin America.

On the same evening of the premieres the film was shown on Channel 13 in New York with a statement by Adlai Stevenson, U.S. Ambassador to the United Nations. It drew attention to the World Food Congress, which FAO held in Washington in June with the U.S. Government as host.

Advances in Use of Drugs for Mentally Ill is Shown

Active workers in mental health programs, including those organized under President Kennedy's five year, \$800 million program, will see increased hope for many patients in a new film, *Advances in Drug Management of Schizophrenia*, sponsored by Wyeth Laboratories.

The 25-minute documentary shows how nearly 10 years of drug research has led to the development of advanced methods in the use of drugs for treating chronic schizophrenia. The experienced clinician can view the film to compare methods and results with the film's technical supervisor, Dr. Douglas Goldman, chief psychiatrist at Longview State Hospital, Cincinnati, Ohio. Staff aids can also benefit from the film.

Features of the 16mm black and white sound film are methods for programming antipsychotic drug therapy in institutional care of severely regressed chronic schizophrenics, suggested management of extra-pyramidal effects where these are encountered, and live interviews with a number of patients demonstrating varying degrees of response to treatment. The film also emphasizes the effective use of occupational therapy and other methods of rehabilitation.

The film is made available for showings at meetings of recognized mental health associations as well as professional psychiatric personnel through the Film Library, Wyeth Laboratories, P. O. Box 8299, Philadelphia 1, Pa.

* * *

U. S. Film Aims to Improve Statistics on Cause of Death

To aid physicians in completing medical certification on the death certificate, a major source of mortality statistics in the United States, the U. S. Department of Health, Education and Welfare has provided a new 17-minute color film titled, *Medical Certification of Causes of Death*. The National Bureau of Vital Statistics of the National Center for Health Statistics is the official Government sponsor.

The film was produced by the Communicable Disease Center, Public Health Service Audiovisual Facility, Atlanta 22, Georgia. Prints are available for doctors and interested hospital personnel for short term loan via this source. They may be purchased outright (at government film rates) through Norwood Films, Inc., 926 New Jersey Avenue, N. E., Washington 1, D. C.

what's new in pictures

All-Star Cast in Film for American Cancer Society Volunteers

THE AMERICAN CANCER SOCIETY has introduced a new film featuring leading Hollywood stars, which will be shown to the two million cancer drive volunteers at orientation meetings with the purpose of making them feel "in" on the great crusade as well as to show them in an entertaining way how an ACS volunteer should go about his work.

Three hundred prints of the film are now in distribution among volunteer groups. These prints will later be shown to non-theatrical groups and on television.

Appearing in the film are such luminaries as George Burns, the Beverly Hillbillies, Bob Cummings and Evan Evans, Dick Van Dyke and Carl Reiner, Steve Allen,

Ralph Edwards and Keely Smith. All volunteered their performances for the film to ACS' Director of Films and Television, Harry Olesker.

George Burns, acting as master of ceremonies, introduces the acts, each of which has a point to make in regard to a volunteer's work. The Beverly Hillbillies all go dashing out to make their crusade calls and "don't git nothing from them tight-fisted Yankees who kep' askin' how the money's gonna be spent."

Jed says, "'Pears t' me they wasn't none of us proper prepared t' do no collectin'." All gather around as Jethro starts to read the ACS volunteer's pamphlet.

Bob Cummings shows one rea-

\$4 Million for Dick Van Dyke?

son why it is a good idea to make your ACS calls face-to-face. (He meets gorgeous Evan Evans on one of his calls — says to the audience, "See — you never can tell.")

Volunteer Dick Van Dyke always suggests a specific amount when he calls on the average middle-class home. Four million dollars. But, he's always ready to compromise, and you can't go wrong in thinking big.

After all the fun, Ralph Edwards plays it straight, stresses the great need for contributions to the Cancer Fund. Keely Smith endorses this in her show-closing song, *Keep Someone Happy*.

Harry Olesker produced and directed the 27-minute film for the American Cancer Society.

Film Pathological Conference for Professional Medical Use

A Clinico-Pathological Conference at the Philadelphia General Hospital has been filmed for continuing medical education use by the Wm. S. Merrell Division of Richardson-Merrell, Inc. The 39-minute case study allows for audience participation, is in two parts so that the professional medical viewers may make their own diagnosis following completion of the first segment.

Dr. John B. Chewning, who developed the idea for Merrell, believes that the film realistically re-creates a clinico-pathological conference or a medical society meeting," he said, "the new film gives each person in the audience the challenge of a real CPC. Related case material may be presented also by the local pathologist."

Merrell supplies the viewer with a pocket-size summary booklet giving all the details of the case in the film. A section of the booklet is sealed and it contains the answer.

Hospitals, medical schools and medical societies (to whom this

professional picture is directed) may obtain the film from John B. Chewning, M.D., Director of Professional Relations, The Wm. S. Merrell Division, Richardson-Merrell, Inc., Cincinnati 15, Ohio. The company also offers the award-winning series on *Medicine and the Law*.

Three Films on Communism in National Education Program

☆ Herbert A. Philbrick, author of "I Led Three Lives" and the man whose career as an undercover agent for the FBI has been told in a widely-seen television series, narrates a new 13 minute motion picture, *What Is Communism?* now being offered for outright print sale by the National Education Program, 815 E. Center St., Searcy, Arkansas.

The new film is part of a series of three pictures offered by this source under the general title "The Threat of Communism." *What Is Communism?* portrays Communist techniques and brutality, their infiltration into the United States government, labor unions, the communications and entertainment industries, colleges, universities and churches.

Other titles in the series are: *What Is the Difference Between Communism and Socialism?*, which explains the process whereby Communists first soften up a country by allowing, even assisting, Socialism to be embraced. The film depicts pre-Communist Socialism in early Russia and in Czechoslovakia — and shows it could happen here. Final film in the series tells *What Can We Do About It?* and all three can be purchased as a series for \$175. Individual prints are approximately \$65.00. All are in black & white.

☆ Fuller Filmstrip to Chapman 5
☆ The W. P. Fuller Co., Western manufacturer of paints and paint

accessories has awarded production of a 14-minute color and sound filmstrip to Chapman 5 Productions, Inc. The filmstrip is being created for sales and sales promotion use by the Fullerton, California-based concern.

Elektra Produces "Opening" for Danny Kaye's Fall TV Show

☆ Elektra Studios, New York, has just finished producing the Opening for the new Danny Kaye Show starting in the fall on television.

Kaye, in town with his producer, Perry Lafferty, made faces, struck poses, jumped on the trampoline, all providing enough material for the Opening, as well as two billboards — one for Armstrong Cork, and another for the alternate week sponsors, Ralston Purina and American Motors.

Elektra's Roy Kuhlman is designing the Opening of the new show.

A Note of Editorial Correction

☆ Polaroid's award-winning TV commercial at the American Festival was produced by Pelican Films for Doyle Dane Bernbach. Another producer was erroneously credited with this prize-winning spot in our Number Three, page 36.

Two films produced for the Arabian American Oil Company, mentioned on page 53, Number Three, were produced by Richard Lyford. Another producer was credited with these productions by error.

The McCormick Inn, dramatic new addition to Chicago's lakefront skyline, will be built opposite McCormick Place, Chicago exposition center. 17 meetingrooms will provide the latest in audio-visual meeting facilities.

"Aristocrats" in Hospitality for Business

Business Groups Meeting in Chicago Find the Aristocrat Inns of America Combine the Latest in Audio-Visual Tools With Flexible Facilities and Personalized Service

FIRM BELIEVER in the effective role of audio-visuals, a Chicago doctor who learned the value of films while a medical student, is setting a precedent in equipping an entire chain of motor hotels in that city with the ultimate in projection facilities for his business clientele.

Dr. Martin L. Gecht, a native Chicagoan in his early forties, entered the innkeeping field just six years ago. A graduate of the Chicago Medical School, he was in general practice for several years before taking specialized work in dermatology at the Cook County Hospital. Today, as president of the burgeoning Aristocrat Inns of America and a practicing dermato-

logist, he enjoys the dual role and draws a comparison.

"A traveler is very much like a patient," says Dr. Gecht, one of the founders of the Allport Medical Center, "he is tired, anxious and in a place he doesn't necessarily want to be." This practical insight into the peripatetic public is put to work in his Aristocrat Inns' operation where employees are instructed always to consider the special needs of their "house guests."

Seeks Advice of A-V Leaders

From medicine, too, Dr. Gecht learned the value of consultation. When plans for his towering McCormick Inn (opposite Chicago's new exposition center, McCormick Place) were first being drawn months ago, Dr. Gecht invited audio-visual experts from business and industry to specify the ideal facilities since incorporated in its meeting rooms. Members of the Industrial Audio-Visual Association were pleasantly surprised when American Oil exec., O. H. Peterson, brought McCormick Inn plans to a Milwaukee meeting.

Counsel was also sought from sales managers and sales training directors of other large Midwest companies, from film studios and projectionists. Today, three modern motor inns located in downtown Chicago all have audio-visual facilities that were the fore-runners

of the McCormick hostelry to come.

Another outlying inn, the Acres on Chicago's northwest side, was the first motor inn with meeting room facilities of this type in the Windy City. These four existing inns have, as a consequence of their far-sighted planning, attracted a very large number of the nation's top companies and association groups for meetings of all kinds and sizes.

The Aristocrat Inns' downtown buildings are strung along the most adjacent area of South Michigan Avenue, nearest to McCormick Place. The Essex Inn, at Eighth Street, is adjacent to the Conrad Hilton and the ultra-modern Ascot House, at Eleventh Street boasts a supplemental theater facility just across the street. Both offer gratis parking, on the premises, with unlimited in and out privileges for guests.

The good taste and discretion which have gone into meeting rooms is also reflected in both public dining facilities and guest rooms. The Essex Inn houses Delmonico's Restaurant, while the Ascot House has an equally unique dining spot, the Cafe French Market, with a gourmet cuisine. From its spotless, stainless steel kitchens, both Inns provide meeting room service as well as banquet facilities and guest room service.

Outdoor recreation decks at both

This Chicago chain of motor hotels shows the way in audio-visuals

motor inns are complete with swimming pools, landscaping, beach lounges and expert supervisors.

But these columns are addressed to the men who make provision for meetings. Their interest in room capacity is served at the Essex Inn by the wide range of facilities: the Buckingham Court (capacity 75); the Park East Walk (capacity of 50). Both of these rooms are join-

The 15-story Essex Inn houses the famed Delmonico's Restaurant, has 325 modern guest units available.

The 9-story Ascot House has an outdoor swimming pool and the unique French Market restaurant.

ed or made divisible by air walls as are the Essex and Windsor Courts with a capacity of 40 persons each. To the latter combination, still another suite can be added to build capacity to 140. Even the smallest gathering is served by the Aristocrat Suite, which is reserved for meetings of 30 or less.

Royal Enclosure Holds 500

The Royal Enclosure (or ballroom) of the Ascot House will handle groups up to 500 persons or, through the use of its air walls, can be separated into five meeting

Dr. Martin Gecht, who learned the value of films in medical school, heads the Aristocrat Inn chain.

The Buckingham and Essex Court meeting rooms at the Essex Inn were combined in "classroom" style for a recent sales meeting of 75 men.

oms. Three additional rooms at Ascot are available for meetings of smaller size.

Dr. Gecht and his partner, Eugene Heytow, have gone a step farther than most inn-keepers in their enthusiasm for the modern tools so essential to successful meetings. These tools are furnished, gratis, for meeting use: projection screens (both 6' and 10'); projection equipment tables; extension cords; talkboards (either 6' or 4'); P. A. systems with standing, table or valiere microphones; lighted podiums of three varieties (floor light, table type or a portable combination podium with built-in battery-operated P. A. system); flip chart pads; flip chart easels; display easels and product display tables with fireproof coverings.

A group of 150 required this "auditorium" type setup at the Essex Inn, using a bi-level stage. Four rooms were easily combined.

The 3M Communications System with its overhead projector, Thermofax copying machine and "instant" transparencies (reproducing either color or black & white material in eight seconds) is also on hand.

The McCormick Inn, "flagship" of the Aristocrat Inns, a \$20 million, 25-story, 750-room hotel-motor inn facility will be built on air rights across from McCormick Place. Plans call for ten meeting rooms. The Garden Deck atop the tower will include seven more. All of these rooms will incorporate audio-visual media facilities and the latest in presentation technique, for their sponsors are practical enthusiasts who practice what they have learned to believe in: the value of these tools in putting ideas across for business clientele.

Firms Show American Airlines "New York" to Employees

EXTENDING THE USEFUL LIFE of current and outstanding sponsored motion pictures is a notable trend toward the interchange of prints in sizeable numbers for the use of non-related companies. A recent American Medical Association IMPAC program made use of 100 prints of a Ford "Get Out the Vote" picture; the inspiring Bob Richards' films of General Mills have found widespread use among other companies.

Adopt American Airlines' Film

Latest to score national acceptance among large industrial companies is American Airlines' outstanding new travel film, *New York, New York* (BUSINESS SCREEN No. 2, 1963) which is now being used for several special

purposes "above and beyond the normal call of duty."

The Metropolitan Life Insurance Company, seeking to guarantee a large and interested audience at annual agents' and managers' meetings to be held in New York next year, is circulating five prints of the film to its branch offices throughout the U. S. The point made is — New York is not only where the home office is, but a friendly, pleasant place to visit as well.

Mutual of New York, another major insurance company in Manhattan, has also arranged for showings of the film for a similar purpose.

The Martin Company (Martin Marietta), which has recently un-

Fred Cook of Iowa State Wins Farm Film Foundation Award

☆ Winner of the Farm Film Foundation's \$500 Professional Improvement Award in 1963 is D. Frederiek Cook, audio-visual specialist at Iowa State University. The award was made on July 8 at the annual meeting of the American Association of Agricultural College Editors by Mrs. Edith T. Bennett, executive vice-president of the Foundation.

William O. Maxwell, manager of the advertising department, International Harvester Company, Chicago, was the principal speaker and assisted in the presentation of the award and of three Honorable Mention certificates which were accompanied by \$50 cash awards.

Mr. Cook is a supervisory executive at Iowa State in motion picture production. Honorable Mention recipients were Ralph J. Ballew, visual editor, Extension Service, Auburn University; E. Albert Moffett, asst. communications specialist, College of Agriculture, University of Florida; and the Department of Agricultural Journalism, University of Wisconsin.

Judges who selected the winners were: Dr. Landis Bennett, in charge of visual aids, Agricultural Extension Service, North Carolina State College; Edward Marsden, International Harvester Company; and J. K. McClarren, Foreign Agricultural Service, U.S. Department of Agriculture. ■

Film Students Receive Browning Awards

SRO Audience Honors Winners at Columbia University

THE CAMERA MART'S "Irving and Sam Browning Memorial Awards" to the most promising film production students of the year attending Columbia University, C.C.N.Y., and New York University, were presented on May 27th at the Casa Italiana Auditorium on the Columbia University campus.

Prof. Erik Barnouw of the Department of Film, Radio and Television at Columbia University, Yael Woll, Director of the Institute of Film Techniques at C.C.N.Y., and Prof. Haig P. Manoojian of the Department of Television, Motion Pictures and Radio at New York University, who had chosen the most promising film production students of the year at their schools, were on hand that evening to present the winning students with their award plaques.

Four Share the Annual Awards

The award-winning students are Harrison Engle of Columbia University, David Bienstock of C.C.N.Y., and Eli Bleich and Ares Demertzes of New York University. In view of the fact that the N.Y.U. entry was co-directed by two students, the Camera Mart doubled its award so that both students received full shares. All three films produced by the students were shown and received enthusiastically by an SRO audience that overfilled the auditorium.

Preceding the awards presentation and the film showings was a

discussion of the problems involved in the making of an independent low-budget film without compromising content or artistic values.

Helped Produce "David & Lisa"

Among those leading the discussion were several of the people who were connected with the production of the feature film, *David and Lisa*: Leonard Hirschfield of

Irving Oshmon, vice-president of Vision Associates (left) chats with Leonard Hirschfield of VPI (right).

VPI Productions, who was Director of Photography; Irving Oshmon of Vision Associates, who was Film Editor; Janet Margolin, who is the "Lisa" of the film, and Dr. Theodore I. Rubin, the author of the original story.

Paul Meistrich, vice-president of the Camera Mart, Inc., discussed the motion picture background of Irving and Sam Browning, their experiences in the early days of film making and the ready

Honored guests at awards' program (l to r) Mrs. Anna Browning, the secretary-treasurer; Samuel Hyman, president; and Poul Meistrich, vice-president, all of the Camera Mart.

help and encouragement they gave young film-makers throughout their lifetimes. He also pointed out that the Browning brothers were among the first to introduce the Arriflex camera to America and were instrumental in persuading Robert Flaherty to use this camera in the making of *Louisiana Story*.

As part of the Irving and Sam Browning Memorial Award, the Camera Mart is granting each of the four award-winning students a \$150 credit towards the rental of professional motion picture equipment, as well as thousands of feet of raw stock film. Du Art Film Laboratories, a New York laboratory participating in the award program, will process this negative film without charge. Charles Lipow, Camera Mart's general manager, served as chairman of the program. ■

Syd Cassyd Television Curator for Hollywood Film Museum

☆ Syd Cassyd, "founding father" in 1946 of the Academy of Television Arts and Sciences and president of that organization in 1950, has accepted the post of curator of the Television Collection of the Hollywood Museum.

A veteran of film and television production, he produced his first TV show in 1945 for the experimental workshop of the American Television Society in New York, later produced 130 episodes of two live shows on Hollywood television and five experimental filmed programs of the Ford Foundation titled *Almanac of Liberty*.

From 1959 to 1960 he was a consultant on research and development for educational television at the Los Angeles Extension Division of the University of California where he also served as acting curator of the television collections.

WORLD OF POWER:

CONTINUED FROM PAGE 39)
determined amount of time
owing the million dollar display
equipment.

Cost breakdowns, based on a
-mile hookup, used over a seven-
y period, show that TV equip-
ment and technicians cost 73% of
the outlay; the telephone com-
pany's relay service, 20%; the nar-
rator, 5% and the wire service
1%.

The Ad Director's Viewpoint

Stanley S. Roberts, director of
advertising and sales promotion for
the Tractor Group, sums it up
this way: "A particular means of
communication is never considered
an end in itself. A typewriter
can be used to make out a grocery
list or to write a best selling novel.
In other words, it is the application
of the medium which justifies its
use."

Three major points were consid-
ered before the time, effort and

money were invested in live TV as
an exhibit adjunct:

1. Will the extra effort make our
exhibit a standout?

2. Does the subject for live tele-
casting add its measure to the
show?

3. If one and two can be an-
swered "yes," is the cost realistic in
terms of return?

Viewers Gave Us the Answers

We were able to answer "yes" to
the first two and our predictions
for return on investment looked
accurate. In retrospect, over-
whelming acceptance of the idea as
measured in terms of viewers and
their reaction to the "World of
Power" exhibit spell out the an-
swer to question three in big letters
... YES!

* * *

"Techniscope" Process Said to Cut 35mm Negative Costs 50%

Cutting in half the costs of neg-
atives and negative processing in
35mm color photography, the
Technicolor Corporation has in-
troduced a new photographic sys-
tem called "Techniscope."

The new system uses 35mm
color negative, with photography
accomplished with standard spher-
ical camera lenses. The negative
frame in the camera is two per-
forations in height as compared
with the usual methods in photo-
graphy of four perforations in
height. Consequently, one-half the
amount of negative is used. This
means that in the "Techniscope"
process the negative and negative
processing costs are reduced by 50
per cent.

Following processing, the
"Techniscope" two-perforation
frame is optically printed vertically
at a ratio of 1:2 providing a 35-
mm anamorphic Technicolor posi-
tive print having the normal four
perforation height.

A Paramount Pictures' feature,
The Day of the Hanging, produced
by A. C. Lyles for that company,
is using the new "Techniscope"
system of photography. Photog-
raphy is accomplished with normal
35mm cameras, with simple modifi-
cations to the film transport me-
chanism, aperture and finder.

In addition to anamorphic ratio
prints, prints for spherical projec-
tion with aspect ratios of 1.75:1
or 1.85:1 or 16mm prints with
either anamorphic or spherical im-
age may be manufactured. 35mm
and 16mm prints for television use
may also be made through this pro-
cess.

Four Top Producers Join 20th Century Fox Movietone

Twentieth Century-Fox Movietone's strong bid for a major place in the industrial film field has now been augmented by the addition of a group of four top producers skilled in business film and industrial show production.

W. R. Higginbotham, Vice-President of Twentieth Century-Fox and head of Movietone, has brought in the former Presidents and Executive Vice-Presidents of Cinerama Productions, Caravel Films and Sound Masters, Inc. to beef up the company's extensive production staff.

The men involved are Grant Leenhouts, William Githens, David I. Pineus, and Kirby Alexander, whose combined talents and experience encompass theatrical, television, newsreel and large stage productions, as well as business films.

Grant Leenhouts' background includes seven years as Head of Production for Cinerama, Head of Planning and Production for the U. S. Navy Training Film Branch during the war, Head of Production of the International Motion Picture Division of the United States Department of State, writer, director and producer of many theatrical films, and consultant on planning and production of Educational TV programming for the Ford Foundation.

Bill Githens has such credits as originator and President of the first large chain of newsreel theatres, managing editor of Pathe News, founder and President of Sound Masters, Inc., and National Educational Films, Inc. He was Head of Production for U. S. Navy special productions during the war.

Dave Pineus was the founder and President of Caravel Films, Inc., producer of hundreds of prestige industrial films made during the last 40 years in addition to thousands of TV and other advertising and public relations projects.

Kirby "Jack" Alexander directed for the March of Time Television series. His background includes features and numerous religious and educational films. As a documentarian he has produced in South America and around the world.

The new production group will work under the direction of Jack Kuhne, Fox Movietone Production Manager. Headquarters is at Fox Movietone Studios in New York, one of the larger groups of sound stages in the city.

BUSINESS SCREEN EXECUTIVE

NEWS OF STAFF APPOINTMENTS AND BUSINESS FILM INDUSTRY DEVELOPMENTS

Edwards to Head Professional, Commercial Kodak Advertising

Robert W. Edwards has been named manager of the professional and commercial advertising division of the Eastman Kodak Company. His appointment was announced by W. B. Potter, vice-president and director of advertising, and A. Dexter Johnson, advertising manager.

Associated with Kodak advertising for 17 years, Edwards joined the company in 1946. In 1955 he was appointed assistant manager of amateur products advertising and has been responsible since for the preparation of magazine advertising, promotional booklets, brochures and direct mail campaigns.

A veteran of both Atlantic and Pacific sea campaigns in World War II, he was commissioned as a lieutenant senior grade after completing special studies at the Harvard School of Business Administration. He was graduated magna cum laude from Wooster College before entering the service, and is a member of Phi Beta Kappa.

Edwards' short stories have appeared in the POST, AMERICAN and other periodicals. A member of the board of directors of the Rochester Advertisers, he is also a former director of the Advertising Council in that city. The Edwards' reside in Irondequoit, New York. They have three children.

M. S. Mickey Greenman

Greenman Named Vice-Pres., Gen. Mgr. of Cinevision Corp.

☆ M. S. "Mickey" Greenman has been appointed vice-president and general manager of Cinevision Corporation of America, a subsidiary of Estey Electronics, Inc. Cinevision Corporation holds the exclusive United States rights to Cinebox, a new audio-visual medium being introduced in the United States. The Cinebox is a motion picture jukebox, now popular in many countries of Europe, which holds 40 three-minute color, sound, industrial or entertainment films which can be selected for playing as records are chosen on a conventional jukebox.

As operating head of Cinevision, Mr. Greenman will direct the distribution of the Cinebox through all marketing channels and in addition will coordinate production and supply of films for the machine. He was formerly head of commercial film production for United Press International.

Speed is General Manager of Anso Photo & Repro Division

John J. Speed has been appointed Administrative Assistant to the Vice President and General Manager of the Photo and Repro Division of General Aniline and Film Corporation. He was formerly Operations Manager of the company's Ozalid Products Plant at La Habra, Calif.

Thaddeus J. Trojnar, formerly Eastern Regional Sales Manager of the division's Distributor Operations, will succeed Mr. Speed as Operations Manager at the La Habra plant.

Mr. Speed, who joined the company at corporate headquarters in New York in 1951, became Operations Manager of the La Habra plant in January, 1962. Prior to that he served in various administrative and staff positions at the corporate level and within the Dyestuff and Chemical Division of General Aniline & Film.

Harvester's Edward Marsden

Marsden to Harvester Company as the Film Project Supervisor

Edward D. Marsden is the newly-appointed motion picture project supervisor in the Advertising Department of International Harvester Company, Chicago. According to W. O. Maxwell, department manager, Marsden will be responsible for coordinating research, development and preparation of

motion pictures produced by the company.

A graduate of the University of Miami and a former teacher in the Dade County schools, Marsden joins Harvester after 11 years with the United States Steel Corporation in Pittsburgh, where he had similar responsibilities.

Audio Productions Names F. J. Lucidon As Account Executive

Frank J. Lucidon has joined Audio Productions, New York, as an account executive.

A veteran of both World War II and Korea, Mr. Lucidon has an extensive background in films, television and radio, both in sales and as an announcer on station WFIL-TV, Philadelphia, and on other stations.

Lawrence, Wright to Niles' Chicago Studio as Directors

Donald Lee Lawrence and Rudy R. Wright have joined the Fred A. Niles Communications Centers, Inc., Chicago, as film directors. Lawrence was associated with Hill, Rogers, Mason & Scott advertising agency as a TV producer-writer before joining Niles.

Wright is the former vice-president in charge of production at Ray-Eye Productions. Both directors will headquarter at Niles' Chicago studios.

Westrex Elects Gale Livingston Vice-Pres., Int'l & Recording

Gale Livingston's appointment as a vice-president of Westrex, subsidiary of Litton Industries, has been confirmed by George T. Scharffenberger, senior vice-president of the parent firm.

In his new position, Livingston will coordinate activities of Westrex International and the Recording Department. He has been general manager of Westrex Recording. The company has operations and facilities in 29 countries.

Nemethy-Davis Names Parrott as Director of Visual Services

The newly-appointed director of visual services for Nemethy-Davis Company, Detroit advertising, merchandising and marketing firm, is John E. Parrott. Announcement was made by Allan R. Malcomson, president.

A former account executive at Wilding, Inc. and also associated with the Ford Motor Company in sales promotion and training activities, Parrott is a graduate of the University of Washington.

When one of Frank Willard's able representatives calls on you, by Ned, he'll make sure you get the whole story about the services and facilities of one of the South's biggest film studios. We're good, you see. How else do you think we get such clients as Coca-Cola, Delta Airlines, Lay's Potato Chips, and Finkhauser's Delicatessen?

If you want it best, fast, and pretty reasonable, contact

The Astrovision helicopter was designed for use in film production.

"Astrovision" Unit Set Up to Shoot Helicopter Film Scenes

A modified helicopter which is said to permit the taking of vibration-free motion pictures from the air has been announced as a service for film producers by the Photo Instrumentation Corporation, New York. Called "Astrovision", the unit uses a Bell helicopter whose rotors are maintained in dynamic balance to minimize vibration.

Located outboard on its starboard side is an anti-vibratory camera mount, so positioned that a cameraman can operate his camera from within the helicopter and simultaneously guide the pilot as to speed and direction he desires.

The anti-vibratory camera mount is a two piece unit consisting of a supporting base and an anti-vibratory platform. Inside the platform's aluminum housing is a network of resilient steel which can be dampened for maximum anti-vibration according to the weight of the camera to be supported and the helicopter speed at which shooting will take place. Cameras such as Arriflex, Mitchell, Camerette, and helicopter speeds of 14 to 30 mph are recommended.

Mounting of the camera to Astrovision's anti-vibratory mount is achieved with a fluid type pan and tilt tripod head. With it, the cameraman can pan in a 125 degree arc from a point parallel with the line of flight to the rear, and tilt downward in a 75 degree arc.

A pilot familiar with shooting techniques, an advisor to instruct the cameraman in proper use of the anti-vibratory mount, also form a part of the Astrovision rental package.

Klaeger Moves His West Coast Operation to Paramount Lot

Robert H. Klaeger Associates of California, Inc., West Coast operation of the New York based studios of the same name, has relocated at Paramount Studios, 5541

along production lines

Marathon Street, Los Angeles. The Western operation continues to be managed by its vice-president, Robert A. Drueker.

Kodak Reduces Prices 17% on Its Ektachrome ER Stock

The Eastman Kodak Company announced on June 25th that the price of Ektachrome ER motion picture film has been reduced about 17 percent. The price reduction applies to 16mm, 35mm and 70mm Ektachrome ER film.

Introduced as a special purpose product, Ektachrome ER has found application in color motion pictures made with available light and in missile photography. A Kodak spokesman said that the price reduction is expected to broaden the market for the product.

Canyon Films Sponsors First Annual Junior Film Awards

A Phoenix-based studio, Canyon Films of Arizona, has sponsored the first annual Arizona Junior Film Awards for movie-makers of high school age. The statewide community relations project covered both 8 and 16mm entries, sound and silent, in both color and black and white.

Winner of the Awards contest was 16-year old Steve Spielberg, who received a \$400 camera and a trophy as well as a 12-volume set on film production for his school's library. The winning entry was a 30-minute silent film, *Escape to Nowhere*, with Spielberg's friends cast as American and German troops in World War II. Plaques also went to second and third place winners.

Roy Boley (left) presents film books to Phoenix teacher Afton Carpenter.

Judging was by a panel of Arizona photographers and television producers as well as by Del Shelley, director of audio-visuals in the Phoenix schools and George Aurelius, manager of Arizona Paramount Theatres. The awards ceremony was held in the screening room of the Phoenix Paramount.

Bob Allen, Canyon Films' secretary-treasurer and a veteran professional cameraman, summed it up:

"We couldn't be more pleased with the results. Camera clubs and individual students pitched in to produce some fine films. From present indications, the contest will be several times as big next year. But the big question is already answered. We wanted to recognize and encourage young talent, if we could find it. Believe me, it's there."

City Officials Expedite Work of Film Makers in New York

"Welcome film-makers!" is the new slogan in New York City these days. New rules to aid producers of commercial entertainment and television films have just gone into effect, as instituted by the city's Department of Commerce and Industrial Development.

Formerly a variety of municipal departments had to be checked before production on a film could begin, but now processing of permits has been centralized in a Coordinator of Commercial Photography. Applications will be expedited by this office through other city departments and returned within three days. Coordinator is Mary Imperato, who has been working with film producers for the Commerce Department for some time.

With a permit, producers may set up cameras on city property and be given police protection, traffic assistance and other cooperation. The Parks Department, Transit Authority and Port of New York Authority will continue to handle their own permits.

IF YOU OWN A BERTHIOT

ZOOM LENS, YOU WILL NEED THIS

F&B TAKES THE WIGGLE OUT OF ZOOMS WITH THE BEELAND ELECTRIC ZOOM CONTROL

Here is a rugged yet light weight control that assures you of smooth zoom action from start to finish of each shot. Mounts directly on the lens barrel, no camera attachments are required. Interchangeable mounting clamps allow the same control to be used for the 17mm to 70mm, and 17mm to 85mm lenses for 16mm cameras, and the 38mm to 150mm lens for 35mm cameras.

The cameraman can control the picture size by eye or can pre-set the zoom range by quick-set limit stops on the quadrant. A silicon loaded slip clutch and mechanical limit stops provide precise control of the zoom range. The control box is equipped with instant contact push-buttons for easy finger-tip operation of zoom-in or zoom-out. The box mounts on a tripod handle, or directly on the camera for hand-held operation. It also may be held and operated by an assistant. Speed range is rheostat controlled and adjustable from approximately 2 1/2 seconds to 10 seconds of zoom time. A special feature is the very efficient motor which operates for hundreds of moves on one set of 5 type "C" flashlight batteries. Two models are available: Regular, where noise is not a problem. Super-quiet, where whisper-quiet operation is needed for sound recording.

\$185⁰⁰
Regular

\$275
Super- Quiet

- Smooth, quiet zoom action
- Easy finger-tip operation
- Precise zoom range control
- Zoom speeds from 2 1/2 to 10 seconds
- Interchangeable—for 16mm and 35mm cameras.
- Mounts directly on lens barrel
- Uses type "C" flash light batteries

Movielab Invites Film Makers With "Operation Red Carpet"

★ A new open-house policy, "Operation Red Carpet," is helping show producers and distributors of films the "inside story" of a modern film laboratory. Inaugurated by Movielab, Inc., New York City, the project provides tours of the company's extensive black and white and color film facilities.

According to Movielab president Saul Jeffee, the professional film laboratory is one of the most important and, at the same time, unheralded, branches of the film industry. "Except in rare instances" says Jeffee (who is also national president of the Association of Cinema Laboratories), "the film industry takes the laboratory for granted, even though without it, not a foot of film could be projected. We are the last to receive credit for a job well done."

He feels that is vital for professionals in the field to understand technical operations of a lab, to learn what can and what cannot be done after completion of photography. It is a mistake, he believes, for producers to spend large sums on so-called "above-the-line" production costs while economizing excessively on the "below-the-line" budget, which includes the essential technical services of the laboratory.

"It is a wise producer," says Jeffee, "who allows time to do the job right." Vast sums have been invested in the development and construction of Movielab's modern equipment, now on display. This year alone, the laboratory is spending \$500,000 for new equipment and expansion.

Eddie O'Brien, The Writer, Moves to Wilton, Connecticut

★ Eddie O'Brien, The Writer, has moved from Washington, D. C. to new business and residence facilities in Wilton, Conn. After July 1, this well-known script writer will make his office headquarters at 300 Danbury Road, Wilton, Conn. His new telephone number in Wilton is 762-8400, A C 203.

Du Pont Increases the Price on Eleven of Positive Films

Prices of eleven Du Pont positive motion picture films and certain leader stocks were increased from 2.3 to 7.9 per cent on June 7th. Motion picture films affected by the increase are Type 802 sound recording, Type 833 fine grain VA sound recording, Type 803 release positive high speed,

Type 828 fine grain master positive, Type 834 TV recording, Type 225 "Cronar" fine grain release positive, Type 825 fine grain leader stock, and Type T-71 exposed rawstock leader stock.

Announce Skyline Films, Inc. New Manhattan Film Studio

A new film production company, Skyline Films, Inc., has been formed at 124 East 40th Street, New York, by Joseph F. McDonough, a former executive producer at Craven Film Corporation.

Prior to entering the motion picture field, Mr. McDonough, president of the new firm, was a vice-president and associate creative director of Cunningham and Walsh Advertising Agency. David Saperstein, former production manager and a producer-director of Craven Film, is vice-president and in charge of production.

Guild Issues "Screen Director"

★ Film and television producers, advertising agencies and other interested parties are currently receiving the first edition, new series, of THE SCREEN DIRECTOR, a bimonthly publication of the Screen Directors International Guild. Editor of the new publication is Jack Glenn, SDIG Public Relations Director. The editorial board consists of George L. George, Robert Edmonds, Julius Postal, Robert Braverman, Leslie Goldman, Graeme Ferguson, Dana Noyes and Lewis Jacobs.

Cinebox offers 40 pictures for selection by viewers.

Cinebox Executives Review Use of Movie System for Business

☆ Cinebox, the new motion picture box being introduced in this country on a major scale by Cinevision Corporation, Hicksville, N.Y., is expected to have quite a few uses in the industrial field in addition to the several thousand expected to be placed for entertainment purposes in next two years.

As envisioned by Stanley Green, President of Estey Electronics, Inc., Cinevision's parent company, Cinebox will be used for industrial trade exhibits, point-of-sale retaining, travel agencies, as an adjunct to automatic vending machines, and many other applications.

For example, in industrial trade exhibits a manufacturer with many divisions, or many products, could exhibit short films dramatizing and merchandising many products in a compact nine square feet of expensive exhibit space. Or, automobile dealers whose selling floor space is generally limited, would be able to show prospects every desired model of an extensive car line, in action, on the Cinebox.

A department store that wished to demonstrate and sell many lines of major appliances could utilize the Cinebox. The 40 films on the machine could be allocated among the various manufacturers. Each could provide action presentations of its products, featuring the performance features, consumer benefits, interior how-it-works animations and other details, by professionals.

Bright New SeAQUartz Lamp for Underwater Film Making

☆ The pocket-size SeAQUartz* is said to provide a new concept in underwater lighting for photo-

graphy. Only 7½-inches square but delivering a brilliant 5,000 watts the new underwater lighting unit is available from Birns & Sawyer Cine Equipment.

Researched and engineered by this company, the SeAQUartz utilizes an adjustable locking yoke which attaches to camera or underwater apparatus for angling the beam. It has a cast aluminum housing with convection cooling fins to accommodate the 65,000 candle-power, quartz iodide Sylvania Professional Sun Gun lamp. The exclusive reflector design is said to have over 750 light intensifying surfaces to work with and reinforce one another.

SeAQUartz lights are available for 115 volt AC, 220 volt AC or 30 volt DC battery pack. Write New Products Desk for details.

... The Projectola Editor (SOS)

Fast "All-in-One" Editing System Announced by S.O.S.

☆ An "all-in-one" editing system, designed to save time in newsfilm and other types of film editing, is offered by S.O.S. PhotoCine Optics. The Projectola Editing-Filming unit not only synchronizes

sound with picture but provides a sizeable projected image.

S.O.S. time-saver is compact but includes Projectola 16mm viewer with two-sprocket unitized timer/synchronizer; special-circuit 10W amplifier; to mix any two tracks — built-in magnetic heads to read the "bottom side" of the film (with teeth toward the operator); optical soundhead on sprocket farthest from the operator; separate unit and synchronizing base with internal wiring.

Optical pick-up is 26 frames from picture; magnetic pick-up is 28 frames from picture. Reproduction on both sound and picture is said by maker to be sharp and crisp, in motion or still. Price of unit: \$679; alternate model (with magnetic head built into each sprocket but without optical head) is \$629. Write for data.

C/S/C Motor Adapter Door for Mitchell's Mark II Reflex

☆ A new motor adapter door for the Mitchell Mark II 35mm Reflex camera has been introduced which will permit the use of all Mitchell and Mitchell-type variable-speed AC/DC motors.

The adapter door, manufactured by Camera Service Center, New York, can be installed in seconds without tools. Four knurled thumb screws mount the door to the camera. Standard Mitchell motors can then be mounted to the adapter door in the conventional manner.

The door weighs in at under two pounds. The dimensions are 7¾ inches by 5½ inches. Maximum depth is 2¼ inches. The CSC adapter door is made of aluminum with a black crinkle finish that matches the finish of the Mitchell Reflex. Wiring is complete and compatible with standard camera wiring.

The door will be sold through the CSC sales affiliate, Camera Sales Center Corp., for \$149.00.

* * *

Spectra "Lighting Director" Adds to Precise Measurement

The Photo Research Corp. is offering a new Spectra "Lighting Director" to measure a basic range of 0 to 300 footcandles, extended to 3,000 footcandles with an X10 multiplier slide and on to 30,000 footcandles with an X100 multiplier slide.

The "Lighting Director's" large selenium cell is micro-ammetered to a logarithmic response scale which is individually calibrated on an N.B.S. approved photo-bench, thus enabling control of balance.

Wilson Movie-Mover RP Unit shown in showroom of Ron Esserman Motors, Chicago Heights, Illinois.

MAKE YOUR AUDIO-VISUAL PROGRAM MORE EFFECTIVE

Thousands of business leaders have discovered the rear-projection concept effects substantial savings in time and money and makes their Audio-Visual program more effective. Sharp, clear images in full light permit audience note-taking . . . increase memory retention.

Employee training, sales presentations and other audio-visual programs are offered with no groping in the dark. Visuals may be shown wherever there's an electric outlet.

Another rear-screen projection benefit is that a minimum space is required . . . the cost of separate projection booth is eliminated. Because modern rear projection units are easily moved, practically any room becomes an audio-visual room. Cost of an excellent rear screen projection unit — equipped with Lenscreen by Polacoat — is less than the cost of darkening a single room! Lenscreen gives sharp, clear pictures in any lighted rooms.

For complete information mail this coupon today.

COMMUNICATOR TO MANKIND: (CONTINUED FROM PRECEDING PAGE 41)

precedented conflicts between labor and management which could be resolved only by communication based on understanding of emotional as well as material issues.

If his first A.T.&T. film was a departure from the ordinary, his second, *An Orchid for Peggy*, was a milestone in the industry, for it came right out and admitted that some jobs are just plain dull, as Peggy's surely was — she had charge slips.

"It would have been silly," says Henry, "to go to show that this kind of work was glamorous, or even interesting. You can't inject romance where it doesn't exist. When something promised and doesn't happen, the subject is disillusioned."

In this case, the message was simple: 'As long as you are here, you do the best you can, because that's the way you are.' It's unrealistic to tell the Peggies of the world that anything can be done or falls by their not being on the job. But you can tell them that it makes their work harder, appeal to their naturally sympathetic instincts. A.T.&T. took a progressive, sophisticated attitude when they allowed us to make this picture."

Putting Inside Viewers' Hearts, Minds

It was during this period that Strauss first described his work as "communications", possibly five years before "attitudes and motivations" were generally recognized as a key factor in labor-management relations, except for such men as Mayo and Roethlisberger.

His early films were radically different from those typical of the day. Industrial films for internal use had mostly dealt with training techniques — how to do something, how to demonstrate something, how to sell something, how to teach someone to handle a customer. So many of them had little to say except, "Fit the old ball!", "Sell! Sell! Sell!" or condescended themselves to what went on inside machines instead of inside people.

The function they performed could often have been accomplished with stills and captions. By contrast, Strauss used film in ways for which no other media could be substituted — actively changing attitudes, stimulating emotion, arousing emotion, establishing identification through role-playing characters who lived through the same circumstances faced by the audience.

The Inter-Action of Workers' Problems

The Inner Man Steps Out, produced in 1948 for General Electric, is a case in point. The film sought to make men aware of the interaction between their own problems and those of others on the job; and it purposely left audiences with a sense of uneasiness, thus preparing an atmosphere for discussions which might result in solutions.

The demand for this particular film has resulted in the sale of over 1,500 prints to business concerns, colleges, libraries and hospitals all over the world.

With his own firm, (established in 1950 and now occupying a five-story building at 31 West 47th Street in New York) Strauss was able to show measurable results in film-based pro-

grams of employee training and management development (Pan American), modernized retail merchandising (Johnson & Johnson), recruiting (Ethyl), public service (Armed Forces, American Medical Association); and felt equipped to move into still newer concepts of communication.

He had long believed, for example, that a whole range of audio-visual techniques could be integrated with the central film; that motivation and training, teaching and learning, attitude and counter-attitude were interrelated aspects of basic communications . . . which he defines as getting people first to understand, then to accept, finally to act.

The company diversified, devising and producing dozens of different media. Whole training courses evolved, using everything from conferences to "war games", bulletin board material, posters, booklets, pay-inserts, motion picture case material, cartoon books, displays, programmed learning, house organ features, film utilization guides.

Films to Surmount Semantic Barriers

Some form of motion picture was almost always the keystone, since nothing but film so quickly surmounts semantic barriers, assures uniformity in the presentation of a message and, through its identification factor, has the power to unfreeze set patterns of thought.

But surrounding the film, amplifying it, supporting it, extending its useful "lifetime", framing its ideas in a larger perspective . . . there were now packages of related media tailored to individual groups at whatever level an internal situation required.

The latitude of Henry Strauss' thinking has enabled him to develop communication tools for some situations where attitudes at first seemed in direct conflict. For Pan American he has made a remarkable film on the Soviet Union, one which is not only palatable to both Russians and Americans but which is meaningful and truthful. For the United States Employment Service he has produced films with a valid message for those who think its policies are too liberal and those who feel they are too strict.

Only film, he thinks can accomplish this . . . because only film can examine the many sides of a question in terms of emotional values as well as factual reality. But the film is often only a beginning; a variety of supplementary tools can be employed to fix a new attitude as a permanent working part of an individual's relationship to job, society or self.

By developing "semantic-free" concepts . . . and tools and techniques that "visualize" ideas for information in "living" terms rather than in the abstract . . . the Strauss organization has been able to motivate, train and educate people in over 90 countries on six continents.

Working with Pan American employees of the most widely different cultural and linguistic backgrounds, Strauss programs have helped to significantly reduce turnover, absenteeism, and customer complaints . . . significantly increase productivity in almost every main type of job function.

Much of what Strauss believes about the art of communication he has put into a film signature. (CONCLUDED ON THE FOLLOWING PAGES)

COMMUNICATOR TO MANKIND:

nificantly called *More Than Words*. It has been used for training by hundreds of organizations in business, education and government; and its message has proved universal enough to be translated into seven foreign languages. Such recognition is hardly unusual for a Strauss film.

A remarkable number of his productions, from a three-minute silent on telephone courtesy to a two-reel color exploration of the scientific spirit, have won honors and awards in major competition at home and overseas.

What Strauss *doesn't* do is interesting, too. He makes no "nuts and bolts" films on industrial processes, no television commercials, no pictures which are put out on bids. He believes, in the latter case, that *ideas*, which are his commodity, cannot be narrowed to a dollar-and-cents basis. Such films are politely referred to other producers "who can do the job as well if not better than we can."

The company has never had a salesman and Strauss has not personally solicited new business for many years. He has, in fact, turned down or resigned accounts whose philosophy was counter to his own. "We are not interested," says Strauss, "in pleasing the client, except through making their staffs perform better." And he will not in any circumstances use his skills for manipulating people toward something he does not believe in.

The Beauty of Places — and of Peoples

Some of the most spectacular Henry Strauss films have been the extraordinarily beautiful productions which are the pride of the company's extensive library. Sponsored by Pan American, these pictures were shot on location in New Zealand, Tahiti, Russia, U.S.A., Fiji-Samoa, Spain and Japan. Many were directed and photographed by Henry Strauss himself. But the true charm of the films lies in the subjective portrayal of the people of each country, their identifiable reactions to the human experience, rather than a staid concentration on experiences of American tourists.

The Strauss organization is a tight outfit of twelve skilled specialists, the newest of whom has been with the company for over ten years. He feels that the size of the firm gives him a mobility to do the work he can do best, quickly, efficiently, avoiding such extraneous activity as dwelling on assignments which might be brought in by a salesman.

He believes that turnover of personnel is emotionally costly and that bigness leads to a preoccupation with mechanics. Strauss' policy is to apply the full force of his staff to each and every client's needs, to fight for what is really wanted, to resist at all cost the pressures of expediency.

When he leaves his 53rd Street office, Strauss commutes in a Porsche sport car to his home on Long Island Sound in Darien, Connecticut. Here, framing a picturesque view of a sloping lawn and placid lagoon, is a 33-foot Dutch-built sloop which is probably the first boat in the water in spring and the last out in late fall.

Strauss is 48 years old, balding, bouncy, a former diving champion and has been married

The Strauss' building on West Fifty-Third

to the former Joan Strauss (no relation) for 22 years; they have two daughters, Jan, 20 and Terry, 16. When Henry isn't sailing his boat he plays the piano and organ, reads voraciously and reminisces nostalgically on the part of his much-traveled world which most appeals to him. Tahiti. He is convinced that the Polynesians' complete rejection of materialism is a lesson that can at least give some balance to Western civilization. And he often applies a Tahitian reality to his business philosophy.

Henry Strauss believes that the industrial film industry has developed tremendously in recent years. He feels there is an awareness of the need for deeper concepts; ideas, inspirations. Experimentation in film production is not always successful but indicates an increasing recognition of the industry's dynamics. Many producers are continually demonstrating their dissatisfaction with the status quo by exploring new areas, expressing new thoughts applying new knowledge.

Achieving Peace Through Understanding

What does Henry Strauss see in his own future? First, he will respond to each new challenge with a determination that rejects the idea of failure. And next, he looks to the future for more ways to apply what he has learned and proven. He believes devotedly that the

For Business

Only Compcor offers "a new dimension in quality" recognized and accepted by leaders in the movie making industry. Compcor's superiority is attributed to a new, major advance in film reel construction—resulting in truly professional reels that run truer, smoother, providing lifetime protection to valuable film. Compcor reels and cans are finished in a scratch-resistant, baked-on enamel, and are available in all 16 mm. sizes—400 ft. thru 2300 ft. For details and prices write to:

COMPCO corporation

1800 N. Spaulding Ave., Chicago 47, Ill.

DAMAGED FILM HOSPITAL

Why Junk DAMAGED FILM?

"The Film Doctors" (specialists in the science of film rejuvenation) can restore scratched, brittle, and worn film at a fraction of new print costs. DId, damaged 8, 16, 35mm film can be restored to original screening quality and its life can be prolonged indefinitely.

RAPIDWELD: restores damaged originals, negatives and prints.

RAPIDTREAT: completely protects and prolongs the life of new prints indefinitely.

RAPID FILM SHIPPERS: vault storage, international distribution and inspection facilities.

COMMUNICATOR TO MANKIND

techniques he has used for dozens of industrial clients can be equally effective on the troubled international scene. He envisions employing such skills in relations between countries, starting with the conviction that understanding is a greater force than armies, missiles, food or gold.

"The guts of our work," he says, "is the denial that man is strictly a material animal. I see communications as the great hope of convincing all peoples that potential enemies are people, too. It's easy to make war against a symbol. It's easy to bomb a city from 20,000 feet. But it's a lot harder to set off a bomb in somebody's kitchen."

The American Medical Political Action Committee Opens Campaign With Film

Armed with a compelling filmed presentation produced on its behalf by Parthenon Pictures, the American Medical Political Action Committee (AMPAC) is pulling the nation's doctors together for an active role in the 1964 elections.

While the full story of this program must await another issue, we were greatly impressed by a visit to the Chicago gathering of AMPAC held last month. The Parthenon presentation was notable for its fresh creative style; it also contained a Ford motion picture segment furnished by the public-spirited company and aimed at reducing voter apathy. The AMPAC presentation shows doctors the "do's" and "don'ts" of political activity and won tremendous applause from Chicago viewers.

"The World of Henry Ford" is Major Centennial Film of Ford Motor Company

Now we know. In our last issue, reviewing the Allan Nevins' interview-film, *A Historian's View of Henry Ford*, we credited production of this noted historian's commentary on the life and accomplishments of the great auto maker to MPO. The Ford Motor Company's major centennial film, *The World of Henry Ford*, was the subject produced by that company and written by MPO's Joseph March.

NEW A-V EQUIPMENT:

New "Superior" 3 High-Speed Negative Announced by Du Pont

A new "Superior" 3 panchromatic, high-speed, fine-grain negative film with an ASA speed rating of 250 daylight and 200 tungsten has been announced by Du Pont. Film was designed for general motion picture and television studio production to permit recording of fine-grain images under low set illumination levels or with smaller camera lens openings to increase the depth of field.

"Superior" 3 is available in 16mm daylight loading rolls of 100, 200 and 400 feet and in a 35mm 100-foot daylight loading roll. It is also available in bulk loads of 400 and 1200 feet in 16mm and in loads of 200, 400 and 1,000 feet of 35mm.

Carousel Console in action

Carousel Console, With Sound Has 16" Rear-Viewing Screen

An attractive new cabinet for rear-projection slide viewing has been introduced by the Lester A. Dine Company of Floral Park, N.Y. This "Carousel Console" cabinet contains a Kodak Carousel projector, a built-in rear projection screen measuring 16 inches square and a tape recorder which is synchronized with the changing mechanism of the projector.

The Console is finished in walnut, measures 36 inches high, 22 inches wide and 21 inches deep. With sound tape on a loop, and with the Carousel's 80-slide circular slide tray, the machine may be run continuously for marketing use in stores, or at conventions and exhibits.

Other suggested uses are in board rooms, hospitals, military installations. The projector may be operated automatically, or by remote control, and is easily removed from the console for standard front projection use.

THE CASE FOR SPONSORED FILMS:

Bill Foster, Western Electric Co., Springfield Gardens, New York

INSTANT PROGRAMS

(why Western Electric shows sponsored films)

"The most popular lunch hour of the week is on the day we show sponsored films. The program has been a success since we started regular showings almost four years ago. Our attendance ranges between 100 and 200 people and includes just about every job category in the plant . . . trainees, warehousemen, shop production people, office personnel, and management.

"Sports and travel films are the most popular and attract the largest audiences, although we don't limit our choices to these programs. Almost any film will attract an audience interested in its subject matter. We've shown films on free enterprise, health, manufacturing, and, for the ladies, films on home-making topics.

"Our management endorses the film program because it is popular. Our audiences like the films because they're entertaining and informative. As program chairman for our group, I like sponsored films for both of these reasons, and also because they're easy and convenient for me to schedule."

SPONSORED FILMS ARE AN EFFECTIVE PR TOOL because they're useful in programs like this one. The Western Electric Plant at Springfield Gardens is one of almost 1/4 million audiences who regularly use sponsored films distributed by Modern. Modern's user groups by major category:

Industry & Business	29,748	Churches & Church Groups	44,300
General Adult Groups	43,858	Education	70,313

Interested in setting up a regular film program for your own plant? Drop us a note on your letterhead or contact any one of our 32 film libraries.

He goes for the flesh tones

The color of skin is terribly important to this gentleman. He's a color-correction specialist in the General Film lab; skin is the key tone he uses to judge color adjustments that are needed from scene to scene in trial prints.

His corrections are then programmed into our automated printers. (We use both additive and

subtractive types.) These reproduce release prints in any quantity, rapidly and without variation.

In many instances, the precision and speed of our modern equipment will lower processing costs for producers. Send for our latest price list, or call for a specific quote on your next production, either color or b&w. Write to General

Film Laboratories, 1546 N. Argyle, Hollywood, California 90028. Phone (213) HO 2-6171.

CAN YOU WIN SUCCESS BY MENTAL ATTITUDE?

Every man who has attained any of his personal goals knows the answer. But no man ever knows too many of the ways to develop the right mental attitude.

The surest way to help men . . . by showing what negative mental attitudes are . . . and how to overcome them with a positive approach . . . is vividly demonstrated in the color sound filmstrip:

"The Power of Mental Attitude in Selling"

This helps men to check negative thinking and build the confidence that boosts sales. One of a series of six:

"SELLING IS MENTAL"

Time and energy saver for Sales Directors—in training and re-training.

MILITANT NEGRO LEADERSHIP is making the headlines, storming the barricades of economic and social injustice. But when the sound and fury have subsided and the marchers come home to reality, what then?

The wisdom disregarded is in the sobering facts of educational inequities. The threat of economic sanction, fortified by politics, is thrusting thousands of unskilled into business, government and other jobs vulnerable to these demands. Force will not take care of training; race relations deteriorate in such conditions. The health of the national economy is imperilled when it *must* remain strong.

This is, indeed, a *time of testing* for tools of communication. Yet we find *no* vocational guidance films, *no* training films, *no* human relations films useful within business or government which have a negro-oriented content. Even the most familiar anti-prejudice motion pictures of years past seem out-dated by modern conditions.

It would seem, also, to be a time of sponsor opportunity for the encouragement of filmed media on a private-enterprise level. "Big Brother" has done enough, has taken too long and made a big enough mess out of the multi-million dollar "defense education" program. Besides, we'd like to see if "private enterprise" is truly capable of positive action. The film producer's role in all this is obvious: do some original, creative thinking and show the way from the simplicity and utility of filmstrips and 8mm sound or silent films all the way through the more sophisticated media.

Camera Eye

THE EDITORIAL VIEWPOINT

The knock resounds on your door! Let it be answered by speeding the process of education, raising the skills — preparing the hearts and minds of these troubled people for their rightful place under God's sun.

"Best of Europe" Films; Portraits of Industry Leaders; Shell Theater Featured

You won't have to look hard to find important reading within this pre-autumn issue of **BUSINESS SCREEN**. Weigh the content and direction of the 92 "Best of Europe" industrial motion pictures listed on pages 29-32 beside the 15 U. S. entries to the 4th International Industrial Film Festival. The superb quality of many of these will remind American business that technical films can attain difficult objectives and that high-quality work is worthy of professional skills.

The leadership of large segments of the U. S. film industry is present in those word and picture portraits on pages 34-35. Here are four of the men who begin to make up a national policy group we should bring together for the discussion of common problems and growth potentials. And it is an artistic as well

as practical triumph to present the first pictures of the just-opened Shell Centre Theater in London. (Pages 36-37) The choice of Cecil Beaton for interior design is second only to the completeness of this room's physical equipment for projection and presentation.

The Centennial year of Henry Ford's motor company has been enlightened by the historic sequences which remind us of this man's contributions. Early premiere results are heart-warming as they prove the acceptance of pictures that really tell us something. *leave residual values worthy of viewers' time and of emulation.*

There are other pictures in these pages of equal value in their way and the reminder, in association news and convention reports, that a vast number of people are devoted to audio-visual tools and techniques for a very wide range of interests.

* * *

3M Company Donates \$1.5 Million in Audio-Visual Equipment to 500 Schools

One of the largest private contributions to American education has been announced. 500 schools across the country will receive \$1,500,000 in visual training tools under a program announced in August by Bert S. Cross, president of the Minnesota Mining and Manufacturing Company.

Public, private and parochial schools at all levels are eligible. Schools will be selected on the basis of written proposals describing present and future uses of visual tools in the class- (CONTINUED ON FOLLOWING PAGE EIGHT)

Don't buy it

try it.

The way to sell anything easier and better is through visual persuasion. Demonstration. Right on your prospect's desk.

How? With the Videotronic 8, the lightweight repeating 8mm sound projector that puts your sales story across the same way every time, at any time. Simple to use. One-knob control. Takes up to 15 minutes of motion-picture film. Has a self-contained screen and sound system.

You can try this proven sales-improvement system by simply leasing the Videotronic 8. No need to make a major capital investment to equip your

sales force. Most lease plans average out to less than 75¢ a day per man.

Any film you now have can be easily converted to use in the Videotronic 8. Or we can make a film for you. After all, MPO is the world's largest producer of sponsored films.

Call or write MPO Videotronics, Inc., Repeater Sales Div., 210 W. 65 St., N. Y. 23. (212) TN 7-8200.

THE EDITORIAL VIEWPOINT:

(CONTINUED FROM THE PRECEDING PAGE SIX)
 room. Each of the schools designated will receive \$3,000 worth of equipment, including 11 overhead projectors and supplies for making transparencies. Training will be given to teachers in the production of materials and operation of the donated equipment. □

Dr. Herbert Kalmus, "Mr. Technicolor," Will Be Remembered for Quality Standards

The man whose adamant belief in the practicality of color in motion pictures brought the first Technicolor feature film to the screen away back in 1917 is dead. Dr. Herbert T. Kalmus, who combined a learned background in science with a stubborn insistence on high quality, died on July 11 in his Bel Air, Los Angeles, home. He was 82. He had retired from business life in 1960.

But he will be remembered *whenever good color films are seen*, by direct projection or in the era of color television just ahead. Coincidentally, the company to which he gave his great name is moving swiftly into that field of video color film processing. As the quality of electronic reproduction continues to improve, color film prints will match their ability to transmit. □

Awards Collector? You Might Try Your Luck at N.Y. International Film Festival

Readers have solicited this department's views concerning the forthcoming "3rd International" Film Festival to be held in New York next month. They ask, "what about this, is it worth the entry fees?"

This is a horse-race, brother. You "pays your money and takes your chance." For collectors of engraved metal or fine paper, here's another opportunity to gamble on a possible winner. To be specific: we do *not* have the names of the "15 judges" listed in the publicity releases of the entrepreneur holding this party for profit.

Nothing wrong in that, either. Perhaps some of the many business prospects for a-v tools and techniques who couldn't even *buy* their way into the recent Chicago A-V Trade Show will take advantage of some "free" events at this one. But it *won't* solve the problem of getting our best product in front of top-management where buying decisions are made. Still, a party can be fun and this is also a *fun* party, with overtones of joy and sadness for winners and losers. □

Belgium to Sponsor a Labor, Industrial Film Triennial in Antwerp, November 20-27

Belgium's Ministry of Employment and Labour will sponsor the "Fourth International Labour and Industrial Film Triennial" to be held in Antwerp November 20 through 27.

Entries of specific technical training, research, labor and industrial relations films made since January, 1960 are being invited. For entry forms: airmail or cable the Secretariat, International Labor & Industrial Film Triennial, Frankrijklei 128A, Antwerp, Belgium. Cable address: Audiovisau. □

**TRI ART FOR COLOR
DU ART FOR BLACK AND WHITE**

OVER 40 YEARS IN THE BUSINESS! Tri Art or Du Art offers you fast, dependable service, the highest quality film processing, the most complete facilities. And a knowledge based on more than 40 years of experience.

IN NEW YORK: 245 WEST 55TH STREET, NEW YORK 19, N.Y., PLAZA 7-4580
IN CANADA: ASSOCIATED SCREEN INDUSTRIES, LTD., 2000 NORTHCLIFF AVENUE, MONTREAL, CANADA

NEW! ARRIFLEX® 35

*with built-in signal generator
and automatic start marker!*

NOW! Throw away your "Clap-Stick"

Eureka! Now, without the use of clap-sticks, achieve perfectly-sync'd sound movies — easily, efficiently, **economically!** This new Arriflex 35 motion picture camera, factory-equipped* with a built-in signal generator and automatic start marker, becomes an even more versatile tool for the professional. In all filming, particularly news, candid and documentaries, the art of location synchronous sound recording is streamlined. And on the editing bench, your line-up is fast, accurate and economical.

The Arri built-in generator develops the required 60 cycle signal for lip synchronization and assures an

output frequency that is always a positive reflection of camera speed. The electrical output is compatible with every quarter-inch tape sync system in use today. Starting the 16 volt transistorized governor-controlled motor energizes marker lights, which go out the instant the camera comes to speed. Several frames are flashed at the beginning of each take to indicate the start mark.

The compact Arriflex 35, uniquely light weight and maneuverable, combines with modern compact recorders ideally — a perfect match for today's film assignments.

*Available only as an original installation on new cameras.

INCOMPARABLE VERSATILITY! The Arriflex 35 is shown as a hand camera (left), with 400-foot magazine, matte box, and 16-volt variable-speed DC motor; and as a studio sound camera, fully blimped with 400-foot magazine (center); and with 1,000-foot blimp (right).

EXCLUSIVE WITH CFI

GOOF PROOF

There's no mistake about it. Our system makes mis-labelled or illegible 16 mm release print leader a thing of the past.

First, we include all identification data in the negative leader. It's then automatically printed on the head leader of all release prints. Next, we convert this clear film to reinforced opaque white leader thru our special, patented* process. Result: legibility, durability, infallibility. Makes old-fashioned, hand-labelled leaders obsolete. See for yourself!

Bruce Hill Directs Sales at Mitchell Camera Corporation

☆ The Mitchell Camera Corporation's new director of sales is R. Bruce Hill. His new post will include U. S. sales responsibilities for the film and TV production equipment made by Vinten and sold by Mitchell-Vinten, Inc. and for the marketing program of Vinten Mitchell Ltd., representing Mitch-

Mitchell's Bruce Hill

ell equipment in the United Kingdom and in Europe.

Experienced in both technical and marketing phases of electro-optical-mechanical systems, Mr. Hill was active in photogrammetrical engineering and research on the development of photographic instrumentation at Fairchild Corporation. Later he held marketing and management responsibilities for advanced electronics as an associate of Chicago Aerial Industries.

Prior to joining Mitchell, he was vice-president of Hayward Scientific Glass Corporation in California, directing the negotiations which led to Hayward's acquisition by Hycon Manufacturing Company.

Screen Directors' Bob Edmonds is Executive Secretary of Guild

☆ Robert Edmonds has been named Executive Secretary of the Screen Directors International Guild. He succeeds George L. George, who recently announced his resignation from the post.

The new Executive Secretary has worked for more than 20 years in the film industry as director, producer, writer, cinematographer and editor. He has been Business Representative of the Guild for three years after completing a successful two-year task of organizing the Midwest area directors for the Guild. Mr. Edmonds took up his new duties on August 12th in New York City.

ASSIGNMENT

Obtain selected technical audiences for new
Western Electric Company science films

Tyranny of Large Numbers

— 15 min. 16mm color sound film

Quartz Crystal Growing

— 16 min. 16mm color sound film

Sponsored by: Western Electric Company
Manufacturing Unit of the Bell System

Produced by: Pelican Films, Inc.
Western Electric Company

Objective: Reports on bold new solutions to complex
problems in modern manufacturing engineering
arrived at by scientific research.

"Tyranny of Large Numbers":
Describes an automated production process
controlled by a digital computer.

"Quartz Crystal Growing":
Describes a revolutionary manufacturing process
which produces synthetic quartz crystals
by hydrothermal action.

Selected Audiences: Exclusive distribution to professional engineering
societies and industry engineering staffs; science
research and statistical associations; corresponding
technical audiences at the university level.

Audience Development
and Distribution:

In a scene from the motion picture "Tyranny of Large Numbers" two Western Electric engineering associates inspect a bell jar which is used in a revolutionary manufacturing process to sputter a layer of gold on the ends of carbon deposited resistors

With this 23-day process, crystals for filters and oscillators can be produced at a lower cost and of higher quality than natural quartz

KALART VICTOR

SERIES SEVENTY 16mm SOUND PROJECTORS

focus on film safety

Kalart/Victor 16mm projectors have a reputation for film safety. For 35 years, Victor Projectors have had three Safety Film Trips (one for each film loop) as exclusive components of the film transport mechanism. These Safety Film Trips spot film trouble before it happens and stop the projector instantly and automatically. Saves thousands of dollars in film damage annually. Kalart/Victor's large diameter Single Drive Sprocket moves film in and out of the projector smoothly and at one constant speed . . . no chance for film "pile up." These features give even beginning projectionists full confidence, allow them to concentrate on putting on a good show, with no interruptions. And a good show it will be with a clearer, brighter picture and brilliant sound . . . a combination that increases learning power. For full details see your Kalart/Victor dealer or write:

WASHINGTON FILM COMMENTARY

**Interior Secretary Stewart Udall Calls Festival Winners
 "Incentive for Production of More High-Quality Pictures"**

THE USEFUL ROLE of the film medium was summed up recently by Secretary of the Interior Stewart L. Udall in these words:

"The use of motion pictures to educate our people in the wonders of nature and science is part of the Department's program of conservation education. The more we know about our resources, the ways of nature, and the manner in which they affect our environment, the better we are equipped to utilize them wisely."

The Secretary's remarks were made during the formal presentation of four international awards of excellence to Department films, given on June 21 by Elio Pascarelli, press attache for the Italian Embassy. The award-winners included *Copper*, the *Oldest Modern Metal*, produced by Jamieson Film Company for the Bureau of Mines under sponsorship of Phelps Dodge Corporation, and *Eruption of Kilauea*, 1959, produced by the Geological Survey. Secretary Udall concluded:

"Prize winning films of this caliber will provide incentive for the production of more high-quality motion pictures throughout the broad range of natural resource interest." The Bureau of Mines film received the Diploma of Honor at Venice and first prize at the International Exhibition of Scientific Didactic Films, University of Padua, Italy.

Four U. S. Educational Films Honored at '63 Venice Festival

Speaking of festival winners, a U.S. film, *Team, Team, Team* has been awarded a first place in the Sports category at the recent 14th International Exhibition of Documentary Films in Venice. *Polaris Submarine; Journal of an Undersea Voyage* won top honors in the television category. *Music, the Expressive Language* was given first place in "education for the very young" category while second place in the adolescent film category went to *Human Growth*, 2nd Edition.

Credit New City Films for the sport winner; Louis J. Hazam produced the *Polaris* film for NBC News. Sutherland Educational Films, Los Angeles, created the

Music picture; and Wexler Film Productions, also of Los Angeles, filmed *Human Growth* for the E. C. Brown Trust, Portland, Ore.

Washington Film Council Hear Program by George Stevens, Jr.

Members of the Washington Film Council heard George Stevens, Jr., Director of the International Motion Picture Service, USA on Monday evening, August 12, in the West Auditorium of the Department of State. Three new USA short films were presented by Mr. Stevens. They were:

Letter from Colombia, which won the Lion of St. Mark award at Venice; *School at Rincon Santo*, which received a special award at the same festival; and *United Progress*, the USA film describing President Kennedy's trip to Costa Rica in March, 1963. The latter film was directed by Charles Guengerich and has been selected for the current Edinburgh Film Festival.

supervisors, managers and company executives dealing with subordinates.

Two of the new subjects were written by William Simon: one by Stanley Schneider. The fourth film, starring Wally Cox, was scripted by Harry Muheim. Production of all four was by Norwood Studios, Inc.

Names That Made News in and Around the Washington Scene:

The Public Health Service Audiovisual Facility, a branch of the Communicable Disease Center, names James D. Clark as assistant to the director with responsibility in the field of program development.

Lewis S. Baer has been appointed producer on government projects by Norwood Studios. Both Lowry Coe and Cliff Peacock have been on overseas script assignments this summer. You'll see Lt. Col. Mildred C. Bailly, commanding officer of the Ft. Meyer Wac Detachment in the Army's new film, *With Pride and Dignity*, filmed on the anniversary date of the Women's Army Corps. It will be shown as a recruiting film, coast-to-coast.

World Population Problems Are Subject of Five Long Pictures

United States Productions, New York industrial and documentary film producer, is currently engaged in filming five hour-long motion pictures on *Population Growth* for NET (National Educational Television). Executive Producer Alfred Butterfield is supervising crews now filming in Western Europe, Egypt, Latin America, Japan, India and the United States.

The concept of the series is to cast light on the population problems of the world as a whole — to show that these problems are complex in different societies and in different parts of the world. Rather than do the series as a panel-of-experts show — or as a quick, episodic, journalistic presentation, the USP films are planned as a more eloquent and imaginative approach to the problem using the full scope of the motion picture.

"The Fitness Challenge" Joins Crusade of President's Council

The American Osteopathic Association has joined the crusade for physical fitness with a new 28-minute color, sound film titled *The Fitness Challenge*.

A sensible approach to physical fitness for adults is the theme of this Douglas Production. Encouraging participation by the entire family, the film emphasizes that adult fitness isn't a matter of muscle building but a gradual buildup of heart and lung capacity through exercise, diet and physical recreation such as walking, bike riding and swimming.

Made in support of and with the President's Council on Physical Fitness, the film features opening comments by President Kennedy and a closing statement by "Bud" Wilkinson, head football coach at the University of Oklahoma. Wilkinson is special consultant to the President's Council.

Some 300 prints are now in circulation. *The Fitness Challenge* is available on free loan. Requests should be directed to the American Osteopathic Association, Department of Public Relations, 212 E. Ohio Street, Chicago 11, Illinois.

Canada's First Nuclear Power Plant in a Non-Technical Film

The first nuclear power station in Canada is depicted in a new 25-minute color film, *NPD — Nuclear Power Demonstration*, produced by Crawley Films Ltd. under the joint sponsorship of Atomic Energy of Canada, Ontario Hydro and the Canadian General Electric Company.

The film explains, in layman's language and by the use of simple animation, the principles of operation of the Nuclear Power Demonstration station which was built near Rolphoton, Ontario. The NPD station first produced electricity in June, 1962 and is a prototype for larger Canadian nuclear power plants to come.

Produced for a non-technical audience, the film is being distributed world-wide by the National Film Board of Canada.

"The Long Haul" Tells Disability Protection Under Social Security

The Social Security Administration has a new 14½-minute color film, *The Long Haul* which dramatically portrays disability protection under social security. It was premiered on August 14th before a large and interested audience in Washington.

KALART VICTOR MOVIEMATIC AND DUOLITE MODELS

where will your next prospect be

... out in the barn ... in the office ... the factory ... or on a convention floor? Wherever he is you can picture the solution in the best selling atmosphere, next to his problems, with the versatile single-case Moviematic repeater 16mm projector. With Moviematic you're not selling in the dark: you can watch your prospect's expression as your sales points are made on film ... see what piques his interest ... then close the sale on the spot. How? The Moviematic projects on its own built-in screen under daylight conditions. OR, for large-group showings, the Moviematic projects on a remote screen. How about operation? Just plug it in! Film is already in the projector ready to show. That's because the last time you showed it, the film was rewinding itself getting ready for this time. No rethreading or rewinding. Moviematic is versatile, too, because it can show any of your present 16mm optical sound films. No expensive new productions or alterations required. And, it will show anyone else's 16mm films as well. You can purchase, lease or lease-to-buy ... long term or short. Ask your Kalart, Victor dealer or write:

New A F Distribution Centers for Eastern, Far West States

☆ Association Films, Inc., has opened a film distribution center in Oakmont, Pa., a suburb of Pittsburgh. The custom-built center, the fifth in the company's distribution network, will serve schools, clubs, churches, industries, television stations and other organizations in Western Pennsylvania and New York, Ohio, West Virginia, North Carolina and Kentucky. Joseph Liebich has been named manager. He has had over ten years of experience in film distribution and exchange operations.

In a further expansion, the company has transferred its San Francisco film center to a new, larger facility in suburban Hayward, across the bay and just south of Oakland. The exchange, built to Association Films' specifications, will serve a 12-state area, including Alaska and Hawaii.

The expansion has been necessitated by the marked increase in film usage on the West Coast, brought about by the extraordinary population boom, school construction and other factors. Winston Siler, manager of the San Francisco center for 16 years, will continue in this capacity. □

Pratt Prepares Problem Clinic for IAVA Rochester Meeting

☆ AT&T executive Bill Pratt will chair a problem-solving clinic on October 2nd when members of the Industrial Audio-Visual Association, professional society of business a-v communications men, holds its annual fall meeting in Rochester, New York from September 30 to October 3rd. The meeting is a closed session, for members only.

Technical questions organized by Mr. Pratt will be answered by a panel of selected specialists from the Eastman Kodak Company. □

* * *

Directors Guild, SDIG Hold Exploratory Talks on Merger

☆ Working toward solution of a long unresolved schism in the ranks of professional film directors, the Directors Guild of America, Inc., acting through its Eastern Council, has offered merger terms to the Screen Directors International Guild.

Each organization has appointed a committee to discuss the matter, headed by Ted Corday of the DGA and Jack Glenn, spokesman for the SDIG. The committee held its first meeting on July 31 and agreed to continue the talks. □

Perfect Photo, Inc. Acquires Color Service Company, N.Y.

☆ The acquisition of Color Service Company, Inc. and its affiliate, Royal Laboratories, Inc., of New York City has been announced by Perfect Photo Inc., one of the nation's largest photo finishing companies. Entry of the coast-to-coast "personal" film processing firm into the field of processing and printing professional color motion pictures was announced by Martin S. Ackerman, president and board chairman of Perfect Photo and Robert Crane, president and sole stockholder of Color Service.

The acquisition was for an undisclosed amount of cash. Perfect Photo sales last year exceeded \$23 million. Color Service, established in 1948, has an annual volume of \$3 million. It concentrates activities from New York westward to Chicago and is also active in California, doing only professional film processing in 8mm, 16mm and 35mm.

One of the founders of Color Service, Crane will continue to head this wholly-owned Perfect Photo subsidiary. In a joint statement, the two company heads noted, "we believe this step will be valuable for customers of both companies — especially in view of the increasing use of color films, particularly for television. The skills and distribution set-ups, as well as the managements of both concerns, are complementary."

"This Is Coffee" to Theaters Via United World Facilities

☆ *This Is Coffee*, a 16mm film produced some years ago (by Vision Associates) for the Coffee Brewing Institute, has recently been reprocessed into 35mm prints for a theatrical distribution campaign now under way through the facilities of United World Films. The film is designed to induce the the American housewife, using the conventional home coffee makers, to brew a fine, full-bodied beverage coffee by following Institute recommendations.

In the past two months, the film has had 917 theatrical showings with an attendance of 235,000 in sections of New Jersey, Pennsylvania, Delaware and New York. By the end of the fourth month it is estimated that attendance will mount to an average of 200,000 per month with coast-to-coast distribution.

The Coffee Brewing Institute, a non-profit membership corpora-

right off the newsreel

tion formed by the Pan-American Coffee Bureau and the National Coffee Association, considers the new theatrical campaign as a highly-useful and successful public relations venture.

DeFrenes-Calvin Corporation Succeeds Philadelphia Pioneer

☆ The widely-known DeFrenes Company, founded in Philadelphia by pioneer film maker Joseph DeFrenes in 1916, has affiliated with Calvin Productions of Kansas City. The new company, Calvin-DeFrenes Corporation, will extend Calvin services into the Eastern half of the U. S.

Following Mr. DeFrenes' recent retirement from active business life, former Calvin vice-president Lee Davis has been named president of the new corporation, continuing its activities at 1909 Buttonwood Street in Philadelphia.

Calvin-DeFrenes will engage in all phases of film production and services for business, education and television use. The firm will also serve as sales agent for Calvin release printing.

Du-Art Buys Television Station WOLE in Puerto Rico

☆ Du-Art Film Laboratories, Inc., has applied to the Federal Communications Commission for approval of its purchase of television station WOLE, Channel 12, in Aguadilla, Puerto Rico.

WOLE, according to Irwin Young, Du-Art President, is part of a three station network. It covers the western portion of the island, of which the principal city is Mayaguez.

Film Dividend in International Goodwill: when President Kennedy visited Ireland recently, marquee and entrance of this Dublin theater were covered with placards for timely U. S. documentary films and current newsreels.

Sales V.P. Leon Kreger

Wilding Appoints Leon Kreger Vice-President, Eastern Sales

☆ Leon A. Kreger has been appointed vice-president in charge of sales for the Eastern regional offices of Wilding, Inc., 405 Park Avenue, New York City.

In making the announcement, H. Williams Hamner, Wilding president, noted that Kreger's move to New York is part of an overall expansion program which included the opening of Wilding International office in Rome, Italy this month.

A former vice-president in charge of creative services, Mr. Kreger is credited with the development of important new techniques for management and sales training programs used by many leading business firms. He is a native of Buffalo, N. Y. where he attended the University of Buffalo before going on to Northwestern University. He began his business career as a reporter for the Scripps-Howard BUFFALO TIMES, joining Wilding in 1947 as a writer-producer.

Kreiman Heads Technicolor's Business & Education Branch

☆ A Commercial and Educational Branch of the Technicolor Corporation has been announced by Edward E. Ettinger, executive vice-president. Formed to consolidate Technicolor's activities in the expanding industrial and educational markets, the branch will take over marketing and manufacture of the existing line of Technicolor products and the new-product engineering program.

Robert T. Kreiman, former vice-president for Audio-Visual Systems at Argus Cameras, Inc. who joined Technicolor in 1961, has been named General Manager of this branch. Its formation, he notes, will provide a base for better customer service and for closer coordination between the film and equipment ends of Technicolor's commercial and educational business.

George Named Administrator of Screen Directors' Funds

☆ George L. George, Executive Secretary of the Screen Directors International Guild, has resigned to become Administrator of the SDIG Trust Fund.

Mr. George had been executive secretary of the SDIG since its formation in September, 1957, and was an organizer of the Screen Directors Guild, a predecessor of the SDIG in 1946.

In a statement to Guild members Mr. George noted, "Today the Guild is in a strong position; it has a new three-year contract covering its jurisdiction, a respected place in the industry, an expanding and active membership, and experienced leaders. This having been accomplished, I feel that I had fulfilled what I had set as my contribution to the welfare of my fellow directors and that it is time for someone else to carry on in my place with a fresh perspective.

"Our Trust Fund has been in existence for over two years, but not fully operational. Now that our new contract has clarified certain disputed points, the task of setting up the activities of the Fund must be started as expeditiously as possible, in order to implement in an efficient manner the purposes of the Pension Plan. Pensions are the deserved reward of those who have worked long and with devotion in our industry. I feel that it is imperative that the responsible job of administering the Trust Fund be no longer delayed." Mr. George concluded.

NEW YORK World's Fair Report

by Robert Seymour, Jr.

THE theme of the 1964-1965 World's Fair in New York will stress *Peace Through Understanding*. And because understanding depends on man's ability to communicate, the Bell System exhibit at the Fair will be especially significant.

The Bell pavilion, which will be constructed of Fiberglas in a steel framework, has been gradually taking shape on Flushing Meadows under the direction of architects Harrison & Abramovitz. Plans for the interior and the "goings-on", which were made by policy and steering committees of American Telephone & Telegraph Company, Bell Laboratories, Western Electric and the New York Telephone Company, are being carried out by a production team under A.T.&T.'s Henry Habley, Manager — World's Fair Exhibits.

Jo Mielziner, the well-known stage designer, has been engaged as producer of the feature presentation in the exhibit, which will be an 11-minute "ride." Relaxing in contour chairs provided with individual stereo speaker systems, visitors will be transported at 70 feet a minute past a series of stages and filmed scenes which in preview have been called "memorable, inspirational, and a new experience in theatre."

These scenes, produced on film by Owen Murphy Productions, will feature Pierre Olaf, celebrated pantomimist from the musical hit, *Carnival*. They will develop the theme of man's need and desire to communicate, and will trace the peaks of his achievements from the primitive drum signalling of his early existence to the creation of complex networks and systems of world-wide and space communications.

Although much of the technical details of the film production must remain under wraps until Fair-time, the motion picture is being made with special-process photography; no frame lines will show, and both front and rear projection elements of the film will be intricately combined with three-dimensional exhibits all in one scene.

* * *

Moody Science Films to Be Featured in the "Sermons from Science" Pavilion

☆ There will be interesting, startling "sermons" delivered in the Sermons from Science Pavilion for which ground was broken last month. The discourses will be unlike any sermons preached from pulpits. The exhibit is a project of a committee of Christian laymen, sponsored by the Christian Life Convention of New York City.

Science films in color as well as live demonstration will be offered in the pavilion's theatre. Multilingual films on such subjects as creation, the atom, space, underseas life and other scientific subjects, produced by the Moody Institute of Science, will seek to show that science and religion are in complete harmony. Earphones and a panel at each of the 500 seats will allow foreign visitors to dial any one of six languages.

The pavilion will consist of a circular theatre

The Eastman Kodak Company's pavilion, nearing completion at the N. Y. Fair, will have two theaters within its 60,000-foot exhibit area.

connected to a smaller circular wing, surrounded by a reflecting pool and fountains of water and flame.

* * *

U. S. Productions Shooting a One-Hour Color Film "Tour of Historic Jordan"

☆ Alfred Butterfield, Executive Producer of United States Productions, is now in Jordan preparing for a one-hour film production which will be presented in the Jordanian pavilion at the Fair. The film, which will be photographed by Tom Hollyman, has a working title of *A Tour of Historic Jordan and the Holy Land with His Majesty, King Hussein*. Its purpose is to increase the awareness and interest of tourists in the historic and scenic attractions of Jordan.

After exhibition in the Kingdom of Jordan pavilion, it is expected that the film will gain (CONTINUED ON THE FOLLOWING PAGE 63)

Cineramic New York

New Motion Picture System
to Show State at the Fair

THE NEW YORK STATE exhibit at the World's Fair will have incorporated into it a unique motion picture system which will give Fair visitors an unusual and exciting panoramic view of the state. Coleman Productions, Inc., of New York City, will be the producers of the picture and will also function as the operators of the exhibit.

Harry Coleman, president of that firm, engaged the Cinerama Camera Corporation to design a unique motion picture camera which could photograph "in the round" — that is to say, with a panoramic 360 degree picture. Cinerama Camera undertook the task in the early part of April of this year, and has already delivered the camera system, which is now being used for the production of the film.

"Spacearium" at Seattle Fair

Cinerama's Special Projects Department has produced such unique exhibits as the Spacearium, the hemispherical projection system which took viewers on a motion picture trip to outer space. The film was located in the United States Science Pavilion of the Seattle World's Fair. It had been developed by a Cinerama Camera team under the direction of William D. Liitschwager, who is now Director of Marketing for the company.

Coleman recognized that such talent was needed for the development of the New York State Exhibit and contracted to have his cameras built by them. Coleman, in conjunction with Gerhard Lessman, Cinerama Camera's Director of Engineering, and with Mr. Liitschwager, worked out the detailed specifications of the system.

360-degree View of State

The motion picture system envisioned for the exhibit was to be a panoramic picture of New York State projected onto a cylinder 80 feet in diameter and 20 feet high, in a 360-degree panorama. To accomplish this it was necessary to first design and develop a multiple camera system which could photograph in this configuration. It was decided that six Mitchell Mark II cameras would be mounted in tandem on a pedestal. This would provide six 35mm single frame exposures to cover the 360-degree panoramic view called for.

FILM — —

A MULTIPLE-USE TOOL

Few businessmen realize the variety of problems which film can help them solve, and the objectives which film can help achieve . . . and at an honest dollar profit. Test your own awareness by checking the uses below:

PUBLIC RELATIONS

CORPORATE IMAGE

"Fire and the Wheel" (Mobil Oil)
"Tools of Telephony" (Western Elec.)
"In Touch With the Future" (GenTel)

INSTITUTIONAL

"Hail the Heart" (Borden Company)

PUBLIC SERVICE

"Holiday for Bands" (American Oil)
"Collectors' Item" (Int'l. Harvester)
"Man With a Thousand Hands" (LH)
"Television in Education" (AT&T)
"Fair Chance" (Planned Parenthood)

SALES PROMOTION

"SOFT" PROMOTION

"Case of the Bewildered Bride"
(Carnation Co.)
"Happy Holidays Along the Potomac"
(American Oil)

DIRECT SELL

"Communication Services for ETI"
(American Tel. & Tel.)

PRODUCT DEMONSTRATION

"Modern Basic Refractories" (Kaiser)

SALESMAN TRAINING

"The File On Henry Royall" (Bank Am.)
"The Hardest Case" (Ford Mktg. Inst.)

CUSTOMER GOODWILL

"Headline for Harper" (Int'l. Harv.)

FACILITIES & CAPABILITIES

"Weston Hydraulics" (Boig W Sub)

EMPLOYEE RELATIONS

EMPLOYEE MORALE

"The Independent" (USITA)
"May I Help You?" (AT&T)
"In Touch With the Future" (GenTel)

NEW-EMPLOYEE ORIENTATION

"Elsie & Co." (Borden Co.)
"A Hotel Is Born" (Hilton Hotels)

EXPLANATION OF CHANGES

"This Is Standard Oil" (Indiana)

EMPLOYEE RECRUITING

"Three For Tomorrow" (API)

AND: TRAINING

DEALER GUIDANCE

"Your B-Line" — Stu Erwin (LH)

IN-SERVICE "SKILL" TRAINING

"An Answer For Linda" (AT&T)
"First Impressions" (Bank Am. slidetfilm)

EMPLOYEE INFORMATION

"Outside That Envelope"
(Conn. Gen. Life Insurance)

SUPERVISOR TRAINING

"Locked On" (Gen. Dyn. Astronautics)

POLITICAL ACTION

IF YOU CAN'T GET IT THROUGH THE DOOR

try putting some of your big sales problems into this compact film cartridge.

This "Magi-cartridge"™ snaps right into the Technicolor Instant Movie Projector. It will show your biggest sample or most complex sales story. No bigger than your telephone, but easier to operate. Just plug it in—no set up required. With the Technicolor Magi-cartridge there's no threading or rewinding of film, it's always ready for the next show—instantly. Models priced from \$69.50.

THIS AD IS THE SECOND BEST WAY TO SHOW YOU THE TECHNICOLOR INSTANT MOVIE PROJECTOR.

• OF COURSE THE BEST WAY IS WITH AN INSTANT DEMONSTRATION. JUST SEND THIS COUPON TO:

Technicolor CORPORATION

Dept. AV 3 • 123 S. Hollywood Way • Burbank, Calif.
I would like details on all models of the Technicolor Instant Movie Projector.

TECHNICOLOR WILL MAKE YOUR 8 MM PRINTS, TOO!

Show your product at its best in "color by Technicolor."

Technicolor prints now available in 8, 16, 35 and 70 MM.

HOW TO GIVE THE HUMAN TOUCH TO STARK RULES

The skill of the Supervisor—in interpreting and applying your policies and goals—determines in great degree their favorable acceptance and faithful performance by your employees. Here's a helpful sound film-strip:

"Interpreting Company Policies"

that accentuates the Supervisor's responsibilities and shows the methods that have proved most successful, in explaining and winning acceptance of rules and policies, for other important organizations.

This is one of eight sound filmstrips in the series:

"SUPERVISOR TRAINING ON HUMAN RELATIONS"

which dramatically shows how to clothe the "bare bones" of company rules and regulations with a friendly, human touch.

Trends in the BUSINESS of Audio-Visuals

Florman & Babb (Canada) Ltd. Opens New Facility in Montreal

Arthur Florman, president of Florman & Babb, Inc., has announced the opening of the firm's new Canadian subsidiary, Florman & Babb (Canada) Ltd. The principal showroom, maintenance facility and offices are located in Montreal at 1263 Dorchester St., West.

The new Canadian corporation is under the management of Kenneth Jones, well-known in the Canadian film and television industries from his eight years as manager of the Montreal branch of Alex L. Clark, Ltd. and service as secretary-treasurer of the Canadian chapter of SMPTE.

Florman & Babb (Canada) Ltd. will provide the Canadian industry, Mr. Florman disclosed, with services, equipment and rental facilities which utilize the full resources of the U. S. corporation. Additional showrooms in other cities are anticipated and many of the F&B products will be made available to dealers throughout the provinces.

Bell & Howell and Technicolor Increase First-Half Earnings

Two companies active in the audio-visual field reported higher earnings and sales for the first half of 1963.

The Bell & Howell Company, noting that first-half sales were up 14 percent over last year, reported a 10 percent increase in net earnings for the second quarter. These amounted to \$1,031,000.

Earnings of Technicolor, Inc. for the first six months of 1963 were nearly double those of the like period in 1962. Chairman Patrick Frawley noted that the Motion Picture Division continued to make important contributions to the gains. Frawley further stated that the newly-formed Commercial and Educational Branch in

the company's Consumer Products Division should help, noting that the company expects to show a profit in this division in 1964.

TelePrompter Agrees to Sale of A-V Manufacture Division

The TelePrompter Corporation has agreed to sell three of its operating divisions, including the manufacture of audio-visual products, to Defiance Industries, Inc. The businesses to be sold include the manufacture of Conley endless loop magnetic tape cartridges, Weather high-fidelity components and the basic TelePrompter brand products, sold as individual units and as part of sophisticated large-screen display systems for use in broadcasting, industry, government and education.

Manufacturing activities are at Cherry Hill, New Jersey and sales offices are in New York City. H. J. Schafly, Jr. is resigning as vice-president, engineering at TelePrompter to become executive head of the Cherry Hill operation under the new owners.

Cousino Electronics Merges With Herbert Orr Enterprises

The merger of Cousino Electronics of Toledo, Ohio with J. Herbert Orr Enterprises of Opelika, Alabama, combines the talents and facilities of two well-known innovators in the field of magnetic tape. Inventor and pioneer Bernard Cousino, a developer of continuous-play tape cartridges, holds five U. S. patents which are basic in the manufacture and operation of most endless loop cartridge type tape recorders.

John Herbert Orr is a specialist in the development of precision magnetic tape material who formed ORRadio Industries, Inc. His company grew to an industrial complex that was eventually sold to Ampex Corporation in 1958.

another distribution plus from United...

RESULTS...

NOT JUST PROMISES!

In case history after case history United can show you remarkable achievements in sponsored film distribution that more than fulfilled the requirements and/or expectations of the client. More than a quarter of a century in this field has given our personnel the experience needed to assess the full potential of a film...and then achieve the maximum exposure for it.

For instance, within six months after the National Aeronautics and Space Administration commissioned us to distribute its prize-winning film, "Friendship Seven," we had reached a total of 9,756 showings in 16mm to a verified audience of 912,706 persons. On the basis of only 300 prints of this hour-long color production, we produced a remarkable 3.6 bookings per print per month! With the same film on television United produced 235 telecasts during the same period.

Theatrical distribution is another area where United is uniquely equipped to supply the largest circulation possible. Within a year after the National Livestock and Meat Board released "The Adventures of Dudley Worthington," United produced 22,855 showings in 35mm of this film, before more than 6,500,000 persons at first-rate four-wall and drive-in theatres across the land...including an 8-week stand at the Forum Theatre on Broadway in New York!

Where the sponsor requires continuity as well as large circulation (rather than quick saturation), United, again, is uniquely equipped to achieve it through its varied activities in the distribution field. Take the case of "Born in Freedom," a production sponsored by the American Petroleum Institute. In 36 months more than 16,000 showings were produced, and we project more than 25,000 bookings in the next 60 months...with audiences running into the millions!

This is the kind of effort you can expect from United's custom distribution. Do you get this kind of service now?

**WHATEVER YOUR DISTRIBUTION NEEDS,
UNITED'S CUSTOM SERVICE SUPPLIES IT!**

- Better 35mm Theatrical Distribution
- More Extensive Television Coverage
- Wider Non-Theatrical Distribution
- Finer Facilities for Sponsor-Generated Bookings

You owe it to yourself and your organization to find out more about United's unique services. Call or write today for a copy of our brochure, "How United's Custom Film Distribution Can Improve Your Public Relations Program." No obligation, of course!
